Preface

This is a dictionary of basic Japanese grammar designed primarily for first and second year Japanese students and for teachers of Japanese. After having examined major textbooks being used in Japan and the United States we have chosen what we believe to be basic grammatical items. Our descriptions and explanations have incorporated the recent findings in Japanese linguistics which we felt were of practical significance.

We have spent three years and a half preparing this dictionary. Each of us initially prepared half of the original draft: approximately 200 entries. Upon completion of the first draft of the dictionary (i.e., Entries, Appendixes, Characteristics of Japanese Grammar, and Grammatical Terms), we closely examined, discussed and improved our individual drafts. Therefore, every part of this dictionary has virtually been written by both of us.

Naturally we owe a great deal to our predecessors whose works are listed in the references. Our heart-felt thanks go to them, although we could not acknowledge them individually in each entry where we used their insightful explanations. We would also like to acknowledge many profitable discussions with our colleagues at the University of Illinois, Urbana-Champaign and at the Summer Japanese School of Middlebury College, Middlebury, Vermont. For fear of omission, we would rather not attempt a comprehensive listing of names. Even so we would like to mention four individuals whose technical assistance has made it possible to publish this dictionary: First, Mr. Burr Nelson of the University of Illinois and Mrs. Sharon Tsutsui, who have edited our English and provided us with valuable comments and suggestions from the user’s viewpoint; also, Mr. Mamoru Yoshizawa, who has patiently and conscientiously assisted with the proofreading; and, last but not least Mr. Masayuki Ishida of The Japan Times, who has done such conscientious editing: he has been a perfect midwife for the birth of our progeny and our special thanks go to him.

To the Reader

This dictionary consists of the following parts:
A. Grammatical Terms contains brief explanations or informal definitions of the grammatical terms frequently used in this book. If the reader finds that he is not familiar with these terms, we suggest he read this section carefully.
B. Characteristics of Japanese Grammar introduces the reader to the major characteristics of Japanese grammar and the important concepts involved. The reader should read through this section before he starts to consult the dictionary. Some entries from the Main Entries section refer the reader to topics in this section which provide broader perspectives on those entries.
C. Main Entries constitutes the core of this book. Each entry is organized as follows:

1. [entry name]  2. [part of speech]
   3. [meaning / function]
   4. [English counterpart(s)]
      [antonym]
   5. [related expression(s)]

6. ♦Key Sentence(s)

7. Formation

8. Examples

9. Note(s)

10. [Related Expression(s)]

1. [entry name]: Each entry is given in romanized spelling followed by its hiragana version. Entries are alphabetically ordered based on their romanized spellings.
2. [part of speech]: Each entry is followed by its part of speech.
3. [meaning / function]: The general meaning or function of the entry is given in the box below the entry name.
4. [English counterpart(s)]: English expressions equivalent to the entry are given to the right of the box. When the entry has an antonym, it is provided, as in (ANT. xxx).
[related expression(s)]: Items which are related semantically to the entry are listed as [REL. aaa; bbb; ccc (ddd)]. Expressions in non-bold type like aaa are explained in the entry under 【Related Expression(s)】 (6). Expressions in bold type like ccc contain comparisons to the entry under 【Related Expression(s)】 for ccc. Parenthesized expressions like (ddd) are explained in the ccc entry.

Key Sentence(s): Key sentences present basic sentence patterns in frames according to sentence structure. The parts in red color are recurrent elements. The same is true of Formation.

Formation: The word formation rules/ connection forms for each item are provided with examples.

Examples: Example sentences are provided for each entry.

Note(s): Notes contain important points concerning the use of the item.

【Related Expression(s)】: Expressions which are semantically close to the entry are compared and their differences are explained.

D. Appendixes contains information such as tables of verb/adjective conjugations, a list of connection rules for important expressions and a list of counters.

E. Indexes contains three indexes: the grammar index, the English index and the Japanese index. The reader, therefore, has three means of access to the word he is looking up.

List of Symbols

⇒ = See or refer to.  
? = The degree of unacceptability is indicated by the number of question marks, three being the highest.  
*= ungrammatical or unacceptable (in other words, no native speaker would accept the asterisked sentence.)  
{A / B}C = AC or BC (e.g. {V/Adj(i)}inf = Vinf or Adj(i)inf)  
ø = zero (in other words, nothing should be used at a place where ø occurs. Thus, Adj(na) {ø / datta} kamoshirenai is either Adj(na) kamoshirenai or Adj(na) datta kamoshirenai.)
Grammatical Terms

The following are brief explanations of some grammatical terms most frequently used in this dictionary.

Active Sentence A sentence which describes an action from the agent’s point of view. (Cp. Passive Sentence) In active sentences, the subject is the agent. Sentences (a) and (b) below are an active and a passive sentence, respectively.

(a) 先生はジョンをしかった。
   Sensei wa Jon o shikatta.
   (The teacher scolded John.)

(b) ジョンは先生にしかられた。
   Jon wa sensei ni shikarareta.
   (John was scolded by the teacher.)

Agent One who initiates and/or completes an action or an event. The agent is not always in the subject position. Compare the positions of the agent Bill in (a) and (b).

(a) ビルはマーサをぶった。
    Biru wa Māsa o butta.
    (Bill hit Martha.)

(b) マーサはビルにぶたれた。
    Māsa wa Biru ni butareta.
    (Martha was hit by Bill.)

Appositive Clause (Construction) A clause which modifies a noun (or noun phrase) and explains what the modified noun is. In (a), Meari ga Tomu ni atta ‘Mary met Tom’ is an appositive clause, and is what jijitsu ‘the fact’ refers to.

(a) 私はメアリーがトムに会った事実を知っている。
    Watashi wa Meari ga Tomu ni atta jijitsu o shitte iru.
    (I know the fact that Mary met Tom.)

Auxiliary Adjective A dependent adjective that is preceded by and at-
attached to a verb or another adjective. The bold-printed parts of the following sentences are typical auxiliary adjectives.

(a) 私はジョンに行って欲しい。
   *Watashi wa Jon ni itte hoshii.*
   (I want John to go there.)

(b) この辞書は使いやすい。
    *Kono jisho wa tsukaiyasui.*
    (This dictionary is easy to use.)

(c) 私はすしが食べたい。
    *Watashi wa sushi ga tabetai.*
    (I want to eat sushi.)

(d) ベスは大学を出たらしい。
    *Besu wa daigaku o deta rashii.*
    (Beth seems to have graduated from college.)

(e) 花子は淋しいようだ。
    *Hanako wa sabishii yōda.*
    (Hanako looks lonely.)

(f) このお菓子はおいしそうだ。
    *Kono o-kashi wa oishisōda.*
    (This cake looks delicious.)

**Auxiliary Verb** A verb which is used in conjunction with a preceding verb or adjective. The bold-faced words of the following sentences are typical auxiliary verbs.

(a) ビルは今手紙を書いている。
    *Biru wa ima tegami o kaite iru.*
    (Bill is writing a letter now.)

(b) 窓が開けてある。
    *Mado ga akete aru.*
    (The window has been opened. (=The window is open.))

(c) 僕は宿題をしたかった。
    *Boku wa shukudai o shite shimatta.*
    (I have done my homework.)

(d) 私は友達にお金を貸してあげた。
    *Watashi wa tomodachi ni o-kane o kashite ageta.*
(I loaned money to my friend.)

(e) このコンピューターは高すぎる。
Kono konpyūtā wa takasugiru.
(This computer is too expensive.)

(f) ジョージはスポーツカーを欲しがっている。
Jōji wa supōtsukā o hoshigatte iru.
(Lit. George is showing signs of wanting a sports car. (=George wants a sports car.))

(G) あっ！雨が降って来た！
A! Ame ga futte kita!
(Gee! It’s started to rain!)

**Compound Particle**  A particle which consists of more than one word but functions like a single particle. For example, the compound particle to shite wa consists of the particle to, the te-form of suru and the particle wa, but it is used like a single particle to mean ‘for’. (Cp. Double Particle)

**Compound Sentence**  A sentence which consists of clauses combined by coordinate conjunctions such as ga meaning ‘but’ or by the te-forms of verbs, adjectives or the copula meaning ‘～and’.

(a) 僕は泳いだがスミスさんは泳がなかった。
Boku wa oyoida ga Sumisu-san wa oyoganakatta.
(I swam but Mr. Smith didn’t.)

(b) 吉田さんは東京に行って鈴木さんに会った。
Yoshida-san wa Tōkyō ni itte Suzuki-san ni atta.
(Mr. Yoshida went to Tokyo and met Mr. Suzuki.)

**Contrastive Marker**  A particle which marks contrast. For example, when X is contrasted with Y, it is typically marked by the particle wa. X and Y usually appear in $S_1$ and $S_2$, respectively in $S_1 ga S_2$, as shown in (a).

(a) ジョンは来たが、ビルは来なかった。
Jon wa kita ga, Biru wa konakatta.
(John came here. But Bill didn’t.)

**Coordinate Conjunction**  A conjunction that combines two sentences without subordinating one to the other. A typical coordinate conjunction is ga ‘but’. Example:
Direct Object  The direct object of a verb is the direct recipient of an action represented by the verb. It can be animate or inanimate. An animate direct object is the direct experiencer of some action (as in (a) and (b) below). An inanimate direct object is typically something which is created, exchanged or worked on, in short, the recipient of the action of the verb (as in (c), (d) and (e) below).

(a) 走っていますが、ちょっともやせません。
Hashitte imasu ga, chitto mo yasemasen.
(I'm running, but I haven't lost any weight at all.)

(b) かおりは一郎をだしました。
Kaori wa Ichirō o damashita.
(Kaori deceived Ichiro.)

(c) 僕は本を書いた。
Boku wa hon o kaita.
(I wrote a book.)

(d) 一郎はみどりにスカーフをやった。
Ichirō wa Midori ni sukāfu o yatta.
(Ichiro gave a scarf to Midori.)

(e) 私はドアを開けておいた。
Watashi wa doa o akete oita.
(I kept the door open.)

Although direct objects are marked by the particle お, nouns or noun phrases marked by お are not always direct objects, as shown in (f) and (g).  

(f) 花子は一郎の大学入学を喜んだ。
Hanako wa Ichirō no daigakun'yūgaku o yorokonda.
(Hanako was glad that Ichiro entered college.)

(g) トムはその時公園を歩いていた。
Tomu wa sono toki kōen o aruite ita.
(At that time Tom was walking in the park.)
Double Particle A sequence of two particles. The first particle is usually a case particle and the second is an adverbial particle such as \textit{wa} ‘topic / contrast marker’, \textit{mo} ‘also, even’, and \textit{shika} ‘only’.

(a) 東京からは田中さんが来た。
\textit{Tōkyō kara wa Tanaka-san ga kita.}
(Lit. From Tokyo Mr. Tanaka came.)

(b) 私はミラーさんとも話した。
\textit{Watashi wa Mirā-san to mo hanashita.}
(I talked with Mr. Miller, too.)

Embedded Sentence A sentence within another sentence is an embedded sentence. The bold-faced part of each sentence below is the embedded sentence. An embedded sentence is marked by a subordinate conjunction such as \textit{kara} ‘because’, \textit{keredo} ‘although’, \textit{node} ‘because’, \textit{noni} ‘although’, \textit{to} ‘if’, the quote marker \textit{to} ‘that’, a nominalizer (\textit{no} or \textit{koto}) or the head noun of a relative clause.

(a) 山田は頭が痛いと言った。
\textit{Yamada wa atama ga itai to itta.}
(Yamada said that he had a headache.)

(b) 山田は頭が痛いので学校を休んだ。
\textit{Yamada wa atama ga itai node gakkō o yasunda.}
(Yamada didn’t go to school, because he had a headache.)

(c) 山田は外国に行くのが大好きだ。
\textit{Yamada wa gaikoku ni iku no ga dai-sukida.}
(Yamada loves to go to a foreign country.)

(d) 山田は空手を習ったことがある。
\textit{Yamada wa karate o naratta koto ga aru.}
(Yamada has learned \textit{karate} before.)

Hearer The person who receives a spoken or written message. In this dictionary the term “hearer” is used in a broader sense to mean the person to whom the speaker or the writer communicates.

Imperative Form A conjugated verb form that indicates a command, as in \textit{Hanase!} ‘Talk!’, \textit{Tabero!} ‘Eat it!’, \textit{Shiro!} ‘Do it!’ or \textit{Koi!} ‘Come!’.
Indefinite Pronoun  A pronoun which does not refer to something specifically. *No* in B’s sentence in (a) is an indefinite pronoun. Here, *no* is used for *jisho* ‘dictionary’, but does not refer to a specific dictionary.

(a)  A:  どんな辞書が欲しいんですか。

_Donna jisho ga hoshii n desu ka._
(What kind of dictionary do you want?)

B:  小さいのが欲しいんです。

_Chisai no ga hoshii n desu._
(I want a small one.)

Intransitive Verb  A verb which does not require a direct object. The action or state identified by the intransitive verb is related only to the subject of the sentence. For example, the verb *hashitta* ‘ran’ in (a) is an intransitive verb because the action of running is related only to the subject.

(Cp. Transitive Verb)

(a)  鈴木さんは走った。

_Suzuki-san wa hashitta._
(Mr. Suzuki ran.)

Intransitive verbs typically indicate _movement_ (such as *iku* ‘go’, *kuru* ‘come’, *aruku* ‘walk’, *tobu* ‘fly’, *noru* ‘get onto’), _spontaneous change_ (such as *naru* ‘become’, *kawaru* ‘change’, *tokeru* ‘melt’, *fukuramu* ‘swell’, *hajimaru* ‘begin’), _human emotion_ (such as *yorokobu* ‘rejoice’, *kanashimu* ‘feel sad’, *omou* ‘feel’), and _birth / death_ (such as *umareru* ‘be born’, *shinu* ‘die’).

(⇒ Appendix 3)

* i-type Adjective  An adjective whose nonpast prenominal form ends with *i*. Examples of *i*-type adjectives are *takai* ‘high, expensive’ and *tsuyoi* ‘strong’, as seen in (a).

(Cp. *Na*-type Adjective)

(a)  高い本

_takai hon_  
(an expensive book)

強い人

_tsuyoi hito_  
(a strong person)

*i*-type adjectives are further subdivided into two types: *i*-type adjectives which end with *shi-i* and those with non-*shi-i* endings. Most adjectives with *Shi-i*
endings express human emotion (such as *ureshii* ‘happy’, *kanashii* ‘sad’, *sabishii* ‘lonely’, *kurushii* ‘painful’); the non-*shi-i* adjectives are used for objective descriptions (such as *kuroi* ‘black’, *shiroi* ‘white’, *hiroi* ‘spacious’, *takai* ‘high, expensive’).

**Na-type Adjective** An adjective whose nonpast prenominal form ends with *na*. For example, *shizukada* ‘quiet’ and *genkida* ‘healthy’ are *na*-type adjectives, as in (a).

(Cp. *l*-type Adjective)

(a) 静かな家
*shizukana* ie
(a quiet house)

元気な人
*genkina* hito
(a healthy person)

*Na*-type adjectives are very similar to nouns. Some *na*-type adjectives can be used as real nouns as shown in (b). All *na*-type adjectives behave as nouns when they are used before the copula *da*, as shown in (c).

(b) 健康は大事ですよ。
*Kenkō* wa *daijidesu* yo.
(Health is important, you know.)

Cp. 健康な人
*kenkôna* hito
(a healthy person)

ご親切は忘れません。
*Go-shinsetsu* wa *wasuremasen*.
(I’ll never forget your kindness.)

Cp. 親切な人
*shinsetsuna* hito
(a kind person)

(c) この人は元気/学生 {だ/です/だった/でした/じゃない/じゃありません/じゃなかった/じゃありませんでした。}
*Kono* hito wa *genki* / *gakusei* {da / desu / datta / deshita / janai / jaari-masen / janakatta / jaarimasendeshita.}
(This person [is / was / isn’t / wasn’t] healthy / a student.)

**Nominalizer** A nominalizer is a particle that makes a sentence into a noun phrase or clause. There are two nominalizers *no* and *koto*: the former rep-
represents the speaker's empathetic feeling towards an event / state expressed in the nominalized noun phrase / clause; the latter represents the speaker's relatively anti-empathetic feeling towards an event / state. \(\Rightarrow no^3; koto^2\)

(Reading Japanese is difficult.)

The nominalized sentence can be used in any position where an ordinary noun or a noun phrase / clause can be used.

**Passive Sentence** A sentence which describes an action by someone from the viewpoint of someone else who is affected by that action. (Cf. Active Sentence) (a) and (b) are passive sentences.

(a) 私はビルにぶたれた。
Watashi wa Biru ni butareta.
(I was beaten by Bill.)

(b) 太郎は秋子に泣かれた。
Tarō wa Akiko ni nakareta.
(Lit. Taro was annoyed by the fact that Akiko cried. (=Taro was annoyed by Akiko's crying.))

**Potential Form** A verb form that expresses competence in the sense of 'can do s.t.' The formation is as follows:

| Gr. 1 Verbs | Vcond +る | e.g. 話せる ‘can talk’ | hanase-ru |
| Gr. 2 Verbs | Vstem +られる | e.g. 食べられる ‘can eat’ | tabe-rareru |
|             | Vstem +れる | e.g. 食べれる ‘can eat’ | tabe-ru |
| Irr. Verbs  | 来る | 来られる ‘can come’ | korareru |
**Predicate**  The part of a sentence which makes a statement about the subject. The core of the predicate consists either of a verb, an adjective, or a noun followed by a form of the copula *da*. Optionally, objects and other adjectival and / or adverbial modifiers may be present. In (a), (b) and (c) the predicates are printed in bold type.

(a) 松本さんはよく映画を見る。
*Matsumoto-san wa yoku eiga o miru.*
(Mr. Matsumoto sees movies often.)

(b) 私の家はスミスさんのより新しい。
*Watashi no ie wa Sumisu-san no yori atarashii.*
(My house is newer than Mr. Smith’s.)

(c) ジョンは日本語の学生です。
*Jon wa nihongo no gakusei desu.*
(John is a student of Japanese language.)

**Prenominal Form**  The verb / adjective form which immediately precedes a noun and modifies it. The bold-faced verb and adjectives in (a), (b), (c) and (d) are prenominal forms.

(a) 私が読む / 読んだ新聞
*watashi ga yomu / yonda shinbun*
(the newspaper I read)

(b) 大きい / 大きかった家
*ökii / ökikatta ie*
(a big house / a house which used to be big)

(c) 立派な / 立派だった建物
*rippana / rippadatta tatemono*
(a magnificent building / a building which used to be magnificent)

(d) おいしそうな / おいしそうだったケーキ
*oishisōna / oishisōdatta kēki*
(a delicious-looking cake / a cake which looked delicious)
Punctual Verb  A verb that represents a momentary action which either occurs once, as in (a), or can be repeated continuously, as in (b).

(a) 知る  'get to know'
    shiru
死ぬ  'die'
    shinu
始まる  'begin'
    hajimaru
結婚する  'get married'
    kekkonsuru
やめる  'stop s.t.'
    yameru
似る  'resemble'
    niru

(b) 落とす  'drop'
    otosu
もぎる  'pluck off'
    mogiru
ける  'kick'
    keru
跳ぶ  'jump'
    tobu
打つ  'hit'
    utsu

With the auxiliary verb *iru* (i.e., *iru*²), the punctual verbs in (a) express a state after an action was taken, and those as in (b) express either a repeated action or a state after an action was taken.

⇒ Appendix 2

Stative Verb  A verb which represents a state of something or someone at some point in time, as in (a).

(a) ある
    aru
    (exist (of inanimate things))
いる
    iru
    (exist (of animate things))
Subject  The subject is an element of a sentence which indicates an agent of an action in active sentences (as in (a)) or an experiencer of an action (as in (b)) or someone or something that is in a state or a situation (as in (c), (d), (e) and (f)). The subject is normally marked by the particle *ga* in Japanese unless it is the sentence topic.

(a) ジョンがりんごを食べた。
   *Jon ga ringo o tabeta.*
   (John ate an apple.)

(b) メアリーが先生にほめられた。
   *Meari ga sensei ni homerareta.*
   (Mary was praised by her teacher.)

(c) ナンシーはきれいだ。
   *Nanshi wa kireida.*
   (Nancy is pretty.)

(d) ドアが開いた。
   *Doa ga aita.*
   (The door opened.)

(e) 机が一つある。
   *Tsukue ga hitotsu aru.*
   (Lit. One table exists. (= There is a table.))

(f) 空が青い。
   *Sora ga aoi.*
   (The sky is blue.)

Subordinate Clause  A clause which is embedded into a main clause with a subordinate conjunction. Typical subordinate conjunctions are *ba* ‘if’, *kara* ‘because’, *node* ‘because’, *keredo* ‘although’ and *noni* ‘although’. Thus, in (a) below, the bold-faced clause with the subordinate conjunction *node* is embedded into the main clause *Nakayama-san wa gakkō o yasunda*, ‘Mr. Nakayama was absent from school.’
The informal form of a verb / adjective is usually used in a subordinate clause.

Transitive Verb  A verb that requires a direct object. It usually expresses an action that acts upon s.o. or s.t. indicated by the direct object. Actions indicated by transitive verbs include real causatives (such as ikaseru ‘make / let s.o. go’, korosu ‘kill’, miseru ‘show’, nakasu ‘make s.o. cry’, noseru ‘put, place’), exchange (such as ageru ‘give’, morau ‘receive’, kureru ‘give’), creation (such as tsukuru ‘make’, kaku ‘write’, kangaeru ‘think’), communication (such as hanasu ‘speak’, oshieru ‘teach’, tsutaeru ‘convey a message’) and others. Note that some English transitive verbs are intransitive in Japanese.

(a) 私は車がある。
    Watashi wa kuruma ga aru.
    (Lit. With me a car exists. (=I have a car.))

(b) 僕はお金がいる。
    Boku wa o-kane ga iru.
    (Lit. To me money is necessary. (=I need money.))

(c) スミスさんは中国語が分かる。
    Sumisu-san wa chūgokugo ga wakaru.
    (Lit. To Mr. Smith Chinese is understandable. (=Mr. Smith understands Chinese.))

(d) 私はフランス語が少し出来る。
    Watashi wa furansugo ga sukoshi dekiru.
    (Lit. To me French is a bit possible. (=I can speak French a little.))

(e) 木下さんは東京でお父さんに会った。
    Kinoshita-san wa Tōkyō de o-tō-san ni atta.
    (Mr. Kinoshita met his father in Tokyo.)

(f) 私にはベルが聞こえなかった。
    Watashi ni wa beru ga kikoenakatta.
    (Lit. To me the bell wasn’t audible. (=I wasn’t able to hear the bell.))

(g) ここからは富士山が見えますよ。
    Koko kara wa Fujisan ga miemasu yo.
    (Lit. From here Mt. Fuji is visible. (=We can see Mt. Fuji from here.))
(h) 私達は新幹線に乗りました。
Watasitachi wa shinkansen ni norimashita.
(We rode a bullet train.)

(i) 私は母に似ているらしい。
Watashi wa haha ni niteiru rashii.
(It seems that I resemble my mother.)

**Volitional Sentence**  A sentence in which a person expresses his will. The main verb in such sentences is in the volitional form, as in (a).

(a) 僕が行こう / 行きましょう。
Boku ga ikō / ikimashō.
(I will go.)

**WH-question**  A question that asks for information about who, what, where, which, when, why and how, as exemplified by (a) through (f) below.

(Cp. Yes-No Question)

(a) 誰が来ましたか。
Dare ga kimashita ka.
(Who came here?)

(b) 何を食べますか。
Nani o tabemasu ka.
(What will you eat?)

(c) どこに行きますか。
Doko ni ikimasu ka.
(Where are you going?)

(d) いつ大阪へ帰りますか。
Itsu Ōsaka e kaerimasu ka.
(When are you going back to Osaka?)

(e) どうして買わないんですか。
Dōshite kawanai n desu ka.
(How come you don’t buy it?)

(f) 東京駅へはどう行きますか。
Tōkyō eki e wa dō ikimasu ka.
(How can I get to Tokyo Station?)
WH-word  An interrogative word which corresponds to English words such as *who, what, where, which, when, why* and *how*. The following are some examples.

(a) 誰  'who'
    *dare*
    何  'what'
    *nani / nan*
    どこ  'where'
    *doko*
    いつ  'when'
    *itsu*
    どうして / なぜ  'how come / why'
    *dōshite / naze*
    どう  'how'
    *dō*

Note that Japanese WH-words are not always found in sentence-initial position; they are frequently found after a topic noun phrase, as shown in (b) and (c) below.

(b) きのうのパーティには誰が来ましたか。
    *Kinō no pāti ni wa dare ga kimashita ka.*
    (Lit. To yesterday’s party, who came there? (=Who came to yesterday’s party?))

Cp. 誰がきのうのパーティーに来ましたか。
    *Dare ga kinō no pāti ni kimashita ka.*
    (Who came to yesterday’s party?)

(c) 日本では何をしましたか。
    *Nihon de wa nani o shimashita ka.*
    (Lit. In Japan what did you do? (=What did you do in Japan?))

Cp. 何を日本でしましたか。
    *Nani o nihon de shimashita ka.*
    (What did you do in Japan?)

**Yes-No Question**  A question that can be answered by *hai / え 'yes' or iie 'no'. (Cp. WH-question) Examples follow:

(a) A: 上田さんは来ましたか。
    *Ueda-san wa kimashita ka.*
    (Did Mr. Ueda come?)
B: はい、来ました。
   *Hai, kimashita.*
   (Yes, he did.)

(b) A: 鈴木さんは学生ですか。
    *Suzuki-san wa gakusei desu ka.*
    (Is Mr. Suzuki a student?)

B: いいえ、そうじゃありません。
   *Ie, sō ja arimasen.*
   (No, he isn't.)
Characteristics of Japanese Grammar

1. Word Order

Japanese is typologically classified as an SOV (Subject + Object + Verb) language, whereas English is classified as SVO. An important fact about Japanese word order is that each sentence ends in a verb, an adjective or a form of the copula, and that the order of the other sentence elements is relatively free, except for the topic noun or noun phrase, which normally comes at sentence-initial position. A sample sentence follows.

(1)

<table>
<thead>
<tr>
<th>Subject (topic)</th>
<th>Location</th>
<th>Direct Object</th>
<th>Verb (transitive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sumisu-san wa</td>
<td>Nihon de</td>
<td>nihongo o</td>
<td>benkyōshite iru.</td>
</tr>
</tbody>
</table>

(Mr. Smith is studying Japanese in Japan.)

The Location and the Direct Object can be switched, but the Subject (topic) and the Verb must normally be in sentence-initial and sentence-final positions, respectively.

The word order principle for Japanese is the modifier precedes what is modified. This principle holds whether the modified word is dependent or fully independent. The function of the modifier is to specify the meaning of the modified word. Thus, in (1), the verb benkyōshite iru ‘is studying’ is modified by the preceding elements Subject, Location and Direct Object. Observe the following phrases and clauses.

(2) Adjective | Noun
---|---
赤い akai | 車 kuruma
(a red car)

(3) Noun Phrase

<table>
<thead>
<tr>
<th>Relative Clause</th>
<th>Noun</th>
</tr>
</thead>
<tbody>
<tr>
<td>父 が きのう 読んだ chichi ga kinō yonda</td>
<td>本 hon</td>
</tr>
</tbody>
</table>
(a book which my father read yesterday)
In (2) and (3) where the modified word is an independent noun the basic principle holds; in (4), (5) and (6) where the second element is a dependent word, such as a particle, conjunction, or nominalizer, the basic modificational principle also holds, because the meaning of the modified word is fully specified by the modifier. Unlike independent words, however, dependent words require modifiers.

It is important for students of Japanese to recognize and understand some of the most basic Japanese sentence types and their word order. Examples of these basic sentence types are given below:
a. X wa Y da / X ga Y da ‘Speaking of X, X is Y / It is X that is Y’

<table>

</table>

(Speaking of universities, there are two of them in this town.)

Finally, as shown in the following diagram, any major element listed vertically in (1) through (8) can be a topic marked by *wa*. The element with a lower number tends to be used towards the beginning of a sentence. The order of elements within the predicate is usually much more complex than that shown below. An adverb, which is omitted in the chart, can be positioned at any place before the Core Predicate, as long as it is positioned before or after NP + Prt. The normal position for an adverb, however, is right before the word it modifies.
(1) NP  (ni) [Time]
(2) NP  ni [Location]
(3) NP  ga [Subject]
(4) NP  to [Reciprocal]
(5) NP  de [Means / Location]
(6) NP  kara [Starting point / Source]
(7) NP  e [Direction]  NP  ni [Indirect Object / Direction]
(8) NP  o [Direct Object]

2. Topic

Topic is a key concept in understanding Japanese. Roughly speaking, the topic of a sentence is what the sentence is about. For example, in (1), the topic is *Hanako* and the rest of the sentence provides information about *Hanako*.

(1) 花子は学生です。

*Hanako wa gakusei desu.*

(Hanako is a student.)

[(Speaking of Hanako,) Hanako is a student.]

Topics are presented using various topic-marking devices. Among these, *wa* is the most frequent marker. (For other topic-markers, see *wa*¹ (は).)

When a topic is presented it must be something both the speaker and the hearer can identify from their knowledge. Usually a topic is something that has been mentioned in a previous discourse, something the speaker and the hearer perceive through their five senses, a proper noun or a generic noun, as seen in (2).

(2) a. 昔々，一人のおじいさんが住んでいました。おじいさんはとても貧乏でした。

*(O-ji-san was mentioned previously.)*

*Mukashimukashi, hitori no o-ji-san ga sunde imashita. O-ji-san wa totemo binbōdeshita.*

(Once upon a time, there lived an old man. The old man was very poor.)

b. これは私のペンです。

*Kore wa watashi no pen desu.*

(This is my pen.)

c. 鈴木さんは日本人です。

*Suzuki-san wa nihonjin desu.*

(Mr. Suzuki is Japanese.)

d. くじらは哺乳動物です。

*Kujira wa hōnyūdōbutsu desu.*

(Whales are mammals.)

In general, any noun phrase (NP) can be topicalized, although subject NPs are the ones most frequently topicalized. (3) presents additional examples. As seen below, when an NP is topicalized, the particle which follows may or may not be retained depending on the particle.
(3) a. スミスさんは日本へ行きました。
    *Sumisu-san wa Nihon e ikimashita.*
    (Mr. Smith went to Japan.)

b. その映画はもう見ました。
    *Sono eiga wa mō mimashita.*
    (I already saw the movie.)

c. 日本(へ / に)はまだ行ったことがない。
    *Nihon (e / ni) wa mada itta koto ga nai.*
    (I haven’t been to Japan yet.)

d. まり子には本をあげた。
    *Mariko ni wa hon o ageta.*
    (To Mariko, I gave a book.)

e. アメリカからはスミスさんが来た。
    *Amerika kara wa Smisu-san ga kita.*
    (As for ((lit.) from) America, Mr. Smith came (from there).)

Finally, in discourse, once a topic is established, it does not need to be repeated unless another topic is presented. Consider the following passage, consisting of four sentences (a) – (d) in (4).

(4) a. 太郎はまだアメリカに行ったことがない。
    *Tarō wa mada Amerika ni itta koto ga nai.*
    (Taro has not been to America yet.)

b. いつも行きたいと思っているがお金がないから行けない。
    *Itsumo ikitai to omotte iru ga o-kane ga nai kara ikenai.*
    (He always wants to go, but since he has no money, he cannot go.)

c. お父さんは働いてお金をためなさいと言う。
    *O-tō-san wa hataraito o-kane o tamenasai to iu.*
    (His father tells him to work and save money.)

d. でも太郎はお父さんにお金を出してほしいのだ。
    *Demo Tarō wa o-tō-san ni o-kane o dashite hoshii no da.*
    (But Taro wants his father to give him money.)

Here, (4a) introduces a topic, *Tarō*. Since (4b) is a statement about *Tarō* and *Tarō* is an established topic at this point, *Tarō wa* does not have to be repeated here. (4c), however, presents a new topic, *o-tō-san*. Since this topic is still in effect when the topic returns to *Tarō* in (4d), *Tarō wa* has to be reintroduced. A topic must also be presented if a sentence is the first sentence of a new paragraph, even if the last sentence of the preceding paragraph has the same topic.
3. Ellipsis

In language it is universally observed that strategies exist to minimize the effort of conveying messages. The most common strategies are ellipsis, contraction, abbreviation and the use of pronouns. Of these, ellipsis (i.e., the omission of words) is the most efficient and occurs frequently in Japanese.

Generally speaking, elements which can be understood from the context and / or from the situation can be omitted in Japanese unless ellipsis makes the sentence ungrammatical. For example, in (1), B does not repeat Tarō wa and sono mise de because they can be understood.

(1) A: 太郎はその店で何を買いましたか。

Tarō wa sono mise de nani o kaimashita ka.
(What did Taro buy at the store?)

B: ペンを買いました。

Pen o kaimashita.
(He bought a pen.)

Kaimashita, however, cannot be omitted in normal conversation even though it can be understood here, because Japanese sentences (or clauses) must end with a core predicate (that is, either a verb, an adjective or a noun phrase which is followed by a form of the copula). Therefore, without the core predicate kaimashita, this sentence is ungrammatical. (In informal conversation, B might reply "pen" in answer to A's question, but an answer of this sort is considered abrupt.)

The following are some general rules of ellipsis in Japanese.

(A) If X is the topic of a sentence (often marked by wa) and it is also the topic of the sentence which follows it, X can be omitted in the second sentence. (See (4) in 2. Topic.)

(B) In question-and-answer discourse, if an element X is shared in the question and the answer, X can be omitted in the answer unless X is the core predicate. Example:

(2) A: 田中さんはむかえに来てくれましたか。

Tanaka-san wa mukae ni kite kuremashita ka.
(Did Mr. Tanaka come to pick you up?)

B: はい、来てくれました。

Hai, kite kuremashita.
(Yes, he did.)
(3) A: あなたはアメリカにいた時、学生でしたか。
Anata wa Amerika ni ita toki gakusei deshita ka.
(You were a student when you were in America?)

B: はい、そうです。 （Sō is more commonly used.）
Hai, sō / gakusei deshita.
(Yes, I was.)

(Refer again to (1). In yes-no question situations, even predicates can be omitted in very informal conversation.)

(C) If the referent of X is something very close to the speaker and the hearer, and X can be understood from the context and / or the situation, X can be omitted as in (4) – (6). (The parenthesized words can be omitted.)

(4) A: (あなたは)行きますか。
(Anata wa) ikimasu ka.
(Are you going?)

B: はい、(私は)行きます。
Hai, (watashi wa) ikimasu.
(Yes, I am.)

(5) A: (私達は)行きましょうか。
(Watashitachi wa) ikimashō ka?
(Shall we go?)

B: いや、(私達は)よしましょう。
Iya, (watashitachi wa) yoshimashō.
(No, let's not.)

(6) A: (これは / それは)何ですか。
(Kore wa / Sore wa) nan desu ka.
(What is this / that?)

B: (それは / これは)花子からのプレゼントです。
(Sore wa / Kore wa) Hanako kara no purezento desu.
(That / This is a present from Hanako.)

(A) – (C) concern the ellipsis of content words such as nouns and verbs. However, ellipsis in Japanese is not limited to content words. The following are some general rules regarding the ellipsis of particles in conversation.

(D) If the referent of X in X wa is psychologically close to the speaker and the hearer, wa tends to drop unless X is under focus. Examples:
(7) a. わたくし(は)山田ともうします。
    Watakushi (wa) Yamada to mōshimasu.
    (Lit. I call myself Yamada. (= I am Yamada.))

b. 君(は)今, 何年生ですか。
    Kimi (wa) ima nan-nensei desu ka.
    (What year (in school) are you in now?)

c. この本(は)おもしろいよ。
    Kono hon (wa) omoshiroi yo.
    (This book is interesting.)

d. あの(は)誰ですか。
    Ano hito (wa) dare desu ka.
    (Who is that person?)

(E) The subject marker *ga* can be omitted if the sentence conveys information which is expected by the hearer or which is very closely related to the hearer. Examples:

(8) a. あ, 電車(が)来た。
    A, densha (ga) kita.
    (Oh, here comes the train.)

b. みなさん, お食事(が)出来ました。
    Minasan, o-shokuji (ga) dekimashita.
    (Folks, the meal is ready now.)

c. 今日田中さんから君に電話(が)あったよ。
    Kyō Tanaka-san kara kimi ni denwa (ga) atta yo.
    (There was a phone call for you today from Mr. Tanaka.)

d. もしもし, くつのひも(が)ほどけてますよ。
    Moshimoshi, kutsu no himo (ga) hodokete masu yo.
    (Excuse me, your shoelace is untied.)

(F) The direct object marker *o* can be omitted unless the NP *o* is under focus. (*O* drops more frequently in questions.) Examples:

(9) a. コーヒー(を)飲みませんか。
    Köhi (o) nomimasen ka.
    (Wouldn’t you like coffee?)

b. じゃ, それ(を)もらいます。
    Ja, sore (o) moraimasu.
    (Then, I’ll take it.)
c. 今晚電話(を)ください。
   *Konban denwa (o) kudasai.*
   (Please give me a call tonight.)

Rules (A) – (F) concern the ellipsis of parts of simple sentences or clauses. There are, however, cases in which entire clauses are omitted. (G) is a general rule regarding this sentential ellipsis.

(G) If the message conveyed by a main clause can be understood from the context and / or the situation, the main clause can be deleted. Examples:

(10) A: きのうパーティーに来なかったね。
   *Kinō pātī ni konakatta ne.*
   (You didn’t come to the party yesterday.)

B: うん、ちょっと忙しかったから(行けなかった)。
   *Un, chotto isogashikatta kara (ikenakatta).*
   (Yeah, I couldn’t come) because I was busy.)

(11) 田中先生に聞いたら(どうですか)?
   *Tanaka-sensei ni kiitara (dō desu ka)?*  
   (Lit. (How will it be) if you ask Prof. Tanaka? (=Why don’t you ask Prof. Tanaka?))

(12) お茶ははいりましたけど(いかがですか)。
   *O-cha ga hairimashita kedo (ikaga desu ka).* 
   (Lit. Tea is ready now, but (how would you like it?))

Additionally, ellipsis can take place for psychological reasons. That is, the speaker may omit a part of a sentence either because he considers it rude, because he feels uncomfortable saying it or because he doesn’t know how to say it, etc. For example, if he is offered food he cannot eat, he may say, *Sore wa chotto,* ‘(lit.) That is, a little,’ implying *Sore wa chotto taberaremasen,* ‘I can hardly eat it.’ Or, if the speaker hears someone’s unhappy news, he may say, *Sore wa dōmo,* ‘(lit.) That is, very,’ meaning *Sore wa kanashii koto desu ne,* ‘That is a sad thing.’

Finally, it is noted that since ellipsis is common in Japanese, Japanese sentences are often ambiguous in isolation. They are interpreted correctly only if they are in proper contexts and / or situations. Examples:

(13) a. ぼくは雪子はあまり好きじゃない。
   *Boku wa Yukiko wa amari sukijanai.*
   *Shikashi (boku wa)*
   春子は好きだ。
   *Haruko wa sukida.*
   (I don’t like Yukiko very much. But, I like Haruko.)
b. ぼくは雪子はあまり好きじゃない。しかし春子は
Boku wa Yukiko wa amari sukijanai. Shikashi Haruko wa
(雪子が)好きだ。
(Yukiko ga) sukida.
(I don’t like Yukiko very much. But, Haruko likes her.)

(t4) a. 私はいい人を見つけたので、さっそく田中さんに
Watashi wa ii hito o mitsuketa node, sassoku Tanaka-san ni
(その人に)会ってもらった。
(sono hito ni) atte moratta.
(I found a good man, so I asked Mr. Tanaka to see him right away.)

b. 私はいい人を見つけたので、さっそく(その人に)
Watashi wa ii hito o mitsuketa node, sassoku (sono hito ni)
田中さんに会ってもらった。
Tanaka-san niatte moratta.
(I found a good man, so I asked him to see Mr. Tanaka right away.)
### 4. Personal Pronouns

One of the peculiarities of Japanese personal pronouns is that there is more than one pronoun for the first and second person and that traditionally there have been no third person pronouns. The most frequently used first and second person pronouns are listed below:

<table>
<thead>
<tr>
<th>Levels of Formality</th>
<th>Personal Pronouns</th>
<th>Singular</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

</tr>
</tbody>
</table>

<table>
<thead>
<tr>

<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>First Person ‘We’</td>
<td>Second Person ‘You’</td>
</tr>
<tr>
<td>Very Formal</td>
<td>わたくしども watakushidomo</td>
<td>none</td>
<td></td>
</tr>
<tr>
<td>Formal</td>
<td>わたくしたち watakushitachi</td>
<td>あなたがた anatagata</td>
<td></td>
</tr>
<tr>
<td></td>
<td>わたしたち watashitachi</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Informal</td>
<td>ぼくたち bokutachi (male)</td>
<td>きみたち kimitachi (male)</td>
<td>あなたたち anatatachi (male)</td>
</tr>
<tr>
<td></td>
<td>あたしたち atashitachi (female)</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>ぼくら bokura (male)</td>
<td>きみら kimira (male)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>あたしら atashira (female)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Very Informal</td>
<td>おれたち oretachi (male)</td>
<td>おまえたち omaetachi (male)</td>
<td>あなたたち anatatachi (male)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>おまえら omaera (male)</td>
<td>あんたら antara (male)</td>
</tr>
</tbody>
</table>

Note: (Male) / (female) means that the particular pronoun is used by a male / female speaker, respectively.
The first person singular pronoun *watakushi* has at least six contracted forms. The way the contraction (i.e., omission of sounds) takes place is as follows:

- **watakushi** → **watashi** (formal)
- **watakushi** → **atakushi** (formal, female)
- **watakushi** → **atashi** (informal, female)
- **watakushi** → **atai** (very informal / vulgar, female)
- **watakushi** → **washi** (informal, older male)
- **watakushi** → **agshe** (very informal, adult male of the Bay area of Tokyo)

The fact that there is more than one pronoun for the first and second person leads us to suspect that Japanese first and second person pronouns are not pure pronouns but are a kind of noun. In fact, these ‘pronouns’ can be freely modified by adjectives or by relative clauses as in (1) and cannot be repeated in a single sentence as in (2), which supports the idea that they are similar to regular nouns.

(1) a. 忙しい私はテレビも見られない。
_Isogashii watashi wa terebi mo mirarenai._
(Lit. Busy me cannot see even TV. (=I cannot even watch TV because I’m so busy.))

b. 音楽が好きな私は一日中音楽を聞いている。
_Ongaku ga sukina watashi wa ichinichijū ongaku o kiite iru._
(Lit. I who like music is listening to music all day long. (=Because I like music, I listen to it all day long.))

c. 若いあなたにはまだ分からないでしょう。
_Wakai anata ni wa mada wakaranai deshō._
(Lit. Young you probably won’t understand it. (=Since you are young, you probably won’t understand it.))

(2) a. *私は私の部屋で私の友達と話していた。
*Wata**ashi wa watashi no heya de watashi no tomodachi to hanashite ita.**
(I was talking with my friend in my room.)
→ 私は 0 部屋で 0 友達と話していた。
_Wata**shi wa 0 heya de 0 tomodachi to hanashite ita._

b. *あなたはきのうあなたの部屋であなたの友達と何をしていましたか。
*Anata wa kinō anata no heya de anata no tomodachi to nani o shite imashita ka.
(What were you doing yesterday with your friend in your room?)
→あなたはきのうお部屋でお友達と何をしていましたか。

*Anata wa kinō o heya de o tomodachi to nani o shite imashita ka.*

It is also important to note that Japanese first and second person pronouns are deleted unless it is necessary to emphasize me-ness or you-ness. Under normal communicative situations, who is speaking to whom is obvious, so Japanese speakers simply omit these pronouns. Students of Japanese, therefore, should avoid using first and second person pronouns whenever possible.

In addition to first and second person pronouns, there are other ways to refer to the speaker or the addressee, as summarized in the following chart.

Within a family, if the speaker is considered superior (primarily in terms of age) to the addressee (Speaker > Addressee), he may use a kinship term as a form of self-address, but if not, he can use only a first person pronoun in self-address. If the addressee is considered superior to the speaker (Addressee > Speaker), the speaker has to employ the kinship term of the addressee when addressing him, or he must use a second person pronoun or the addressee’s name (optionally with -san or -chan). Outside the family, in an Addressee > Speaker situation, the speaker has to employ the addressee’s social role term when addressing him. If the situation is Speaker > Addressee, the speaker cannot use his own social role term as a form of self-address, except for the term sensei when it refers to elementary and junior high school teachers.

Occupational terms such as sakana-ya ‘fish monger’, niku-ya ‘butcher’, and hana-ya ‘florist’ are used as address forms by attaching -san to them. (⇒ -ya) Also, a female first name is employed by a young girl as a self-address form in very informal speech as in (3).

(3) あのね, 京子きのう一郎さんとデートしたのよ。
Ano ne, Kyōko kinō Ichirō-san to dēto shita no yo.
(You know what? I (=Kyoko) had a date with Ichiro yesterday!)

There is no real third person pronoun in Japanese. As shown in (4), all English third person pronouns have no corresponding forms in Japanese.

(4)  a. 山田さんは去年アメリカに行った。英語が勉強したかったのだ。
Yamada-san wa kyonen Amerika ni itta. Eigo ga benkyōshitakatta no da.
(Mr. Yamada went to America last year. He wanted to study English.)

b. 上田さんは十年前に買った車にまだ乗っている。
Ueda-san wa jūnen mae ni katta kuruma ni mada notte iru.
(Mr. Ueda is still driving the car which he bought ten years ago.)

c. A: ボブはきのう来ましたか。
Bobu wa kinō kimashita ka.
(Did Bob come see you yesterday?)

B: ええ、来ましたよ。
E, kimashita yo.
(Yes, he did.)

d. A: 田中さんは、遅いわけ。
Tanaka-san-tachi, osoi wa né.
(Miss Tanaka and the people with her are late, aren’t they?)
B: 忘れているんじゃないかしら。
Wasurete iru n ja nai ka shira.
(I wonder if they have forgotten about this.)

c. ここから大阪まで車で一時間かかる。
Koko kara Ōsaka made kuruma de ichijikan kakaru.
(It takes one hour from here to Osaka.)

f. 今七時です。
Ima shichiji desu.
(It is seven now.)

During the past century or so, however, the third person pronouns *kare* ‘he’, *kanojo* ‘she’, *karera* ‘they (male)’ and *kanojora* ‘they (female)’ have begun to be employed primarily in novels translated into Japanese and in Japanese novels. These pronouns are also fairly widely used in current spoken Japanese. Like first and second person pronouns, they are treated very much like nouns, as seen in (5).

(5) a. 僕の彼女、とてもきれいなんだ。
*Boku no kanojo, totemo kireina n da.*
(My girl friend is very pretty, you know.)

b. 大学を出た彼はすぐ結婚した。
*Daigaku o deta kare wa sugu kekkonshita.*
(Lit. He who finished college got married right away. (=He got married right after graduation from college.))

There is one condition governing the use of third person pronouns:

The speaker / writer is psychologically somewhat distant from the referent of the pronoun.
5. Passive

The concept of passive in Japanese, which is called ukemi (受身) (lit. body which receives something), is considerably different from its English counterpart. The Japanese passive contains two elements: an event (i.e., an action by someone / something) and a person or thing which is affected by that event. For example, if someone runs away and it affects someone else, that action can be expressed by the passive construction. Or, if someone smokes and it affects someone else, that can be a passive situation. In other words, the common characteristic of the Japanese passive is that the event is not under the control of those affected by it. Note that the person in the first situation above has no control over someone’s running away and the one in the second has no control over someone’s smoking.

Passive situations are expressed in various ways according to the situation. The most common way is to use the passive forms of verbs. (⇒ rareru) For instance, the above situations can be expressed as in (1), using passive verb forms.

(1) a. 山田さんは奥さんに逃げられた。
    Yamada-san wa okusan ni nigerareta.
    (Lit. Mr. Yamada’s wife ran away on him.)

    b. 太郎は春子にたばこをすわれた。
    Tarō wa Haruko ni tabako o suwareta.
    (Lit. Taro had a cigarette smoked by Haruko on him.)

Notice here that in (1a) the verb nigeru ‘run away’ is intransitive and in (1b) there is a direct object tabako ‘cigarette’. Neither (1a) nor (1b) can be expressed using the English passive construction “be+past participle”. This type of construction, however, is frequently found in Japanese and is called ‘the indirect passive’. In indirect passive sentences the thing affected by the event is usually human and how the person is affected is interpretable only from the context. The sentences in (1) show situations where someone is negatively affected. The following is an example where the person is positively affected.

(2) 木村さんは美人に横に座られてうれしそうだ。
    Kimura-san wa bijin ni yoko ni suwararete ureshi sōda.
    (Lit. Mr. Kimura, having a pretty woman sit beside him, looks happy.)

In indirect passive sentences the agent of the event is usually animate and the action is volitional. Therefore, the following examples are all unacceptable.
(3)  a.  *私は石に頭に落ちられた。
    *Watashi wa ishi ni atama ni ochirareta.
    (*My head was fallen on by a rock.)

    b.  *トムは交差点のまん中で車に止まれた。
    *Tomu wa kōsaten no mannaka de kuruma ni tomarareta.
    (*Tom was stopped in the middle of the intersection by his car.)

There are, however, a very few exceptions, as seen in (4).

(4)  僕は雨に降られた。
    Boku wa ame ni furareta.
    (Lit. It rained on me.)

The passive forms of verbs can also express what is called direct passive. (5) presents some examples.

(5)  a.  ジョンはビルにぶれた。
    Jon wa Biru ni butareta.
    (John was hit by Bill.)

    b.  この絵は十九世紀に描かれた。
    Kono e wa jūkyū-seiki ni kakareta.
    (This picture was painted in the nineteenth century.)

    c.  酒は米から作られる。
    Sake wa kome kara tsukurareru.
    (Sake is made from rice.)

As seen in (5), direct passive sentences have passive equivalents in English. It is noted that in direct passive sentences, too, the conditions mentioned above are satisfied. That is, in (5a) there is a person, John, who was affected by an event, Bill’s hitting, and the event was not under John’s control. The difference between direct passive and indirect passive is that in direct passive sentences a person / thing is directly affected by an event (i.e., a person / thing is the direct receiver of someone’s / something’s action) as in (5), while in indirect passive sentences the effect of an event on a person is indirect (i.e., a person is not the direct receiver of someone’s / something’s action), as seen in (1) – (4).

In general, when a passive sentence is used, it is about the person / thing which is affected by the event, and when what is affected is human, the sentence takes the viewpoint of the person rather than the agent of the event.

(See 9. Viewpoint.)

Some passive situations are also expressed by the verb morau ‘get’, as in (6).
(6)  a. マーガレットはポールにイヤリングをもらった。
    Māgaretto wa Pōru ni iyaringu o moratta.
    (Margaret got a pair of earrings from Paul.)

   b. メアリーはスティーブにアパートに来てもらった。
    Meari wa Sutibu ni apāto ni kite moratta.
    (Mary had Steve come to her apartment. (=Steve came to Mary’s apartment for her.))

   c. 私は父にカメラを買ってもらった。
    Watashi wa chichi ni kamera o katte moratta.
    (I had my father buy me a camera. (=My father bought a camera for me.))

When morau is used, the event always affects the person positively. (This is not the case with sentences with rareru.) In this case, also, the speaker’s viewpoint is that of the person affected by the event.  

(⇒ morau\textsuperscript{1,2})

Naru ‘become’ can also express some passive situations. Compare the following pairs of sentences with suru ‘do’ and naru.

(7)  a. 山口さんはアメリカに行くことにした。
    Yamaguchi-san wa Amerika ni iku koto ni shita.
    (Mr. Yamaguchi has decided to go to America.)

   b. 山口さんはアメリカに行くことになった。
    Yamaguchi-san wa Amerika ni iku koto ni natta.
    (It’s been decided that Mr. Yamaguchi is going to America.)

(8)  a. 先生はフレッドを停学にした。
    Sensei wa Fureddo o teigaku ni shita.
    (The teacher suspended Fred from school.)

   b. フレッドは停学になった。
    Fureddo wa teigaku ni natta.
    (Fred was suspended from school.)

Here, again, the viewpoint in the (b) sentences is that of the person affected by the event, and the agent of the event is not the speaker’s main concern.

(⇒ koto ni naru; naru)
6. Politeness and Formality

All languages are equipped with polite expressions and Japanese is no exception. What makes Japanese polite expressions distinctly different from those of other languages is that the Japanese system involves grammar as well as lexical items. Basically, there are two ways to be polite in Japanese; one is to elevate the speaker's superior, i.e., a person who is older and higher in social status than the speaker. Expressions of this type are called *Honorific Polite Expressions*. The other method is to lower the speaker or his in-group members, and thus elevate his superior indirectly. Expressions of this type are called *Humble Polite Expressions*.

With *Honorific Polite Expressions*, the subject of the sentence is the speaker's superior and the form of the main predicate is an honorific form, as shown below:

The following are typical examples of sentences using honorific polite verbs:

(1) a. 先生はアメリカの大学で日本語をお教えになります。
   Sensei wa Amerika no daigaku de nihongo o o-oshie ni narimasu.
   (The professor will teach Japanese at an American college.)

   b. 先生はアメリカの大学で日本語を教えられます。
   Sensei wa Amerika no daigaku de nihongo o oshierarematsu.
   (The professor will teach Japanese at an American college.)

   c. 先生はゴルフをなさるとおっしゃいました。
   Sensei wa gorufu o nasaru to osshaimashtita.
   (The professor told me that he's going to play golf.)

Sentence (1a) with its longer honorific expression, is more polite than (1b), which has a shorter honorific expression. Notice also that the honorific form in (1b) is the same as the passive form. An important characteristic of the honorific and passive form is indirectness, the origin of honorific politeness. Sentence (1c) includes the irregular verbs nasaru 'do' and ossharu 'say'. Such verbs as nasaru and ossharu which are irregular must be memorized one by one. Note that the following honorific polite verbs are Gr. 1 verbs, but are irregular in their conjugations of formal nonpast and imperative forms.

The honorific polite form of *Vte iru* is formed as shown in the following chart.

The use of the honorific polite Vte iru is exemplified by (2) below. Here again the longer version is more polite than the shorter one. Thus, the hierarchy of politeness is: o- Vmasu de *irassharu* > Vte *irassharu* > o- Vmasu *da*.

(2) a. 先生は今ご本をお読みでいらっしゃいます。

*Sensei wa ima go-hon o o-**yomi de irasshaimasu.*

(The professor is reading a book.)

b. 先生は今ご本を読んでいらっしゃいます。

</tbody>

There are additional polite adjectival forms (such as o-wakō gozaimasu (from wakai ‘young’), o-tsuyō gozaimasu (from tsuyoi ‘strong’)), but such hyperpolite forms are now seldom used by younger native speakers, except in greetings such as o-hayō gozaimasu (from hayai ‘early’), o-medetō gozaimasu ‘Congratulations!’ (from medetai ‘auspicious’) and arigatō gozaimasu ‘Thank you very much’ (from arigatai ‘grateful’). Adjectives which can be used in honorific polite sentences are limited to those which refer to personal characteristics. Examples follow:

(3) a. お若いですね。
O-wakaidesu ne.
(You are young, aren’t you?)

b. お父さんはお元気でいらっしゃいますか。
O-tō-san wa o-genkide irasshaimasu ka.
(Lit. Is your father healthy? (=How is your father’s health?))

In terms of humble polite expressions, the subject of the sentence is the speaker or someone in his in-group rather than the speaker’s superior. The humble polite predicates are listed below:

Typical sentences containing humble polite expressions follow:

(4) a. 私がそのお荷物をお持ちします。
    *Watashi ga sono o-nimotsu o o-mochi shimasu.*
    (I will carry your luggage.)

b. 母がお連れいたします。
    *Haha ga o-otsure itashimasu.*
    (My mother will take you there.)
Sentence (4b) with its longer humble expression is more humble than (4a) with a shorter humble expression.

In addition to the two major polite expressions (i.e., Honorific Polite and Humble Polite Expressions), there is what might be called *Neutral Polite Expression*. It is called ‘neutral’ because its predicate *de gozaimasu* can be honorific-, humble- or neutral-polite, as shown in the following chart.

**(D) Neutral Polite Form of Copula ‘da’**

<table>
<thead>
<tr>
<th>Nonpolite</th>
<th>Neutral Polite</th>

</thead>
</table>
| (a) 先生は病気だ。 Sensei wa byōki da.  (The professor is ill.) | Speaker’s superior *wa / ga o- / go- ~ de gozaimasu*.  
(Honorific) |
| | 先生はご病気でございます。  
*Sensei wa go-byōki de gozaimasu.* |
| (b) 私は学生だ。 Watashi wa gakusei da.  (I am a student.) | Speaker *wa / ga ~ de gozaimasu*.  
(Humble) |
| | 私は学生でございます。  
*Watashiki wa gakusei de gozaimasu.* |
| (c) あれは議事堂です。 Are wa gijidō desu.  (That’s the Diet building.) | Inanimate object *wa / ga ~ de gozaimasu*.  
(Neutral) |
| | あれは議事堂でございます。  
*Are wa gijidō de gozaimasu.* |

In (Da) the speaker is being polite to the person referred to by the subject. In (Db) the speaker is being humble towards the addressee and in (Dc) the speaker is just using polite speech; it is not directed towards the inanimate object referred to by the subject.

In the case of honorific polite expressions in general, the polite prefix *o-* or *go-* is attached to someone or something belonging to the human subject of a sentence. Although the prefixes *o-* and *go-* are normally attached to Japanese and Sino-Japanese nouns, respectively, the prefix *o-* can be attached to highly Japanized nouns such as *benkyō* (勉強) ‘study’, *cha* (茶) ‘tea’ and *denwa* (電話) ‘telephone’. *Go-* , however, is never attached to traditional Japanese nouns. Example sentences in which *o-* or *go-* are used are given below:
42 CHARACTERISTICS OF JAPANESE GRAMMAR

(5) a. 先生はお車をお持ちですか。
   Sensei wa o-kuruma o o-mochi desu ka.
   (Do you have a car, Professor?)

   b. 田中先生はご本をお書きになった。
   Tanaka-sensei wa go-hon o o-kaki ni natta.
   (Prof. Tanaka has written a book.)

   The prefixes o- and go- can also be attached to things which are not related
to the speaker's superior, especially to basic items related to clothing, food and
housing. The purpose of such usage is to make a sentence sound more elegant.
Female speakers tend to use o- and go- in this way more frequently than males.
Example sentences follow:

(6) a. 今晚はお刺身とお吸い物にしましょうか。
   Konban wa o-sashimi to o-suimono ni shimashō ka.
   (Shall we make it sashimi and clear soup tonight?)

   b. お手洗いはどこですか。
   O-tearai wa doko desu ka.
   (Where is the washroom?)

   It is also important to note that there is a stylistic distinction between the
informal and formal styles, independent of the honorific-, humble-, and neutral-
polite distinctions. The formal style is normally used when one is NOT speak-
ing intimately or personally with someone who belongs to his in-group. The
informal style is used when one is speaking with one's own in-group or when a
verb, an adjective or the copula is used in specific grammatical positions, such
as right before hazu da 'be expected to' or tsuromi da 'intend to', as shown in
(7).

   ⇔ Appendix 4 (C), (D), (E), (I), (J) and (K)

(7) a. 先生は今日研究室にいらっしゃる /* いらっしゃいますはずです。
   Sensei wa kyou kenkyūshitsu ni irassharu / *irassoimasu hazu

   (The professor is expected to be at his office today.)

   b. 私が先生にご連絡する /*ご連絡しますつもりです。
   Watashi ga sensei ni go-renrakusuru / *go-renrakushimasu
tsuumori desu.
   (I intend to contact you, Professor.)

   The formal style is marked by -mas- or -des- as shown in the following
chart.

Students of Japanese will usually be exposed to the formal style in their beginning textbook, because it is the proper stylistic register for adults. They should be aware, however, that the informal style is more basic than the formal style, as evidenced by the fact that native children master the informal style first.

It is interesting to note that whenever the speaker takes a *speaker-oriented position* he switches his style from formal to informal, even in a formal situation. For example, a student speaking with his professor would use the formal style during conversation. But, if he were stung by a bee while talking, he would use the informal *itai ‘ouch’,* rather than the formal form *itaidesu,* because getting stung is purely a speaker-oriented matter. This is an extreme case, but there are many situations where the informal style must be used due to speaker-orientation. This results in a formal discourse interspersed with informal verbals and nominals.

Finally, in practical terms, what are the appropriate situations for polite sentences? Generally speaking, an inferior uses polite speech to an addressee or to the person presented as the topic of a sentence. Typical situations are the following:
<table>
<thead>
<tr>
<th>You are:</th>
<th>Your addressee is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>student</td>
<td>teacher, professor</td>
</tr>
<tr>
<td>subordinate</td>
<td>boss</td>
</tr>
<tr>
<td>salesperson</td>
<td>customer</td>
</tr>
<tr>
<td>junior</td>
<td>senior</td>
</tr>
</tbody>
</table>

Sometimes, an older person uses polite expressions when he is asking a favor of a younger person. Under such circumstances, the older person feels psychologically inferior to the person he is addressing.

Another appropriate situation for polite speech involves discourse among adults of equal status who do not know each other well. Formal Japanese is also used at such occasions as ceremonies, public speeches and public announcements. The informal style, then, is normally reserved for communication among equals who are on intimate terms.
7. Sentence-final Particles

In Japanese there is a group of particles called sentence-final particles. In non-inverted sentences, sentence-final particles are placed at the end of a main clause and indicate the function of the sentence or express the speaker's emotion or attitude toward the hearer in a conversational situation. (Personal letters, which are a sort of conversation between the sender and the receiver, may also contain sentence-final particles.) Some of these particles are used exclusively by male or exclusively by female speakers, so they also function to mark the speaker's sex. In what follows, we will take some common sentence-final particles and see how they are used.

(1) is a declarative sentence. If the sentence-final particles *ka* and *ne* are affixed to (1), as in (2) and (3), the sentence becomes a question ((2)) and a sentence of confirmation ((3)).

(1) 山田さんは先生です。
*Yamada-san wa sensei desu.*
(Mr. Yamada is a teacher.)

(2) 山田さんは先生ですか。
*Yamada-san wa sensei desu ka.*
(Is Mr. Yamada a teacher?)

(3) 山田さんは先生ですね。
*Yamada-san wa sensei desu ne.*
(Mr. Yamada is a teacher, isn't he?)

*Ne* is also used to soften requests and invitations, and it often expresses the speaker's friendliness.

(4) 来て（ください）ね。
*Kite (kudasai) ne.*
(Please come.)

(5) 一緒に行きましょうね。
*Isshoni ikimashō ne.*
(Let's go together, shall we?)

*Ne* can be used with polite imperatives but not with plain imperatives.

(6) 学校へ行きなさいね。
*Gakkō e ikinasai ne.*
(Go to school, okay?)
(7) *学校へ行けね。
   *Gakkō e ike ne.

    Na functions as the negative imperative marker when it is used with informal nonpast verbs.

(8) a. こっちへ来るな。
    Kotchi e kuru na.
    (Don’t come this way.)

b. 動くな。
    Ugoku na.
    (Don’t move.)

When na is affixed to informal declarative or invitational sentences, it sometimes functions like ne, with the limitation that it is used only by men.

(9) a. 一郎は一年生だな。
    Ichirō wa ichi-nensei da na.
    (Ichiro is a freshman, isn’t he?)

b. 一緒に行こうな。
    Isshoni ikō na.
    (Let’s go together, shall we?)

Na is also used by men in monologue situations.

(10) a. おかしいな。誰もいない。どうしたんだろう。
    Okashii na. Dare mo inai. Dō shita n darō.
    (It’s strange. There’s nobody. What’s wrong, I wonder?)

Sometimes na is used with formal sentences in older men’s speech. This na conveys the feeling of weak assertion.

(11) a. それはちょっと難しいですから。
    Sore wa chotto muzukashii desu na.
    (That’s a bit difficult.)

    Yo, zo and ze are used for assertion. Some English equivalents are “I tell you”, “you know”, “believe me”, and “I’d say”. Zo and ze are exclusively used in informal male speech.

(12) a. 私は知りませんよ。
    Watashi wa shirimasen yo.
    (I don’t know. Believe me.)
b. おれは負けないぞ。
   *Ore wa makenai zo.*
   (I won't lose!)

c. これは金だぜ。
   *Kore wa kin da ze.*
   (Hey, this is gold!)

_Yo_ and _ze_ are also used with invitational sentences.

(13) 今晚は飲もうよ / ぜ。
   *Konban wa nomō yo / ze.*
   (Let's drink tonight!)

_Wa_ is affixed only to declarative sentences by female speakers. It gives sentences a feminine flavor and sometimes expresses a light assertion. It is used in both formal and informal speech.

(14) a. 私はまだ十八ですわ。
   *Watashi wa mada jūhachi desu wa.*
   (I am still eighteen.)

b. あたし、うれしいわ。
   *Atashi, ureshii wa.*
   (I'm happy.)

_Wa_ can be used with _ne_ and _yo_ but not with _ka_, as in (15).

(15) a. これ、高いよね。
   *Kore, takai wa ne.*
   (This is expensive, isn't it?)

b. 私も行くよ。
   *Watashi mo iku wa yo.*
   (I'm going, too.)

c. *田中さんも来るわか。
   *Tanaka-san mo kuru wa ka.*
   (Is Mr. Tanaka coming, too?)

_Nē, nā_ and _wā_ are used in exclamatory sentences. _Nē_ can also convey the idea of confirmation. _Nā_ is usually used by men, but can be heard in conversations by younger women. _Wā_ is used only by women.

(16) a. きれいだねえ。  (Male)
   *Kireida nē.*
   (Isn't it pretty!)
b. きれいただよね。 (Female)
   Kireida wa nē.
   (Isn't it pretty!)

c. 鈴木君はよく働くなあ。 (Male)
   Suzuki-kun wa yoku hataraku nā.
   (Boy, Mr. Suzuki works hard!)

d. すてきだわあ。 (Female)
   Sutekida wā.
   (It's wonderful!)

Some sentence-final particles appear in questions in informal speech. For example, in informal male speech kai and dai mark yes / no questions and WH-questions, respectively.  
(⇒ dai; kai)

(17) a. これは君の本かい。 (Male)
    Kore wa kimi no hon kai.
    (Is this your book?)

b. これはだれの本だい。 (Male)
    Kore wa dare no hon dai.
    (Whose book is this?)

In informal female speech the sentence-final n(o) desu ka becomes no spoken with rising intonation. In this use no is almost a female question marker. Examples follow:

(18) a. 友子さん、パーティーに行かないの？ (Female)
   Tomoko-san, pāti ni ikanai no?
   (Aren't you going to the party, Tomoko?)

b. 何を買うの？ (Female)
   Nani o kau no?
   (What are you going to buy?)

Kashira and kanā also appear in sentence-final position and express the speaker’s uncertainty about a proposition. The former is usually used by female speakers and the latter by male speakers.

(19) a. 私にも出来るかしら。 (Female)
   Watashi ni mo dekiru kashira.
   (Can I do it, too, I wonder?)

b. あしたは雨かなあ。 (Male)
   Ashita wa ame kanā.
(Will it rain tomorrow, I wonder?)

As we have seen in the various examples above, sentence-final particles play an important role in determining the function of a sentence. Also, by using these particles in conversation, a speaker expresses his/her emotion or attitude toward the hearer as well as his/her masculinity/femininity.
8. Sound Symbolisms—giseigo and gitaiigo

Japanese is abundant in sound symbolisms in the form of phonomimes (= onomatopoeia, giseigo), phenomimes (= gitaiigo) and psychomimes (= gitaiigo). All languages have phonomimes or direct phonetic representations of actual sounds in every day life, such as the English bang, bzzzwooow, cock-a-doodle-do and meow. English phonomimes are normally considered children's language and are not fully integrated into adult language. In Japanese, however, not only phonomimes but also phenomimes (phonetic representations of phenomena perceptible by non-auditory senses) and psychomimes (phonetic representations of human psychological states) are an integral part of adult spoken and written Japanese. Therefore, it is of vital importance that students of Japanese learn these sound symbolisms as part of their ordinary vocabulary.

A summary of sound symbolisms is given below. Each sound symbolism is an adverb associated with a specific verb. The adverb is normally followed by the quote marker to, because the sound symbolism is perceived as a quotation. The examples contain the verb that typically co-occurs with the given sound symbolism.

(A) Voiceless and Voiced Consonants

Voiced consonants tend to represent something big, heavy, dull or dirty; whereas voiceless consonants represent something small, light, sharp or pretty.

a. きらきら((と)光る) ((shine) sparkingly)
    kirakira ((to) hikaru)

b. ころころ((と)転がる) ((small object) rolls)
    korokoro ((to) korogaru)

c. ぽたぽた((と)落ちる) ((small amount of liquid) drips)
    potapota ((to) ochiru)

d. さくさく((と)切る) ((cut) a thin, light object)
    sakusaku ((to) kiru)

a'. ぎらぎら((と)光る) ((shine) dazzlingly)
    giragira ((to) hikaru)

b'. ごろごろ((と)転がる) ((heavy object) rolls)
    gorogoro ((to) korogaru)

c'. ぽたぽた((と)落ちる) ((large amount of liquid) drips)
    botabota ((to) ochiru)
d'. ざくざく ((と)切る)  ((cut) a thick, heavy object)  
zaku zaku ((to) kiru)

(B) Velar Consonants—k and g

The velar consonants [k] and [g] tend to represent hardness, sharpness, clear-cutness, separation, detachment or sudden change.

a. かちかち ((に)凍る)  ((freeze) hard)  
kachikachi (ni kōru)

b. くっきり ((と)見える)  ((be visible) clearly)  
kukkiri ((to) mieru)

c. きっぱり ((と)別れる)  ((separate from people) once and for all)  
kippari ((to) wakareru)

d. がらっ (と変わる)  ((completely) change)  
garat (to kawaru)

e. ぐっと ((と)引く)  ((pull) with a jerk)  
gut (to hiku)

f. ぽっくり ((と)死ぬ)  ((die) suddenly)  
pokkuri ((to) shinu)

(C) Dental Fricative Consonant—s

The dental fricative consonant [s] tends to represent a quiet state or a quiet and quick motion. [sh] in particular seems to represent some quiet human emotion.

a. さっと ((立ち上がる)  ((stand up) quickly)  
sat (to tachiagaru)

b. するする ((と)滑る)  ((slide) smoothly)  
surusuru ((to) suberu)

c. しとしと ((と)降る)  ((it rains) quietly)  
shitoshito (to furu)

d. しんみり ((と)話す)  ((talk) quietly and intimately)  
shinmiri ((to) hanasu)

e. しん ((とする)  ((be) quiet)  
shin (to suru)

f. ちょっと ((と)する)  ((be despondent)  
shonbori ((to) suru)
g. こそこそ((と)逃げる)  ((escape) secretly)
    kosokoso ((to) nigeru)

h. しゅん((と)する)  ((be) dispirited)
    shun ((to suru))

i. ひっそり((と))する)  ((be) quiet)
    hissori ((to) suru)

[D] Liquid Consonant—r

The liquid consonant [r] tends to represent fluidity, smoothness or slipperiness.

a. すらっ((と)している)  ((figure) is slim)
    surat ((to shite iru))

b. すらすら((と)答える)  ((answer) with great ease)
    suresura ((to) kotaeru)

c. くるくる((と)まわる)  ((turn) round and round)
    kurukuru ((to) mawaru)

d. つるつる((と)している)  ((be) slippery)
    tsurutsuru (shite iru)

e. ぬるぬる((と)している)  ((be) slimy)
    nurunuru (shite iru)

f. さらさら((と)流れる)  ((flow) smoothly)
    sarasara ((to) nagareru)

g. たらたら((と)流れる)  ((sweat or blood) drip continuously)
    taratara ((to) nagareru)

[E] Nasal Consonants—m and n

The nasal sounds tend to represent tactuality, warmth and softness.

a. むくむく((と)している)  ((of a dog or a cat) is plump)
    mukumuku (shite iru)

b. むちむち((と)している)  ((be) plump)
    muchimuchichi (shite iru)

c. なよなよ((と)している)  ((be) slender and delicate)
    nayonayo ((to) shite iru)

d. にちゃにちゃ((と)する)  ((be) sticky)
    nichanicha (suru)
(F) Voiceless Bilabial Plosive—p

The voiceless bilabial plosive (=stop) [p] tends to represent explosiveness, crispiness, strength and suddenness.

a. ぱっと(と明るくなる)  ((become bright) suddenly)
    pat (to akaruku naru)

b. ぴしゃり(と叩く)  ((whack)
    pishari (to tataku)

c. ぴん(とくる)  ((come to (me) in a flash)
    pin (to kuru)

d. べらべら((と)しゃべる)  (gibber, speak fluently)
    perapera ((to) shaberu)

e. ぴんぴん(している)  ((be) peppy)
    pinpin (shite iru)

f. ぶい(と出て行く)  ((leave) suddenly)
    pui (to dete iku)

g. ぶつっ(と切れる)  ((break) suddenly)
    putsut (to kireru)

h. ぼっかり((と)浮かぶ)  ((float) suddenly)
    pokkari ((to) ukabu)

(G) Semi-vowel—y

The semi-vowel [y] tends to represent weakness, slowness and softness.

a. よいよい(になる)  (have locomotor ataxia, loss of reflexes)
    yoiyoi (ni naru)

b. よぼよぼ(になる)  ((become) senile)
    yoboyobo (ni naru)

c. よれよれ(になる)  ((become) worn-out)
    yoreyore (ni naru)
d. ゆらゆら((と)ゆれる) ((sway) like waves)
yurayura ((to) yureru)

e. ゆっくり(話す) ((speak) slowly)
yukkuri (hanasu)

f. やんわり(と言う) ((tell) softly)
yanwari (to iu)

g. よちよち((と)歩く) ((walk) totteringly)
yochiyochi ((to) aruku)

(ii) Back High Vowel—u

The back high vowel [u] tends to represent something that has to do with human physiology or psychology.

a. うとうと(する) (doze)
utoutsu (suru)

b. うきうき(する) ((be) buoyant)
ukiuki (suru)

c. うすうす(感づく) ((perceive) dimly)
usuusu (kanzuku)

d. うずうず(する) (itch for action)
uzuuzu (suru)

e. うつうつ(する) (doze)
utschutaitsu (suru)

f. うっかり(する) ((be) off guard)
ukkari (suru)

g. うっとり(する) ((be) enchanted)
uttori (suru)

h. うら(さびしい) (somewhat (lonely))
ura (sabishii)

i. うんざり(する) ((be) fed up with)
unzari (suru)

(i) Back Vowel—o

The back vowel [o] tends to represent something basically negative with regard to human psychology.

a. おずおず(している) ((be) nervous and timid)
ozuoouzu (shite iru)
b. おどおど（している） ((be) very nervous)
    *odoodo* (shite iru)

c. おろおろ（する） ((be) in a dither)
    *orooro* (suru)

d. おたおた（する） (don’t know what to do)
    *otaota* (suru)

e. おめおめ（とだまされる） ((be deceived) in a shameless manner)
    *omeome* (to damasareru)

(j) Front Vowel—e

The front vowel [e] tends to represent something vulgar.

a. へべれけ（になる） ((become) dead drunk)
    *hebereke* (ni naru)

b. へらへら（（と）笑う） ((laugh) meaninglessly when embarrassed)
    *herahera* (to warau)

c. てらてら（光る） (be glossy)
    *teratera* (hikaru)

d. めそめそ（（と）泣く） (sob)
    *mesomeso* (to naku)

In addition to the regular sound symbolisms there are some basic words that can be explained in terms of (B) and (E) above. Consider the following semantically similar words that are indispensable in Japanese grammar.

The words with the nasal [n] sound more personal, subjective and speaker-oriented than their counterparts with the velar [k] or [g].

It is also to be noted that (C) above would tend to explain why i-type adjectives that end in -shi as in kanashii ‘sad’, sabishii ‘lonely’, tanoshii ‘enjoyable’, ureshii ‘happy’ represent human emotive psychological states.

Also note that the glottal stop is often used to create more emphatic and / or more emotive versions of a given sound, as in pitari vs. pittari ‘tightly’, yahari vs. yappari ‘as expected’, bakari vs. bakkari ‘only’, yohodo vs. yoppodo ‘to a great extent’, to vs. tte ‘that’, i-type adj. stem+kute (e.g., sabishikutte ‘be lonely and ~’ vs. i-type adj. stem+kutte (e.g., sabishikutte), etc.

It is important for students of Japanese to learn basic sound symbolisms, (especially, phenomimes and psychomimes) relatively early in their Japanese language study. These words are an indispensable part of the basic vocabulary of any adult speaker. More importantly, the acquisition, use and understanding of Japanese sound symbolisms allow the student to appreciate the keen sensibility of Japanese language and culture toward directly perceptible objects.
9. Viewpoint

There is more than one way to describe a state or an event, and the choice of expressions depends, in part, on the viewpoint from which the state or event is described. To illustrate this, let us suppose that a person A hit a person B. This event can be expressed by either (1a) or (1b).

(1)    a. A hit B.
       b. B was hit by A.

Both (1a) and (1b) state the same fact, but the speaker's (or writer's) viewpoint is different. That is, when (1a) is chosen, the speaker is describing the event from A's point of view or a neutral viewpoint, and when (1b) is used, the speaker's description is from B's point of view.

There are several principles and rules concerning viewpoint; some are universal and others are specific to Japanese. The following are rather universal principles:

(A) Within a single sentence (excluding coordinate sentences) the viewpoint should be consistent.

(B) When a sentence includes the structure A's B, (e.g., John's wife) the speaker is taking A's viewpoint rather than B's.

(C) When the speaker (or writer) empathizes with someone, the speaker tends to take that person's viewpoint.

(D) The speaker usually describes a situation or an event from his own viewpoint rather than from others' when he is involved in the situation or the event.

(E) It is easier for the speaker to take the viewpoint of the person in a sentence subject position than to take the viewpoint of a person in other positions.

(F) It is easier for the speaker to take the viewpoint of the person who has been established as a discourse topic than to take the viewpoint of someone who has just been introduced in the discourse.

(G) Under normal circumstances the speaker cannot take the viewpoint of a dead person.

Although many of the grammatical principles concerning viewpoint are rather universal, as seen above, there are a number of viewpoint-related expressions which are important and specific to Japanese. Some rules concerning these
expressions are listed below:

(H) The following giving / receiving verbs require the viewpoints shown in (2).

(2) a. やる、あげる、さしあげる (give): the giver's or a neutral viewpoint
    yaru  ageru  sashiageru (when they are used as auxiliary verbs, only the giver's viewpoint)

    b. くれる、くださる (give): the receiver's viewpoint
    kureru  kudasaru

    c. もらう、いただく (get; receive): the receiver's viewpoint
    morau  itadaku

(H), together with (A) and (D), explains the unacceptability of the following sentences.

(⇒ ageru\textsuperscript{1,2}; kureru\textsuperscript{1,2}; morau\textsuperscript{1,2})

(3) a. *一郎は私にパンをあげた。
    *Ichirō wa watashi ni pan o ageta.
    (Ichiro gave me some bread.)

    b. *私は和男にペンをくれた。
    *Watashi wa Kazuo ni pen o kureta.
    (I gave Kazuo a pen.)

    c. *花子は私にえんぴつをもらった。
    *Hanako wa watashi ni enpitsu o moratta.
    (Hanako received a pencil from me.)

(1) The passive construction, whether direct or indirect, requires the viewpoint of the referent of the subject. (Cp. (E))

Together with (A), (B) and (D), this explains the unnaturalness of sentences like (4).

(⇒ rareru\textsuperscript{1})

(4) a. *私のむすこは私にしかられた。
    *Watashi no musuko wa watashi ni shikarareta.
    (My son was scolded by me.)

    b. *私の家内は私に秘密の手紙を読まれた。
    *Watashi no kanai wa watashi ni himitsu no tegami o yomareta.
    (My wife had her secret letter read by me.)

(J) When the verb kuru 'come' is used, the speaker's viewpoint is somewhere close to the arrival point. When kuru is used as an auxiliary verb, the viewpoint is the point to which an action is directed or a change proceeds.
(k) When the verb *iku* ‘go’ is used, the speaker’s viewpoint is somewhere close to the departure point. When *iku* is used as an auxiliary verb, the viewpoint is the point from which an action is directed or a change proceeds.

(J) and (k) explain the unacceptability of the sentences in (5) and (6) under the given conditions.

(5) a. [The speaker is in Japan.]

*私は来年アメリカへ来ます。
*Watashi wa rainen Amerika e *kimasu.*
(I will come to America next year.)

b. [The speaker is in America.]

*私は去年アメリカへ行きました。
*Watashi wa kyonen Amerika e *ikimashita.*
(I went to America last year.)

(6) a. *私はどろぼうにおそいかかって来た。
*Watashi wa dorobō ni osoikakatte *kita.*
(Lit. I came to attack the robber.)

b. *どろぼうは私におそいかかって行った。
*Dorobō wa watashi ni osoikakatte *itta.*
(Lit. The robber went to attack me.)

(L) When adjectives like *hoshii* ‘want’ (lit. desirable), *ureshii* ‘happy’ and *kanashii* ‘sad’ which describe one’s personal feelings are used with the third person subject, the speaker empathizes with that person, which usually implies that the speaker is taking the viewpoint of that person.

(Cp. (C))

Thus, if the subject is someone the speaker is unable to empathize with, the adjectives mentioned in (L) cannot be used, as in (7).

(7) a. *見知らぬ人がたばこが欲しい。
*Mishiranu hito ga tabako ga *hoshii.*
(A stranger wants a cigarette.)

b. *通りがかりの人がうれしい。
*Tōrigakari no hito ga *ureshii.*
(A passerby is happy.)

(M) Kinship terms can be used for the first person and (less commonly) the second person. In this case the proper kinship term for the first person
(or the second person) is selected from the viewpoint of someone X with whom the speaker empathizes. The person X is usually lower in status than the person for whom a kinship term is used. (e.g., one’s little brother)  
(Cp. 4. Personal Pronouns)

(8) a. [From an elder brother to his younger brother]

兄さんに見てごらん。
_Ni-san ni misete goran._
(Let me see it.)

b. [From an uncle to his niece]

おじさんがしてあげよう。
_Oji-san ga shite ageyō._
(I’ll do it for you.)

c. [Spoken by a mother to her daughter Yoshiko from the viewpoint of the daughter’s little brother Hiroshi]

お姉ちゃん、ひろしに貸してあげなさい。
_O-nē-chan, Hiroshi ni kashite agenasai._
(Yoshiko, let Hiroshi have it.)

(N) When a reflexive pronoun _jibun_ ‘self’ is used, the speaker tends to empathize with the referent of _jibun_, which implies that the speaker’s viewpoint is that of the referent.  
(⇒ _jibun_)

In (9) the referent of _jibun_ is Hanako and the speaker is taking Hanako’s viewpoint.

(9) 花子は太郎が自分を愛していると信じていた。

_Hanako wa Tarō ga jibun o aishite iru to shinjite ita._
(Hanako believed that Taro loved her.)

(10) is unnatural because the viewpoint is inconsistent.

(10) *妻は私が自分を今でも愛していると信じている。

* _Tsuma wa watashi ga jibun o ima demo aishite iru to shinjite iru._
(My wife believes that I still love her.)

Examples

(a) 大野さんは山本さんに本をあげた。
    Ōno-san wa Yamamoto-san ni hon o ageta.
    (Ms. Ono gave Mr. Yamamoto a book.)

(b) 君はアンに何をあげましたか。
    Kimi wa An ni nani o agemashita ka.
    (What did you give to Ann?)

Notes

1. Ageru is one of a set of giving and receiving verbs; the meaning is ‘give’. However, ageru cannot be used when the indirect object is the first person (i.e., I or we) or a person with whom the speaker empathizes (usually a member of the speaker’s in-group). Thus, (1a) and (1b) are ungrammatical.

   (1) a. *花子は私に本をあげた。
        *Hanako wa watashi ni hon o ageta.
        (Hanako gave me a book.)

   b. *花子は私のむすこに本をあげた。
      *Hanako wa watashi no musuko ni hon o ageta.
      (Hanako gave my son a book.)

   The reason for this is as follows: Ageru requires the giver's point of view or a neutral point of view when describing an event. When an event involves the first person or a person the speaker empathizes with,
however, the event is normally described from that person’s point of view. (See Characteristics of Japanese Grammar, 9. Viewpoint.) Therefore, if the first person or a person the speaker empathizes with is a recipient in ageru-sentences, a viewpoint conflict arises, making the sentences ungrammatical. The grammatical sentences for (1a) and (1b) are (2a) and (2b), respectively.

(2) a. 花子は私に本をくれた。
   Hanako wa watashi ni hon o kureta.
   (Hanako gave me a book.)

b. 花子は私のむすこに本をくれた。
   Hanako wa watashi no musuko ni hon o kureta.
   (Hanako gave my son a book.)

2. The humble polite version of ageru is sashiageru. Example:

(3) 私は先生に本をさしあげました。
    Watashi wa sensei ni hon o sashiagemashita.
    (I gave my teacher a book.)

The degree of politeness expressed in sashiageru is higher than that of kudasaru and itadaku, which are the polite versions of kureru and morau, respectively.

(⇒ kureru¹, REL. II)

3. When the giver is in a higher position than the recipient or the recipient is a person very close to the speaker, yaru is used instead of ageru. Examples:

(4) a. 私は弟に本をやった。
    Watashi wa otōto ni hon o yatta.
    (I gave my little brother a book.)

b. ひろしほ猫にミルクをやった。
    Hiroshi wa neko ni miruku o yatta.
    (Hiroshi gave milk to the cat.)

c. [Tom is the speaker’s intimate friend.]
   私はトムにケーキをやりました。
   Watashi wa Tomu ni kēki o yarimashita.
   (I gave a cake to Tom.)
ageru² あげる  aux. v. (Gr. 2)

S.o. gives some action as a favor to a person who is not a member of the giver's in-group but whose status is about equal to that of the giver.

do s.t. for s.o.; do s.o. a favor by doing s.t.

Examples

(a) 君はお母さんに何をしてあげましたか。
   *Kimi wa o-kā-san ni nani o shite agemashita ka.*
   (What did you do for your mother?)

(b) 田中さんはスミスさんに本を貸してあげた。
   *Tanaka-san wa Sumisu-san ni hon o kashite ageta.*
   (Mr. Tanaka lent a book to Mr. Smith.)
1. Ageru is used as an auxiliary verb with the te-form of verbs. The meaning of Vte ageru is ‘do s.t. for s.o.’ or ‘do s.o. a favor by doing s.t.’ The restriction which applies to ageru\(^1\) also applies to ageru\(^2\). Namely, sentences with Vte ageru are descriptions from the viewpoint of the benefactor (i.e., the person in subject position); therefore, the indirect object must not be the first person or a person the speaker empathizes with. (⇒ ageru\(^1\), Note 1) Thus, (1a) and (1b) are ungrammatical.

   (1) a. *花子は私に日本語を教えてあげた。
       *Hanako wa **watashi ni nihongo o oshiete ageta.**
       (Hanako taught me Japanese.)

   b. *メアリーは私のむすめにペンを買ってあげた。
       *Meari wa **watashi no musume ni pen o katte ageta.**
       (Mary bought a pen for my daughter.)

   The grammatical sentences for (1a) and (1b) are (2a) and (2b), respectively. (⇒ kureru\(^2\))

   (2) a. 花子は私に日本語を教えてくれた。
       **Hanako wa watashi ni nihongo o oshiete kureta.**

   b. メアリーは私のむすめにペンを買ってくれた。
       **Meari wa watashi no musume ni pen o katte kureta.**

2. As in KS (B), if the person receiving the benefit is the direct object of the sentence, the indirect object is omitted. Therefore, (3a) and (3b) are ungrammatical.

   (3) a. *僕は春子さんに春子さんをなぐさめてあげた。
       *Boku wa **Haruko-san ni Haruko-san o nagusamete ageta.**

   b. *僕は春子さんになぐさめてあげた。
       *Boku wa **Haruko-san ni nagusamete ageta.**

3. When the main verb is intransitive, ageru is not used along with ni. The following sentence is ungrammatical,

   (4) *私達はジョンに働いてあげた。
       *Watashitachi wa Jon ni hataraitte ageta.
       (We worked for John.)

   In this case, no tame ni ‘for the sake of’ is used, as in (5). (⇒ tame(ni))
(5) 私達はジョンのために働いた。
Watashitachi wa Jon no tame ni hataraita.
(We worked for John's sake.)

4. The humble polite version of Vte ageru is Vte sashiageru. Example:

(6) 私は先生にピアノをひいてさせあげました。
Watashi wa sensei ni piano o hiite sashiagemashita.
(I played the piano for my teacher.)

The degree of politeness expressed in Vte sashiageru is higher than that of Vte kudasaru and Vte itadaku, which are the polite versions of Vte kureru and Vte morau, respectively. (⇒ kureru^1, REL. II)

5. When the benefactor is in a higher position than the recipient or is of equal status and his relationship to the recipient is close, Vte yaru is used instead of Vte ageru. Examples:

(7) a. 私は妹にレコードを買ってやった。
Watashi wa imōto ni rekōdo o katte yatta.
(I bought my little sister a record.)

b. じゅんは猫に魚を焼いてやった。
Jun wa neko ni sakana o yaite yatta.
(Jun roasted fish for his cat.)

c. [John is the speaker’s close friend.]
私はジョンにラジオを貸してやりました。
Watashi wa Jon ni rajio o kashite yarimashita.
(I lent John my radio.)

Examples

(a) スミスさんは日本にいる間英語を教えていました。
    Sumisu-san wa Nihon ni iru aida eigo o oshiete imashita.
    (Mr. Smith was teaching English (all during the time) while he was in Japan.)

(b) 子供達がテレビを見てる間私は本を読んでいました。
    Kodomotachi ga terebi o mite iru aida watashi wa hon o yonde imashita.
    (I was reading a book (all during the time) while my children were watching TV.)

(c) 高橋さんはアメリカにいる間にゴルフを覚えました。
    Takahashi-san wa Amerika ni iru aida ni gorfu o oboemashita.
    (Mr. Takahashi learned golf while he was in America.)

(d) 中川さんのお母さんは中川さんがパリに留学している間に病気になりました。
    Nakagawa-san no o-kā-san wa Nakagawa-san ga Pari ni ryūgakushite
    iru aida ni byōki ni narimashita.
    (Mr. Nakagawa’s mother became ill while he was studying in Paris.)

(e) 秋子は子供がいない間に本を読む。
    Akiko wa kodomo ga inai aida ni hon o yomu.
    (Akiko reads books while her children are not at home.)

Notes

1. The subjects for the aida-clause (=subordinate clause) and the main clause can be different as in Exs. (b), (d) and (e) or can be the same as in Exs. (a) and (c). When the subjects are different, the subject in the aida-clause is marked not by wa but by ga.

2. The verb before aida is normally nonpast Vte iru or iru, regardless of the tense of the main clause.
3. *Aida*, if followed by *ni*, a particle of specific time point, means that the time span of an event identified by the main clause falls within the time span of an event identified by the *aida*-clause, as in Exs. (c), (d) and (e). *Aida* without *ni*, as in Exs. (a) and (b), indicates that the two events are assumed to cover the same span of time. Thus, if the main verb is a punctual verb, *aida* should be used with *ni*. The following sentence, therefore, is ungrammatical.

(1) *山田さんのパリに留学している間お母さんが病気になった。
    *Yamada-san ga Pari ni ryūgakushite iru *aida* o-kā-san ga byōki
    *ni natta.*

(*Mr. Yamada’s mother became ill (all during the time) while he was studying in Paris.)

The difference between *aida* *ni* and *aida* can be diagrammed as follows:

```
    Event 1
      |
      |
aida ni
      |
      |
    Event 2
     |
     |
   (main clause)
     |
     |
   (subordinate clause)
```

4. A noun or an adjective can be used before *aida*.

(2) 夏休みの間レストランでアルバイトをしました。
    *Natsuyasumi no* *aida* resutoran de arubaito o shimashita.
    (During the summer vacation I worked part time at a restaurant.)

(3) 夏休みの間にガールフレンドが出来ました。
    *Natsuyasumi no* *aida* ni gāurfurendo ga dekimashita.
    (During the summer vacation I found a girl friend.)

(4) 長い間母に手紙を書いていません。
    *Nagai* *aida* haha ni tegami o kaite imasen.
    (I haven’t written to my mother for a long time.)

(5) 若い間に本を出来るだけたくさん読みなさい。
    *Wakai* *aida* ni hon o dekiru dake takusan yominasai.
    (Read as many books as you can while you are young.)
5. The non-temporal *aida* which means ‘space between’ or ‘relationship’ is used in the structure *A to B (to) no aida* ‘between A and B ’ as in:

(6) 日本とアメリカ（と）の間には海しかない。
    *Nihon to Amerika (to) no aida ni wa umi shika nai.*
    (There is only ocean between Japan and America.)

(7) 山口と僕（と）の間は決して悪くない。
    *Yamaguchi to boku (to) no aida wa kesshite warukunai.*
    (The relationship between Yamaguchi and me is not bad at all.)

The usage of *aida* meaning ‘relationship’ in (7) is a metaphorical extension of physical space between two persons.

6. The verb *iru* ‘(an animate object) exists’ can be used by itself, as in Ex. (c), due to its stative nature. Some adjectives such as *takai* ‘expensive’, *yasui* ‘cheap’, *atatakai* ‘warm’, *suzushii* ‘cool’, *wakai* ‘young’ can also be used in this way, as follows:

(8) 若い間にスポーツをいろいろした方がいいです。
    *Wakai aida ni supōtsu o iroiro shita hō ga ii desu.*
    (It’s better to do various sports while you are young.)

These adjectives, however, sound a little more natural with *uchi ni* ‘while’.

(⇒ *uchi ni*)

[Related Expression]

If the subjects of the main and subordinate clauses are identical and if the verbs are action verbs, *aida* can be replaced by *nagara*, but with different meaning.

[1] 雪子はご飯を食べている間テレビを見ていただい。
    *Yukiko wa gohan o tabete iru aida terebi o mite ita.*
    (Yukiko was watching TV while she was eating her meal.)

[2] 雪子はご飯を食べながらテレビを見ていただい。
    *Yukiko wa gohan o tabenagara terebi o mite ita.*
    (Lit. Yukiko was primarily watching TV, although simultaneously she was eating her meal. (=Yukiko was eating her meal while watching TV.))

[1] and [2] focus on ‘duration of some action/state’ and ‘accompanying minor action’, respectively.

(⇒ *nagara*)

(Miss Suzuki does not eat much.)

(b) 私はあまり速く走れません。
Watashi wa amari hayaku hashiremasen.
(I cannot run very fast.)

*Notes*

1. The adverb *amari* usually occurs in negative sentences, meaning ‘not very (much)’. *Amari* is one of a group of adverbs which co-occur with negative predicates. They include:

   (1) zenzen ‘(not) at all’; mettani ‘rarely, seldom’; kesshite ‘never, by no means’; sappari ‘(not) at all’; sukoshimo ‘(not) a bit’; chittomo ‘(not) a bit’

2. *Amari* is a phonological variant of *amari* and usually used in conversation.

3. In limited situations, *amari* can be used in affirmative sentences, too. In this case, it means ‘very; too’ with a negative implication. Examples:

   (2) a. スコットがあまり失礼なことを言うのでサリーは怒って帰ってしまった。
Sukotto ga amari shitsureina koto o iu node Sarī wa okotte kaette shimatta.
(Since Scott was very rude (lit. said very rude things), Sally got mad and went home.)

   b. 井上さんはあまり酒を飲んだので病気になった。
Inoue-san wa amari sake o nonda node byōki ni natta.
(Mr. Inoue drank too much and became ill.)

c. それはあんまりです。
Sore wa anmari desu.
(You're (lit. That's) too cruel.)

(There are two TV sets in my apartment.)

(b) デトロイトはミシガン州にあります。
Detoroito wa Mishigan-shū ni arimasu.
(Detroit is in the State of Michigan.)
(c) 和田さんのうち(に)はクーラーがない。
Wada-san no uchi (ni) wa kūrā ga nai.
(There is no air-conditioner at Mr. Wada’s.)

Notes

1. Aru expresses the existence of or the possession of inanimate things including abstract things such as events and problems. Thus, (1) is ungrammatical.

(1) *この町には日本人がある。
*Kono machi ni wa nihonjin ga aru.
(There are Japanese in this town.)

For animate things, iru¹ is used.  

2. The negative informal form of aru is not aranai but nai.

3. Two sentence patterns can be used with aru. The KS (A) pattern is used when a location is presented as a topic. In this case, what exists is under focus. In this pattern, the location marker ni can optionally drop. The KS (B) pattern is used when something which exists is presented as a topic. In this case, where it exists is under focus. Compare the two patterns in (2).

(2) A: 早稲田大学はどこにありますか。
Waseda Daigaku wa doko ni arimasu ka.
(Where is Waseda University?)

B: 早稲田大学は東京にあります。
Waseda Daigaku wa Tōkyō ni arimasu.
(Waseda University is in Tokyo.)

A: 東京には早稲田大学しかありませんか。
Tōkyō ni wa Waseda Daigaku shika arimasen ka.
(Lit. Are there no universities in Tokyo but Waseda University? (=Is Waseda University the only university in Tokyo?))

B: いいえ、東京には大学がたくさんあります。
īe, Tōkyō ni wa daigaku ga takusan arimasu.
(No, there are many universities in Tokyo.)

4. A thing (whether animate or inanimate) can also occur in the location position of KS (A). In this case, the sentence expresses possession rather than existence. Examples:
3. a. この車(に)はカー・ステレオがある。
   Kono kuruma (ni) wa kā sutereō ga aru.
   (Lit. There is a car stereo in this car. (= This car has a car stereo.))

b. 私(に)は車がある。
   Watashi (ni) wa kuruma ga aru.
   (Lit. There is a car with me. (= I have a car.))

Note that even if aru expresses the idea of possession, possessed things are marked not by o but by ga. This is because aru essentially indicates existence.

5. When aru is used to express the idea of having and the object is animate, that object must be someone who maintains a very close relationship with the possessor, such as a family member, a relative or a friend. Thus, (4) is acceptable, but (5) is odd.

4. 私(に)は子供が三人ある。
   Watashi (ni) wa kodomo ga sannin aru.
   (I have three children.)

5. ??私(に)は運転手がある。
   ??Watashi (ni) wa untenshu ga aru.
   (I have a chauffeur.)

Since aru in this usage is a possessive expression, it cannot be used in situations where the idea indicates existence. Thus, (6) is unacceptable.

6. 私(に)は母がもうありません。
   *Watashi (ni) wa haha ga mō arimasen.
   (I don’t have my mother now.)

In this case, iru must be used.

6. When aru is used for events such as parties and concerts, the particle marking locations must be de as in (7).

(⇒ de¹; ni⁰)

7. 今日サムのうちで/にパーティーがある。
   Kyō Samu no uchi de / ni pātī ga aru.
   (There is a party at Sam’s today.)

[Related Expressions]

I. There is another possessive expression, motte iru, which is the te-form of motsu ‘hold’ followed by the auxiliary verb iru. However, motte iru is used only when the possessor is animate and the possessed thing
is inanimate. Thus, [1] is acceptable, but [2] and [3] are not.

[1] ジョンはいい車を持っている。
Jon wa ii kuruma o motte iru.
(John has a good car.)

[2] *ジョンは妹を持っている。
*Jon wa imōto o motte iru.
(John has a younger sister.)

[3] *この車はクーラーを持っている。
*Kono kuruma wa kūrā o motte iru.
(This car has an air-conditioner.)

Groups and organizations of people such as political parties, countries, institutions and companies can also be possessors in sentences with motte iru, as in [4].

[4] この大学はいい図書館を持っている。
Kono daigaku wa ii toshokan o motte iru.
(This university has a good library.)

II. iru¹ is also used to express existence. However, iru¹ is used only for animate objects. (See Note 1.)

(Drinks have already been bought.)

(b) 窓が開けてある。

Mado ga akete aru.

(The window has been open / is open.)

Notes

1. Aru is used with Vte as an auxiliary verb. Two points are indicated by the Vte aru expression:

   (A) Someone did something to X. (Thus, Vte is usually a transitive verb.)

   (B) X is still in that state.

   X is most frequently marked by the topic marker wa or the subject marker ga; occasionally it is marked by the direct object marker o.

2. The agent is usually omitted because he is unimportant, unknown or obvious.

[Related Expressions]

There are expressions similar to Vte aru, namely, Vte iru and Vte oku. Let us compare [1] and [2] with Ex. (b).

[1] 窓が開いている。

Mado ga aite iru.

(The window is open.)

[2] 私は窓を開けておく。

Watashi wa mado o akete oku.

(I open / will open the window (in advance).)
[1] simply means that the window is open. It doesn't imply that someone opened it. Aite, the te-form of ako 'open', is an intransitive verb. As seen in [2], Vte oku means 'do s.t. in advance for future convenience'. An important difference between Vte aru and Vte oku is that the former expresses a state, while the latter expresses an action. Note that in Vte oku sentences, the agent is not omitted unless it is known.

**Examples**

(a) これは松本先生に聞けば分かります。
   Kore wa Matsumoto-sensei ni kikeba wakarimasu.
   (You’ll understand it if you ask Prof. Matsumoto.)

(b) その町は車で行けば三十分で行ける。
    Sono machi wa kuruma de ikeba sanjuppun de ikeru.
    (You can get to that town in thirty minutes if you go by car.)

(c) 安ければ買います。
    Yasukereba kaimasu.
    (I’ll buy it if it’s cheap. / I would buy it if it were cheap.)

(d) 時間があれば京都へも行きたい。
    Jikan ga areba Kyōto e mo ikitai.
    (If I have time, I want to go to Kyoto, too. / If I had time, I would want
to go to Kyoto, too.)

(e) 見たければ見なさい。
    Mitakereba minasai.
    (If you want to see it, see it.)

(f) 出来ればこれもやってください。
    Dekireba kore mo yatte kudasai.
    (Please do this, too, if you can.)

**Notes**

1. “$S_1$ $ba$ $S_2$” basically expresses a general conditional relationship between
   the two propositions represented by $S_1$ and $S_2$. $S_1$ represents a condition
   and $S_2$ a proposition which holds or will hold true under the condition.
   ($Ba$ is, in fact, the origin of the topic marker $wa$.)

2. $S_2$ can be a statement of the speaker’s volition or hope, as in Exs. (c)
   and (d).

3. $S_2$ can be a command, a request or a suggestion, as in Exs. (e) and (f).
   In this case, however, $S_1$ cannot be an action. Thus, in (1) and (2) $ba$
   is ungrammatical.

(1) 山本さんが来たら/*来れば知らせしてください。
    Yamamoto-san ga kitara/*kureba shirasete kudasai.
    (If Mr. Yamamoto comes in, please let me know.)
(2) シカゴへ行く (の) なら / *行けばパスで行ったらどうですか。
Shikago e iku (no) nara / *ikeba basu de ittara dō desu ka.
(If you go to Chicago, why don’t you go by bus?)

4. $S_1$ can express both factual and counterfactual conditions. Thus, Exs. (c) and (d) can be either factual or counterfactual statements.

($\Rightarrow ba$ yokatta)

5. $S_1$ can be a state or an event in the past if it is counterfactual or habitual. Examples:

(3) もっと安ければ買いました。
Motto yasukereba kaimashita.
(I would have bought it if it had been much cheaper.)

(4) 雨が降ればよく家で本を読んだものだ。
Ame ga fureba yoku ie de hon o yonda mono da.
(When it rained, I often read at home.)

However, $S_1$ cannot be a single factual event in the past even if it represents a condition, as seen in (5).

($\Rightarrow tara$)

(5) 日本へ行ったら / *行けば日本語が上手になった。
Nihon e ittara / *ikeba nihongo ga jōzuni natta.
(I became good at Japanese when I went to Japan.)

6. “$S_1$ ba $S_2$” does not mean more than a conditional relationship; therefore, this construction cannot be used when the speaker wants to suggest something by a conditional sentence. For example, (6) does not suggest that one should not approach the cage. It is acceptable only when it means, as a mere conditional statement, that one is in danger under the condition that one gets close to the cage.

(6) そのおりに近づけばあぶないですよ。
Sono ori ni chikazukeba abunaidesu yo.
(It is dangerous if you get close to the cage.)

(In order to suggest that one should not approach the cage, chikazuku to or chikazuitara is used instead of chikazukeba.)

7. There are some idiomatic expressions which utilize the “$S_1$ ba $S_2$” construction. ($\Rightarrow ba$ yokatta; nakereba naranai; to ieba)

(Prof. Fisher is talking only with Lisa.)
(6) 十人ばかりの友達が手伝ってくれました。
Jūnin bakari no tomodachi ga tetsudatte kuremashita.
(About ten friends helped me.)

**Notes**

1. The basic idea which *bakari* expresses is that there is nothing except what is stated. When V inf.-nonpast precedes *bakari*, the whole expression means there is nothing left to do (to complete something) but what is stated by the verb. In some contexts, V inf.-nonpast *bakari* means that someone does nothing but what is stated. Example:

   (1) 彼は笑うばかりで何も説明してくれない。
   *Kare wa warau bakari de nanimo setsumeishite kurenai.*
   (He just laughs and doesn’t explain anything to me.)

2. When V inf.-past precedes *bakari*, the whole expression means that there has been almost no time for anything to happen since what is stated took place. That is, something has just happened, or someone has just done something.

3. When *bakari* follows “N ga” or “N o”, *ga* or *o* drops. The directional *e* and *ni* may be either deleted or retained. Other case particles do not drop when they are followed by *bakari*.

4. *Bakari* in classical Japanese expressed the speaker’s conjecture and this usage is still seen in the “Quantifier *bakari*” pattern, where *bakari* means ‘about’.

(c) ああ、もっと英語を勉強しておけばよかったなあ。

Ā, motto eigo o benkyōshite okeba yokatta nā.
(Oh, I wish I had studied English harder!)

Notes

1. Vcond ba yokatta is an idiomatic expression which means ‘I wish ~ had done s.t.’ It consists of a conditional clause with ba and yokatta ‘was good’ and literally means ‘It would have been good if ~ had done s.t.’

2. When there is no subject in a ba-clause sentence, the first person is the implicit subject.

3. This expression is often used with exclamatory words such as あ ‘oh’ and the sentence-final particle of exclamation nā, as in Ex. (c).

4. “S.o. (other than the first person) wishes ~ had done s.t.” is expressed using this phrase and the verb omou ‘think’, as in (1).

(⇒ iru², Note 4; to³)
(1) ビルは日本へ行けばよかったと思っている。
   *Biru wa Nihon e ikeba yokatta to omotte iru.*
   (Lit. Bill thinks that it would have been good if he had gone to Japan. (=Bill wishes he had gone to Japan.))

**[Related Expression]**

In “Vcond *ba yakatta*”, Vcond *ba* expresses a counterfactual action or state in the past. In a similar expression “Vte *yokatta*”, Vte expresses a factual action or state in the past. Compare [1] with Ex. (a).

[1] あの本を読んでよかった。
   *Ano hon o yonde yokatta.*
   (Lit. It was good that I read that book. (=I’m glad I read that book.))

Examples

(a) 新しい仕事はどうだい。
Atarashii shigoto wa dō dai.
(How's your new job?)

(b) あの人はだれだい。
Ano hito wa dare dai.
(Who is that person?)

(c) 何かおかしいんだい。
Nani ga okashii n dai.
(What's funny?)

(d) どの人が佐藤先生なんだい。
Dono hito ga Satō-sensei na n dai.
(Which person is Prof. Sato?)

Notes

1. *Dai* can also be used with declarative sentences for emphasis in boys’ speech, as in (1)

(1)  a. これは僕のだい。
   Kore wa boku no dai.
   (This is mine.)

   b. 僕も行くんだい。
   Boku mo iku n dai.
   (I will go, too.)

2. When *dai* is used with interrogative sentences, the sentences must be WH-questions. Thus, the following sentences are ungrammatical.

(2)  a. *あの人は先生だい。
   *Ano hito wa sensei dai.
   (Is that person a teacher?)

   b. *村田さんも行くんだい。
   *Murata-san mo iku n dai.
   (Is Mr. Murata going, too?)

For yes-no questions, *kai* is used.  

(⇔ *kai*)
3. Questions with *dai*, as in KS (A), and those with *n dai*, as in KS (B), correspond to questions without *no desu* and those with *no desu* in formal speech, respectively. 

(⇒ *no da*)

4. *Dai* actually consists of the copula *da* and the particle *i*. Thus, it can follow only *na*-type adjective stems, nouns and noun equivalents. The following sentences are ungrammatical because *dai* follows a verb or an *i*-type adjective.

(3) a.  *だれが行くだい。
*Dare ga iku dai.
(Who is going?)

b.  *どれがおもしろだい。
*Dore ga omoshiroi dai.
(Which one is interesting?)

*N dai* can follow verbs and *i*-type adjectives, as in KS (B) and Ex. (c), because *n* is a nominalizer (the colloquial form of *no*) and it changes the preceding sentence into a noun equivalent.

5. In informal male speech, questions as in (3) are expressed as in (4), with rising intonation.

(4) a.  だれが行く？
*Dare ga iku?  
(Who is going?)

b.  どれがおもしろい？
*Dore ga omoshiroi?
(Which one is interesting?)

6. The past form of *dai* is *dattai*, but it is not frequently used. The more frequently used past form of *dai* is *datta* with rising intonation, as seen in (5).

(5) a.  新しい仕事はどうだった？
*Atarashii shigoto wa dō datta?*  
(How was your new job?)

b.  どこが静かだった？
*Doko ga shizukadatta?  
(What place was quiet?)

[Related Expression]

In informal speech, the question marker *ka* (i.e., *ka?*) is not usually used.
The following chart summarizes the endings for informal questions.

Sinf ka is used in very informal speech or in vulgar speech. Female informal endings can also be used by male speakers.

    (It was a party for students only.)

(j) 出来るだけゆっくり話して下さい。
    Dekiru dake yūkuri hanashite kudasai.
    (Please speak as slowly as possible.)

Notes

1. When dake modifies a preceding noun, as in Exs. (a), (b), (c), and (d),
the particle that is used with the noun can be positioned before or after
dake, except for the particles ga, o and wa, which can be optionally
used only after dake.

2. The optional positionings of the particles other than ga, o and wa create
a subtle semantic difference. Distinctive emphasis is placed on the
particle, yielding a meaning of exclusiveness in the case of N+Prt+
dake. No meaning of exclusiveness is implied in the case of N+dake
+Prt.

3. If dake is used in:

    \[ \sim \left\{ \begin{array}{l}
    \{V / Adj (i)\} \text{inf} \\
    \{\text{Adj (na) stem } na / datta\} \\
    \end{array} \right\} +dake \{da / desu\} \]

as illustrated by KSs (C), (D) and (E), dake modifies the entire pre-
ceding part and means ‘\sim, that’s all.’

Compare (1a) and (1b) below:

(1) a. 魚だけ(を)食べた。
    Sakana dake (o) tabeta.
    (I ate only fish.)

    b. 魚を食べただけだ。
    Sakana o tabeta dake da.
    (I ate fish, that’s all.)

In (1a) dake modifies only the preceding noun sakana ‘fish’, while
in (1b) dake modifies the entire preceding part of the sentence sakana
o tabeta ‘I ate fish.’

4. V(Potential)+dake as in Ex. (j) means ‘as much as one can ～’.

(2) a. 食べられるだけ食べたい。
    Taberareru dake tabetai.
    (I’d like to eat as much as I can (eat).)
b. 踊れるだけ踊ろう。
Odoreru dake odorō.
(Let’s dance as much as we can (dance).)

Examples

(a) あの人は小説を読むだけではなく書きます。
Ano hito wa shōsetsu o yomu dake de wa naku kakimasu.
(He not only reads novels but also writes them.)

(b) ブラウンさんは日本へ行っただけではなく住んだこともあります。
Buraun-san wa Nihon e itta dake de wa naku sura koto mo arimasu.
(Mr. Brown has not only been to Japan, but has also lived there.)

(c) このアパートは高いだけでなく大変狭いです。
Kono apāto wa takai dake de naku taihen semaidesu.
(This apartment is not only expensive but it is also very small.)

(d) 幸子は頭がよかっただけではなく、とても親切でした。
Sachiko wa atama ga yokatta dake de wa naku, totomo shinsetsudeshita.
(Sachiko was not only bright but was also very kind.)

(e) この車はきれいなだけではなく、よく走ります。
Kono kuruma wa kireina dake de wa naku, yoku hashirimasu.
(This car is not only pretty but also runs well.)

(f) 日本人だけでなくアメリカ人もうよく働きます。
Nihonjin dake de naku amerikajin mo yoku hatarakimasu.
(Not only Japanese but also Americans work hard.)

(g) 中村さんはアメリカやヨーロッパだけではなく東南アジアにもよく出張します。
Nakamura-san wa Amerika ya Yōroppa dake de wa naku Tōnan Ajia ni mo yoku Shutōshimasu.
(Mr. Nakamura makes a business trip not only to America and Europe but also to Southeast Asia.)

(h) ジョンソンさんは日本語だけではなく中国語も話せます。
Jonson-san wa nihongo dake de wa naku chūgokugo mo hanasemasu.
(Mr. Johnson can speak not only Japanese but also Chinese.)

Note

In “Noun ~ dake de (wa) naku Noun ~ mo”, the two nouns can be followed by various particles.

(1) 手紙は友達（から）だけではなく先生からも来ました。
Tegami wa tomodachi (kara) dake de wa naku sensei kara mo kimashita.
(Letters came not only from my friends but also from my teachers.)
(2) 手紙は友達(に)だけではなく先生にも書きました。
   Tegami wa tomodachi (ni) dake de wa naku sensei ni mo kakimashita.
   (I wrote letters not only to my friends, but also to my teachers.)

[Related Expression]

In the majority of cases dake can be replaced by bakari. When one needs
to define limitation in a rigid way, however, dake is preferable. For example:

[1] [Teacher to his student.]
   あしたまでに十課だけ / ?? ばかりでなく十一課も勉強しておきなさい。
   Ashita made ni jukka dake / ?? bakari de naku jūikka mo benkyō-
   shite okinasai.
   (Study not only Lesson 10 but also Lesson 11 by tomorrow.)

(That apartment is probably expensive.)

(b) ロジャーはスキーが上手だろう。

Rojā wa ski ga jōzu darō.
(Roger is probably good at skiing.)

(c) あの人は中国人だろう。

Ano hito wa chūgokuujin darō.
(That man is probably Chinese.)

Notes

1. Darō is originally the informal conjecture form of the copula da, but it is used as an auxiliary of conjecture. The formal version is deshō.

2. Probability adverbs such as tabun, osoraku and kitto are sometimes used with darō or deshō. The speaker's conjecture sounds more certain with tabun or osoraku, and even more certain with kitto. Examples:

(1) アンダーソンさんはたぶん日本へ行くだろう。

Andāson-san wa tabun Nihon e iku darō.
(Ms. Anderson will most probably go to Japan.)

(2) アンダーソンさんはきっと日本へ行くだろう。

Andāson-san wa kitto Nihon e iku darō.
(I'm almost certain that Ms. Anderson will go to Japan.)
3. Darō / deshō with the question marker ka makes questions softer or less direct. Compare (3) and (4).

(3) 大しようぶですか。
Daijōbu desu ka.
(Is it all right?)

(4) 大しようぶでしょうか。
Daijōbu deshō ka.
(I wonder if it's all right.)

4. S darō / deshō with rising intonation asks for the hearer's agreement.

(5) a. 君も行くだろう?
Kimi mo iku darō?
(You will go too, (am I) right?)

b. これ、きれいでしょう?
Kore, kirei deshō?
(Isn't this pretty?)

The sentence-final particle ne also asks for the hearer's agreement, but S darō / deshō with rising intonation is softer or less direct. (⇒ ne)
Compare (5a) with (6).

(6) 君も行くね。
Kimi mo iku ne.
(You will go too, won't you?)

Notes

1. Dasu in Vmasu+dasu is used as an auxiliary verb. When it is used as a full verb, it means ‘cause something to become visible’.

2. Vmasu+dasu is normally ambiguous; one meaning is ‘～ out’ and the other is ‘begin to ～’. Thus, tsukuridasu means ‘turn out’ or ‘begin to make’.
3. Vmasu + dasu conjugates as a Gr. 1 Verb.

4. Vmasu + owaru ‘finish ~ing’ is an antonym of Vmasu + dasu / hajimeru.

[Related Expression]

~dasu in the sense of ‘begin to ~’ is different from ~hajimeru in that the former indicates a non-volitional and abrupt beginning while the latter is more broadly used. Thus,

[1] そろそろ歩き始めましょう / *歩き出しましょうか。
Sorosoro arukihajimemashō / *arukidashimashō ka.
(It’s getting late. Shall we begin to walk?)

[2] 私達が歩き始めた / 歩き出した時山田達が来た。

(f) ベッツィーはそのレポートを一日で書いたそうだ。
*Bettsi wa sono repōto o ichinichi de kaita sōda.*
(I heard that Betsy wrote the report in one day.)

**Notes**

1. In general, *de²* indicates something which is used when someone or something does something. Typically, it indicates means and instruments as in KS and Exs. (a) – (c).
2. Since de also indicates reason and cause, the phrase nan de, which consists of nan ‘what’ and de, is ambiguous: One meaning is ‘by means of what (=how)’ and the other is ‘for what reason (=why)’. Thus, (1) can be interpreted in two ways.

(1) 本田さんは何か大阪へ行くんですか。
Honda-san wa nan de Ōsaka e iku n desu ka.
(How / Why is Mr. Honda going to Osaka?)

[Related Expression]

De² can be used instead of the phrase ~ o tsukatte ‘by using ~’, except when the preceding noun refers to a human being. Examples:

[1] 私達はタクシーを使ってで来ました。
Watashitachi wa takushi o tsukatte / de kimashita.
(We came by taxi.)

[2] 私は子供を使ってで家具を動かした。
Watashi wa kodomo o tsukatte / *de kagu o ugokashita.
(Lit. I moved the furniture using my children.)

</tr>
</tbody>
</table>

(Lit. Mr. Yamaguchi was ill and absented himself from school. (=Because Mr. Yamaguchi was ill, he didn’t come to school.))

Examples

(a) あしたは期末試験で大変です。
Ashita wa kimatsushiken de taihen desu.
(I’m having an awful time because of tomorrow’s final exam.)
(b) 大雨で橋がこわれた。
    Ōame de hashi ga kowareta.
    (Lit. Because of heavy rain the bridge broke down. (=Heavy rain destroyed the bridge.))

(c) きのうは夜、仕事でとても疲れた。
    Kīnō wa yoru, shigoto de totemo tsukareta.
    (Lit. Because of my work I got very tired last night. (=I worked so hard last night that I got very tired.))

(d) 父は交通事故で入院しました。
    Chichi wa kōtsūjiko de nyūinshimashita.
    (My father was hospitalized due to a traffic accident.)

**Notes**

1. Some of the uses of *de*³ (such as KS and Ex. (a)) are very close to the 
   *te*-form of *desu*. For example, KS can be paraphrased into two sentences 
   (1a) and (1b):

   (1) a. 山口さんは病気でした。
       *Yamaguchi-san wa byōki deshita.*
       (Mr. Yamaguchi was ill.)

   b. 山口さんは学校を休みました。
       *Yamaguchi-san wa gakkō o yasumimashita.*
       (Mr. Yamaguchi was absent from school.)

   And KS can be considered to be the result of combining the two sentences 
   using the *te*-form of *desu* which basically means ‘be ~ and’.

2. A noun that precedes *de*³ expresses something that is beyond human control 
   (such as illness, flood, accident, rain, and fire). It is also to be 
   noted that *de*³ co-occurs with any noun, if a predicate expresses something 
   that is beyond human control. If the co-occurring predicate expresses something 
   that is controllable, the particle *de* is no longer *de*³; it is *de*² of means. (⇒ *de*²) Compare (2a) and (2b) below:

   (2) a. 卵でアレルギーになる。
       *Tamago de arerugi ni naru.*
       (Lit. Eggs cause me allergy. (=I’m allergic to eggs.))

   b. 卵でオムレツを作る。
       *Tamago de omuretsu o tsukuru.*
       (I make an omelette with eggs.)
(2a) and (2b) contain a noncontrollable predicate *arerugi ni naru* 'become allergic' and a controllable predicate *omuretsu o tsukuru* 'make an omelette', respectively. Therefore, *de* in (2a) and (2b) are *de*³ and *de*⁴, respectively.

**[Related Expression]**

The particle *de*⁴ is a very loose marker of cause due to its origin; in contrast, *kara*³ and *node* are clear subordinate conjunctions of cause / reason.

(⇒ *kara*³; *node*)

(My passport expires in June.)

(c) アメリカに来てから今日で三年になる。

*Amerika ni kite kara kyō de sannen ni naru.*

(It's been three years since I came to America.)
1. In general, X de⁴ indicates that something lasts for a period of time up to X.

2. When X in X de refers to a duration of time, as in (1), it is the de of means rather than the de of termination time.  (⇌ de³)

(1) 山田さんは一週間でそのレポートを書いた。
   Yamada-san wa isshūkan de sono repōto o kaita.
   (Mr. Yamada wrote the report in a week (lit. using a week).)

[Related Expression]

Ni¹ can be used in place of de⁴ in KS and Exs. (a) and (b), as in [1].

[1] 春学期は五月十日で/に終わる。
   Harugakki wa gogatsu tōka de / ni owaru.
   (The spring term ends on May 10.)

When de is used, the nuance is that the spring term lasts up to May 10. When ni is used, however, the sentence simply indicates the time when the spring term ends.

(⇒ de¹; de²)
dō どう  adv.

an interrogative adverb which asks how; in what way about the state of s.o. / s.t. or the way of doing s.t.

Key Sentence

| Topic (subject) | どう (ですか)。
|----------------|-------------------|
| お母さん  は | どう (ですか)。
| O-kā-san  wa | dō (desu ka).

(How's your mother?)

Examples

(a) 新しいアパートはどうですか。
   "Atarashii apāto wa dō desu ka.
   (How's your new apartment?)

(b) コーヒーはどうですか。
   "Kōhi wa dō desu ka.
   (How is the coffee? / Would you like coffee? / How about coffee?)

(c) 土曜日はどう?
   "Doyōbi wa dō?
   (How about Saturday?)

Notes

1. The polite version of dō is ikaga. In very informal speech desu ka is omitted after dō or ikaga.

2. Dō and ikaga are also used to offer or suggest something, as in Exs. (b) and (c). In this case, dō or ikaga are asking about the state of the hearer's mind regarding the offer or suggestion rather than about the state of what is being offered or suggested.

3. Dō is also used to ask the way of doing something. In this case, ikaga is usually not used. Example:

   (1) この言葉はどう読みますか。
       "Kono kotoba wa dō yomimasu ka.
       (How do you read this word?)
4. The idiomatic expression *dō shite* ‘lit. doing what’ is used to ask manners, reasons or causes. Examples:

(2) どうして日本語を勉強しているんですか。
*Dō shite nihongo o benkyōshite iru n desuka.*
(How (= In what way) are you studying Japanese? / Why are you studying Japanese?)

(3) この木はどうして枯れたんですか。
*Kono ki wa dō shite kareta n desu ka.*
(Why did this tree die?)

As seen in (2), unless the context is clear, *dō shite* is sometimes ambiguous. (The interrogative adverb *naze* ‘why’ is unambiguous but less colloquial than *dō shite.*)

(a) 私は札幌のうちへ飛行機で帰った。
   Watashi wa Sapporo no uchi e hikōki de kaetta.
   (I went back home to Sapporo by plane.)

(b) 地震だったのでいそいで外へ出た。
   Jishin datta node isoide soto e detta.
   (It was an earthquake, so I went outside quickly.)

(c) 父へ手紙を出したが、まだ返事が来ない。
   Chichi e tegami o dashita ga, mada henji ga konai.
   (I sent a letter to my father, but his reply has not come yet.)

Related Expressions]

I. The particles e, made, and ni? focus on direction, course (up to ~), and point of contact, respectively. Thus,

[1] はるばる東京まで / に / へ来た。
   Harubaru Tōkyō made / ni / e kita.
   (I came all the way to Tokyo.)

[2] 東京に / へ / *まで十二時に着いた。
   Tōkyō ni / e / *made jūniji ni tsuita.
   (I arrived in Tokyo at 12:00 o'clock.)

[3] ニューヨークへ / まで / *にの便はもうありません。
   Nyūyōku e / made / *ni no bin wa mō arimasen.
   (There isn't any flight to / as far as New York any more.)
[4] ここまで / *へ / *のにの道は悪かったでしょう。
Koko made / *e / *ni no michi wa warukatta deshō.
(Your way here must have been rough.)

In actuality, native speakers use e and ni (of point of contact) almost interchangeably except in the case of [3] (i.e., ni cannot be followed by no).

II. Even the ni of direct contact meaning ‘into; onto’ can be replaced by e as in:

[5] お風呂に / へ入った。
O-furo ni / e haitta.
(Lit. I entered into a bath. (=I took a bath.))

[6] 机の上に / へ乗った。
Tsukue no ue ni / e notta.
(I got onto the table.)

[7] 黒板に / へ漢字を書いた。
Kokuban ni / e kanji o kaita.
(I wrote kanji on the blackboard.)

(b) あ、のり子が走っている。
A. Noriko ga hashitte iru.
(Oh, Noriko is running.)

(c) A: このレストランは何がおいしいですか。
Kono resutoran wa nani ga oishii desu ka.
(What is good in this restaurant?)

B: ステーキがおいしいです。
Sutēki ga oishii desu.
(Steak is good.)

Notes

1. Ga marks the subject of a sentence when the information expressed by
   the subject is first introduced in a discourse. When the subject is
   presented as the topic (that is, the information has already been intro-
   duced into the discourse), however, the topic marker wa replaces ga.
   (⇒ wa１ (は)) Consider the following discourse, a typical opening in
   folktales, which illustrates the different uses of ga and wa.

(1) 昔々一人のおじいさんが住んでいました。おじいさんはとても貧乏で
   した。
Mukashimukashi hitori no o-ji-san ga sunde imashita. O-ji-san
wa totemo binbōdeshita.
(Once upon a time there lived an old man. He (lit. the old man) was very poor.)
In the first sentence, *o-ji-san* ‘old man’ appears for the first time in the discourse; *o-ji-san* is the subject but not the topic in this sentence. Therefore, it is marked by *ga*. The second sentence tells something about the old man introduced in the first sentence. *O-ji-san* is now the topic; therefore, it is marked by *wa* rather than *ga*. Note the parallelism here between *ga* and *wa* in Japanese and *a* and *the* in English.

2. *Ga* is also replaced by *wa* if the subject is in contrast with another element. For example, in Ex. (c), B could also say:

(2) ステーキはおいしいです。

*Sutēki wa oishiiidesu.*  
(Steak is good (but other food is not). / (I don’t know about other food but at least) Steak is good.)

Here, *sutēki* ‘steak’ is newly introduced in the discourse and is not the topic; yet it is marked by *wa*. This is because *sutēki*, in this case, is being contrasted with other food.

3. Since WH-words like *nani* ‘what’, *dare* ‘who’ and *doko* ‘what place’ can never be topics, they are never marked by *wa*, as in (3).

(3) 今晚だれが *は来ますか。

*Konban dare ga / *wa kimasu ka.*  
(Who is coming tonight?)

4. The subject in subordinate clauses is marked by *ga* unless it is a contrasted element, as seen in (4).

(4) a. 私はデビューが / *はフランスへ行くことを知らなかった。

*Watashi wa Debi ga / *wa Furansu e iku koto o shiranakatta.*  
(I didn’t know that Debbie was going to France.)

b. ジーンは僕が / *はアパートを出た時まだ寝ていた。

*Jin wa boku ga / *wa apāto o deta toki mada nete ita.*  
(Gene was still in bed when I left my apartment.)

c. 私が / *はきのう見た映画はドイツの映画だった。

*Watashi ga / *wa kinō mita eiga wa Doitsu no eiga datta.*  
(The movie I saw yesterday was a German film.)

Note that topics are not presented in subordinate clauses.

5. In relative clauses, the subject may be marked by *no*, as in (5).

(⇔ Relative Clause, Note 3)
(5) 私のきのう見た映画はドイツの映画だった。
    *Watashi no kinō mita eiga wa Doitsu no eiga datta.*
    (The movie I saw yesterday was a German film.)

6. In some expressions, elements which are considered to be direct objects are presented as subjects and are marked by *ga*.  
    (⇒ ~ *wa* ~ *ga*)

   (6) a. 僕はスポーツカーが欲しい。
       *Boku wa supōtsukā ga hoshii.*
       (I want a sports car. (Lit. To me, a sports car is desirable.))

       b. 春子はスペイン語が分かる。
           *Haruko wa supeingo ga wakaru.*
           (Haruko understands Spanish. (Lit. To Haruko, Spanish is understandable.))

7. To sum up the important rules concerning *ga*,

   (A) *Ga* marks the subject when it is newly introduced in a discourse.

   (B) *Wa* replaces *ga* when the subject is a topic or a contrasted element.

   (C) WH-words are always marked by *ga* when they are the subject of a sentence.

   (D) The subject in subordinate clauses is marked by *ga* unless it is a contrasted element.

   (E) When predicates are transitive adjectives or stative transitive verbs, the elements which correspond to the direct object in English are marked by *ga*.

**[Related Expression]**

The topic marker *wa* is often mistaken for a subject marker. It appears to be a subject marker because it often replaces *ga*. (See Notes 1 and 2, and Characteristics of Japanese Grammar, 2. Topic.)  
(⇒ *wa*¹ (は))

(John came but Mary didn’t (come).)

Formation

\( S_1 \text{ ga } S_2 \)

太郎は泳いだが次郎は泳がなかった。 (Taro swam but Jiro didn’t swim.)

Tarō wa oyoida ga Jirō wa oyoganakatta.

Examples

(a) 私はビールは飲むが酒は飲みない。
   Watashi wa biru wa nomu ga sake wa nomanai.
   (I drink beer but don’t drink sake.)

(b) 旅行をしたいがお金がない。
   Ryokō o shitai ga o-kane ga nai.
   (I want to travel but I don’t have money.)

Notes

1. \( Ga^2 \), like but in English, combines two sentences which express contrastive ideas. However, \( ga \) is much weaker than but in that it is sometimes used simply to combine two sentences for stylistic reasons even if those two sentences do not represent contrastive ideas. For example, the \( ga \) in (1) is used simply as a transition word to connect two sentences.

   (1) a. パーティーをしますが来ませんか。
       Pātī o shimasu ga kimasen ka.
       (We’ll have a party. Wouldn’t you like to come?)

   b. 田中さんは私のうちにも時々来ますがおもしろい人ですね。
       Tanaka-san wa watashi no uchi ni mo tokidoki kimasu ga omoshirōi hito desu ne.
       (Mr. Tanaka sometimes comes to my place, too. He is an interesting person, isn’t he?)

2. \( Ga^2 \) makes a sentence unit with the preceding sentence, not with the following sentence. Thus, it is wrong to place a comma before \( ga \) or to start a sentence with \( ga \), as in (2) and (3).
(2) *ジョンは来た。がメアリーは来なかった。
*Jon wa kita. ga Meari wa konakatta.
(John came, but Mary didn’t come.)

(3) *ジョンは来た。がメアリーは来なかった。
*Jon wa kita. Ga Meari wa konakatta.
(John came. But Mary didn’t come.)

3. $S_1$ and $S_2$ in “$S_1 \ ga \ S_2$” must be in the same form whether formal or informal, because they are both independent clauses. (4) and (5) are stylistically awkward. ($\Rightarrow$ keredomo)

(4) ??太郎は泳ぎましたが次郎は泳がなかった。
??Tarō wa oyogimashita ga Jirō wa oyoganakatta.
(Taro swam but Jiro didn’t (swim).)

(5) ??太郎は泳いだが次郎は泳ぎませんでした。
??Tarō wa oyoida ga Jirō wa oyogimasendeshita.
(Taro swam but Jiro didn’t (swim).)

4. $S_2$ in “$S_1 \ ga \ S_2$” is often omitted when it is understandable from the context and/or the situation, or when the speaker doesn’t want to continue for some reason (e.g., the sentence is too direct, impolite, embarrassing, etc.). Examples:

(6) 大しようぶだと思いますが。
* Daijōbuda to omoimasu ga.
(I think it’s all right but . . .)

(7) トムはよく勉強するんですか。
* Tomu wa yoku benkyōsuru n desu ga.
(Tom studies hard but . . .)

5. When “$S_1 \ ga \ S_2$” expresses contrastive ideas, the contrastive wa typically appears in $S_1$ and $S_2$, as in KS and Ex. (a). ($\Rightarrow$ wa¹ (ば))

[Related Expressions]

Daga, dakedo, demo, shikashi and keredomo express the same idea as ga. However, the first four cannot make compound sentences like ga does; they must occur at the beginning of a sentence, as in [1]. (See Note 2.)

[1] a. $S_1 \ ga \ S_2$.
   b. $*S_1 \ daga / dakedo / demo / shikashi \ S_2$.
   c. $S_1 \ Daga / Dakedo / Demo / Shikashi \ S_2$.

Keredomo differs from ga in that keredomo is a subordinate conjunction.
meaning ‘although’. That is, in “S₁ keredomo S₂”, S₁ keredomo is a subordinate clause and S₂ is a main clause. In “S₁ ga S₂”, on the other hand, both S₁ and S₂ are independent clauses.

   (Susan feels lonely by herself.)

(b) 子供が眠たがっている。
   *Kodomo ga nemutagatte iru.*
   (My child wants to go to sleep.)

Notes

1. There is a group of adjectives which, in the present tense, usually requires the first person (or a person with whom the speaker can empathize) as subject. If the subject of a sentence in which these adjectives occur is not the first person (or one with whom the speaker can empathize), then *garu* is attached to the adjective. Observe the accompanying change of particles from *ga* into *o.*

   (1) a. 僕は犬がこわい。
      *Boku wa inu ga kowai.*
      (Lit. To me dogs are scary. (=I am scared of dogs.))

   b. 深田さんは犬をこわがっている。
      *Fukada-san wa inu o kowagatte iru.*
      (Mr. Fukada fears dogs.)

   (2) a. 僕はスポーツカーが欲しい。
      *Boku wa supōtsukā ga hoshii.*
      (I want a sports car.)

   b. 一男はスポーツカーを欲しがっている。
      *Kazuo wa supōtsukā o hoshigatte iru.*
      (Kazuo wants a sports car.)

   If an adjective appears in an embedded clause (except a nominalized clause), the *garu* attachment is unnecessary even if the tense is nonpast and the subject is a person with whom the speaker cannot empathize. Thus,

   (3) a. 深田さんは犬がこわいと言った。
      *Fukada-san wa inu ga kowai to itta.*
      (Mr. Fukada said that he is scared of dogs.)

   b. 一男はスポーツカーが欲しいそうだ。
      *Kazuo wa supōtsukā ga hoshii sōda.*
      (I heard that Kazuo wants a sports car.)

   (⇒ *hoshii*¹, Note 3)

Examples

(a) A: いつごろ北京に行きますか。
   *Itsu goro Pekin ni ikimasu ka.*
   (About when are you going to Beijing?)

   B: 来年の六月ごろ行きます。
   *Rainen no rokugatsu goro ikimasu.*
   (I'm going there around June of next year.)

(b) A: 今朝は何時ごろまで寝ていましたか。
   *Kesa wa nanji goro made nete imashita ka.*
   (Until about what time were you asleep this morning?)

   B: 十時ごろまで寝ていました。
   *Jūji goro made nete imashita.*
   (I was asleep until about 10 o'clock.)

(c) 去年の今ごろは大雪でしたね。
   *Kyonen no ima goro wa ōyuki deshita ne.*
   (About this time last year it snowed heavily, didn't it?)

Notes

1. *Goro* is used with a specific point of time. Thus, the following sentence is unacceptable.

   (1) *夜ごろテレビを見ていました。
   *Yoru goro terebi o mite imashita.*
   (*I was watching TV about at night.)

2. Depending on the speaker's perspective, time expressions other than exact time expressions can be perceived as points in time. Thus, in Ex. (a), the month of June is a point in time from the speaker's viewpoint. In these cases, *goro* seems easier to use grammatically if there is some distance between the time of the event and the time of speech, as seen in the following examples.
(2) ??来年の夏ごろ山中さんに会います。
??Rainen no natsu goro Yamanaka-san ni aimasu.
(*I will see Mr. Yamanaka around next summer.)

(3) 再来年の夏ごろ山中さんに会います。
Sarainen no natsu goro Yamanaka-san ni aimasu.
(I will see Mr. Yamanaka in the summer in a couple of years.)

(4) ?? 去年の夏ごろ山中さんに会いました。
??Kyonen no natsu goro Yamanaka-san ni aimashita.
(*I met Mr. Yamanaka around the summer of last year.)

(5) おととしの夏ごろ山中さんに会いました。
Ootoshi no natsu goro Yamanaka-san ni aimashita.
(I met Mr. Yamanaka sometime during the summer of the year before last.)

[Related Expression]

Goro is different from kurai / gurai ‘about’ in that the latter is used with specific quantity expressions. Thus,

[1] 僕は三時ごろに寝ました。
Boku wa sanji goro ni nemashita.
(I went to sleep at about 3 o’clock.)

[2] 僕は三時間ぐらい寝ました。
Boku wa sanjikan gurai nemashita.
(I slept about three hours.)

(d) 三日ごとにテニスをしています。
    Mikka goto ni tenisu o shite imasu.
    (I'm playing tennis every third day.)

Related Expression

Oki ni indicates that something is repeated at certain intervals. Although its usage is comparable to goto ni, note the distinct difference in meanings in examples [1a] and [1b].

[1] a. この電車は二駅おきに止まる。
    Kono densha wa futa eki oki ni tomaru.
    (This train stops at every third station.)
b. この電車は二駅ごとに止まる。

Kono densha wa futa eki goto ni tomaru.
(This train stops at every other station.)

When a time expression precedes oki ni or goto ni, there is no difference in meaning, if an event takes place at one point in time as in [2a]. But there is difference in meaning, if an event takes place within a certain period of time as in [2b].

[2] a. 電車は五分おきに / ごとに出る。

Densha wa gofun oki ni / goto ni deru.
(The train leaves every five minutes.)

b. 私は二日おきに / ごとに花子と会っている。

\]

2. For the sentence (1) below, there are two honorific versions, depending on which part of Vmasu+hajimeru is changed into an honorific form; if the Vmasu is changed into an honorific form, it will become (2a) and if the entire Vmasu+hajimeru is changed into an honorific form, it will become (2b).

(1) 先生は本を書きはじめた。

b. 先生はご本をお書きはじめになった。
    Sensei wa go-hon o o-kakhajime ni natta.
    \((\Rightarrow o \sim ni naru)\)

3. \sim hajimeru is normally attached to a non-punctual verb (such as yomu ‘read’, kaku ‘write’ and miru ‘see’). If the subject is plural, however, the verb can be a punctual verb (such as tsuku ‘arrive’, kuru ‘come’ and shinu ‘die’). \((\Rightarrow\text{Appendix 2D})\) Thus,

_hazu da_

{話す/話した} はず だ  (It is expected that s.o. will talk/talked.)
{hanasu/hanashita} hazu da

(iii) N の/だった はず だ
[no/datta] hazu da

[先生の/先生だった] はず だ (It is expected that s.o. is / was a
teacher.)

Examples

(a) 大野先生はサンドラを知っているはずです。
Ôno-sensei wa Sandora o shitte iru hazu desu.
(I expect that Prof. Ono knows Sandra.)

(b) あの本は高かったはずだ。
Ano hon wa takakatta hazu da.
(I expect that book was expensive.)

(c) そのアパートはきれいなはずです。
Sono apâto wa kireina hazu desu.
(I expect that apartment is clean.)

(d) カールソングさんは昔先生だったはずだ。
Kâruson-san wa mukashi sensei datta hazu da.
(I'm fairly sure that Ms. Carlson was a teacher before.)

Notes

1. “S hazu” expresses the speaker’s expectation, not in the sense of hoping or looking forward to something, but in the sense that the proposition expressed by S should be true or come true. Thus, when the speaker uses hazu, he is not merely guessing, but stating a proposition based on reliable information or knowledge. （⇔ darō; rashii; sōda²; yōda）

2. Hazu is a dependent noun and cannot be used alone. It is always modified by a sentence or a demonstrative such as sono ‘that’ and konna ‘like this’. “Demonstrative hazu” is used when a proposition is known to the hearer from the context, as in (1).

(1) A: マーサも来ますか。
   Māsa mo kimasu ka.
   (Is Martha coming, too?)

   B: はい。そのはずです。
   Hai, sono hazu desu.
   (Yes, I expect so.)

3. Negative expectations can be expressed in two ways:

   (A) S (negative) hazu da
(2) クラークさんはパーティーに行かないはずだ。
Kurāku-san wa pātī ni ikanai hazu da.
(Lit. I expect that Mr. Clark is not going to the party.
(=I don’t expect that Mr. Clark is going to the party.))

(3) クラークさんはパーティーに行くはずは/がない。
Kurāku-san wa pātī ni iku hazu wa ga nai.
(Lit. I have no expectation that Mr. Clark is going to the party.
(=It is improbable that Mr. Clark will go to the party.))

The assertion in (3) is stronger than that in (2).

4. “S hazu” can also be used when the speaker has discovered the reason for an event or a state. In this case, hazu means “It is natural that ~.” or “No wonder ~.” and can be paraphrased as “S wake da.” (⇒ wake da) Example:

(4) 高いはずだ。これは金だ。
Takai hazu da. Kore wa kin da.
(No wonder this is expensive. It’s gold.)

5. When “S hazu” modifies a noun, that is, when “S hazu” is a relative clause, no follows, as in (5). (⇒ Relative Clause)

(5) 山口さんに出したはずの手紙が床に落ちていた。
Yamaguchi-san ni dashita hazu no tegami ga yuka ni ochite ita.
(I found the letter I thought I had sent to Mr. Yamaguchi on the floor.)

(I can’t walk as fast as you can.)
(b) ジェニファーほどよく勉強する学生はいない。

Jeniifā hodo yoku benkyōsuru gakusei wa inai.
(There is no student who studies as hard as Jennifer.)

(c) 私は西田さんがあれほどピアノがひけるとは思わなかった。

Watashi wa Nishida-san ga are hodo piano ga hikeru to wa omowana-katta.
(I didn't think that Mr. Nishida could play the piano that well (lit. to that extent).)

(d) ルイスさんの日本語は太田先生も外国人だと気づかなかったほど上手です。

Ruisu-san no nihongo wa Ōta-sensei mo gaikokujin da to kizukanakatta hodo jōzudesu.
(Mr. Lewis's Japanese is so good that even Prof. Ota didn't notice he was a foreigner.)

Notes

1. When *hodo* is preceded by a noun, the predicate must be negative, as in KS(A), Exs. (a) and (b). The following sentences are ungrammatical.

   (1) *私は太郎ほど強い。
       *Watashi wa Tarō hodo tsuyoi.
       (I am as strong as Taro.)

   (2) *フットボールほどおもしろいスポーツはたくさんある。
       *Futtobōru hodo omoshīroi supōtsu wa takusān aru.
       (There are many sports which are as interesting as football.)

If a sentence or a demonstrative modifies *hodo*, however, the predicate of the main clause can be either affirmative or negative, as in KS(B), Ex. (d) and (3).

(3) その仕事はそれほどやさしいんですか。

   Sono shigoto wa sore hodo Yasashii n desu ka.
   (Is that job that easy (lit. easy to that extent)?)

2. When *hodo* is used with a quantifier, it means 'about'. Example:

   (4) ビールを三本ほど飲みました。

   Biru o sanbon hodo nomimashita.
   (I drank about three bottles of beer.)

[Related Expressions]

*Bakari* and *kurai* also mean 'about' when they are used with a number and a counter. The difference among the three is that *bakari* and *hodo* can be
used with an exact number or amount of something, whereas *kurai* cannot, as seen in [1].

[1] そのりんごを二つばかり / ほど / *くらいください。
*Sono ringo o futatsu bakari / hodo / *kurai kudasai.*
(Please give me two of those apples.)

In the situation in [1] the speaker does not want *about* two apples but *exactly* two apples, and, in this case, *kurai* cannot be used. It is a very common practice in Japanese to avoid asking for exact numbers or amounts, and the practice comes from the idea that being straightforward or direct is impolite. This can be observed in many verbal and nonverbal expressions in Japanese and also in the manners of the Japanese people.

Examples

(a) 野菜も食べたほうがいいよ。

(You'd better eat vegetables, too.)

(b) もう帰ったほうがいいですか。
Mō kaetta hō ga iidesu ka.
(Had I better go home now?)

(c) 和子はもっと英語を勉強したほうがいいね。
Kazuko wa motto eigo o benkyōshita hō ga ii ne.
(Kazuko had better study English harder.)

Notes

1. Vinf-past hō ga ii is an idiomatic expression of the comparative structure and expresses a strong suggestion.  
   (⇒ ~ hō ga ~ yori)

2. The second person subject in declarative sentences and the first person subject in interrogative sentences are usually omitted. (KS and Exs. (a) and (b)) When the subject is the third person, it is not omitted unless it can be clearly understood from the context. In this case, the speaker is telling the hearer what the speaker suggests for the third person. (Ex. (c))

3. Vinf-nonpast can be substituted for Vinf-past, as in (1).

   (1) 日本語の本を読むほうがいい。
   Nihongo no hon o yomu hō ga ii.
   (You'd better read Japanese books.)

   The meaning of Vinf-nonpast hō ga ii is almost the same as that of Vinf-past hō ga ii if it is used in situations of suggestion. However, Vinf-past hō ga ii may express a stronger suggestion than Vinf-nonpast hō ga ii. For instance, in the following example, Vinf-past hō ga ii is more appropriate.

   (2) お前、このごろ麻薬をやってるそうだな。そんなもの止めた/??止めるほうがいいぜ。
   Omae, konogoro mayaku o yatteru sō da na. Sonna mono yameta/??yameru hō ga ii ze.
   (I heard you are taking drugs these days. You'd better stop such things, I tell you.)

4. “Had better not do s.t.” is expressed by Vneg nai hō ga ii. Example:
(3) コーヒーを飲まないほうがいい。
Kōhi o nomanai hō ga ii.
(You’d better not drink coffee.)

Note that the verb must be in the nonpast negative form in this expression. The following is ungrammatical.

(4) *コーヒーを飲まなかったほうがいい。
*Kōhi o nomanakatta hō ga ii.
(You’d better not drink coffee.)

(f) 私は女であるほうが男であるより楽しいと思う。
    Watashi wa onna de aru hō ga otoko de aru yori tanoshii to omou.
    (I think it’s more enjoyable to be a woman than to be a man.)

Notes

1. In Japanese there are no comparative forms of adjectives and adverbs.
   The idea of comparison is expressed by the “X no hō ga Y yori” pattern.
   Y yori may be omitted if it is clear from the context or the
   situation. Example:

   (1) A: トムとジョンどちらが強いですか。
       Tomu to Jon to dochira ga tsuyoidesu ka.
       (Who is stronger, Tom or John?)

       B: トムのほうが(ジョンより)強いです。
       Tomu no hō ga (Jon yori) tsuyoidesu.
       (Tom is stronger (than John).)

2. In the “S1 hō ga S2 yori” pattern (KS(B)), S1 can be either nonpast or
   past. S2, however, is always nonpast regardless of the tense of S1 and
   the main clause. There are two cases in which S1 is past. First, S1
   can be past when the whole sentence is about a present or future action
   or state. In this case, the sentence sounds rather hypothetical. Example:
(2) 私が話したほうが君が話すよりいいでしょう。
   Watashi ga hanashita hō ga kimi ga hanasu yori ii deshō.
   (It would probably be better if I talk rather than if you talk.)

S₁ can also be past if the whole sentence is about a past action or state.
In this case the sentence is counterfactual. Example:

(3) 私が話したほうが君が話すよりよかった。
   Watashi ga hanashita hō ga kimi ga hanasu yori yokatta.
   (It would have been better if I had talked rather than you.)

3. Y yori can precede X (no) hō ga, as in (4).

(4) あのカメラよりこのカメラのほうが好きです。
   Ano kamera yori kono kamera no hō ga sukidesu.
   (I like this camera better than that camera.)

4. X no hō is a noun phrase; therefore, it can also be a direct object, an indirect object, etc. However, when it is used for something other than the subject, the "Y yori X no hō (o, ni, etc.)" order is preferable. Examples:

(5) a. 私はビールより酒のほうがよく飲む。
    Watashi wa biru yori sake no hō o yoku nomu.
    (I drink sake more than beer.)

b. 学生は川田先生より木村先生のほうがよく質問に行く。
   Gakusei wa Kawada-sensei yori Kimura-sensei no hō ni yoku shitsumon ni iku.
   (Students go to Prof. Kimura to ask questions more often than to Prof. Kawada.)

[Related Expression]

The idea of comparison can be expressed by the "X wa Y yori" pattern, too. (⇒ yori) However, when this pattern is used, X must have already been established as a topic. Thus, in a context like [1], the "X wa Y yori" pattern cannot be used.

[1] A: トムとジョンどどちらが強いですか。
   Tomu to Jon to dochira ga tsuyoidesu ka.
   (Who is stronger, Tom or John?)

B: トムのほうが / *トムは(ジョンより)強いです。
   Tomu no hō ga / *Tomu wa (Jon yori) tsuyoidesu.
   (Tom is stronger (than John).)
On the other hand, in a context like [2], the “X wa Y yori” pattern is preferable, because X has already been established in the previous sentence.

[2] トムはとても強いです。彼は/??彼のほうがジョンより強いです。
Tomu wa totemo tsuyoidesu. Kare wa/??Kare no hō ga Jon yori tsuyoidesu.
(Tom is very strong. He is stronger than John.)

(I want a Japanese friend.)

(b) あなたは今何がほしいですか。
Anata wa ima nani ga hoshiidesu ka.
(What do you want now?)
(c) パムはステレオをほしがっている。
Pamu wa sutere o hoshigatte iru.
(Pam wants a stereo.)

Notes

1. The i-type adjective hoshii expresses a person’s desire for some object. Like other stative transitive adjectives, hoshii takes the wa-ga construction, where the experiencer is marked by wa and the desired object by ga. (In subordinate clauses the experiencer is also marked by ga.)

\( \Leftrightarrow \sim \text{wa} \sim \text{ga} \)

2. Since hoshii expresses a very personal feeling, the experiencer is usually the first person in declarative sentences and the second person in interrogative sentences, as in KS(A), Exs. (a) and (b). The third person's desire is usually expressed by hoshigatte iru ‘Lit. be showing the sign of wanting (s.t.)’, as in KS(B) and Ex. (c). \( \Leftrightarrow \text{garu} \) It is noted that when hoshigatte iru is used, the desired object is marked by o.

3. It is, however, acceptable to use hoshii in connection with the third person experiencer in the following situations:

(1) In the past tense

モーリスはいいステレオがほしかった。
Mōrisu wa ii sutere ga hoshikatta.
(Maurice wanted a good stereo set.)

(2) In indirect / semi-direct speech

a. ジョイもほしいと言っている。

Joi mo hoshii to itte iru.
(Joy says she wants it, too.)

b. オスカーもほしいそうだ。

Osukā mo hoshii sōda.
(I heard that Oscar wants it, too.)

(3) In explanatory situations

パメラはイヤリングがほしいんです。
Pamera wa iyaringu ga hoshii n desu.
((The explanation is that) Pamela wants a pair of earrings.)

\( \Leftrightarrow \text{no da} \)
(4) In conjecture expressions

   (I want my children to live together with me.)
(b) あなたはだれに来てほしいですか。
_Anata wa dare ni kite hoshii desu ka._
(Who do you want to come?)

**Notes**

1. _Hoshii_ is used as an auxiliary with _Vte_ to mean ‘want (s.o.) to do (s.t.).’
   When the experiencer wants a person **X** to do something, **X** is marked by _ni_. _Hoshii_ is not used if **X** has a higher status than the experiencer. Thus, the following sentence is not appropriate when the speaker is a student of Prof. Yoshida’s. (See Related Expression, [2] for the correct sentence in that situation.)

   (1) 私は吉田先生に来てほしい。
   _Watashi wa Yoshida-sensei ni kite hoshii._
   (I want Prof. Yoshida to come.)

2. When _Vte hoshii_ is used, the experiencer is usually the first person in declarative sentences (KS, Ex. (a)) and the second person in interrogative sentences (Ex. (b)). If the experiencer is the third person, _Vte moraita-gatte iru_ ‘(lit.) be showing the sign of wanting to receive the favor of doing s.t. from s.o.’ is used, as in (2).  
   (⇒ _morau²_; _tai_; _garu_)

   (2) アダムスさんはフランス人にこの仕事をしてもらいたがっている。
   _Adamusu-san wa Furanshisu ni kono shigoto o shite moraita-gatte iru._
   (Mr. Adams wants Francis to do this job.)

**Related Expression**

The same idea can also be expressed by _Vte moraitai_. (⇒ _morau²_; _tai_) Example:

[1] 私はあなたに英語を教えてもらいたい。
   _Watashi wa anata ni eigo o oschite moraitai._
   (I want you to teach me English.)

This pattern can be used when the experiencer wants someone who has higher status to do something. In this case, _itadaku_, the humble version of _morau_, is used instead of _morau_. Example:

[2] 私は吉田先生に来ていただきたい。
   _Watashi wa Yoshida-sensei ni kite itadakitai._
   (I would like Prof. Yoshida to come.)

### Examples

(a) 私は毎朝八時に会社に行く。

*Watashi wa maiasa hachiji ni kaisha ni iku.*

(I go to work (lit. my company) at eight every morning.)

(b) A: 今晚私のうちでパーティーをしますが来ませんか。

*Konban watashi no uchi de pâti o shimasu ga kimasen ka.*

(We are going to have a party at my place tonight. Wouldn't you like to come?)

B: はい、行きます。

*Hai, ikimasu.*

(Yes, I'll come (lit. go).)

(c) あなたにもその知らせは行きましたか。

*Anata ni mo sono shirase wa ikimashita ka.*

(Lit. Did the notice go to you, too? (=Did you get the notice, too?))

(d) その村にもバスは行っている。

*Sono mura ni mo basu wa itte iru.*

(The bus goes to the village, too.)

### Notes

1. *iku* is used when someone or something moves in a direction away from the speaker or in a direction away from the speaker’s viewpoint, which is not necessarily the speaker’s position. (⇔ *kuru*) For example, in the following situation, *iku* is used when the speaker (point C) places his viewpoint near point A.

(1) X さんは B に行った。

*X-san wa B ni itta.*

(Mr. X went to B.)

(I went from Tokyo to Osaka by bus.)
2. When someone goes to his own "home base" (e.g., *uchi* ‘home’), *uchi ni iku* is ungrammatical. In this case, *kaeru* ‘return’ is used as in *uchi ni kaeru* ‘go home’.

3. There are cases where both *kuru* and *iku* can be used with different shades of meaning. Examples:

(2) 君のうちに息子が来ませんでした / 行きませんでしたか。
*Kimi no uchi ni musuko ga kimasendeshita / ikimasendeshita ka.*

(Didn’t my son go to your house?)

(3) [The speaker lives in San Francisco and is calling his friend in New York who is coming to Los Angeles.]

スミスさんは来月ロサンゼルスに来る / 行くそうですね。
*Sumisu-san wa raigetsu Rosuanjerusu ni kuru / iku sôdesu ne.*

(Mr. Smith, I was told that you’re coming to Los Angeles next month.)

In (2), when the speaker uses *kuru*, he is putting himself psychologically in the addressee’s location; when he uses *iku*, he is not. In (3), *kuru* is more appropriate than *iku* because, in general, a speaker is more empathetic with a location close to his own. The choice of *iku* here definitely implies that the speaker is unusually unempathetic with his neighboring location.

**iku² 行く** *aux. v. (Gr. 1)*

Some action or state keeps changing from the point in time at which the speaker first describes the action.  

- go on ~ing; continue; grow; 
- become

Formation

Examples

(a) これからは毎日本を一冊読んで行くつもりです。
Kore kara wa mainichi hon o issatsu yonde iku tsumori desu.
(I intend to keep reading one book a day from now on.)

(b) これからは暖かくなって行きますよ。
Kore kara wa atatakaku natte ikimasu yo.
(It will grow warmer (and continue in that way) from now on.)

(c) その頃から日本の経済は強くなって行った。
Sono koro kara Nihon no keizai wa tsuyoku natte itta.
(The Japanese economy grew stronger (and continued to grow that way) from that time on.)

(d) 分からないことをノートに書いて行った。
Wakaranai koto o nōto ni kaite itta.
(I went on taking notes on things I didn’t understand.)

Notes

1. The point in time at which the action starts is the present time in Exs. (a) and (b) and the past in Exs. (c) and (d), respectively.

2. The following examples use iku as a full verb meaning ‘to go’, and are not the usage of iku².

(1) 毎日会社にバスに乗って行く。
Mainichi kaisha ni basu ni notte iku.
(Lit. I ride a bus every day and go to my company. (=I go to work every day by bus.))

(2) あのレストランでコーヒーを飲みで行きましょう。
Ano resutoran de kōhī o nonde ikimashō.
(Lit. Let’s drink coffee at that restaurant and go. (=Let’s drink coffee at that restaurant and then continue on our way.))

[Related Expression]

When a change of state is expressed by iku², as in Exs. (b) and (c), iku² can be replaced by kuru², as in [1a] and [1b] below.

[1] a. これからは暖かくなって来ますよ。
Kore kara wa atatakaku natte kimasu yo.
(It will grow warmer from now on.)

b. その頃から日本の経済は強くなって来た。
Sono koro kara Nihon no keizai wa tsuyoku natte kita.
(The Japanese economy grew stronger from that time on.)

The iku² versions here are more impersonal and objective than the kuru² versions. The latter versions stress that some change is going to involve or has involved the speaker himself, while the former versions are impersonal statements.

(There are pandas in this zoo.)

(b) スチーブはいまロビンのアパートにいる。

*Suchibu wa ima Robin no apāto ni iru.*

(Steve is in Robin’s apartment now.)

**Notes**

1. *iru¹* expresses existence in terms of animal life. It cannot be used for plant life or inanimate things. Thus, the following sentence is ungrammatical.

   (1) *このキャンパスには木がたくさんいる。

   *Kono kyanpasu ni wa ki ga takusan iru.*

   (There are many trees on this campus.)

For plants and inanimate things, *aru* is used.  

(⇒ *aru¹*)

2. Two sentence patterns can be used with *iru¹*. In the KS(A) pattern, a location is presented as the topic and what exists there is under focus. In this pattern the location marker *ni* can optionally drop. In the KS(B) pattern, on the other hand, what exists is presented as the topic and where it exists is under focus.  

(⇒ *aru¹*, Note 3)

3. An animate thing or a group or organization of animate things such as a football team can also be in the location position, as seen in (2).

   (2) a. 私(に)は子供が三人いる。

   *Watashi (ni) wa kodomo ga sannin iru.*

   b. このチーム(に)はいいクオーターバックがいる。

(b) このりんごはくさっている。

*Kono ringo wa kusatte iru.*

(c) 木が倒れている。

    (A tree has fallen down (and is lying there).)

(d) 私は鈴木さんを知っています。
    *Watashi wa Suzuki-san o shitte imasu.*
    (I know Miss Suzuki.)

**Notes**

1. *Iru* is used as an auxiliary verb with *Vte* and expresses the continuation of an action or state. In general, if *Vte* expresses an action which can continue or be repeated, *Vte iru* expresses the continuation of the action. If *Vte* is a verb indicating a momentary action which cannot be repeated, *Vte iru* expresses the idea that something happened to X and X maintains the state which was created by that event. KS and Ex. (a) are examples of the first usage and Exs. (b), (c) and (d) are examples of the second usage. Note in Ex. (d) that *shiru*, the dictionary form of *shitte*, means ‘to get to know’ and *shitte iru* expresses the continuation of the state after the speaker got to know Miss Suzuki, which is expressed by *know* in English. It is also noted, however, that ‘not to know’ is not *shitte inai*, but *shiranai*.  
   (⇒ *shiru*)

2. *Vte iru* also expresses a habitual action, which is a special sort of repeated action. Example:

   (1) 私は毎日四マイル走っている。
       *Watashi wa mainichi yonmairu hashitte iru.*
       (I run four miles every day.)

3. When *Vte* is a motion verb such as *iku* ‘go’, *kuru* ‘come’ and *kaeru* ‘return’, the meaning of *Vte iru* is not ‘be ~ing’. For example, *itte iru* means ‘to have gone to some place and to still be there’. The sentences in (2) provide examples.

   (2) a. 次郎はアメリカに行っている。
       *Jirō wa Amerika ni itte iru.*
       (Jiro has gone to America and is there.)

   b. ベックさんはもう家に帰っています。
       *Bekku-san wa mō ie ni kaette imasu.*
       (Mr. Beck has already returned home and is there.)

4. The verb *sumu* ‘live’ requires the “*Vte iru*” pattern if the sentence ex-
presses a present state. Also, verbs like *iu ‘say’ and *omou ‘think’ with a third person subject require the “Vte iro” pattern if the sentence expresses a present state. Examples:

(3) a. 私は東京に住んでいる / *住む。
   Watashi-wa Tōkyō ni sunde iro / *sumu.
   (I live in Tokyo.)

b. ウェストさんは日本語はやさしいと思っている / *思う。
   Uesuto-san wa nihongo wa yasashii to omotte iro / *omou.
   (Mr. West thinks that Japanese is easy.)

**iru** いる  v. (Gr. 1)

**Examples**

(a) 私は今お金がいる。
   Watashi wa ima o-kane ga iro.
   (I need money now.)

(b) 何か道具がいりますか。
   Nanika dōgu ga irimasu ka.
   (Do you need some tools?)

(c) この車はガソリンがたくさんいる。
   Kono kuruma wa gasorin ga takusan iro.
   (This car needs a lot of gas.)

**Notes**

1. *Iru ‘need’ takes the wa-ga construction, where the experiencer (that
is, the person or thing that needs something) is followed by *wa* and
the necessary object by *ga*.  

(⇒ ~ *wa* ~ *ga*)

2. *Iru* 'need' is a Gr. 1 verb; thus, the negative form is *iranai*, the polite
form is *irimasu* and the *te*-form is *itte*.  

(Cp. *iru*¹; *iru*²)

3. The experiencer can also take the particle *ni*, as in (1).

(1)  a. この子にはいい家庭教師がいる。
    
    *Kono ko ni wa ii kateikyōshi ga iru.*
    
    (This child needs a good tutor.  (Lit. For this child, a good
tutor is necessary.))

    b. このプロジェクトには人と金がいる。
    
    *Kono purojekuto ni wa hito to kane ga iru.*
    
    (This project needs people and money.  (Lit. For this project
people and money are necessary.))

4. In subordinate clauses, the experiencer is followed by either *ga* or *ni*,
as in (2), unless the sentence is contrastive.  (In that case, *wa* follows.)

(⇒ *wa*¹ (は))

(2) この車が / にガソリンがたくさんいることを知っていましたか。

    *Kono kuruma ga / ni gasorin ga takusan iru koto o shitte ima-

(John was thinking of Mary. Is she going to marry me (lit. myself)? Is
she going to leave me (lit. myself) and marry Bob?)

Notes

1. Jibun¹ is an empathy marker that normally refers back to the subject of
the main clause as in KS(A), Exs. (a), (b) and (c), or to the discourse
topic as in KS(B) and Ex. (d).

2. When jibun is an empathy marker, its referent (i.e., the subject of the
sentence) is normally a passive experiencer. In other words, the referent
is not an agent (i.e., someone who initiates and / or completes an action).
(⇒ jibun²)

3. Ex. (c) is an ambiguous sentence, because jibun can refer to either the
main subject Michiko or to Kazuo. Jibun’s reference to Kazuo is not
a counterexample of jibun’s strong tendency to refer to the subject,
however, because Kazuo is semantically the subject of the verb iku ‘go’.
Also to be noted is that Michiko is an agent of the causative action, but
Kazuo is a passive experiencer of the causative action. Indeed, it is
easier to look at Kazuo as the object of the speaker’s empathy, because
he is a passive experiencer. It is very likely that jibun is not an empathy
marker but a contrastive marker when it refers to an agent Michiko.
Other similar ambiguous sentences follow:

(1) a. Michiko wa Kazuo ni jibun no kuruma de itte moratta.
(Lit. Michiko received from Kazuo a favor of going there in
her / his own car. (=Michiko had Kazuo go there in her /
his own car.))

b. Michiko wa Kazuo ni jibun no kuruma de ikareta.
(Lit. Michiko is annoyed by the fact that Kazuo went there
by her / his own car. (=Michiko had Kazuo go there in her /
his own car.))
Note that *jibun* in (1a, b) is an empathy marker when it refers to *Michiko* and is a contrastive marker when it refers to *Kazuo.*

(⇒ *jibun*²)

4. The referent of *jibun* in a complex sentence has to be conscious of the situation expressed in the main clause. Compare (2a) and (2b):

(2)  

a. 友子は自分が死ぬ前に子供が大学に入った。

*Tomoko wa jibun ga shinu mae ni kodomo ga daigaku ni haitta.*

(Lit. Speaking of Tomoko, before she (lit. herself) died, her child entered college. (⇒ Before Tomoko died, her child entered college.))

b. *友子は自分が死んだあとで子供が大学に入った。*

*Tomoko wa jibun ga shinda ato de kodomo ga daigaku ni haitta.*

(Lit. Speaking of Tomoko, after she (lit. herself) had died, her child entered college. (⇒ After Tomoko died, her child entered college.))

The sentence (2b) is ungrammatical because one can hardly empathize with a dead person.

Note

\textit{Jibun} is a contrastive marker if at least one of the following three conditions is met: (1) \textit{its referent is an agent} (as in KSs (B), (C), Exs. (b), (c) and (d)). (2) \textit{the subject is generic} (as in KS(A) and Ex. (a)). (3) \textit{jibun cannot be replaced by an implicit third person pronoun} (\(\emptyset\)) \textit{or by an explicit third person pronoun} (such as \(kare\) \textit{‘he’} and \(kanojo\) \textit{‘she’}). KS(C) satisfies the condition (3), because if \textit{jibun} is replaced by \(\emptyset\) or \(kare\) \textit{‘he’}, the meaning of the sentence changes into \textit{‘Kazuo encouraged him’}.

[Related Expression]

\textit{Jibun} is \textit{jibun}\(^1\) if the referent does not satisfy any of the three conditions given in Note; if it satisfies at least one of them it is \textit{jibun}\(^2\).

(e) 食べるか話すどちらかにしなさい。
    *Tab eru ka hanasu ka dochiraka ni shinasai.*
    (Lit. Decide on either eating or talking. (=Just do one thing, eat or talk.))

**Notes**

1. The basic function of *ka* is to mark an alternative. It can mark either nouns or sentences. When it marks nouns, the final *ka* is usually omitted. When it marks sentences, the sentences are subordinate clauses; that is, they must be in the informal form. The topic marker *wa* must not be used.

2. *Ka* cannot be used to connect two questions. Thus, the following sentences are ungrammatical.

   (1) a. *これはあなたのですか。か私のですか。
       *Kore wa anata no desuka. Ka watashi no desu ka.*
       (Is this yours or mine?)

   b. *私と一緒に来ますか。かここにいますか。
       *Watashi to isshoni kimasu ka. Ka koko ni imasu ka.*
       (Will you come with me? Or will you stay here?)

In this case, *soretomo* is used instead of *ka.*  
(⇒ *soretomo*)
【Related Expression】

Soretomo is also used with alternatives. However, the function of soretomo is to connect two alternatives, not to mark an alternative. Thus, soretomo appears with ka, not in place of ka. Examples:

[1] 肉が高かったか，それとも一郎が肉がきらいだったかどちらかだ。
   Niku ga takakatta ka, soretomo Ichirō ga niku ga kiraidatta ka dochiraka da.
   (Either meat was expensive or Ichiro didn't like meat.)

[2] 私と一緒に来ますか。それともここにいますか。

Soretomo is optional in [1], but not in [2].

- [高い / 高いです] か (Is s.t. expensive? (informal / formal))
- \{takai / takaidesu\} ka

(ii) \{Adj (na) stem / N\} \{∅ / です\} か

- [静か / 静かです] か (Is s.t. quiet? (informal / formal))
- \{shizuka / shizukadesu\} ka

- [先生 / 先生です] か (Is s.o. a teacher? (informal / formal))
- \{sensei / sensei desu\} ka

**Examples**

(a) あなたは学生ですか。
    Anata wa gakusei desu ka.
    (Are you a student?)

(b) これは何ですか。
    Kore wa nan desu ka.
    (What is this?)

(c) 友達は漢字が難しいかと聞いた。
    Tomodachi wa kanji ga muzukashii ka to kiiita.
    (My friend asked if kanji is difficult.)

(d) 私はジャンにだれが来たかとたずねた。
    Watashi wa Jan ni dare ga kita ka to tazuneta.
    (I asked Jan who had come.)
(e) 僕は山崎先生がきのう何を言ったか忘れてしまった。
Boku wa Yamazaki-sensei ga kinō nani o itta ka wasurete shimatta.
(I've forgotten (completely) what Prof. Yamazaki said yesterday.)

(f) 私は健二にお金を貸したかどうか思い出せない。
Watashi wa Kenji ni o-kane o kashita ka dō ka omoidasenai.
(I cannot remember if I lent Kenji some money.)

**Notes**

1. The question marker *ka* is a special use of the *ka* which marks an alternative (i.e., *ka*). For example, KS(A) came from (1), with the parenthesized part omitted.  

   (1) よしこは大学へ行きますか。(それとも行きませんか。)
   Yoshiko wa daigaku e ikimasu ka. (Soretomo ikimasen ka.)
   (Is Yoshiko going to college? (Or is she not?))

2. Unless it is very informal, an interrogative sentence is marked by *ka* whether it is a yes-no question or a WH-question. (⇒ *dai; kai*) Note that in Japanese interrogative sentences, the word order is the same as that of the corresponding declarative sentence. Also, an interrogative sentence is pronounced with rising intonation whether it is a yes-no question or a WH-question.

3. *Ka* remains in indirect questions as in KS(B), Exs. (c) and (d).

4. When the informal forms of *na*-type adjectives and the copula precede the question marker *ka*, *da* drops. A possible reason is that *da*, the informal form of *desu*, expresses a strong assertion and it conflicts with the question marker *ka*, which expresses the speaker's uncertainty about something.  

   (⇒ *kai; kamoshirenai; kashira*)

[shizuka / shizukadatta] ka (dō ka)

[先生 / 先生 だった] か (どう か) (whether or not s.o. is / was a teacher)

[sensei / sensei datta] ka (dō ka)

Examples

(a) 小川さんが結婚しているかどうか知ってますか。

Ogawa-san ga kekkonshite iru ka dō ka shitte imasu ka.

(Do you know if Mr. Ogawa is married or not?)

(b) フォークナーの小説がおもしろいかどうか知らない。

Fōkunā no shōsetsu ga omoshiroi ka dō ka shiranai.

(I don’t know if Faulkner’s novels are interesting.)

(c) 山口先生がお元気かどうか存じません。

Yamaguchi-sensei ga o-genki ka dō ka zonjimasen.

(I don’t know if Prof. Yamaguchi is healthy.)

Notes

1. When the optional dō ka is used, the embedded question has to be a yes-no question. If it is not used, then the question can be either a yes-no question or a WH-question.
(1) レストランで何を食べたか／*かどうか覚えていますか。
Resutoran de nani o tabeta ka / *ka dō ka oboete imasu ka.
(Do you remember what you ate at the restaurant?)

(2) その時だれと一緒にいたか／*かどうか覚えていますか。
Sono toki dare to isshoni ita ka / *ka dō ka oboete imasu ka.
(Do you remember who you were with at that time?)

2. Typical final verbs include, among others, verbs of knowing, examining, understanding, asking, remembering, and deciding.

3. Sinf ka (dō ka) can be used as a noun phrase that takes particles such as ga and o.

(3) 仕事をやめるかどうかが問題だった。
Shigoto o yameru ka dō ka ga mondai datta.
(Whether or not to quit the job was the question.)

(4) 大学院に行くかどうかを今考えています。
Daigakuin ni iku ka dō ka o ima kangaete imasu.
(I'm now thinking about whether or not I will go to graduate school.)

†Da after Adj (na) stem and N changes to na.
Examples

(a) 日本語を勉強するかい。
    *Nihongo o benkyōsuru kai.
    (Will you study Japanese?)

(b) このアパートは静かかい。
    *Kono apāto wa shizuka kai.
    (Is this apartment quiet?)

(c) 君達は学生かい。
    *Kimitachi wa gakusei kai.
    (Are you students?)

(d) その本は難しいのかい。
    *Sono hon wa muzukashii no kai.
    (Is the book difficult?)

(e) あの人は先生なのかい。
    *Ano hito wa sensei na no kai.
    (Is that person a teacher?)

Notes

1. Since kai is used in informal speech, preceding sentences must be in the informal form. The following sentences are unacceptable.

   (1) a. *日本語はおもしろいです(の)かい。
        *Nihongo wa omoshiroidesu (no) kai.
        (Is Japanese interesting?)

   b. *上野さんはアメリカへ行きます(の)かい。
        *Ueno-san wa Amerika e ikimasu (no) kai.
        (Is Mr. Ueno going to America?)

2. Kai is used only for yes-no questions. Thus, the following sentences are ungrammatical.

   (2) a. *どこへ行く(の)かい。
        *Doko e iku (no) kai.
        (Where are you going?)

   b. *あの人はだれ(なの)かい。
        *Ano hito wa dare (na no) kai.
        (Who is that person?)

   (In these sentences, dai is used. (⇒ dai))
3. Questions in the KS(A) pattern and those in the KS(B) pattern correspond to questions without *no desu* and those with *no desu* in formal speech, respectively. 

(⇒ *no da*)

4. Questions in female informal speech can be formed by dropping *kai* in male informal questions and using rising intonation. Examples:

3) a. 日本語はおもしろいの?
   *Nihongo wa omoshirōi (no)?*  
   (Is Japanese interesting?)

b. 上野さんはアメリカへ行くの?
   *Ueno-san wa Amerika e iku (no)?*  
   (Is Mr. Ueno going to America?)

c. あの人は先生の?
   *Ano hito wa sensei no?*  
   (Is that person a teacher?)

(e) あれは鈴木先生かもしれないよ。

Are wa Suzuki-sensei kamoshirenaid yo.
(That might be Prof. Suzuki.)

[Related Expressions]

I. The probability of accuracy predicted by a kamoshirenai sentence is lower than that of a darō sentence and much lower than that of a ni chigainai sentence as diagrammed below:

\[
\text{low probability} \xrightarrow{\text{kamoshirenai}} \text{darō} \xrightarrow{\text{ni chigainai}} \text{high probability}
\]

The Japanese weatherman on radio or TV, for example, employs deshō (the formal version of darō) in his forecasts as in the following:

[1] 関東地方、あすは小雨が一日中降るでしょう。

Kantō-chihō, asu wa kosame ga ichinichijū furu deshō.
(Tomorrow, in the Kanto area it will probably be drizzling all day long.)

II. Vmasu / Adj (i / na) stem sōda is used when the speaker's conjecture is based primarily on visual or other perceptual evidence, but kamoshirenai is not; rather the latter is used when that conjecture is based on logical reasoning. Thus,

[2] あっ！このケーキ（は）おいしいでしょうね。

A! Kono kēki (wa) oishisōdesu ne.
(Look, this cake looks good, doesn’t it?)

[3] *あっ！このケーキ（は）おいしいかもしれませんがね。

*A! Kono kēki (wa) oishii kamoshiremasen ne.
(*Look, this cake might be good, might it not?)

(f) つまらないことからけんかになった。

Note

Kara basically indicates a temporal or spatial starting point (Exs. (a), (b) and (c)) or a source (Exs. (d), (e) and (f)). As seen in Exs. (d), (e) and (f), a source can be a person, material, a cause or a reason.

(Since he caused a traffic accident two years ago, Mr. Miller has been trying not to drive a car.)
Notes

1. Vte kara S means ‘S after doing s.t.’ or ‘S since ~ did s.t.’ The usage of kara² is an extended use of kara¹.

2. Te kara is not to be confused with ta kara in which kara is used as a conjunction of cause / reason. (↔ kara³)

   (1) a. ジョギングをしてからシャワーを浴びた。
       Jogingu o shitē kara shawā o abita.
       (After jogging, I took a shower.)

   b. ジョギングをしたからシャワーを浴びた。
       Jogingu o shitā kara shawā o abita.
       (Because I jogged, I took a shower.)

[Related Expression]

Kara in Vte kara can be omitted if the main verb does not indicate a high degree of volitional control on the part of the speaker as in the cases of a strong suggestion, determination or a command. Thus, in KS and Exs. (a), (b) and (c) kara can drop, but in Ex. (d), [1a] and [2a] it cannot.

[1] a. 勉強が終わってからテニスをしましょう。
    Benkyō ga owatte kara tenisu o shimashō.
    (Let’s play tennis after we’ve finished studying.)

   b. *勉強が終わって、テニスをしましょう。
      *Benkyō ga owatte, tenisu o shimashō.
      (*We’ve finished studying, and let’s play tennis.)

[2] a. 勉強が終わってから遊びなさい。
    Benkyō ga owatte kara asobinasai.
    (Play after you’ve finished studying.)

   b. *勉強が終わって遊びなさい。
      *Benkyō ga owatte asobinasai.
      (*You’ve finished studying, and play.)

The difference between te kara and te is that the former focuses more on chronological order and volitional planning than the latter does.

(Haruko is seventeen, so she can’t drink sake yet.)
(b) 今日は忙しいですからあした来てください。

(Please come tomorrow because I’m busy today.)
(c) A: どうしてきのう学校を休んだんですか。
Dō shite kinō gakkō o yasunda n desu ka.
(Why were you absent from school yesterday?)
B: 頭が痛かったからです。
Atama ga itakatta kara desu.
(It was because I had a headache.)

Notes
1. S kara represents a reason or a cause. Thus, S₁ kara S₂ corresponds to ‘S₂ because / since S₁’, ‘Because / since S₁, S₂’, or ‘S₁, so S₂’. Note that the order of S₁ and S₂ is not always the same in English, while in Japanese kara clauses (i.e., S₁) always precede main clauses (i.e., S₂).
2. In subordinate clauses predicates are usually in the informal form. However, since the degree of subordination or dependency of S₁ in “S₁ kara S₂” is rather low, S₁ may be in the formal form in very formal speech, as in Ex. (b).
3. When a main clause is known to the hearer from the context, the KS(B) pattern is used. In this case, the kara clause must be in the informal form. The following sentence is unacceptable.
   (1) *来年日本へ行きますからだ / です。
   *Rainen Nihon e ikimasu kara da / desu.
   (It’s because I’m going to Japan next year.)
4. In question-and-answer situations as in KS(B) and Ex. (c), abbreviated forms are occasionally used. For example, speaker B may say (2) in the KS(B) situation.
   (2) 来年日本へ行きませんから。
   Rainen Nihon e ikimasu kara.
   (Because I’m going to Japan next year.)
In this sentence, the main clause *nihongo o benkyō shite imasu* 'I’m studying Japanese' has been omitted.

- [話す / 話した] かしら (I wonder s.o. (will) talk / talked)
  *[hanasu / hanashita]* kashira
- [高い / 高かった] かしら (I wonder s.t. is / was expensive)
  *[takai / takakatta]* kashira

(ii) [Adj (*na*) stem / N] [∅ / だった] かしら

- [静か / 静かだった] かしら (I wonder s.t. is / was quiet)
  *[shizuka / shizukadatta]* kashira
- [先生 / 先生だった] かしら (I wonder s.o. is / was a teacher)
  *[sensei / sensei datta]* kashira
Examples

(a) あの先生の授業はおもしろいかしら。
    *Ano sensei no jugyō wa omoshiroi kashira.*
    (I wonder if that teacher's class is interesting.)

(b) 幸子さんは何が好きかしら。
    *Sachiko-san wa nani ga suki kashira.*
    (I wonder what Sachiko likes.)

(c) あの人はだれかしら。
    *Ano hito wa dare kashira.*
    (I wonder who that person is.)

Notes

1. Etymologically, *kashira* comes from *ka shiranai* 'I don't know (if) ~', but now expresses the idea "I wonder".

2. *Kashira* is usually used by female speakers in rather informal speech. The male version is *kanā*, which is used only in fairly informal situations. The formation rules of *kanā* are exactly the same as those for *kashira*.

3. Sfml *kashira* is acceptable if the situation is very formal. Example:

   (1) そこは静かですかしら。
       *Soko wa shizukadeshō kashira.*
       (I wonder if that place is quiet.)

4. Since *kashira* and *kanā* mean 'I wonder' (present tense), they cannot be used for expressions like "I wondered" and "Mr. Smith wondered". For such expressions, "A wa Sinf *kashira* / *kanā* to omou" is used. Here, A is the person who wonders; *to omou* literally means 'think that'. Examples:

   (2) a. 私は松本さんは来るかしらと思った。
       *Watashi wa Matsumoto-san wa kuru kashira to omotta.*
       (I wondered if Mr. Matsumoto would come.)

   b. 山本さんは小川さんは先生かしらと思った。
       *Yamamoto-san wa Ogawa-san wa sensei kashira to omotta.*
       (Ms. Yamamoto wondered if Mr. Ogawa was a teacher.)

(c) 日本語の勉強の仕方を教えてください。
Nihongo no benkyō no shikata o oshiete kudasai.
(Please teach me how to study Japanese language.)

Notes

1. Vmasu+kata is in itself ambiguous, meaning either ‘way’ or ‘manner’.
   Thus,

   (1) 飲み方が大事です。
   Nomikata ga dajiidesu.
is ambiguous: it means either 'The way of drinking is important' or 'The manner in which one drinks is important.' The separate meanings become clearer in an extended context:

(2) この薬は飲み方が大事です。必ず食前に飲んでください。
    Kono kusuri wa nomikata ga daijidesu. Kanarazu shokuzen ni nonde kudasai.
    (It's important to know how to take this medicine. Be sure to take it before every meal.)

(3) スープは飲み方が大事です。
    Šūpu wa nomikata ga daijidesu.
    (In eating soup the manner (in which one eats it) is important.)

2. Sino-Japanese suru-verbs such as benkyō-suru 'study', denwa-suru 'telephone', ryōri-suru 'cook', setsumei-suru 'explain' and sōdan-suru 'consult' need the particle no before shikata as in:

(4) 勉強 / 電話 / 料理 / 説明の仕方
    benkyō / denwa / ryōri / setsumei no shikata
    (a way / manner of studying / telephoning / cooking / explanation)

[Related Expression]

Kata can be replaced by hōhō but only when kata means 'a way of doing s.t.' Hōhō roughly corresponds to the English word 'method'; it means a relatively complicated way of doing s.t. Ex. (c) can be rewritten as [1].

[1] 日本語の勉強の方法を教えてください。
    Nihongo no benkyō no hōhō o oshiete kudasai.
    (Please teach me a method for studying Japanese.)

(g) その車は安かったかわりによく故障した。
    *Sono kuruma wa yasukatta kawari ni yoku koshōshita.*
    (That car was inexpensive, but it often broke down.)

Note

In N₁ no kawari ni N₂, N₂ is regarded as the substitute for N₁, which is the originally intended item. In S₁ inf kawari ni S₂, an action or a state identified by S₂ takes place to make up for a counter-action or counter-state represented in S₁.

[Related Expressions]

In S₁ kawari ni S₂, kawari ni can be replaced by keredo(mo) ‘although’ or shikashi ‘but’. Note, however, that the converse is not always acceptable. Thus, keredo(mo) and shikashi in [1] below cannot be replaced by kawari ni, because the meaning of ‘making up for ~’ is missing, but the same conjunctions in [2] can be replaced by kawari ni, because the compensative meaning is present there.
[1] 私は甘いものをたくさん食べれるけれど（も）/。しかし/＊かわりに歯は強い。
Wاتashi wa amai mono o takusan taberu keredo(mo) / . Shikashi /

(c) 大野さんは九十歳だれもとても元気だ。
*Ōno-san wa kyūjūsai da keredomo totemo genkida.*
(Although Mr. Ono is ninety years old, he is very healthy.)

Notes

1. $S_1$ *keredomo* $S_2$ means ‘Although $S_1$, $S_2$’. Here, $S_1$ *keredomo* is a subordinate clause, therefore it is usually in the informal form. However, in very polite speech, $S_1$ can be in the formal form, as in (1).

(1) この本は高いですけれどもいい本ですよ。
*Kono hon wa *takaidesu keredomo ii hon desu yo.*
(Although it is expensive, this book is a good book.)

2. The informal forms of *keredomo* (listed from least formal to most formal) are *kedo* < *kedomo* < *keredo*.

(d) テーラーさんの作った文は変に聞こえる。
    *Tērā-san no tsukutta bun wa hen ni kikoeru.*
    (The sentences which Mr. Taylor made sound strange.)

[Related Expression]
*Kikoeru* is different from the regular potential form of *kiku* ‘hear’ (i.e., *kikeru*), in that the former indicates a passive, auditory potentiality, whereas the latter indicates that the speaker (or the subject of sentence) can hear sound not passively but actively. Thus,

1. 僕は耳が聞こえない / *聞けない。
   *Boku wa mimi ga kikoenai / *kikenai.*
   (I am deaf.)

2. こんなに後ろに座るとよく聞こえない / *聞けないよ。
   *Konna ni ushiro ni suwaru to yoku kikoenai / *kikenai yo.*
   (If we sit this far back, we won’t be able to hear well.)

3. いいステレオを買ったからレコードが聞ける / *聞こえる。
   *Li sutereō o katta kara rekōdo ga kikeru / *kikoeru.*
   (I bought a good stereo set, so I can listen to records.)

4. 音楽がうるさくて話が聞こえない / 聞けない。
   *Ongaku ga urusakute hanashi ga kikoenai / kikenai.*
   (The music is so loud that the conversation is inaudible / we cannot hear the conversation.)
Note that in [4] both *kikeru* and *kikoeru* are possible, depending on the speaker’s perception of the situation; if he perceives the situation to be inalterable, he uses *kikoeru*; if not, he uses *kikeru*.

(I dislike winter.)

(b) ホワイトさんはフットボールが大きらいです。  
*Howaito-san wa futtobōru ga dai-kiraidesu.*  
(Mr. White hates football.)

**Notes**

1. *Kiraida* is a *na*-type adjective which requires the “*wa-ga construction*”. (⇒ ∼ *wa ∼ ga*) The experiencer (i.e., the person who dislikes some thing) is marked by *wa* and the disliked object by *ga*. Note that the disliked object is marked by *ga*, not by *o*.

2. In subordinate clauses, *wa* marking the experiencer changes into *ga*, as seen in (1).
(1)  a. 私がチーズがきらいなことはみんな知っている。
   *Watashi ga chizu ga kiraina koto wa minna shitte iru.*
   (Everybody knows that I don’t like cheese.)

   b. 僕がきれいな季節は冬です。

(Do you remember what (=the thing which) the teacher said?)

(c) 試験のことは忘れなさい。
{Shiken no koto wa wasurenasai.}
(Forget about the exam.)
Notes

1. *Koto* means a thing which is intangible. Thus, (1) is ungrammatical.

   (1) *おいしいことはありませんか。
       *Oishii koto wa arimasen ka.
       (Lit. Isn’t there a delicious thing?)

2. *N no koto*, whose literal meaning is ‘thing of N’, is often used with such verbs as *shitte iru* ‘know’, *hanasu* ‘talk’ and *wasureru* ‘forget’, and means ‘know about N’, ‘talk about N’, etc.

3. *Koto* is used as a nominalizer, too. (⇒ *koto*²) Ex. (b), for instance, is ambiguous without proper context. That is, it means either ‘Do you remember the thing which the teacher said?’ or ‘Do you remember (the fact) that the teacher said (it)?’

[Related Expression]

*Mono* also means ‘thing’, but it means ‘a tangible thing’. Compare *koto* and *mono* in the following sentences:

[1] 黒いもの / *ことが見えましたか。
   Kuroi mono / *koto ga miemashita ka.
   (Lit. Did you see a black thing?)

[2] おもしろいこと / *ものを話してください。

(d) スイスがきれいなことは写真で知っています。

(e) あの人がいい人であることはたしかです。
Ano hito ga ii hito de aru koto wa tashikadesu.
(Lit. It is certain that he is a good person. (=He is without doubt a good person.))

**Note**

The nominalizer koto turns not just a verb or adjective but an entire sentence into a noun phrase. For example, in KS the sentence shōsetsu o kaku ‘one writes a novel’ becomes a complex noun phrase. Once a sentence has become a noun phrase, it can be used anywhere a regular noun phrase can be used. Thus, it can function as the subject, as in KS or Exs. (a) and (e), or as the direct object, as in Exs. (b) and (d), and so on.

**[Related Expression]**

In contrast to another nominalizer no, koto tends to indicate something the speaker does not feel close to. Thus, in KS, the nominalizer koto indicates that the speaker of the sentence is not personally involved in writing a novel; in other words, he is stating the sentence in general or objective terms. The nominalizer no, however, indicates something which the speaker can directly perceive or empathize with. (⇒ no³) Therefore, if koto in KS is replaced by no, the nominalizer now indicates that the speaker of the sentence is somehow personally involved with writing a novel; in short, he is empathetic with an act of writing a novel. A few typical examples in which no or koto are unacceptable are given.

[1] a. 僕は静江が泳ぐの / *ことを見ていた。
   Boku wa Shizue ga oyogu no / *koto o mite ita.
   (I was watching Shizue swim.)

b. お母さんがこんなに心配しているの / ??ことが分からないの?
   O-kā-san ga konna ni shinpaishite iru no / ??koto ga wakaranai no?
   (Don’t you understand that I am (lit. your mom is) really worried?)

c. ジェーンはビルが洗濯するの / *ことを手伝った。
   Jēn wa Biru ga sentakusuru no / *koto o tetsudatta.
   (Jane helped Bill do laundry.)
Incidentally, the difference between koto and no is apparently due to the difference in the initial sounds k and n; the velar sound k is used to symbolize a harsh, metallic, impersonal sound and the nasal sound n is used to symbolize a soft, warm, personal sound.

(⇒ Characteristics of Japanese Grammar, 8. Sound Symbolisms)

Notes

1. In general, Sinf-past koto ga aru expresses the idea that there was a time when someone or something was in some state or did something.

2. More specifically, Sinf-past koto ga aru expresses one’s experience. In this case, Sinf-past koto ga aru is an extended use of the possession expression “A wa B ga aru”, where B is a past action rather than a possessed thing. (⇔ aru¹, Note 4) This extended use of the expression of possession for the expression of experience in Japanese is parallel to that in English. Compare (1) and (2).

(1) [Possession]
 私は車がある。
Watashi wa kuruma ga aru.

(2) [Experience]

私は [ロシア語を勉強したこと]past action がある。

(3) 私は五年前に日本へ行ったことがある。

Watashi wa gonen mae ni Nihon e itta koto ga aru.
(I went to Japan five years ago. (Lit. I have been to Japan five years ago.))

(3) expresses the ideas “I have been to Japan” and “It was five years ago” at the same time. However, in this usage, the time expressed cannot be too close to the present. (4) is unacceptable.

(4) *私はきのう săšimiを食べたことがある。

*Watashi wa kinō săšimi o tabeta koto ga aru.

(c) ジョンソンさんは日本語で手紙を書くことが出来る。  
_Jonson-san wa nihongo de tegami o kaku koto ga dekiru._  
(Mr. Johnson can write letters in Japanese.)

**Notes**

1. Vinf·nonpast *koto ga dekiru* is a potential form meaning ‘can’, or ‘be able to’. This potential form is used in the “*wa-ga construction*”: 

"wa-ga construction"
N (animate) **wa** (\(\sim\) Vinf·nonpast) *koto ga dekiru*.

where N is an animate experiencer and the noun phrase \(\sim\) Vinf·nonpast *koto* is a subject noun phrase nominalized by *koto*. The meaning of the structure is ‘N can V’ (lit. ‘For N Ving \(\sim\) is possible.’).

(\(\sim\) **wa** \(\sim\) **ga**)

2. If a verb is closely associated with its direct object, as in (1) and (2) below, *o V koto* can be deleted.

(1) ナンシーはピアノ（を弾くこと）が出来る。
    *Nanshi wa piano (o hiku koto) ga dekiru.*
    (Nancy can play the piano.)

(2) 岡本さんはロシア語（を話すこと）が出来る。
    *Okamoto-san wa roshiago (o hanasu koto) ga dekiru.*
    (Mr. Okamoto can speak Russian.)

The *o V koto* deletion is unacceptable in the following sentence, however, because there is no close association between the verb and its direct object.

(3) スミスさんは日本語の新聞（を読むこと / *∅*) が出来る。
    *Sumisu-san wa nihongo no shinbun (o yomu koto / *∅*) ga dekiru.*
    (Mr. Smith can read Japanese newspapers.)

**[Related Expression]**

A shorter potential form of verb, i.e., *rareru*\(^2\) can replace the longer potential form *koto ga dekiru* without a change in basic meaning. Thus, Exs. (a), (b) and (c) can be rewritten as [1], [2] and [3], respectively.

(1) 新幹線に乗れば大阪まで三時間で行ける。
    *Shinkansen ni noreba Ōsaka made sanjikan de ikeru.*

(2) 小田は六つの時パッハが / をひけた。
    *Oda wa muttsu no toki Bahha ga / o hiketa.*

(3) ジョンソンさんは日本語で手紙が書ける。
    *Jonson-san wa nihongo de tegami ga kakeru.*

Basically, the difference between the shorter and the longer potential form is one of style; namely, the shorter version is more colloquial and less formal than the longer one.
koto ni naru ことになる  phr.

An event takes place as if spontaneously, irrespective of the speaker's volition.

It will be decided that ~; come about ~; be arranged that ~; turn out that ~

(e) 今日山田先生に会うことになっています。
    *Kyō Yamada-sensei ni au koto ni natte imasu.*
    (Today (it's been arranged that) I'm seeing Prof. Yamada.)

Notes

1. This construction is used when some decision or arrangement is made by some unspecified agent. Semantically this construction is close to the passive, because the experiencer has no control over the event.

2. Even when the experiencer himself decides to do s.t., it sounds more indirect, and therefore, more humble for him to use this construction rather than to use *koto ni suru* 'decide to do'. *(⇒ koto ni suru)*

3. *Koto ni natte iru*, as in KS(B) and Exs. (d) and (e), indicates that some decision took place at some point in the past and that the result of that decision is still in effect, sometimes to the extent that it has become a rule or a custom.

**Examples**

(a) 今年の夏は北海道を旅行することにしました。

*Kotoshi no natsu wa Hokkaidō o ryokōsuru koto ni shimashita.*

(I've decided to make a trip in Hokkaido this summer.)
(b) 京都までバスで行くことにしましょう。
*Kyōto made basu de iku koto ni shimashō.*
(Let’s (lit. decide to) go as far as Kyoto by bus.)

(c) 毎日漢字を十覚えることにしました。
*Mainichi kanji o tō oboeru koto ni shimashita.*
(I’ve decided to memorize ten kanji every day.)

(d) 私は肉をあまり食べないことにしている。
*Watashi wa niku o amari tabenai koto ni shite iru.*
(I make it a rule not to eat very much meat.)

**Notes**

1. If one decides not to do something, the verb before *koto ni suru* should be negated as in:

   (1) ピクニックに行こうと思ったんですが、行かないことにしました。
   *Pikunikkku ni ikō to omotta n desu ga, ikanai koto ni shimashita.*
   (I thought I would go to the picnic, but I’ve decided not to.)

2. *Koto ni suru* is a more complex version of *N ni suru* ‘decide on N’, ‘make it N’. (⇒ ~ *ni suru*) The complexity is due to a noun phrase nominalized by *koto*. (⇒ *koto*) An example of *N ni suru* is given below:

   (2) A：何にしますか。
   *Nan ni shimasu ka.*
   (What are you going to have (lit. decide on)?)

   B：ハンバーガーにします。
   *Hanbāgā ni shimasu.*
   (I’ll have (lit. decide on) a hamburger.)

**[Related Expressions]**

I. *Koto ni suru* indicates someone’s volitional decision, whereas *koto ni naru* indicates a non-volitional decision. Therefore, if you perceive a given decision to be your own decision, you should use *koto ni suru*; on the other hand, if you don’t perceive a given decision to be your own, you should use *koto ni naru* instead. That is why *koto ni suru* and *koto ni naru* are very awkward in [1a] and [1b], respectively.

   [1] a. 私は大阪に転勤することになりました / ???しました。
   *Watashi wa Ōsaka ni tenkinsuru koto ni *narimashita* / ??? *shimashita.*
   (Lit. It has been decided that I will transfer to Osaka. (= I’m going to be transferred to Osaka.))
b. 僕はたばこをやることにしました / ???なりました。
    _Boku wa tabako o yameru koto ni shimashita / ??narimashita._
    (I've decided to quit smoking.)

II. *Koto ni suru* and *koto ni kimeru* ‘determine to do s.t.’ are virtually identical in meaning. The difference is that the former is an idiom and, therefore, frequently used in colloquial speech, while the latter is appropriate when the speaker is talking about a relatively important decision in a rather decisive manner. Also, *koto ni suru* can be used to mean ‘I hereby decide to ~’ but *koto ni kimeru* cannot. Thus, [1] below cannot be rephrased by *koto ni kimeru*.

[1] 私は会社をやることにします / ???きめます。
    _Watashi wa kaisha o yameru koto ni shimasu / ??kimemasu._
    (I've decided to quit my company.)

(g) あの人はいい人はいい人だったけれど頑固だったね。
Ano hito wa ii hito wa ii hito datta keredo gankodatta ne.
(He was indeed a good person, but he was stubborn, wasn’t he?)

Notes

1. In this construction, when the main verb is in the past tense the tense of the first verb / adjective can be changed into the nonpast tense. Thus, Exs. (b) and (d) could be (1) and (2), respectively. The switched versions are more common in conversation.
   
   (1) ボストン シンフォニーの切符は買えることは買えましたが大変悪い席でした。
   Bosuton Shinfoni no kippu wa kaeru koto wa kaemashita ga
taihen warui seki deshita.

   (2) 今日の試験は難しいことは難しかったがよく出来た。
   Kyō no shiken wa muzukashii koto wa muzukashikatta ga yoku
dekita.

2. The verb / adjective / noun before koto wa is normally marked in the informal form even if the final predicate is marked in the formal form.

3. Normally this construction is followed by a disjunctive conjunction such as ga ‘but’, keredo ‘but, although’ and shikashi ‘but’.

(Please tell me the meaning of this word.)
夜おそく電話しないでください。
Yoru osoku denwashinai de kudasai.
(Please don’t call me late at night.)

Notes

1. *Kudasai* is the polite imperative form of *kudasaru*, the honorific version of *kureru* ‘give (me)’ and is used as an auxiliary verb with the te-form of verbs. (*⇒ kureru*²)

2. *Dōzo* emphasizes the speaker’s request and makes it more polite.

   (1) どう教えてください。
   *Dōzo oshiete kudasai.*
   (Please tell me.)

3. In very informal speech, *kudasai* may drop. (This form of request is often used by female speakers.)

   (2) a. 早く来て。
   *Hayaku kite.*
   (Please come quickly.)

   b. まだ帰らないで。

   (3) あした八時に来てくださいませんか。
   *Ashita hachijii ni kite kudasaimasen ka.*
   (Would you please come at eight o’clock tomorrow?)

5. *Kure*, the imperative form of *kureru*, can also be used in place of *kudasai* in informal male speech. {Vte / Vneg nai de} *kure* is the least polite request form.

   (4) a. 僕と一緒に来てくれ。
   *Boku to isshoni kite kure.*
   (Come with me (please).)

   b. アパートには来ないでくれ。
   *Apāto ni wa konai de kure.*

kureru₁ くれる  v. (Gr. 2)

| 大川さん  Ōkawa-san | は  wa | (私  watashi  に  ni) | 本  hon  を  o | くれた / くれました。  kureta / kuremashita.
| (Mr. Okawa gave me a book.) |
Examples

(a) ビルは(君に)何をくれましたか。
Biru wa (kimi ni) nani o kuremashita ka.
(What did Bill give to you?)

(b) 川村さんは私のむすめにレコードをくれた。
Kawamura-san wa watashi no musume ni rekōdo o kureta.
(Mr. Kawamura gave my daughter a record.)

Notes

1. Kurueru, which is one of a set of giving and receiving verbs, means ‘give’. Unlike the English give, however, kurueru is used only when the receiver is the first person or someone with whom the speaker empathizes (usually a member of the speaker’s in-group). Thus, (1) is unacceptable. (If the speaker empathizes with Mr. Ito, (1) is considered acceptable. Addressing someone as “Mr. Ito”, however, is too formal in such a situation.)

   (1) *川口さんはいつも伊藤さんにたばこをくれる。
   *Kawaguchi-san wa itsumo Itō-san ni tabako o kurueru.
   (Mr. Kawaguchi always gives Mr. Ito cigarettes.)

2. When the giver is the first person, kurueru cannot be used.

   (2) *私は中島さんに酒をくれた。
   *Watashi wa Nakajima-san ni sake o kureta.
   (I gave Mr. Nakajima sake.)

In this case, ageru must be used.

(3) 私は中島さんに酒をあげた。
Watashi wa Nakajima-san ni sake o ageita.
(I gave Mr. Nakajima sake.)

Note that when the subject is the first person, kurueru-sentences are not grammatical even if the receiver is someone the speaker empathizes with, as in (4).

(4) *私は兄さんにチョコレートをくれた。
*Watashi wa nī-san ni chokorēto o kureta.
(I gave my elder brother chocolates.)

The reason for this is as follows: Kurueru requires the receiver’s point of view when describing an event, and when an event involves the first person, the event is normally described from the first person’s point of
view. Therefore, if the first person is the giver in kureru-sentences, a viewpoint conflict arises, making the sentences ungrammatical. (In this case, ageru must be used.)

3. The polite (honorific) version of kureru is kudasaru (Gr. 1 verb; The masu-form is kudasaimasu). Example:

(5) 先生は(私に)本をくださいました。
Sensei wa (watashi ni) hon o kudasaimashita.
(My teacher gave me a book.)

4. The indirect object is often omitted if it refers to the speaker in declarative sentences or to the hearer in interrogative sentences.

(See KS and Ex. (a.).)

[Related Expressions]

I. [1] compares the differences among the three giving and receiving verbs ageru, kureru and morau in terms of viewpoint when A gives X to B. The eye sign "\( \triangleright \)" indicates which viewpoint the sentence requires.

[1] a. A は B に X をあげた。
A wa B ni X o ageta.
\( \triangleright \) (or neutral)
(A gave X to B.)

b. A は B に X をくれた。
A wa B ni X o kureta.
\( \triangleright \)
(A gave X to B.)

c. B は A に X をもらった。
B wa A ni X o moratta.
\( \triangleright \)
(B got X from A.)

If the first person or a person the speaker empathizes with is involved in a giving-receiving situation, the NP which refers to him must occur in the positions with "\( \triangleright \)". The reason for this is as follows: When the first person or someone the speaker empathizes with is involved in a giving-receiving situation, the situation is normally described from his viewpoint, and if the NP which refers to him occurs in the positions without "\( \triangleright \)", a viewpoint conflict arises.

II. [2] summarizes the plain forms and polite forms of giving and receiving verbs:
### kureru² くれる aux. v. (Gr. 2)

S.o. does s.t. as a favor to the first person or to s.o. with whom the speaker empathizes. do s.t. (for me or s.o.); do me or s.o. a favor by doing s.t.

(Ms. Walker is kindly teaching my son English.)

(c) 子供達は（あなたに）何をしてくれましたか。
Kodomotachi wa (anata ni) nani o shite kuremashita ka.
(What did your children do for you?)

Notes

1. Kureru is used as an auxiliary verb with Vte. The meaning of Vte kureru is “someone does the first person (or someone with whom the speaker empathizes) a favor by doing something”. Like sentences with kureru as a main verb, sentences with Vte kureru are stated from the viewpoint of the person who receives the favor and the receiver must be the first person or someone the speaker empathizes with (usually a member of the speaker’s in-group). Thus, (1a) is grammatical, but (1b) is not.

(A stranger bought cola for me.)
b. *私は知らない人にコーラを買ってくれた。
   *Watashi wa shiranai hito ni kōra o katte kureta.
   (I bought cola for a stranger.)

(In the case in (1b), ageru ‘give’ must be used. (⇒ ageru²)) Note that if the subject is the first person, sentences with Vte kureru are ungrammatical even if the person who receives the favor is someone the speaker empathizes with, as in (2). (See kureru¹, Note 2.)

(2) *私は母にケーキを焼いてくれた。
   *Watashi wa haha ni kēki o yaite kureta.
   (I baked a cake for my mother.)

In this case, ageru must be used. (⇒ ageru²)

2. As in KS(B), if the person receiving the benefit of the action is the direct object, the indirect object is omitted. Therefore, (3a) and (3b) are ungrammatical.

(3) a. *道男は私に私をなくさめてくれた。
   *Michio wa watashi ni watashi o nagusamete kureta.

b. *道男は私になくさめてくれた。
   *Michio wa watashi ni nagusamete kureta.

3. If the main verb of the sentence is intransitive, the person receiving the benefit of the action is not marked by ni. Therefore, (4) is ungrammatical.

(4) *みんなは私に働いてくれた。
   *Minna wa watashi ni hataraitte kureta.
   (Everybody worked for me.)

In this case, no tame ni ‘for the sake of’ is used, as in (5). (⇒ tame)

(5) みんなは私のために働いてくれた。
    Minna wa watashi no tame ni hataraitte kureta.
    (Everybody worked for my sake.)

4. The polite (honorific) version of Vte kureru is Vte kudasaru. Example:

(6) 先生は私に本を貸してくださった。
    Sensei wa watashi ni hon o kashite kudasatta.
    (My teacher kindly lent me a book.)

5. Note that in sentences like “Mr. A taught me ~”, “Mr. A bought me ~” and “Mr. A lent me ~”, which usually imply that the speaker received some sort of favor, Vte kureru (or kudasaru) should be used,
though in English this is not usually explicitly expressed. In Japanese, without the auxiliary verbs *kureru* or *kudasaru*, such sentences don’t convey the idea that the speaker received a favor.

6. The indirect object is often omitted if it refers to the speaker in declarative sentences or to the hearer in interrogative sentences.

(See KS(A), Exs. (a) and (c).)

[Related Expressions]

*Ageru, kureru* and *morau* and all their polite and non-polite versions are used as auxiliary verbs with *Vte*. (Auxiliary verbs *agaru*, *kureru* and *morau* are explained under *agaru*², *kureru*² and *morau*², respectively.) When these verbs are used as auxiliary verbs, the same viewpoint rules stated in *kureru*¹ Related Expression I apply, except that there is no neutral viewpoint.

**Examples**

(a) ナンシーはきのうパーティーに来ましたか。

*Nanshi wa kinō pātī ni kimashita ka.*

(Did Nancy come to the party yesterday?)

(b) 来週木口さんが名古屋に来るそうだ。

*Raishū Kiguchi-san ga Nagoya ni kuru sōda.*

(I was told that Mr. Kiguchi is coming to Nagoya next week.)
(c) もし，もし，家内が来たらすぐ帰るように言ってください。
Moshi, moshi, kanai ga kitara sugu kae ru yō ni itte kudasai.
(Hello, please tell my wife to come home right away if she (lit. comes to see you) drops by.)

(d) 今日はまだ新聞が来ない。

(Today's newspaper hasn't come yet.)

(e) 僕の研究室にいった来てください。
Boku no kenkyūshitsu ni ashita kite kudasai.
(Please come to my office tomorrow.)

**Note**

*Kuru* commonly describes a movement towards a place where the speaker physically exists, as in KS and Ex. (d). However, it can also describe a movement in a direction where the speaker has placed his viewpoint or where he feels strong empathy. For example, in Ex. (a) the speaker, who apparently did not attend the party, is taking the viewpoint of the hearer, who did attend. In Ex. (c) the speaker is phoning and is not at the hearer's house, yet he is taking the hearer's viewpoint, a typical example of the psychological fusion between speaker and hearer. In Ex. (b), it is possible that the speaker lives nearer Nagoya than Mr. Kiguchi does and feels that Mr. Kiguchi is entering his (the speaker's) territory or area of strong empathy. And again, in Ex. (e), the use of *kuru* indicates that the speaker's office as well as his house can be considered his territory or area of empathy.

**Related Expression**

If a movement is towards a place where the speaker can place his viewpoint, *kuru* is used, but if a movement is towards a place where the speaker cannot place his viewpoint, *iku* is used. \(\Rightarrow iku^1\)

In Exs. (a) and (c) both *kuru* and *iku* are acceptable. The difference is that the use of *kuru* shifts the focus of the sentence to the hearer's viewpoint while *iku* shifts it to the speaker's viewpoint.

tsumori desu.
(Up to now I haven’t been working hard (lit. have been playing), but
from now on I intend to work very hard.)

Notes

1. Vte kuru expresses *inception* as in Exs. (a) through (d), or *continuation* of
s.t. up to a current point of time, as in Exs. (e) and (f). In the former
case the V is a verb that indicates a process that takes some time to com-
plete, such as *naru* ‘become’, *wakaru* ‘understand’, *futoru* ‘gain weight’,
yaseru ‘lose weight’, *fukuramu* ‘swell’ and *chijimu* ‘shrink’. In the
latter case the V is any non-punctual verb.

2. In the following sentences kuru is used more as a full verb than as an
auxiliary verb. The meaning of Vte kuru is the same as that of Vte
(i.e., ‘V and’) and of kuru. (⇒ kuru)

(1) 私は会社にバスに乗って来ます。
Watashi wa kaisha ni basu ni notte kimasu.
(Lit. I ride a bus and come to my company. (=I come to work
by bus.))

(2) 四時までには帰って来てください。
Yoji made ni wa kaette kute kudasai.
(Lit. Please return and come here by 4:00. (=Please come back
by 4:00.))
(3) おいしいケーキを買って来ました。
Oishii kēki o katte kimashita.
(Lit. I bought a delicious cake and came here. (=I bought you a delicious cake.))

(4) 友達をうちにお迎えて来た。
Tomodachi o uchi ni tsurete kita.
(I brought my friends to my house.)

(5) あの本持って来たか？
Ano hon motte kita?
(Did you bring that book (lit. carry that book and come)?)

(6) ちょっと見て来るよ。
Chotto mite kuru yo.
(Lit. I'll just look and come back here. (=I'll just go and take a look at it.))

(7) 傘を取って来ます。
Kasa o totte kimasu.
(Lit. I'll get my umbrella and come back here. (=I'll go and get my umbrella.))

3. Note that the experiencer of the *inception* process or the *continuation* of the action must be the speaker himself or someone with whom the speaker empathizes. In other words, in this usage, what is expressed by *Vte kuru*

**[Related Expression]**

When *kuru* means *inception* (the beginning of a process, that is), it is very close to *Vmasu hajimeru* 'begin to ~' Exs. (a) through (d) can all be paraphrased using *Vmasu hajimeru*. However, *kuru* implies that s.t. happens to the speaker or whomever he can empathize with, whereas *Vmasu hajimeru* lacks the speaker's involvement with a process of inception. (⇒ *hajimeru*)

    (Have you eaten your lunch yet?)

    B₁: いいえ、まだ食べていません。
         Ìe, mada tabete imasen.
         (No, I haven’t eaten it yet.)

    B₂: いいえ、まだです。
         Ìe, mada desu.
         (No, not yet.)
Notes

1. *Mada* expresses the idea that someone or something is in the same state that he or it was in some time ago. In affirmative sentences, *mada* always corresponds to 'still'. In negative sentences, however, it corresponds to 'yet' when an action has not yet been taken, and 'still' in other situations, as in Ex. (c) and KS(B), respectively.

2. The abbreviated sentence seen in B₂ of Ex. (c) is used only when the response to a question is a negative one.

[Related Expression]

The concept which *mada* expresses is opposite to that of *mō*. [1] illustrates the difference between the idea conveyed by *mada* and the one conveyed by *mō*.

[1] a. *mada* X is in the state A → time
    point of reference
    (X is still in the state A)

    b. *mō* X is in the state A → time

(c) ジェット機がパリに着くまでに本を三冊読んでいました。
Jettoki ga Pari ni tsuku made ni hon o sansatsu yonde shimaishita.
(By the time the jet got to Paris, I had finished reading three books.)

[Related Expressions]

I. *Made ni* cannot be used with a verb that indicates a continuous action. Instead, *made* ‘continuously until / to X’ is used.

1. 山田は来月まで / *までにいる。
   *Yamada wa raigetsu made / *made ni iru.*
   (Yamada will stay here until / *by next month.)

2. 私は五時まで / *までに待っている。
   *Watashi wa goji made / *made ni matte iru.*
   (I'll be waiting until / *by five o'clock.)

II. When *made ni* ‘by’ is preceded by an informal nonpast verb, it may be replaced by *mae ni* ‘before’. The difference between the two is the same as the English ‘by’ vs. ‘before’. Thus, if *made ni* in Ex. (c) is replaced by *mae ni*, the sentence means ‘Before the jet got to Paris I had finished reading three books.’ More examples of the different uses follow:

3a. 来月までに / *前にこの仕事をします。
    *Raigetsu made ni / *mae ni kono shigoto o shimasu.*
    (I will finish this work by / *before next month.)

3b. 授業前に / *までに郵便局に行く。
    *Jugyō mae ni / *made ni yūbinkyoku ni iku.*
    (I will go to the post office before / *by class.)

III. *Made de*, a particle which means ‘s.t. continues until / up to X (and stops at X, although it can continue beyond X)’ is similar to *made ni*. The differences in meaning can be seen in the examples below. In [4] *made ni* is unacceptable because Lesson 10 is not the limit of domain (which is Lesson 20). In [5] *made de* is unacceptable because no important items appear after Lesson 10.

4. この教科書は二十課までありますが今学期は十課までで / *までに終わります。
   *Kono kyōkasho wa nijukka made arimasu ga kongakki wa jukka made de / *made ni owarimasu.*
   (There are up to twenty lessons in this textbook, but this semester we will stop at Lesson 10.)

(c) 私は試験の前に映画を見に行った。

Watashi wa shiken no mae ni eiga o mi ni itta.
(Before the exam I went to see a movie.)

Notes

1. Mae ni is used when the speaker knows when something is going to take place. Thus, the following uses of mae ni are marginal.

(1) 雨が降る前に帰りましょう。

Ame ga furu mae ni kaerimashō.
(Let’s go home before it rains.)
(2) ??Forget in advance.

??Wasureru mae ni itte okō.
(I'll say it (in advance) before I forget.)

(See Related Expression for proper expressions.)

2. The verb before mae ni is always nonpast, even if the tense of the main verb is past, as in Ex. (b).

[Related Expression]

When the speaker knows that something is about to happen but does not know exactly when it is to happen, uchi ni ‘before’ is used instead of mae ni. Thus, mae ni in (1) and (2) of Note 1 should be replaced by nai uchi ni, as in [1] and [2].

[1] 雨が降らないうちに帰りましょう。
Ame ga furanai uchi ni kaerimashō.

   (I go to Japan at least once every year.)

(d) ジーンは毎食サラダを食べる。
   Jin wa maishoku sarada o taberu.
   (Jean eats salad at every meal.)

Notes

1. Mai is prefixed to nouns which express a unit of time. Nouns like shoku ‘meal’ can also be used, as seen in Ex. (d). In this case, shoku implies the time at which one eats. However, the following phrases are all unacceptable because the nouns following mai do not indicate a time or period of time. (The correct expressions are given in parentheses.)

   (1) a. *毎人 ‘every person’ (すべての人 / 人はみんな)
       *mai-hito / nin (subete no hito / hito wa minna)

   b. *毎先生 ‘every teacher’ (すべての先生 /
       *mai-sensei (subete no sensei /
       先生はみんな)
       sensei wa minna)

   c. *毎家 ‘every house’ (すべての家 / 家はみんな)
       *mai-ie / ka / ya (subete no ie / ie wa minna)
Mai cannot be used when nouns of time are preceded by numbers; thus, the following phrases are unacceptable. (⇒ goto ni)

(2) a. *毎三日       ‘every three days’
      *mai-mikka

b. *毎二年       ‘every other year’
   *mai-ninen

c. *毎一週       ‘every one week’
   *mai-ismatchē

(See Related Expression [1a] for correct expressions.)

2. Mai is usually used with Japanese-origin words of one or two syllables or shorter Chinese-origin words. Thus, compounds like those in (3) are awkward.

(3) a. ???毎休み       ‘every holiday’
      ???mai-yasumi

b. ???毎クリスマス     ‘every Christmas’
   ???mai-kurisumasu

c. *毎子供の日       ‘every Children’s Day’
   *mai-kodomo-no-hi

(See Related Expression [1b] for correct expressions.)

[Related Expression]

Goto ni also means ‘every’, but its usage differs from that of mai. First, goto ni is not a prefix but a suffix. Second, it is used with nouns of time preceded by numbers or specific dates, as seen in [1]. (⇒ goto ni)

[1] a. Period of time
     三日ごとに       ‘every three days’
     mikka goto ni

     一時間ごとに     ‘every hour’
     ichijikan goto ni

b. Specific date
     クリスマスごとに     ‘every Christmas’
     Kurisumasu goto ni

     子供の日ごとに     ‘every Children’s Day’
     Kodomo-no-hi goto ni
(Cf. 日ごとに ‘day after day’; 年ごとに ‘year after year’)

Third, unlike *mai*, *goto ni* can also be used with other noun phrases, as seen in [2].

[2] ジョンは会う人ごとに日本語であいさつをした。
Jon wa au hito goto ni nihongo de aisatsu o shita.
(John greeted every person he met in Japanese.)

*ōkii mama*

(iii) [Adj (na) stem な/ N の] まま

*na no mama*

不便なまま (leaving s.t. inconvenient)
*fuubenna mama*

昔のまま (leaving s.t. as it was)
*mukashi no mama*

Examples

(a) 電気をつけたまま寝てしまいました。

*Denki o tsuketa mama nete shimaimashita.*

(I fell asleep leaving the light on.)

(b) ビールを買ったまま飲まなかった。

*Biru o katta mama nomanakatta.*

(I bought beer, but I didn’t drink it.)

(c) 聞いたままを友達に話しました。

*Kiiita mama o tomodachi ni hanashimashita.*

(I told my friend exactly what I heard.)

(d) あの人はあれからずっと寝たままだ。

*Ano hito wa are kara zutto neta mama da.*

(He’s been in bed (lit. all along) since then.)

(e) 高山さんはアメリカへ行ったまま帰らなかった。

*Takayama-san wa Amerika e itta mama kaeranakatta.*

(Mr. Takayama went to America never to return.)

(f) 車のエンジンをかけたままにしておいた。

*Kuruma no enjin o kaketa mama ni shite oita.*

(I left the car engine on.)
今のままにしておいてください。
*ima no mama ni shite oite kudasai.*
(Please leave it as it is now.)

**Notes**

1. The verb before *mama* has to be nonpast if the verb is negative as in (1).

   (1) a. ドアを開めないまま出かけてしまった。
   *Doa o shimenai mama dekakete shimatta.*
   (I left my house with the door open.)

   b. さようならの挨拶もしないまま行ってしまった。
   *Sayōnara no aitsu mo shinai mama itte shimatta.*
   (She went away without even saying goodbye.)

If a verb that precedes *mama o* is non-volitional, the verb can be nonpast even if the main transitive verb is past, as shown in (2):

   (2) a. 言われる / 言われたままを払った。
   *Iwareru / Iwareta mama o haratta.*
   (I paid money as I was told to.)

   b. 思っている / いたままを書いて見た。
   *Omotte iru / ita mama o kaite mita.*
   (I wrote exactly as I felt.)

2. When *mama* is followed directly by a verb (other than *suru*) as in KS(A) and Exs. (a), (b) and (e), *de* can be inserted between *mama* and the verb. Thus, KS(A) can be rephrased as follows:

   (3) 弟はテレビをつけたままで寝てしまった。
   *Otōto wa terebi o tsuketa mama de nete shimatta.*
   (Lit. My younger brother left the TV on, and went to sleep. (= My younger brother went to sleep leaving the TV on.))

The difference between the *mama* version and the *mama de* version is minimal; the latter sounds more like a coordinate construction as illustrated by the literary translation of (3).

**[Related Expressions]**

Vinfl•nonpast•neg *mama* can be paraphrased using *nai de* or *zu ni*, as in:

   [1] ドアを開めないと / ないで / ずに出かけてしまった。
   *Doa o shimenai mama / nai de / zu ni dekakete shimatta.*
   (He left his house with the door open.)
The *mama* version focuses on the unaltered situation, but the *nai de / zu ni* versions focus primarily on the negative aspect of the verb. The translation of the former and the latter are ‘He left with the door open.’ and ‘He left without closing the door.’, respectively.  

(⇒ *nai de*)

お話しましょう (I / We will talk; Let’s talk.)

食べましょう (I / We will eat; Let’s eat.)
Examples

(a) 私達が手伝いましょう。
Watashitachi ga tetsudaimashō.
(Wé will help you.)

(b) 私が行きましょうか。
Watashi ga ikimashō ka.
(Shall I go there?)

(c) ビールを飲みましょう。
Biru o nomimashō.
(Let's drink beer.)

(d) 車で行きましょうか。
Kuruma de ikimashō ka.
(Shall we go by car?)

Notes

1. Mashō is a formal verb ending which is used to express the first person’s volition (KS(A), Exs. (a) and (b)) or invitation (KS(B), Exs. (c) and (d)).

2. The sentence in the KS(A) pattern, which includes the subject X ga, implies that ‘not others but X will do something’. If the sentence doesn’t carry such an implication but simply states the first person’s volition, the subject is usually omitted. Compare the following sentences:

   (1) a. そのかばんを持ちましょう。
   Sono kaban o mochimashō.
   (I’ll carry that bag.)

   b. 私がそのかばんを持ちましょう。
   Watashi ga sono kaban o mochimashō.
   (I will carry that bag.)

3. In invitation situations like KS(B), the subject is usually omitted. (Exs. (c) and (d))

4. Mashō with the question marker ka asks whether the hearer will accept the speaker’s volitional action or invitation. (Exs. (b) and (d))

5. Negative volition is usually expressed by simple nonpast negatives, as seen in (2).

   (2) 私はパーティーに行きません。
   Watashi wa pātī ni ikimasen.
   (I won’t go to the party.)
(The negative volitional ending *mai*, as in *ikumai* ‘won’t go’, is not commonly used in modern colloquial Japanese.)

6. “Let’s not do s.t.” is expressed by different constructions.

(A) Vinf no wa yamemashō / yoshimashō. (Lit. Let’s stop doing s.t.)
Example:

(3) パーティーに行くのはやめましょう / よしましょう。
    *Pāti ni iku no wa yamemashō / yoshimashō.*
    (Let’s not go to the party.)

(B) Vneg naide okimashō (Lit. Let’s leave ~ undone.)
    (⇒ *oku*)
Example:

(4) フレッドには言わないでお願いましょう。
    *Fureddo ni wa iwanaide okimashō.*
    (Let’s not tell Fred.)

7. In indirect speech or in sentences with verbs like *omou* ‘think’ and *kesshinsuru* ‘make up one’s mind’, the informal volitional form is used. (For the informal volitional forms of verbs, see Appendix 1.)

(5) 村田さんはコーヒーを飲もうと言った。
    *Murata-san wa kōhī o nomō to itta.*
    (Mr. Murata suggested we drink coffee.)

(6) 私は来年日本へ行こうと思います。
    *Watashi wa rainen Nihon e ikō to omoimasu.*
    (I think I will go to Japan next year.)

8. Unlike English, in Japanese the volitional future and the simple future are expressed by different forms. Thus, “I think I will see a movie.” is expressed by either (7) or (8).

(7) 私は映画を見ようと思う。
    *Watashi wa eiga o mirō to omou.*

(8) 私は映画を見ると思う。
    *Watashi wa eiga o miru to omou.*

(7) is an example of the volitional future, in which the speaker’s volition is expressed, while (8) is an example of the simple future.

[Related Expression]

An invitation by the speaker can also be expressed through negative questions, as in [1].
In invitation situations, negative questions are more polite than mashō-sentences because the former are asking whether or not the hearer will do something and, therefore, are hearer-oriented, while the latter do not consider the hearer's volition and are more speaker-oriented.

Visible Object | Adj (adverbial form) / N+ni
--- | ---
今日 は | 山 が 近く 見える / 見えます。
Kyō wa yama ga chikaku mieru / miemasu.

(Today the mountains look near.)

**Examples**

(a) 私には木の上の小さな鳥が見えた。
Watashi ni wa ki no ue no chisana tori ga mieta.
(I could see small birds on the tree.)

(b) 東京タワーからは東京の町がよく見える。
Tōkyō Tawā kara wa Tōkyō no machi ga yoku mieru.
(From Tokyo Tower you can get a good view of the towns of Tokyo.)

(c) あの人は年よりずっと若く見える。
Ano hito wa toshi yori zutto wakaku mieru.
(He looks much younger than his age.)

(d) 女の人は夜きれいに見える。
Onna no hito wa yoru kireini mieru.
(Women look beautiful at night.)

(e) 中島さんは学生に見える。
Nakajima-san wa gakusei ni mieru.
(Mr. Nakajima looks like a student.)

**Notes**

1. **Mieru** can mean ‘look ~’ if it is preceded by the adverbial form of an Adj (i) as in Ex. (c) or of an Adj (na) as in Ex. (d) or by a N ni as in Ex. (e).

2. **Mieru** can be used as a polite version of kuru ‘come’ as in:

   (1) お母さん、お客さんが見えたよ。
   O-kā-san, o-kyaku-san ga mieta yo.
   (Mom, we have company!)

   (2) 学会には上田先生も見えた。
   Gakkai ni wa Ueda-sensei mo mieta.
   (Lit. To the academic meeting appeared Prof. Ueda, too. (=Prof. Ueda also attended the academic conference.))
Mieru can be used as an honorific polite verb because it is a more indirect reference to a superior's act of 'coming'. In other words, the speaker is referring to a superior's appearance as if it were a spontaneous, natural phenomenon of 'visibility'.

3. A visible object is marked by ga, not by o.

[Related Expression]

Mieru is different from the regular potential form of miru, i.e., mirareru, in that mieru indicates that s.t. or s.o. is passively visible regardless of the volition of the speaker; mirareru, on the other hand, indicates that the speaker or the subject of the sentence can see s.t. or s.o. actively rather than passively. Thus,

[1] 僕は目が見えない /*見られない。
  Boku wa me ga mienai / *mirarenai.
  (I'm blind.)

[2] テレビを買ったからテレビが見られる /*見える。
  Terebi o katta kara terebi ga mirareru / *mieru.
  (Because I bought a TV I can now watch TV.)

[3] あの映画はどこで見られます /*見えますか。
  Ano eiga wa doko de miraremasu / *miemasu ka.
  (Where can we see the movie?)

[4] よく見えない /*見られないからステージの近くに行こう。
  Yoku mienai / *mirarenai kara sutēji no chikaku ni ikō.
  (We can't see it well, so let's go closer to the stage.)

[5] 隣に高いビルが立ったので山が見え / 見られなくなった。
  Tonari ni takai biru ga tatta node yama ga mie / mirare naku natta.
  (Because a tall building was built next door, the mountains are not visible any more / we can't see the mountains any more.)

Note that in [5] both mieru and mirareru are possible, depending on how the speaker perceives the visible object; if he thinks that the situation is beyond his control and has to give up looking at the mountains, he uses mieru; if not, he uses mirareru.
miru みる   aux. v. (Gr. 2)

(b) ここの刺身はおいしいですよ。食べてみましょうか。

Koko no sashimi wa oishiiidesu yo. Tabete mimasu ka.

(Sashimi here is good. Will you try it?)

◆ Note

Miru is used as an auxiliary verb with Vte meaning ‘make an attempt at doing s.t. to see what it is like or what will happen’.

◆ Related Expression

A similar expression, ～yō to suru, means simply ‘try to do s.t.’ When these two expressions are used in the past tense, however, their meanings are not the same. For example, [1a] means that Mr. Brown did put on Tom’s undershirt, whereas [1b] means that Mr. Brown tried to put it on, with the implication that he couldn’t or didn’t actually do it.
a. ブラウンさんはトムのシャツを着てみた。
   Buraun-san wa Tomu no shatsu o kite mita.
   (Mr. Brown tried Tom's undershirt on.)

b. ブラウンさんはトムのシャツを着ようとした。
   Buraun-san wa Tomu no shatsu o kiyō to shita.
   (Mr. Brown tried to put Tom's undershirt on.)

(You can't buy fresh fish in this town. You can't buy it in the next town, either.)

Notes

1. In general, when the element X ～ mo appears in a sentence, a related sentence with the element Y (plus particle if necessary) in place of X ～ mo is presupposed. For example, when a speaker states (1), a sentence like (2) is presupposed.

(1) 私はニューヨークへも行った。
Watashi wa Nyūyōku e mo itta.
(I went to New York, too.)

(2) 私はボストンへ行った。
Watashi wa Bosuton e itta.
(I went to Boston.)

Thus, when X ～ mo appears in a sentence, X ～ mo is always the element under focus in that sentence.

2. There are cases in which X ～ mo is used, although it does not exactly replace the element Y in the presupposed sentence. For example, (3b) can be spoken after (3a).

(3) a. 私の家は居間がせまい。
Watashi no ie wa ima ga semai.
(The living room of my house is small.)

b. それに台所も不便だ。
Sore ni daidokoro mo fubenda.
(On top of that, the kitchen is inconvenient, too.)

In this case, the speaker implies that his house is inconvenient when he says (3a), and this implication is the presupposition of (3b), where the speaker elaborates on the inconvenience.

3. “X ～ mo A da” cannot be used to mean ‘X is also A’ in the sense that
X is A as well as something else. "X mo A da" can be used only when "Y wa / ga A da" is presupposed. Thus, (4) does not mean (5). (In fact, (4) is nonsensical if it is stated by the same person.)

(4) 私は医者だ。 *私も先生だ。

(5) I am a (medical) doctor. I am also a teacher.
The idea that someone is a doctor as well as a teacher is expressed as in (6).

(6) 私は医者だ。 そして先生でもある。
Watashi wa isha da. Soshite sensei de mo aru.
(I am a (medical) doctor and also a teacher.)

       Harisu-san wa hijōi yasashii kanji mo yomenai.
       (Lit. Mr. Harris cannot read very easy kanji, either. (=Mr. Harris cannot read even very easy kanji.))

2. **Nanimo** and **daremo** are used only in negative sentences. Other **WH**-words with *mo* can be used in both affirmative sentences and negative sentences.

   (2) いつも (always; anytime)
       itsumo

       どこも (everywhere; anywhere)
       dokomo

       どちらも (both; neither of the two ~)

(Haruo is all right now.)
Notes

1. *Mo* expresses the idea that someone or something is not in the same state he or it was in some time ago. Thus, *mo* corresponds to 'already' or 'now' in affirmative declarative sentences, 'yet' or 'already' in affirmative interrogative sentences, and '(not) any more' or '(not) any longer' in negative sentences.

2. The opposite concept of *mo* is expressed by *mada*. (⇒ *mada*)

Notes

1. Because the speaker presents a situation before *mono (da)* as if it were a tangible object, this structure tends to convey differing degrees of emotion. KSs (A) through (F) represent emotive excuse, exclamation, nostalgic reminiscence, desire, indirect command and conviction, respectively. Note, however, that the emotion expressed here is not an instantaneously appearing emotion instigated by a current event but an emotion nurtured in one’s mind for a relatively long period time.

2. When *mono* indicates a reason or an excuse it is used only in very informal speech.

3. *Mono* is contracted into *mon* in very colloquial speech.

4. The usage of *mono* in KS(A) does not take *da / desu*, unless it appears in a subordinate clause, as in (1).

   (1) 金がないもんで映画も見られないんだ。
   *Kane ga nai mon de eiga mo mirarenai n da.*
   (Because I don’t have money, I can’t see even a movie, you know.)

[Related Expression]

In KSs(A), (C), (D), (E) and (F) *mono* can be replaced by *no*, but with a slightly different meaning. *Mono* sounds more emotive than *no*, probably due to the semantic difference between *mono* ‘a tangible object’ and *no* ‘a nominalizer of a directly perceptible state or action’. Thus, the *mono (da)* version is more indirectly emotive, and is not necessarily geared to the current moment, whereas the *no (da)* version is more directly emotive and is geared to the current moment. Observe the following:
[1] 今ビールが飲みたいん / *ものです。
   Ima biru ga nomitai n / *mono desu.
   (I'd like to drink beer now.)

[2] 今すぐ会いに行くん / *ものです。
   Ima sugu ai ni iku n / *mono desu.
   (You should go see him at once.)

Note that mono in KS(A) can be replaced by kara, but the latter is free from the emotive overtones which are attached to mono.

Examples

(a) 山川さんは橋本さんにウイスキーをもらった。
   Yamakawa-san wa Hashimoto-san ni uisuki o moratta.
   (Mr. Yamakawa got whiskey from Mr. Hashimoto.)

(b) (あなたは)モリスさんに何をもらったの?
   (Anata wa) Morisu-san ni nani o moratta no?
   (What did you get from Mr. Morris?)
1. Morau, which is one of a set of giving and receiving verbs, means ‘get’. Unlike the English get, however, morau is used only when the receiver is the first person or someone with whom the speaker empathizes (usually a member of the speaker’s in-group). Thus, (1) is unacceptable.

(1) *山本さんは私に酒をもらった。
    *Yamamoto-san wa watashi ni sake o moratta.
    (Mr. Yamamoto got sake from me.)

The reason for this is as follows: morau requires the receiver’s point of view when describing an event, and when an event involves the first person, the event is normally described from the first person’s point of view. Therefore, if the first person is the giver in morau-sentences, a viewpoint conflict arises, making the sentences ungrammatical. (The situation seen in (1) is usually described using ageru.)

(⇒ ageru)

2. The humble polite version of morau is itadaku. Example:

(2) 私は先生に本をいただいた。
    Watashi wa sensei ni hon o itadaita.
    (I was given a book by my teacher.)

3. The giver can also be marked by the source kara ‘from’ (i.e., kara).

(⇒ ni)

(3) 私は山本さんに / から本をもらった。
    Watashi wa Yamamoto-san ni / kara hon o moratta.
    (I got a book from Mr. Yamamoto.)

However, if the giver is not human, kara is more appropriate than ni, as seen in (4).

(4) 私は日本政府から / お金をおわたった。
    Watashi wa Nihonseifu kara / ?? ni o-kane o moratta.
    (I received some money from the Japanese government.)

This seems to be due to the fact that kara carries the idea of source, while ni conveys the idea of direct contact. That is, unlike the situation in (3), the speaker in (4) does not have direct contact with the giver, the Japanese government, when receiving money. Rather, the Japanese government in (4) is merely the source of the money received.

4. In declarative sentences, if the subject is the speaker, it is often
omitted. Similarly, in interrogative sentences, if the subject is the hearer, it is often omitted. (See KS and Ex. (b.))

(c) ジョンソンさんは鈴木さんに日本語を教えてもらっている。
    *Jonson-san wa Suzuki-san ni nihongo o oshiete moratte iru.*
    (Mr. Johnson has Mr. Suzuki teaching him Japanese.)

**Notes**

1. *Morau* is used as an auxiliary verb with *Vte*. The meaning of *Vte morau* is ‘receive some benefit from someone’s action’ or ‘have someone do something for s.o.’s sake’. Like sentences with *morau* as a main verb, when the auxiliary verb *morau* is used, the recipient of the favor (i.e., the person in the subject position) must be the first person or someone with whom the speaker empathizes (usually a member of the speaker’s in-group). Thus, (1a) is grammatical, but (1b) is not.

   (1) a. 私は隣の人にペンを貸してもらった。
       *Watashi wa tonari no hito ni pen o kashite moratta.*
       (Lit. I had the man next to me lend me a pen. (=I borrowed a pen from the man next to me.))

   b. *隣の人は私にペンを貸してもらった。
       *Tonari no hito wa watashi ni pen o kashite moratta.*
       (Lit. The man next to me had me lend him a pen. (=The man next to me borrowed a pen from me.))

Note that if the giver of the favor is the first person, sentences with *Vte morau* are ungrammatical even if the recipient of the favor is someone the speaker empathizes with, as in (2).  

   (2) *弟は私にラジオを貸してもらった。
       *Otōto wa watashi ni raijo o kashite moratta.*
       (My younger brother had me lend him a radio.)
3. The humble polite version of *morau* as an auxiliary verb is *itadaku*. Example:

(3) 私は先生に本を貸していただいた。

*Watashi wa sensei ni hon o kashite itadaita.*

(Lit. I had my teacher lend me a book. (=I borrowed a book from my teacher.))

4. Unlike sentences with *morau*¹, the giver cannot be marked by *kara* in sentences with *morau*².

5. In declarative sentences, if the subject is the speaker, it is often omitted. Similarly, in interrogative sentences, if the subject is the hearer, it is often omitted. (KS(A)(B) and Ex. (b.).)

**Notes**

1. ～na is a strong negative imperative and is seldom used except in highly
emotional situations. However, the addition of yo after na serves to soften the force of the statement.

(1) 酒をあまり飲むなよ。
_Sake o amari nomu na yo._
(Don’t drink too much sake, OK?)

Notes

1. A particle normally follows nado, as in:

nado {wa / ga / (o) / (ni) / kara / de / e / yori / etc.}

Particles other than ga, o, and wa can precede nado, but, depending on the context, this order gives the sentence a more derogatory meaning. Examples:

(1) 薬でなど食べられない。
Hashi de nado taberarenai.
(We can't eat with damned chopsticks.)

(2) 薬などで食べる人もいる。
Hashi nado de taberu hito mo iru.
(Some people eat it with chopsticks (and the like.).)

2. If the main predicate is negated, as in Exs. (d) and (e), nado often conveys a sense of humbleness especially when the subject is the speaker or a member of his in-group. In other cases, it is generally derogatory.

[Related Expression]

Nanka is the informal, colloquial version of nado. It is used as nado is used except that in a context conveying undesirability or contempt there is more emphasis on the derogatory meaning.

(Mr. Kimura works for a company while going to school.)

Notes

1. Vmasu nagara expresses an action that occurs concurrently or simultaneously with another action. The action expressed by Vmasu nagara is always secondary to the action expressed in the main clause. Thus, in (1), B is acceptable as a response to A, but C is not.

(1) A: ちょっと話がしたいんですが。
Chotto hanashi ga shitai n desu ga.
(I’d like to have a little talk with you.)

B: じゃ、コーヒーを飲みながら話しましょう。
Ja, kōhi o nomi nagara hanashimashō.
(Then, let’s talk over a cup of coffee.)

C: *じゃ、話しながらコーヒーを飲みましょう。
*Ja, hanashi nagara kōhi o nomimashō.
(Then, let’s drink a cup of coffee while talking.)

Note that in English, “while ~ing” is not always the secondary action.

2. Vmasu nagara cannot be used when the subjects of the two actions are different, as in (2).

(2) *ルームメートがステレオを聞きながら私は勉強した。
*Rūmumēto ga sutereo o kiki nagara watashi wa benkyōshita.

**Notes**

1. If a nai de clause expresses something one is expected to do, as in KS where there is the expectation that Nancy should eat breakfast, the translation is ‘without ~ing’, but if not, it is ‘do not do ~ and ~’, as in Ex. (a).

2. ~nai de is often used to combine two sentences as in KS and Exs. (a) and (b) but can also be used with kudasai ‘please do s.t.’, as in Ex. (c), hoshii ‘want’, as in Ex. (d), morau ‘receive a favor’, as in Ex. (e), and te oku ‘do s.t. in advance’, as in Ex. (f).

3. ~nai de is used only with verbs. It cannot be used with adjectives.

4. In cases where no auxiliaries such as kudasai, hoshii, morau and te oku are used, nai de implies that the speaker is emphasizing negation, because somehow the proposition expressed in the nai de clause is contrary to his expectation.

**[Related Expressions]**

I. ~nai de can be replaced by ~ zu ni, if de of nai de somehow retains the original meaning of ‘and’, as in KS, Exs. (a), (b) and (f). Thus, the sentences in [1] are all grammatical, but those in [2] are all ungrammatical:

[1] a. ナンシーはきのう朝ご飯を食べずに学校へ行った。
Nanshi wa kinō asagohan o tabezu ni gakkō e itta. (Cp. KS)

b. 中田さんは大阪に行かずに京都に行った。
Nakada-san wa Ōsaka ni ikazu ni Kyōto ni itta. (Cp. Ex. (a))

c. 辞書を使わずに関んでください。
Jisho o tsukawazu ni yonde kudasai. (Cp. Ex. (b))

d. まだあるから買わずにおきました。
Mada aru kara kawanai de okimashita. (Cp. Ex. (f))

*Mada kaerazu ni kudasai. (Cp. Ex. (c))
b. *電話せずに欲しい。
   *Denwasezu ni hoshii. (Cp. Ex. (d))

The only difference between nai de and zu ni is that of style: zu ni is used in formal speech or written Japanese. The formation is exactly the same as nai de, namely, Vinf·neg zu ni. However, the zu ni form for suru-verbs is not shi zu ni, but se zu ni, as in benkyōsezu ni ‘without studying’.

II. ~nai de can be replaced by nakute only when the nai de clause indicates some cause for human emotion which is expressed in the main clause. Otherwise, the nakute version is unacceptable, as in [5].

[3] 僕は英語が話せないので / ???ずに / なくて恥ずかしかった。
   Boku wa eigo ga hanasenai de / ???zu ni / nakute hazukashikatta.
   (I felt ashamed because I couldn’t speak English.)

[4] スージーが遊びに来ないので / ???ずに / なくて助かった。
   Sūji ga asobi ni konai de / ???zu ni / nakute tasukatta.
   (I felt relieved, because Susie didn’t come see me.)

    Ichirō wa bōshi o nukanai de / zu ni / *nakute heya ni haitta.
    (Ichiro entered the room without taking off his hat.)

b. 見ないで / *ずに / *なくてください。
    Minai de / *zu ni / *nakute kudasai.
    (Please don’t look at it.)

c. 食べないで / ずに / *なくておいた。
    Tabenai de / zu ni / *nakute oita.
    (I left it uneaten.)

It is also noted that the idea of ‘X is not Y but Z’ is expressed by nakute rather than nai de, as in [6].

[6] 私は学生ではなくて / *ないで先生です。
    Watashi wa gakusei de wa nakute / *nai de sensei desu.
    (I am not a student but a teacher.)

Notes

1. Vneg nakereba naranai expresses the idea of obligation. The contracted forms Vneg nakerya naranai and Vneg nakya(a) naranai are also used in conversation. Sometimes, naranai is omitted if the context is clear. Example:

    (1) もう帰らなければ / 帰らなければ / 帰らなきゃ (あ).
    Mō kaeranakereba / kaeranakerya / kearanakya(a).
    (I have to go home now.)

2. Negative obligation, i.e., "do not have to" cannot be expressed by the negative form of this pattern. It is expressed by ~nakutemo ii 'It is all right if ~ doesn't do s.t.'  
    (⇒ ~ te mo ii)

[Related Expression]

In addition to ~nakereba naranai / ikenai there are at least four other expressions of obligation. They are as follows:

[1] a. 話さなくてはならない / いけない。
    Hanasanakute wa naranai / ikenai.

b. 話さないといけない / *ならない。
    Hanasanai to ikenai / *naranai.

c. 話さねばならない / *いけない。
    Hanasaneba naranai / *ikenai.

[1c] is the written version of ~nakereba naranai. [1a], [1b] and hanasa nakereba naranai / ikenai carry essentially the same meaning. Nakute wa is often contracted into ~nakucha, ~nakuchā, ~nakutchā, and ~nakutchā.

(e) やっと大学を出て学生ではなくになりました。

[Related Expressions]

Compare naku naru, Vinf-neg yōni naru and mō ~nai in the following sentences:

[1] 日本語が話せなくなった。
Nihongo ga hanasenaku natta.
(I cannot speak Japanese any more.)

[2] 日本語が話せないようになった。
Nihongo ga hanasenai yōni natta.
(I’ve reached the point where I can’t speak Japanese.)

[3] 日本語がもう話せない。
Nihongo ga mō hanasenai.
(I cannot speak Japanese any more.)

[1] and [2] focus on both process and result, but [3] focuses only on result. Thus, [1] and [2] can take time expressions indicating the period of change, such as ichinen no uchi ni ‘within a year’, kyūni ‘suddenly’, tōtō ‘finally’, but [3] cannot. [1] is different from [2] in that the latter focuses on an indirect, circumstantial cause for the change, whereas the former focuses on a more direct one. Thus, [1] implies that the speaker cannot speak Japanese any more because he has simply forgotten Japanese but [2] implies that he cannot speak Japanese because the situation is such that there are no native speakers around to speak with.

e) きびしい先生じゃなくてよかった。
Kibishii sensei ja nakute yokatta.
(Lit. He wasn't a strict teacher and it was good. (=I'm glad that he wasn't a strict teacher.))

【Related Expressions】

I. Nakute mo means ‘(even) if 〜 not 〜’.

[1] 小川は頭がいいから勉強しなくても東大に入れるよ。
Ogawa wa atama ga ii kara benkyōshinakute mo Tōdai ni haireru yo.
(Ogawa is bright, so he can enter Tokyo University even if he doesn’t study.)

[2] この難しい漢字は覚えてなくてもいいですか?
Kono muzukashii kanji wa oboenakute mo ii desu ka?
(Is it all right if I don't memorize this difficult kanji?)

II. The cause and effect relation indicated by nakute is much weaker and more indirectly presented than that of nai kara or nai node. Thus, KS can be rewritten in four versions, including nai de, as shown in [3].

[3] 朝七時に起きられなくて / ないで / なかったから / なかったので会社に遅れました。
Asa shichiji ni okirarenakute / nai de / nakatta kara / nakatta node kaisha ni okuremashita.

The most direct presentation of the cause-effect relation is nakatta kara, and the presentation becomes more indirect in the following order: nakatta node, nai de, and nakute. For an excuse for one's lateness the least direct one is of course preferred, because the more indirect, the politer the expression.

Notes

1. Basically, S nara expresses the speaker’s supposition concerning the truth of a present or past fact or the actualization of something in the future.

2. Nara is the simplified form of naraba, the conditional form of the copula da. (⇒ ba) In modern Japanese, however, ba is usually omitted.

3. Since nara is the simplified conditional form of the copula, it requires a noun or a noun equivalent. Thus, if the preceding element is not a noun, it is nominalized by no (⇒ no3), although this no is optional in modern Japanese. (The stems of na-type adjectives behave like nouns; therefore, they can precede nara without being nominalized. See Formation (ii).)

4. When S1 is nonpast, S1 nara S2 cannot be used if it is nonsensical to suppose the truth of S1. Thus, the sentences in (1) – (3) are all unacceptable. (1) is unacceptable because it never fails to become ten o’clock; (2) is unacceptable because one can never tell whether it is true or not that it will rain tomorrow; (3) is unacceptable because the speaker already knows it is true that he wants to go.

(1) *十時になるならバスが来るはずです。
*Jūji ni naru nara basu ga kuru hazu desu.
(Lit. The bus is expected to come if it is true that it becomes ten o’clock.)

(2) *あしたの雨が降るなら試合はないでしょう。
*Ashita ame ga furu nara shiai wa nai deshō.
(If it is true that it will rain tomorrow, there will probably be no game.)
(3) *僕が行きたいなら、和子も行きたがっているはずです。
*Boku ga ikitai nara, Kazuko mo ikita gatte iru hazu desu.
(If it is true that I want to go, I expect that Kazuko also wants to go.)

As seen above, $S_1$ nara $S_2$ cannot be used if $S_1$ never fails to happen, (B) if one can never tell if it is true or not that $S_1$ will happen, or (C) if the speaker already knows $S_1$ is the fact.
If $S_1$ is counterfactual, $S_1$ nara $S_2$ can be used. For example, (4) is acceptable because $S_1$ expresses the speaker’s counterfactual feeling. Note that in this case the nominalizer no is preferred.

(4) 僕が行きたいのならだれにも言わずに一人で行くよ。
*Boku ga ikitai no nara dare ni mo iwazu ni hitori de iku yo.
(If it were the case that I wanted to go, I would go by myself without telling anybody.)

5. $S_1$ nara $S_2$ cannot be used if the completion or actualization of $S_1$ brings about $S_2$.

(5) *春子のアパートへ行く / 行ったなら一郎がいた。
*Haruko no apāto e iku / itta nara Ichirō ga ita.
(When I went to Haruko’s apartment, Ichiro was there.)

(6) *テープレコーダーを買う / 買ったならテープをくれた。
*Tēpurekōdā o kau / katta nara tēpu o kureta.
(When I bought a tape-recorder, they gave me a tape.)

If $S_2$ does not express a past event or a present habitual event, but expresses a present state, the speaker’s opinion, volition, judgment, command, request or suggestion, $S_1$ nara can be used as in (7).

(7) a. ニューヨークへ行く (の)ならリンカーン・センターがおもしろいですよ。(Opinion)
*Nyūyōku e iku (no) nara Rinkān Sentā ga omoshiroidesu yo.
(If you go to New York, Lincoln Center is interesting.)

b. ニューヨークへ行く (の)ならリンカーン・センターへ行きます。(Volition)
*Nyūyōku e iku (no) nara Rinkān Sentā e ikimasu.
(If I go to New York, I will go to Lincoln Center.)

c. テープレコーダーを買う / 買ったならテープをくれるはずです。(Judgment)
*Tēpurekōdā o kau / katta nara tēpu o kureru hazu desu.
(If you buy / have bought a tape-recorder, they should give you a tape.)

6. When $S_2$ in $S_1$ *nara* $S_2$ is past, $S_1$ must be a past event or state. For example, in (8), $S_1$ represents a past event, and $S_1$ *nara* indicates that the speaker supposes the truth of $S_1$.

(8) 雨が降った (の) なら試合はなかったはずです。

*Ame ga futta (no) nara shiai wa nakatta hazu desu.*

(If it is true that it rained, there should have been no game.)

(8) can also be used in a counterfactual situation where it means 'If it were true that it rained, there should have been no game.' In this case the nominalizer *no* is preferred.

7. *No nara* often becomes *n nara* in conversation.

Examples

(a) A: 今日はいい天気ですね。
    Kyō wa ii tenki desu ne.
    (Today is a fine day, isn't it?)

    B: 本当にそうですね。
    Hontō ni só desu ne.
    (Isn't it!)

(b) あなたは学生ですね。
    Anata wa gakusei desu ne.
    (You are a student, aren't you?)

(c) パーティーにいらっしゃいますね?
    Pātī ni irasshaimasu ne?
    (You are going to the party, aren't you?)

Notes

1. In this construction the sentence preceding ne can be any informal or formal sentence except nonpolite imperative. Thus,

   (1) a.  *読めね。
           *Yome ne.
           (Read it, will you?)

   b. 読みなさいね。
      Yominasai ne.
      (Read it, will you?)
2. *Ne* can be used as a request for either confirmation or agreement from the addressee. When a sentence expresses the speaker's strong impression of something, *ne* indicates the speaker's request for agreement from the hearer, as in Ex. (a). When a sentence expresses something emotively neutral, *ne* indicates the speaker's request for confirmation from the hearer, as in KS and Exs. (b) and (c). Here, however, KS can also be a request for agreement, if the speaker is surprised that Mr. Sakamoto doesn't smoke. These two uses of *ne* have different intonations: the *ne* of agreement uses falling intonation and the *ne* of confirmation uses rising intonation. The *ne* of agreement becomes *nē* if the speaker is excited about the content of his statement. In other words, *S nē* is an exclamatory sentence, as in (2).

(2) A: おもしろい映画でしたねえ！
*Omoshiro i eiga deshita nē!*
(It was such an interesting film, wasn't it!)

B: そうでしたねえ！
*Sō deshita nē!*
(Wasn't it!)

On the other hand, the *ne* of confirmation has no exclamatory overtones; it implies something like 'I am assuming X but can you confirm it?' Thus, in KS the speaker doesn't like people who smoke, and for some reason or other, he wants to confirm that Mr. Sakamoto is not one of those people.

3. *Ne* is sometimes used in a non-sentence-final position to draw the hearer's attention to something or to confirm that the hearer has understood what has been said up to that point. *Ne* is typically used in this manner in telephone conversations.

(3) もしもし，今晚ね，銀座で飲んでから帰るからね，十一時半頃になるよ。
*Moshi moshi, konban ne, Ginza de nonde kara kaeru kara ne, jūichijihan goro ni naru yo.*
(Lit. Hello, tonight, OK? I go home after drinking in Ginza, you understand?, so I'll be home around 11:30. (=Hello, tonight I'll go to the Ginza to drink, so I'll be home around 11:30.))
4. {~te / kara} ne is specifically used to give a reason or a cause for the speaker’s state of mind or feelings in a very indirect and vague fashion. Examples follow:

(a) の先生はとてもびしくて / びしいからね。

 metabe wa totomo kibishikute / kibši... 
((It’s because) that teacher is very strict, you know?)

(b) ゆうは飲すぎて / 飲すぎたからね。

 Yūbe wa nomisugite / nomisugita kara ne. 
((It’s because) I drank too much last night, you know?)

Ne here indicates the speaker’s request for agreement from the hearer based on shared knowledge.

5. The ne of confirmation or agreement is used after another sentence-final particle yo of assertion. Yo ne means ‘I assert that ~ but don’t you agree? / am I right?’ This ne is pronounced with rising intonation.

(a) 英語が分るよね。

 Eigo ga wakaru yo ne. 
(Lit. I assert that you understand English but am I right? (= You understand English, don’t you?))

(b) の先生はいい先生ですよね。

 Ano sensei wa ii sensei desu yo ne. 
(That teacher is a good teacher. Don’t you think so?)

6. The ne of confirmation or agreement is used after another sentence-final particle, the question marker ka. Ka ne means ‘I am not sure if ~, am I right?’ The ne of ka ne is pronounced with falling intonation.

(a) 山下君は京大に入れますかね。

 Yamashita-kun wa Kyōdai ni haimasuka ne. 
(Lit. I’m not sure whether Mr. Yamashita can get into Kyoto University, but am I right? (=I’m not sure whether Mr. Yamashita can get into Kyoto University. What do you say?))

(b) の先生はいい先生ですかね。

 Ano sensei wa ii sensei desu ka ne. 
(I doubt that he is a good teacher.)

\textbf{Notes}

1. There are a number of time expressions that cannot take \textit{ni}; the typical ones are \textit{asa} ‘morning’, \textit{ashita} ‘tomorrow’, \textit{kinō} ‘yesterday’, \textit{kyō} ‘today’, \textit{ototoi} ‘the day before yesterday’, \textit{rainen} ‘next year’, \textit{saikin} ‘lately’, etc. Generally speaking, if a time expression can be specified uniquely in terms of digits, the adverb can take \textit{ni}; otherwise, it cannot. \textit{Getsuyōbi} ‘Monday’ is the ‘first’ day of the week, so it can take \textit{ni}. So can
kurisumasu ‘Christmas’, because it is December 25. But kyō ‘today’ cannot take ni, because ‘today’ cannot be uniquely specified by date.

2. Ni is optional with certain time nouns, such as natsu ‘summer’ (as in Ex. (c)) and toki ‘time’ (as in Ex. (e)). The version with ni stresses the point of time more than the version without ni does.

3. The time noun aida also takes ni if the event in the main clause does not continue for the entire duration of the event in the aida clause, as seen in Ex. (d). If the event in the main clause covers the same duration as the event in the aida clause, ni cannot be used. (⇒ aida (ni))

(1) 子供が学校に行っている間手紙を書いていた。
    Kodomo ga gakkō ni itte iru aida tegami o kaite ita.
    (I was writing letters while my children were away at school.)

4. When a specific time expression takes goro ‘about’ as in (2), ni may drop.

(2) 今朝五時半頃に起きました。
    Kesa gojihan goro (ni) okimashita.
    (I got up at about five thirty.)

5. Ni as a particle for a point of time can be used freely with various time expressions, as long as it occurs with a time expression that can be uniquely specified in terms of digits. (⇒ Note 1)

(3) a. 一时五分に
    ichiji gofun ni

b. 三月四日に

c. 月曜日に

d. 千九百八十四年に

e. 二十一世紀に

6. ン is optional with the names of the four seasons. Thus,

Notes

1. In this construction, as seen in KS, the verb is typically transitive and is related to an action that involves something that can be transferred from one person to another, such as ageru ‘give’, hanasu ‘talk’, kureru ‘give’, miseru ‘show’, nageru ‘throw’, oshieru ‘teach’ and yaru ‘give’.

2. Any transitive verb used in the Vte ageru or Vte kureru construction can take ni, if the verb does not take a human direct object. For example, yomu ‘read’, which does not take a human object, can take ni2, if used in the Vte ageru or Vte kureru construction, as shown in (1), but homeru ‘praise’, which takes a human object, cannot take ni, as shown in (2).

(1) 小さい時お母さんは私によく本を読んでくれた。
Chisai toki o-kā-san wa watashi ni yoku hon o yonde kureta.
(When I was small, my mother often read me books.)

(2) 先生は私を / *にほめてくださいました。
Sensei wa watashi o / *ni homete kudasaimashita.
(My teacher praised me.)

An intransitive verb can never take ni even if it is used in the Vte ageru or Vte kureru construction. Thus,

(3) ジョンはメアリーの / *にパーティーに来てあげた。
Jon wa Meari no / *ni pāti ni kite ageta.
(John came to Mary’s party (for her sake).)

(⇒ ageru2; kureru2)

B: そうですか。だれに聞きましたか。

\textit{Sō desu ka. Dare ni kikimashita ka.}

(Is that right? Who told you so?)

\begin{notes}

1. \textit{Ni}^3 is typically used in passive, causative, \textit{morau} / \textit{te morau} constructions and with verbs such as \textit{kariru} 'borrow', \textit{kiku} 'hear', \textit{morau} 'receive', \textit{narau} 'learn', \textit{osowaru} 'learn' which require a noun phrase representing the source of the direct object.

\( \Rightarrow \textit{rareru}; \textit{saseru}; \textit{morau}^1; \textit{morau}^2 \)

2. Nouns that take \textit{ni}^3 as in KSs (A), (B) and (C) all represent agents of the main verb's action. Thus, KSs (A), (B) and (C) include (1), (2) and (3), respectively as part of their meaning.

(1) 友達が手紙を読みました。

\textit{Tomodachi ga tegami o yonda.}

(His friend read a letter.)

(2) 浩がご飯を作った。

\textit{Hiroshi ga gohan o tsukutta.}

(Hiroshi fixed a meal.)
\end{notes}
(3) 父が車を買った。

*Chichi ga kuruma o katta.*
(My father bought a car.)

3. $ni^3$ of source as in KS (D), Exs. (b) and (e) can be replaced by $kara^1$, but $ni^3$ of agent, as in KSs (A), (B), (C), Exs. (a), (c) and (d), cannot.

[Related Expression]

The difference between $ni^3$ (of source) and $kara^1$ is that the former indicates the speaker's psychological closeness to a human source, whereas the latter doesn't. This difference explains why $ni^3$ is ungrammatical if the source is an impersonal institution to which the speaker can hardly feel close, as shown in [1].

[1] ヒルさんは文部省から/*に奨学金をもらいました。

*Hiru-san wa monbushō kara /*ni shōgakukin o moraimashita.*
(Mr. Hill has received a scholarship from the Ministry of Education.)

Examples

(a) 学生が質問をしに来た。

Gakusei ga shitsumon o shi ni kita.

(A student came to ask questions.)

(b) そこへ何をしに行くんですか。

Soko e nani o shi ni iku n desu ka.

(Lit. To do what are you going there? (=For what are you going there?))

(c) 村井さんは昼ご飯を食べうちに帰った。

Murai-san wa hirugohan o tabe ni uchi e kaetta.

(Mr. Murai went home to eat his lunch.)

Notes

1. Vmasu ni, meaning ‘to do s.t.’, can be used only with verbs of motion, (i.e., verbs which express a movement from one place to another), such
as *iku 'go', *kuru 'come', *kaeru 'return', *hairu 'enter' and *deru 'leave'. Verbs like *aruku 'walk', *hashiru 'run' and *oyogu 'swim' are not considered motion verbs because they express a manner of movement rather than a movement from one place to another. Therefore, the following sentence is ungrammatical.

(1) *私は桜の花を見に公園を歩いた。

*Wataswi wa sakura no hana o mi ni kōen o aruita.

(I walked through the park to see cherry blossoms.)

2. If the verb in Vmasu ni is a compound verb of the structure N suru, such as shigotosuru 'work', benkyōsuru 'study' and shitumsosuru 'ask a question', suru is sometimes omitted.

(2) a. 大山さんは仕事（し）に行った。

Ōyama-san wa shigoto(shi) ni itta.

(Mr. Oyama went to work.)

b. 学生が質問（し）に来た。

Gakusei ga shitsumon(shi) ni kita.

(A student came to ask questions.)

[Related Expression]

Vinf·nonpast tame ni is also used to express purpose in an action. However, the uses of Vinf·nonpast tame ni and Vmasu ni differ in some ways. First, unlike Vmasu ni, Vinf·nonpast tame ni can be used with any verb. Examples:

[1] 私は子供の写真を撮るためにカメラを買った。

Wataswi wa kodomo no shashin o toru tame ni kamera o katta.

(I bought a camera to take pictures of my child.)

[2] 私はアメリカ人の友達と話すために英語を勉強している。

Wataswi wa amerikajin no tomodachi to hanasu tame ni eigo o benkyōshite iru.

(I’m studying English in order to speak with my American friend.)

Second, when Vmasu ni and Vinf·nonpast tame ni are used with verbs of motion, Vmasu ni can be used without a directional phrase, but Vinf·nonpast tame ni cannot, unless that information is clear from the context. Examples:

[3] 僕は酒を飲みに行った。

Boku wa sake o nomi ni itta.

(I went (somewhere) to drink.)
a. Boku wa sake o nomu tame ni tomodachi no ie ni itta.
(I went to his friend’s house to drink.)

b. *Boku wa sake o nomu tame ni itta.
(I went to drink.)

Third, when Vinf-nonpast tame ni and Vmasu ni are used with verbs of motion, Vinf-nonpast tame ni usually expresses a rather important purpose, while Vmasu ni can be used even to express something insignificant. Examples:

5. a. Kissaten e kōhi o nomi ni itta.
(I went to a coffee shop to drink coffee.)

b. ??Kissaten e kōhi o nomu tame ni itta.
(I went to a coffee shop to drink coffee.)

(f) 花子がみのるの隣に座っている。
    *Hanako ga Minoru no tonari ni suwatte iru.*  
    (Hanako is sitting next to Minoru.)

**Notes**

1. *ni* indicates the location where someone or something exists. Verbs such as *iru* ‘(animate things) exist’, *aru* ‘(inanimate things) exist’ and *sumu* ‘live’ typically occur with the locational *ni*.  
   (⇒ *aru*; *iru*)

2. The verb *aru* often takes the particle *ni*, but when *aru* is used for an event, *ni* cannot be used. In this case, *de* is used.  
   (⇒ *aru*; *de*)

3. Noun phrases with *ni* often occur as topics, as in KS(B) and Ex. (b).
4. If a location phrase which indicates the existence of someone or something modifies a noun phrase, as in ‘an apartment in New York’, *ni cannot be used. In this case, *no is used. (⇒ *no)

(1) ニューヨークの / *にアパート
Nyūyōku *no / *ni apāto
(an apartment in New York)

[Related Expressions]

I. *De also indicates location, but not a location where someone/something exists. Thus, in the following sentences *de is ungrammatical.

[1] a. 私のうちに / *ではテレビがない。
Watashi no uchi *ni / *de wa terebi ga nai.
(There is no TV set in my house.)

b. スミスさんは今会議室に / *でいる。
Sumisu-san wa ima kaigishitsu *ni / *de iru.
(Mr. Smith is in the conference room now.)

On the other hand, *ni is used only to indicate the location where someone/something exists, but not an event; therefore, in the following sentences, *ni is ungrammatical.

[2] a. 私はいつも図書館で / *に勉強する。
Watashi wa itsumo toshokan *de / *ni benkyōsuru.
(I always study at the library.)

b. このラケットは日本で / *には五万円ぐらいだ。
Kono raketto wa Nihon *ni wa goman'en gurai da.
(This racket costs about 50,000 yen in Japan.)

c. そのパーティーはトムの家で / *にあった。
Sono pātī wa Tomu no ie *ni atta.
(The party was held at Tom’s.)

II. In some sentences, both the locational *ni and the locational *de can be used. For example, in [3] both *ni and *de are appropriate.

[3] 私は京都に / でいい家を見つけた。
Watashi wa Kyōto *ni / *de ii ie o mitsuketa.
(I found a good house in Kyoto.)

However, the nuances of a sentence with *ni and that with *de are different. Namely, the sentence with *ni implies that ‘I found a good house
which is in Kyoto”, while the one with de means “In Kyoto I found a good house”. Therefore, in [4] the ni version and the de version mean different things.

[4] 私は東京に / で仕事を見つけた。
Watashi wa Tōkyō ni / de shigoto o mitsuketa.
(I found a job in Tokyo.)

Namely, in the sentence with ni, the job is in Tokyo and the place the speaker found it might not have been Tokyo. On the other hand, the sentence with de means that the place the speaker found the job was Tokyo and the place where he is going to work is not necessarily Tokyo.

Examples

(a) 二人は今頃ハワイで楽ししく泳いでいるにちがいない。
Futari wa imagoro Hawai de tanoshiku oyoide iru ni chigainai.
(The two must now be enjoying swimming in Hawaii.)

(b) 一人で外国へ行くのは大変にちがいない。
Hitotari de gaikoku e iku no wa taihen ni chigainai.
(It must be hard to go to a foreign country alone.)

(c) 山口さんは頭がいいにちがいない。
Yamaguchi-san wa atama ga ii ni chigainai.
(Mr. Yamaguchi must be bright.)

(d) あれはトンプソンさんにおちがいない。
Are wa Tonpuson-san ni chigainai.
(That must be Mr. Thompson.)
Note

The sentence-equivalent that precedes *ni chigainai* can be nominalized by *no* in written Japanese, yielding more credibility to the speaker’s assertion. Examples:  

(\(\Rightarrow no^3\))

(1) a. 日本の経済はよくなったのかない。
*Nihon no keizai wa yoku natta no ni chigainai.*
(The Japanese economy must have really improved.)

b. 家を買うのはあまり難しいのかない。
*le o kau no wa amari muzukashikunai no ni chigainai.*
(Buying a house is no doubt not so difficult.)

[Related Expressions]

I. There are cases where *ni chigainai* can sometimes be replaced by *hazu da*. In such cases, however, the former is always a conjecture and the latter is the speaker’s expectation based on objective facts.  

(\(\Rightarrow hazu\))

II. The degree of probability implied by *darō, kamoshirenai*, and *ni chigainai* is as follows:

```
Least probable            Most probable

kamoshirenai       darō       ni chigainai
```

2. In both English and Japanese the subject of the nikui-construction can be the subject of an intransitive verb, as in Ex. (a) where kono doa ‘this door’ is the subject of aku ‘open’. It can also be the direct object of a transitive verb, as in Ex. (b) where ano hito no namae ‘his name’ is the direct object of oboeru ‘remember’. It can be the indirect object of a transitive verb, as in Ex. (c) where ano sensei ‘that teacher’ is the indirect object of hanasu ‘talk’. Finally, the subject can be N+Particle such as kono kutsu de ‘with these shoes’ corresponding in English to Preposition+N. In this construction, as in Exs. (c) and (d), note that the preposition in the English sentence is retained but the corresponding particle in the Japanese sentence is deleted.

3. -yasui ‘easy to do ~’ is an antonym of -nikui. The basic formation of the yasui-construction is identical to the nikui-construction. (⇔ -yasui)
〜ni shite wa 〜にしては

B: 私はステーキにします。
    Watashi wa sutēki ni shimasu.
    (Lit. I've decided on steak. (=I'll have steak.))

(b) 岡田さんはアメリカの車にしました。
    Okada-san wa Amerika no kuruma ni shimashita.
    (Mr. Okada (has) decided on an American car.)

Notes

1. *Ni suru* is usually preceded by a noun or a noun equivalent. (⇒ *koto ni suru*) However, a noun with a particle is also possible. Example:

   (1) 今度の旅行はニューヨークまでにします。
       Kondo no ryokō wa Nyūyōku made ni shimasu.
       (Next trip, I'll make it as far as New York.)

2. If the tense is nonpast, *ni suru* implies that a decision has just been made, as in KS and Ex. (a). If the past tense is used, the sentence is ambiguous; it means either that a decision has been made but no action has been taken or that a decision was made and an action was also taken. (Ex. (b))

[Related Expression]

*Ni kimeru* also means 'decide on' and *ni suru* and *ni kimeru* can be used interchangeably, although *ni kimeru* is usually used in situations where a decision is considered significant or important. Thus, in situations like Ex. (a), *ni kimeru* is not used.

Notes

1. Generally, *no* combines two noun phrases into a larger noun phrase. In A *no* B, A *no* modifies B and indicates a specific member(s) of B among all the members of B. A and B in A *no* B relate to each other in various ways, and these relationships are determined by context. Some common relationships follow.

(A) A is the possessor of B. (Ex. (a))
   B of A; A's B

(B) A is the location where B exists. (Ex. (b))
   B in / at A

(C) B is about / on A. (Ex. (c))
   B on A; B about A

(D) A is a specific kind of B. (Ex. (d))
   AB; B of A; B for A

(E) A is the object and B is the subject. (Ex. (e))
   AB; B of A

(F) A created B. (Ex. (f))
   A's B; B by A; B created by A

(G) A is an attribute of B. (Ex. (g))
   A, B; B, who / which is A

(H) B is made of / from A. (Ex. (h))
   AB

2. In A *no* B, A is sometimes a noun phrase with a particle, as in KS(B) and Ex. (i). Note that *no* cannot be omitted in this case, because it indicates that the preceding noun phrase with a particle modifies the following noun phrase. Without *no*, the noun phrase with the particle is interpreted as an adverbial phrase which modifies the predicate in the clause. For example, in (1a) *hachiji kara* ‘from eight o'clock’ modifies *ikimashita* ‘went’, while in (1b) *hachiji kara no* modifies *pāti* ‘party’.

(1) a. 八時から パーティーに 行きました。

\[ \text{Hachiji kara pāti ni ikimashita.} \]

(I went to the party at (lit. from) eight o'clock.)
b. 八時からの パーティーに 行きました。

\[ \text{Hachiji kara no pātī ni ikimashita.} \]

(I went to the party which had started at (lit. from) eight o’clock.)

3. The “A no B” construction can be extended as in “A no B no C no . . .”

Examples:

(2) a. 私の先生の本

\[ \text{watashi no sensei no hon} \]

(my teacher’s book)

b. 日本語の先生の田中先生

\[ \text{nihongo no sensei no Tanaka-sensei} \]

(the Japanese teacher, Prof. Tanaka)

4. In A no B, B can be omitted if it is apparent from context. Examples:

(3) これは私の（本）です。

\[ \text{Kore wa watashi no (hon) desu.} \]

(This is mine (= my book).)

(4) このレストランの（ステーキ）はよくありません。

\[ \text{Kono resutoran no (sutēki) wa yokuarimasen.} \]

(This restaurant’s (steak) is not good.)

   Tomodachi ga wain o nomitagatta node kinō katta no o dashita.
   (My friend wanted to drink wine, so I served the one I bought yesterday.)

Notes

1. The indefinite pronoun no is a dependent pronoun; it cannot be used by itself. It must be modified by an adjective or a relative clause.

2. No is used in place of a noun when what it refers to is clear from the context or the situation. Things referred to by no are not necessarily tangible. Example:
(1) 今まで聞いたアイデアの中では田村君が言ったのが一番よさそうだ。
    *ima made kiita aidea no naka de wa Tamura-kun ga itta no ga
    *ichiban yosa sôda.
    (Among the ideas we've heard so far, the one Mr. Tamura told
    us seems the best.)

[Related Expressions]

The indefinite pronoun no (i.e., no²) is different from the particle no (i.e.,
no¹) and the nominalizer no (i.e., no³). First, [1] shows the difference be-
 tween no¹ and no². Namely, in [1a] Tomu no is the omitted form of Tomu
no pen. On the other hand, [1b] is not an omitted form; that is, if a noun
is inserted after kuroi no in [1b], the sentence becomes ungrammatical as seen
in [1c]. In fact, what [1b] means is [1d], if no ‘one’ refers to a pen.

[1] a. no¹ (particle)
    *Watashi wa Tomu no (pen) ga hoshii.
    (I want Tom’s pen.)

b. no² (indefinite pronoun)
    *Watashi wa kuroi no ga hoshii.
    (I want a black one.)

c. *Watashi wa kuroi no pên ga hoshii.
    (I want a black pen.)

d. Watashi wa kuroi pên ga hoshii.
    (I want a black pen.)

Next, [2] shows the difference between no² and no³. That is, the meaning of
the sentence depends on whether the no in [2] is interpreted as no² or no³,
as shown in the two English translations.

[2] 高田さんが使っていたのをおぼえていますか。
    Takada-san ga tsukatte ita no o oboete imasu ka.
    ((A) [Indefinite pronoun] Do you remember the one Mr. Takada was
    using?)
    ((B) [Nominalizer] Do you remember that Mr. Takada was using
    (something)?)
no³ の nom.

A nominalizer which is used when the nominalized sentence expresses a directly perceptible event

that ~; to do s.t.; doing s.t.

Examples:

(a) 日本へ行くのは簡単です。
   *Nihon e iku no wa kantandesu.*
   (Going to Japan is easy.)

(b) 私は小林さんがピアノを弾いているのを聞いた。
   *Watashi wa Kobayashi-san ga piano o hiite iru no o kiita.*
   (I heard Ms. Kobayashi playing the piano.)

(c) クラークさんがフランスへ行くのを知っていますか。
   *Kurāku-san ga Furansu e iku no o shitte imasu ka.*
   (Do you know that Mr. Clark is going to France?)

Notes:

1. *No* makes a noun equivalent from a sentence. KS(A) and Ex. (a) are examples of sentences where nominalized sentences are used in subject position, and KS(B) and Exs. (b) and (c) are examples where nominalized sentences are used as direct objects. A nominalized sentence can occur in any position where a noun phrase can appear, except in the position of B in “A wa B da”. In that situation, the nominalizer *koto* (i.e., *koto*²) is used as in (1).

   (1) こまったの / ことは彼が来られないこと / *のた。
       *Komatta no / koto wa kare ga korarenai koto / *no da.*
       (The trouble is that he can’t come.)

2. Nominalized sentences are subordinate clauses, and, therefore, the topic marker *wa* cannot occur, as seen in (2).
   
   (⇒ *ga¹*)

   (2) 僕はひろ子さんが / *はピアノを弾いているのを聞いた。
       *Boku wa Hiroko-san ga / *wa piano o hiite iru no o kiita.*
       (I heard Hiroko playing the piano.)

3. There is another nominalizer, *koto*. *No* and *koto* are sometimes mutually interchangeable. (⇒ *koto²*) For example, Exs. (a) and (c) can be restated as:

   (3) 日本へ行くことは簡単です。
       *Nihon e iku koto wa kantandesu.*
       (Going to Japan is easy.)

   (4) クラークさんがフランスへ行くことを知っていますか。
       *Kurāku-san ga Furansu e iku koto o shitte imasu ka.*
       (Do you know that Mr. Clark is going to France?)
However, in general, *no* is used when the preceding clause expresses something rather concrete or perceptible, while *koto* is used when the preceding clause expresses something rather abstract or imperceptible. In KS(B), Ex. (b) and (5), for example, *koto* cannot be used because the nominalized clauses in these examples all express concrete, perceptible events.

(5) 私は自分の体がふるえているの / *ことを感じた。

*Watashi wa jibun no karada ga furuete iru no / *koto o kanjita.*

(I felt my body trembling.)

Also, there are a number of idiomatic phrases with *koto* where *koto* cannot be replaced by *no.* (⇒ *koto ga aru; koto ga dekiru; koto ni naru; koto ni suru*) (6) lists verbs and adjectives and their appropriate nominalizers.

(d) 大学はプリンストンだったの。

Notes

1. The sentence-final no is derived from no da / no desu through deletion of da / desu.

2. This no is used by females or children only in an informal situation. There are times when adult male speakers use no in questions, as in Exs. (a) and (b), but they do not use it in declarative sentences, as in Exs. (c) and (d).

[Related Expression]

The sentence-final particle no₄ is the same in its meaning as no of no da.

Examples

(a) A: どうしてお酒を飲まないんですか。
   Dōshite o-sake o nomanai n desu ka.
   (Why don't you drink sake?)

B: 私はまだ十七なんですね。
   Watashi wa mada jūshichi na n desu.
   ((The reason is that) I'm still seventeen.)

(b) 僕は今日のパーティーに行けません。宿題がたくさんあるんです。
    Boku wa kyō no pāti ni ikemasen. Shukudai ga takusan aru n desu.
    (I can't go to today's party. I have a lot of homework.)

(c) あなたと結婚したいんです。
    Anata to kekkonshitai n desu.
    (I want to marry you.)

Notes

1. In conversation, no da / desu often becomes n da / desu. In informal speech, male speakers use n da and female speakers use no. (For the informal forms of no da in interrogative sentences, see kai and dai.)

2. Basically, S no da is used when the speaker is explaining or asking for an explanation about information shared with the hearer. The information is often what the speaker and the hearer have observed or heard. For example, in KSs, A uses no desu because he is asking for an explanation about what he sees B doing. B also uses no desu because he is explaining his actions. In this situation, (1) is odd.
(1) A: 何をしていますか。
   \( Nani \) \( o \) \( shite \) \( imasu \) \( ka \).
   (What are you doing?)

B: 日本語を勉強しています。
   \( Nihongo \) \( o \) \( benkyo\-oshite \) \( imasu \).
   (I'm studying Japanese.)

If, however, A is only assuming that B is doing something, A can ask the question in (2), and B can answer as B does in (1).

(2) あなたは何をしていますか。
   \( Anata \) \( wa \) \( ima \) \( nani \) \( o \) \( shite \) \( imasu \) \( ka \).
   (What are you doing now?)

In Ex. (a), as in KS, A uses \( n \) \( desu \) because A observes that B isn't drinking sake and wants an explanation for that. And, B also uses \( n \) \( desu \) because he is explaining about what A observed. In Ex. (b), the speaker uses \( n \) \( desu \) in the second sentence because it is an explanation about the information which has been given in the first sentence.

3. \( no \) \( da \) is also used when no information is shared by the speaker and the hearer and the speaker is not explaining or asking for an explanation about anything. In this case, the speaker is talking as if some information were shared with the hearer and the effects of this are, for example,

(A) to involve the hearer in the affairs he is talking about (See (3) and (4) below.),

and / or

(B) to impose his idea upon the hearer or, at least, to emphasize his idea emotively. (See (5) below.)

Examples:

(3) 今日フットボールがあるんですか一緒に行きませんか。
   \( Ky\-o \) \( futtoboru \) \( ga \) \( aru \) \( n \) \( desu \) \( ga \) \( isshoni \) \( ikimasen \) \( ka \).
   (There is a football game today. Wouldn't you like to go (together) with me?)

(4) 先生、困っているんです。助けてください。
   \( Sensei \), \( komatte \) \( iru \) \( n \) \( desu \). \( Tasukete \) \( kudasai \).
   (Teacher, I'm in trouble. Please help me.)
(5) 日本語の文法は難しいですがおもしろいんですよ。
Nihongo no bunpō wa muzukashiidesu ga omoshiroi n desu yo.
(Japanese grammar is difficult, but it is interesting, you know.)

Examples

(a) 宿題がたくさんあるのでパーティーに行けません。
   Shukudai ga takusan aru node pātī ni ikemasen.
   (Since I have a lot of homework, I can't go to the party.)

(b) その本は高かったので買わなかった。

   (Because that book was expensive, I didn't buy one.)

(c) 私の部屋は静かなのでよく勉強出来ます。
   Watashi no heya wa shizukana node yoku benkyō dekimasu.

(d) ジェーンはまだ中学生なので車を運転出来ない。
   Jēn wa mada chūgakusei na node kuruma o unten dekinai.
   (Because Jane is still a junior high student, she can't drive a car.)

Note

Etymologically, node is the te-form of no da. (⇒ no da) However, in modern Japanese it is used as a conjunction to indicate reason or cause.

[Related Expressions]

I. The conjunction kara also expresses reason or cause. However, kara and node differ in the following way. Node is used when the speaker believes that the information he provides in S₁ node as cause or reason for S₂ is valid and is also evident and acceptable to the hearer. (Exs. (a)–(d)) S₁ kara S₂, however, does not involve that assumption. Therefore, node cannot be used and kara must be used in the following situations:

(A) S₁ (i.e., reason / cause clause) expresses the speaker's conjecture about something.
   [1] 人がたくさん来るだろうから / *ので食べものをたくさん買っておいた。
   Hito ga takusan kuru dārō kara / *node tabemono o takusan katte oita.
   (Because many people will probably come, I've bought a lot of food.)

(B) S₂ (i.e., the main clause) is a command, request, suggestion or invitation.
II. The particle *de* is also used to express a reason or cause. (⇒ *de*;
Semantic Derivations of *De*) *De*, however, can be used only with nouns,
while *node* and *kara* are used only with sentences. Compare [8] and
[9].
[9] 強い風が吹いたから / ので / *で家がたくさん倒れた。
Tsuyoi kaze ga fuita kara / node / *de ie ga takusan taoreta.
(Lit. Many houses fell down because a strong wind blew.)

**Examples**

(a) 中学と高校で六年間も英語を勉強したのにまだ英語が話せません。

*Chūgaku to kōkō de rokunenkan mo eigo o benkyōsha noni mada eigo ga hanasemasen.*
(I studied English for as many as six years at junior high and senior high, but I still cannot speak it.)

(b) 寒いのにオーバーを着ていないで出かけた。
Samui noni o bā o kinaide dekaketa.
(Although it was cold, he went out without wearing an overcoat.)

c) あの人はピアノが上手なのでめたに弾きません。

(He is good at piano, but seldom plays.)

d) 父は九十歳なのにまだ働いています。
Chichi wa kyūjissai na noni mada hataraitte imasu.
(My father is still working in spite of the fact that he is ninety years old.)

Notes

1. Noni is the nominalizer no plus the particle ni ‘to’, meaning ‘in contrast to the fact that ~’. The noni clause expresses a highly presupposed, speaker-oriented action or state. (⇒ no³) In other words, the speaker of S₁ noni S₂ is personally involved with the proposition of S₁. This personal involvement tends to create some emotive overtone.

2. In colloquial speech, if the content of the main clause is predictable, the clause often drops. In this case, the sentence expresses a feeling of discontent on the part of the speaker.

(1) A : そんなもの要らないよ。
Sonna mono iranai yo.
(I don’t need that kind of stuff.)

   B : せっかくあげると言うのに。
Sekkaku ageru to iu noni.
(Lit. Although I’m kindly saying that I’ll give it to you.
(=I’m saying I’ll give it to you, you know.))

[Related Expressions]

I. Because of the speaker-oriented character of the noni clause, certain types of constructions involving the hearer cannot be used in the main clause in this construction. If the main clause is a request, suggestion, question, command or request for permission, only keredo(mo) can be used. Examples of the above categories can be seen in [1] through [5] below:
[1] 難しいけれど / *のにしてみてください。
Muzukashii keredo / *noni shite mite kudasai.
(It is difficult, but try it, please.)

[2] あまりおいしくないけれど / *のに食べてもませんか。
Amari oishiku nai keredo / *noni tabete mimasen ka.
(It's not so good, but do you want to try it?)

[3] a. 寒いけれど / *のに外に出ますか。
Samui keredo / *noni soto ni demasu ka.
(It's cold, but are you going outside?)

b. 寒いけれど / のに外に出るんですか。
Samui keredo / noni soto ni deru n desu ka.
(It's cold, but (lit. is it that you are going outside?) are you going outside?)

[4] つまらないけれど / *のに読みなさい。
Tsumaranai keredo / *noni yominasai.
(It's boring, but read it.)

[5] 下手だけれど / *下手なのにもいいですか。
Hetada keredo / *Hetana noni shite mo ii desu ka.
(I'm not good at it, but can I do it?)

[3b] is acceptable, because the scope of the question is not the main verb deru ‘go outside’ but the whole sentence nominalized by n.

II. The main clause cannot be an expression of intention as in [6], because the expression is directed not towards the speaker but towards the hearer.

[6] 分からないけれど / *のによく考えてみるつもりです / 考えてみようと思います。
Wakaranai keredo / *noni yoku kangaete miru tsumori desu / kangaete miyō to omoimasu.
(Although I don't understand it, I intend to really think about it / I think I will really think about it.)

III. Due to the nominalizer no, the noni clause tends to express something with which the speaker is emotively involved. But keredo(mo) is relatively free from the speaker's emotive involvement; in short, it is more objective than noni.

(⇒ no³)

IV. Noni in Exs. (a) through (d) can also be replaced by the disjunctive conjunction ga ‘but’. For example, Ex. (d) can be rewritten as [7].
Parent is ninety years old, but he is still working.

The disjunctive meaning of *ga* is much weaker than that of *noni*, and *ga* is free from the restrictions imposed on *noni*. The style of the *noni* clause is always informal, but depending on the style of the second sentence, the style of the sentence preceding *ga* can be either informal or formal, as shown below:

```
Sinf  ga  Sinf / fml  vs.  Sinf  noni  Sinf / fml
Sfml  ga  Sfml
```

#### Formation

- Vinf·nonpast のに noni
- 話す のに (in order to talk) hanasu noni
食べるのに (in order to eat)
taberu noni

Examples

(a) すきやきを作るのには何が要りますか。
Sukiyaki o tsukuru noni wa nani ga irimasu ka.
(What do you need to make sukiyaki?)

(b) このレポートを書くのに一か月かかりました。
Kono repōto o kaku noni ikkagetsu kakarimashita.
(It took me a month to write this paper.)

(c) 会社に行くのにバスと電車を使ってる。
Kaisha ni iku noni basu to densha o tsukatte iru.
(I am using the bus and the train to get to (lit. my company) work.)

Notes

1. In the noni^2 construction, only informal, nonpast, volitional verbs can precede noni.
   (Cp. noni^1)

2. When the noni clause is used as the topic (i.e., S noni wa), no is often deleted in conversation, as in (1).

   (1) すきやきを作るには何が要りますか。
   Sukiyaki o tsukuru ni wa nani ga irimasu ka.
   (What do you need to make sukiyaki?)

[Related Expressions]

I. When the main verb is a verb of motion, the noni^2 construction contrasts with that of Vmasu ni V(motion). (⇒ ni^3) Examples:

   [1] 映画を見に銀座へ行った。
   Eiga o mi ni Ginza e itta.
   (I went to Ginza to see a movie.)

   [2] 映画を見るのに銀座へ行った。
   Eiga o miru noni Ginza e itta.
   (I went to Ginza for the purpose of seeing a movie.)

   [3] 映画を見に / *見るのに行った。
   Eiga o mi ni /*miru noni itta.
   (I went to see / *for the purpose of seeing a movie.)

If a destination is specified, as in [1] and [2], both constructions can be used. However, the noni version implies that the subject of the
sentence made a lot out of the entire process. [2] can imply that the speaker shouldn’t have used time and money going to Ginza to see a movie. If a location is not specified, only the Vmasu ni V (motion) construction can be used, as shown in [3].

II. Noni² is similar in its meaning to Vinf·nonpast tame ni ‘in order to’. The latter purely means ‘purpose’ but the former retains the meaning of ‘in the process of’, even when it means ‘purpose’. Thus, in a sentence such as [4] below in which the verb in the noni-clause is incongruous with the meaning of ‘process’, noni cannot be used.

[4] 生きるために / *のに食べる。
Ikiru tame ni / *noni taberu.
(We eat in order to live.)

Cp. この町で生きていくために / のに月二十万円は必要だ。
Kono machi de ikite iku tame ni / noni tsuki nijūman’en wa hitsuyōda.
(We need 200,000 yen a month in order to keep living in this town.)

~no wa ~da ~のは ~だ  str.

A structure that indicates new, important information by placing it between no wa and the copula da (No is an indefinite pronoun (no²) that replaces ‘time’, ‘person’, ‘thing’, ‘place’ or ‘reason’.)

Examples

(a) 山田さん、あなたがシカゴに行ったのはいつですか。

Yamada-san, anata ga Shikago ni itta no wa itsu desu ka.

(Mr. Yamada, when was it that you went to Chicago?)
(b) おととい遊びに来たのは秋子さんです。
 Ototo asobi ni kita no wa Akiko-san desu.
 (It was Akiko who came to see me the day before yesterday.)

c) モーツアルトが大好きになったのは大学一年の時です。
 Mōtsuaruto ga dai-sukini natta no wa daigaku ichinen no toki desu.
 (It was during my freshman year that I became very fond of Mozart.)

d) 父がきらいなのはテレビだ。
 Chichi ga kiraina no wa terebi da.
 (It is television that my father hates.)

e) 日本でおいしいのは果物だ。
 Nihon de oishii no wa kudamono da.
 (What is delicious in Japan is fruit.)

Notes

1. The particle used with the noun or noun phrase between no wa and da usually drops if the particle does not have any concrete meaning (as in the cases of ga and o), or if the meaning of the entire sentence is somehow predictable. Examples follow.

(1) 八時にうちに来たのは森田さん(*が)だ。
 Hachiji ni uchi ni kita no wa Morita-san (*ga) da.
 (It was Mr. Morita who came to my house at eight o'clock.)

(2) 森田さんが持って来たのはケーキ(*を)だ。
 Morita-san ga motte kita no wa kēki (*o) da.
 (It was cake that Mr. Morita brought here.)

(3) 森田さんがケーキをくれたのは弟(に)だ。
 Morita-san ga kēki o kureta no wa otōto (nî) da.
 (It was to my brother that Mr. Morita gave cake.)

(4) 森田さんがうちに来たのは車でだ。
 Morita-san ga uchi ni kita no wa kuruma de da.
 (It was by his car that Mr. Morita came to my house.)

(5) a. 森田さんが来たのは東京からだ。
 Morita-san ga kita no wa Tōkyō kara da.
 (It was from Tokyo that Mr. Morita came.)

b. 森田さんが出発したのは東京(から)だ。
 Morita-san ga shuppatsushita no wa Tōkyō (kara) da.
 (It was from Tokyo that Mr. Morita departed.)
(6) a. 森田さんが飲んだのは田山さんとだ。
    Morita-san ga nonda no wa Tayama-san to da.
    (It was with Mr. Tayama that Mr. Morita drank.)

b. 森田さんが一緒に飲んだのは田山さん（と）だ。
    Morita-san ga isshoni nonda no wa Tayama-san (to) da.
    (It was with Mr. Tayama that Mr. Morita (lit. together) drank.)

In (5b) and (6b) the particles kara and to normally drop, because shuppatsushita ‘departed’ and isshoni ‘together’ generally co-occur with kara and to, respectively.

3. The element between no wa and da cannot be a manner adverb. The following sentences are all unacceptable.

(7) *花子が歩いたのはゆっくりだ。
    *Hanako ga aruita no wa yukkuri da.
    (*It was slowly that Hanako walked.)

(8) *太郎が字を書いたのはきれいにだ。
    *Taro ga ji o kaita no wa kireini da.
    (*It was beautifully that Taro wrote characters.)

4. Unlike English, the copula da in this construction is normally in the present tense.

(9) きのう買ったのはステレオです / ???でした。
    Kinō katta no wa sutereo desu / ???:deshita.
    (It was a stereo set that I bought yesterday.)

5. The number of no wa ~da sentences which can be produced from one sentence is limited only by the number of elements which can be placed between no wa and da. For example, four such sentences can be derived from (10).

(10) ジョンがジェーンに東京で八月に会った。
    Jon ga Jēn ni Tōkyō de hachigatsu ni atta.
    (John met Jane in August in Tokyo.)

(11) a. ジェーンに東京で八月に会ったのはジョンだ。
    Jēn ni Tōkyō de hachigatsu ni atta no wa Jon da.
    (It was John who met Jane in August in Tokyo.)

b. ジョンが東京で八月に会ったのはジェーンだ。
    Jon ga Tōkyō de hachigatsu ni atta no wa Jēn da.
    (It was Jane whom John met in August in Tokyo.)
c. ジョンがジェーンに八月に会ったのは東京(で)だ。
Jon ga Jēn ni hachigatsu ni atta no wa Tōkyō (de) da.
(It was in Tokyo that John met Jane in August.)

d. ジョンがジェーンに東京で会ったのは八月だ。
Jon ga Jēn ni Tōkyō de atta no wa hachigatsu da.
(It was in August that John met Jane in Tokyo.)

6. Normally the no clause takes wa, marking the entire clause as presupposed, old, unimportant information, and the element between no wa and da represents a new, important piece of information. But sometimes the no clause takes ga, marking the clause as new, important information. In this case the element between no ga and da indicates unimportant information.

(12) 私が作っているのがロボットです。
Watashi ga tsukutte iru no ga robotto desu.
(The one I’m making is a robot.)

Cp. ロボットは私が作っています。
Robotto wa watashi ga tsukutte imasu.
(Speaking of robots, I’m making one.)

[Related Expression]

No in the present construction should not be confused with the no used as a nominalizer. Sentence [1] is the no wa ~da construction and [2], the nominalized sentence.

(1) 本を読むのはたいてい夜だ。
Hon o yomu no wa taitei yoru da.
(It is usually at night that I read books.)

(2) 本を読むのはいいことだ。
Hon o yomu no wa ii koto da.
(It is a good thing to read books.)

One way to differentiate between the two constructions is to see if the sentence can be restated by deleting no wa and da and placing the element before no wa in an appropriate position. For example, [1] can be restated as [3], but [2] cannot be restated, as seen in [4].

(3) たいてい夜本を読む。
Taitei yoru hon o yomu.
(I read books usually at night.)
   *ii koto hon o yomu.

   b. *本をいいこと読む。
   *Hon o ii koto yomu.

   c. *本を読むいいこと。
   *Hon o yomu ii koto.

Formation

KS(A): お Vmasu になる  

⇒ o ～ni naru
KS(B): お Vmasu する

KS(C): お Adj (i / na)

KS(D): お N

Examples

(a) 田村先生は今とてもお忙しい。

(b) 毎日お暑いですね。

(c) 上田先生はテニスがお上手です。

(d) 宮本さんの奥様はとてもおきれいだ。

(e) 野村さんからお電話がありました。

(f) お昼ご飯はもう食べましたか。

Notes

1. The polite prefix お- is used with verbs, adjectives and nouns to express the speaker's respect, modesty or politeness. お-Vmasu ni naru
is an honorific polite expression and *o-Vmasu suru is a humble polite expression.  

(⇒ o ∧ ni naru; o ∧ suru)

2. O-Adj can be either an honorific polite expression, as in Exs. (a), (c) and (d), or a simple polite expression, as in Ex. (b).

3. O-N is used in various ways:
   
   (1) *Honorable polite expression:*
   
   先生がお手紙をくださいました。
   Sensei ga o-tegami o kudasaimashita.
   (My teacher wrote me a letter.)
   
   (2) *Humble polite expression:*
   
   明日お電話をさしあげます。
   Myōnichi o-denwa o sashiagemasu.
   (I'll call you tomorrow.)
   
   (3) *Simple polite expression:*
   
   お野菜が高くなりましたね。
   O-yasai ga takaku narimashita né.
   (Vegetables have become expensive, haven't they?)

4. O- cannot be attached to the following words:

   (A) Adjectives and nouns which begin with the [o] sound:
   
   *おもしろい (interesting)  *おおいしい (delicious)
   *o-omoshiroi  *o-oishii
   *お大きい (big)  *おじさん (uncle)  *おび (belt, sash)
   *o-ōkii  *o-oji-san  *o-obi

   (B) Long words:
   
   *おじゃがいも (potato)  (cf. おじゃが (potato))
   *o-jagaimo  o-jaga
   *おほうれん草 (spinach)
   *o-hōrensō

   (C) Foreign words:
   
   *おエレベーター (elevator)  *おクリスマス (Christmas)
   *o-erebeṭa  *o-kurismasu
   *おバター (butter)
   *o-bata
There are some exceptions to this rule. For example:

おたばこ (tobacco) おズボン (trousers) おビール (beer)
-o-tabako o-zubon o-biru
おソース (sauce)
o-so-su

These exceptions are words which have been part of the Japanese vocabulary long enough to sound like Japanese-origin words to native speakers.

5. There are a few words which are always used with the polite prefix o- or go-. (For go-, see Related Expression.)

(4) おなか (stomach) ご飯 (cooked rice, meal)
o-naka go-han

[Related Expression]

There is another polite prefix, go-. Basically, go- is used for Chinese-origin words and o- for Japanese-origin words. Examples follow:

[1] Na-type adjectives (/-type adjectives are all Japanese-origin words; therefore, they are all preceded by o-)

a. Chinese-origin words:
ご親切 (kind) ごていねい (polite) ご便利 (convenient)
go-shinsetsu go-teinei go-benri

b. Japanese-origin words:
お静か (quiet) おにぎやか (lively) お好き (fond)
o-shizuka o-nigiyaka o-suki

[2] Nouns

a. Chinese-origin words:
ご研究 (research) ご結婚 (marriage) ご本 (book)
go-kenkyū go-kekkon go-hon

b. Japanese-origin words:
お肉 (meat) お魚 (fish) おはし (chopsticks)
o-niku o-sakana o-hashī

There are, however, some Chinese-origin words which require the use of o-. These exceptions are words which have become assimilated to the point that native speakers no longer consider them to be "borrowed" words. The words in [3] are examples of such exceptions.
[3] a. *Na*-type adjectives:
   お上手 (skillful)  お元気 (healthy)
   *o-jōzu*         *o-genki*

   b. Nouns:
   お電話 (telephone)  お料理 (dishes)  お時間 (time)
   *o-denwa*         *o-ryōri*         *o-jikan*
   お勉強 (study)  お菓子 (confectionery)
   *o-benkyō*  *o-kashi*

There are very few examples of *go-* Japanese-origin words.

[4] ごゆっくり (slowly)  ごもっとも (reasonable)
   *go-yukkuri*  *go-mottomo*

**Examples**

(a) 前田さんはきのう車を買った。
   *Maeda-san wa kinō kuruma o katta.*
   (Mr. Maeda bought a car yesterday.)

(b) 何を飲みますか。
    *Nani o nomimasu ka.*
    (What will you drink?)
1. O marks the direct object. It is noted, however, that the direct object in English is not always marked by o in Japanese. Compare Japanese and English in the following sentences, for example.

(1) 私は英語が分かる。
    Watashi wa eigo ga wakaru.
    (I understand English.)  \(\Rightarrow \sim wa \sim ga; wakaru\)

(2) ジムはベスに電話した。
    Jimu wa Besu ni denwashita.
    (Jim called Beth.)

(3) 僕はきのう田中さんに / とあった。
    Boku wa kinō Tanaka-san ni / to atta.
    (I met Mr. Tanaka yesterday.)

2. In some constructions, the direct object marker o can be replaced by the subject marker ga.

(4) ミルクを飲む → ミルクを / が飲みたい
    miruku o nomu  \quad miruku o / ga nomitai
    (drink milk)    (want to drink milk)

(5) 日本語を話す → 日本語を / が話せる
    nihongo o hanasu  \quad nihongo o / ga hanaseru
    (speak Japanese) (can speak Japanese)

(6) まどを開ける → まどを / が開けてある
    mado o akeru  \quad mado o / ga akete aru
    (open the window) (The window has been opened.)

3. O cannot occur more than once in a clause, whether it is the direct object marker (i.e., o¹) or the space marker (i.e., o²). Thus, in the causative construction, for example, the causee can be marked only by ni if another element in the same clause is marked by o. (\(\Rightarrow \) saseru)

(7) 父は私に / *を酒を飲みました。
    Chichi wa watashi ni / *o sake o nomaseta.
    (My father made me drink sake.)

(8) 友達は私に / *を急な坂をのぼらせた。
    Tomodachi wa watashi ni / *o kyūna saka o noboraseru.
    (My friend made me go up a steep slope.)

4. If the direct object is presented as a topic or a contrastive element, o is replaced by wa.
(9) 日本語は知りません。
Nihongo wa shirimasen.
(I don’t know Japanese.)

(10) その本はもう読みました。
Sono hon wa mo yomimashita.
(I already read that book.)

\(0^2\) を

Examples:

(a) 公園を通って帰ります。
Kōen o tötte kaerimashō.
(Let’s go home through the park (lit. passing through the park).)

(b) 鶴が湖の上を飛んでいます。
Tsuru ga mizuumi no ue o tonde imasu.
(Cranes are flying over the lake.)

(c) 日本では車は道の左側を走ります。
Nihon de wa kuruma wa michi no hidarigawa o hashirimasu.
(In Japan they drive (lit. cars run) on the left side of the street.)

(d) そこを急に右に曲がってください。
Soko no kōsaten o migi ni magatte kudasai.
(Please turn to the right at the intersection there.)
When a sentence involves the verb *noboru* ‘climb’, there is an important difference between the use of the particle *o* and that of *ni*, as seen in (1).

(1)  
   a. ドンは東京タワーをのぼった。
       *Don wa Tōkyō Tawā o nobotta.*
       (Don scaled Tokyo Tower.)
   b. ドンは東京タワーにのぼった。
       *Don wa Tōkyō Tawā ni nobotta.*
       (Don went up Tokyo Tower.)

[Related Expression]

The particle *de* also marks the space in which an action takes place. The difference between *de* and *o* is that *de* can be used with any action verb, while *o* can be used only with motion verbs such as *aruku* ‘walk’, *hashiru* ‘run’, *tobu* ‘fly’ and *oyogu* ‘swim’. Thus, *o* is ungrammatical in [1].

[1] 私は図書館で/*を勉強した。
   *Watashi wa toshokan de/*o benkyōshita.*
   (I studied at the library.)

When either *de* or *o* is possible, as in [2], there is usually a subtle difference between them.

[2] ジョンは川で/*を泳いだ。
   *Jon wa kawa de/*o oyoida.*
   (John swam in the river.)

First, when *de* is used, other locations for an action are also implied, but when *o* is used, there are no such implications. For example, in [3] John has a choice between a pool and the river. Here, *de* is acceptable, but *o* is not.

[3] ジョンはプールがきらいだからたいへん川で/*を泳ぐ。
   *Jon wa pūru ga kiraida kara taihei kawa de/*o oyogu.*
   (John usually swims in the river because he doesn’t like pools.)

Second, when *de* is used, the sentence often indicates that the purpose of the action is the action itself, whereas when *o* is used it seems that there is another purpose behind the action. For example, in [4] John swam in order to escape, and swimming was not the purpose of his action. Therefore, *o* is acceptable but *de* is not.
[4] ジョンは川を/で泳いで逃げた。
   Jon wa kawa o/*de oyoide nigeta.
   (John escaped by swimming in the river.)

Examples

(a) 汽車がトンネルを出た。
   Kisha ga tonneru o deta.
   (A train came out of the tunnel.)

(b) バスを降りた時友達に会った。
   Basu o orita toki tomodachi ni atta.
   (I met a friend when I got off the bus.)

(c) 日本を離れて外国で暮らしている。
   Nihon o hanarete gaikoku de kurashite iru.
   (He left Japan and is living abroad.)

Related Expression

The particle o³ in Exs. (a), (b), (c) can be replaced by kara¹ ‘from’. The basic difference between o³ and kara¹ is that o³ marks the location from which some movement begins and kara¹ marks the initial location in movement from one location to another. Thus, when focusing on both the new and old location of something or someone, kara should be used instead of o. Consider the following examples.

(⇒ kara¹)
[1] a. 私は今朝八時頃家を/から出た。
Watashi wa kesa hachijii goro ie o/*kara deta.
(This morning I left my house at about eight.)

b. きのううちから/*を外に出なかった。
Kinō wa uchi kara/*o soto ni denakatta.
(Yesterday I didn’t go outside.)

[1a] focuses on a point of detachment, so o is acceptable but kara isn’t. [1b], however, focuses on a starting point, so kara is acceptable but o isn’t.

Examples

(a) 私は浩の大学入学を喜んだ。
    *Watashi wa Hiroshi no daigakunyūgaku o yorokonda.*
    (I was happy about Hiroshi’s entering college.)

(b) ヨーロッパ人はまた戦争が起きることを恐れている。
    *Yōroppajin wa mata sensō ga okiru koto o osorete iru.*
    (Europeans are afraid that war will break out again.)

(c) 信子は京都での一年をなっかしだした。
    *Nobuko wa Kyōto de no ichinen o natsukashinda.*
    (Nobuko nostalgically recollected her year in Kyoto.)

(d) 林は英語が出来ないことを悩んでいる。
    *Hayashi wa eigo ga dekinai koto o nayande iru.*
    (Hayashi is worried that he cannot speak English.)

Notes

1. Because the main verbs used in the KSs and the Exs., such as *kanashimu* ‘sadden’, *yorokobu* ‘rejoice’, *osorēru* ‘fear’, *natsukashimu* ‘nostalgically recollect’ and *nayamu* ‘worry’ are all inwardly-oriented psychological verbs they cannot be considered transitive verbs in Japanese. Therefore, the particle *o* preceding these verbs cannot be the ordinary direct object marker *o* which normally marks an outwardly-oriented event. Rather it indicates the cause for human emotion expressed by the main verb. Thus, it is sometimes possible to rewrite the sentence in question using *node* ‘because’.  (*⇒ node*) For example, KS(A) and Ex. (a) can be paraphrased as (1a) and (1b), respectively.

   1. a. 次郎は父が死んだので悲しだした。
       *Jirō wa chichi ga shinda node kanashinda.*
       (Jiro was sad because his father died.)

   b. 私は浩が大学に入学したので喜んだ。
       *Watashi wa Hiroshi ga daigaku ni nyūgakushita node yorokonda.*
       (I was glad because Hiroshi entered college.)

The original versions are examples of written style and are seldom used in conversational Japanese, but the rewritten versions can be used in both spoken and written Japanese.

2. No matter what person (first, second, third) the subject of this con-
struction is, the main emotive verb is normally in the stative te iru / inai form and / or in the past tense. In a generic statement, however, the verb can be in the non-stative, nonpast form as in (2):

(2) だれでも親の死を悲しむ。
Dare demo oya no shi o kanashimu.
(Everybody is saddened by their parents’ death.)

3. If the emotive verb consists of adj(stem) + suffix mu as in kanashi-mu ‘sadden’, natsukashi-mu ‘nostalgically recollect’, oshi-mu ‘regret’, tanoshi-mu ‘enjoy’, it can take the suffix -garu ‘show signs of ~’ as in kanashi-garu, natsukashi-garu, oshi-garu and tanoshi-garu. Thus, along with KS(A) we have a sentence type (3).  
  (⇒ garu)

(3) 次郎は父の死を悲しがった。
Jirō wa chichi no shi o kanashigatta.
(Jiro showed signs of being sad about his father’s death.)

(3) is a more objective expression than KS(A), because the verb -garu ‘show signs of ~’ has an outwardly-oriented meaning.

(c) 一月(に)は雪が多い。
    Ichigatsu (ni) wa yuki ga ōi.
    (There is a lot of snow in January.)

Notes

1. Unlike the English ‘many’, the Japanese ōi cannot be used before a noun, except in a relative clause where ōi is the predicate of the clause, not the modifier of the head noun.
   
   (1) *京都には多いお寺があります。
       *Kyōto ni wa ōi o-tera ga arimasu.
       (There are many temples in Kyoto.)

   (2) お寺が多い町は京都です。
       O-tera ga ōi machi wa Kyōto desu.
       (The town in which there are many temples is Kyoto.)

2. ōi cannot be used in front of a noun, but ōku no can be used that way in written Japanese. Thus,

   (3) 多くの学生が毎年アジアから日本の大学に来る。
       Ōku no gakusei ga maitoshi Ajia kara Nihon no daigaku ni kuru.
       (Every year many students come to Japanese universities from Asia.)

3. Sukunai, an antonym of ōi, is very similar to ōi in its use. Neither su kunai nor ōi can be used before nouns, except in relative clauses. Sukunai differs from ōi in that there is no counterpart of ōku ‘the majority’ and of ōku no ‘many’. (⇒ sukunai)

   (4) a. この町は車が少ないです。
       Kono machi wa kuruma ga sukunaidesu.
       (There aren’t many cars in this town.)

   b. 日本語の新聞が読める学生は少ない。
      Nihongo no shinbun ga yomeru gakusei wa sukunai.
      (Few students can read Japanese newspapers.)
[Related Expressions]

I. Ōi and ōku no can be replaced by ōzei iru and ōzei no, respectively, if ōi and ōku no refer to human beings. Ōzei is used only for people.

[1] この部屋(に)は学生が多い / 大勢いる。

   (There are a lot of students in this room.)

[2] この部屋(に)は多くの / 大勢の学生がいる。
   Kono heya (ni) wa ōku no / ōzei no gakusei ga iru.
   (There are a lot of students in this room.)

Ōzei can be used by itself as an adverb, but the adverbial form of ōi cannot be used as an adverb in colloquial speech.

[3] 学生が大勢 / *多く来た。
   Gakusei ga ōzei / *ōku kita.
   (Many students came.)

II. Ōi and ōku no can be replaced by takusan aru / iru and takusan no, respectively. Takusan can also be used by itself as an adverb.

[4] この部屋(に)は机が多い / たくさんある。
   Kono heya (ni) wa tsukue ga ōi / takusan aru.
   (There are a lot of tables in this room.)

[5] この部屋(に)は学生が多い / たくさんいる。
   Kono heya (ni) wa gakusei ga ōi / takusan iru.
   (There are a lot of students in this room.)

[6] 今年はたくさん / *多く / *大勢雪が降った。
   Kotoshi wa takusan / *ōku / *ōzei yuki ga lutta.
   (It snowed a lot this year.)

III. Ōku can be used as a noun but ōzei and takusan cannot.

[7] 学生の多く / *大勢 / *たくさんは男だ。
   Gakusei no ōku / *ōzei / *takusan wa otoko da.
   (The majority of the students are male.)

食べておく  (eat s.t. in advance)
tabete oku

◆ Examples

(a) 今日は昼に客が来るので昼ご飯を早目に食べえておいた。
Kyō wa hiru ni kyaku ga kuru node hirugohan o hayame ni tabete oita.
(Since I'm having a guest at noon today, I had my lunch earlier.)

(b) 来年日本へ行くから少し日本語を勉強しておきます。
Rainen Nihon e iku kara sukoshi nihongo o benkyōshite okimasu.
(Since I'm going to Japan next year, I will study a little Japanese ahead of time.)

◆ Notes

1. Oku as a main verb means ‘put’ or ‘place’. However, when it is used with Vte, it is an auxiliary verb meaning ‘do something in advance and leave the resultant state as it is for future convenience’.

2. With a causative verb, Vte oku can express the idea that someone lets someone or something remain in his / its present state. Examples:
(1) a. 信子は疲れているからしばらく寝させておこう。
Nobuko wa tsukarete iru kara shibaraku nesasete okō.
(Since Nobuko is tired, let's let her sleep for a while.)

b. 飲みたいと言うのなら好きなのだékinkingamase te okinasai.
(If he says he wants to drink, let him drink as much as he likes.)

However, if the context is not clear, causative Vte oku can be ambiguous. For example, the following sentence can be interpreted two ways.

(2) 私はポブにビールを飲ませておいた。
Watashi wa Bobu ni biru o nomasete oita.
((A) I let (or make) Bob drink beer (for future convenience). (B) I let Bob drink beer.)

3. Vte oku may be contracted into toku or doku in informal conversation.

(3) a. 見ておく → 見とく (see ~ in advance)
mite oku → mi toku

b. 読んでおく → 読んとく (read ~ in advance)
yonde oku → yon doku

Examples

(a) この本をもうお読みになりましたか。

    (Have you read this book yet?)

(b) グッドマン先生は私の名前をお忘れになった。
    Guddoman-sensei wa watashi no name o o-wasure ni natta.
    (Prof. Goodman has forgotten my name.)

Notes

1. In ordinary circumstances, o-Vmasu ni naru is used when the speaker
describes someone’s action or state with respect. However, if a social
norm requires the speaker to talk in honorific speech, the honorific form
is used, even if the speaker does not respect the person he talks about.
(For more detail, see Characteristics of Japanese Grammar, 6. Politeness
and Formality.) Politeness is expressed in this form by two elements:
first by the polite prefix o-, and second by the verb naru, which describes
someone’s action or state indirectly. This indirectness is a common
strategy in polite expressions. (⇒ naru)

2. There are some verbs whose honorific forms are expressed by special
honorific verbs.
(See Characteristics of Japanese Grammar, 6. Politeness and Formality.)

3. When a verb has the form “N suru” like kekkonsuru ‘marry’ and
denwasuru ‘call’ its honorific form is “go-/o-N nasaru”. Nasaru is
the honorific form of suru ‘do’ and a Gr. 1 verb. (Note that Vmasu
is nasai (masu), not nasari (masu).) Except for a handful of exceptions
which require o- (i.e., denwasuru ‘call’, benkyōsuru ‘study’, ryōrisuru
‘cook’, sentakusuru ‘wash’, sōjisuru ‘clean’, sanposuru ‘take a walk’),
go- precedes N. (⇒ o-, REL.) Examples:
(1) 小山先生は四月にご結婚なさいます。
   Koyama-sensei wa shigatsu ni go-kekkon nasaimasu.
   (Prof. Koyama will get married in April.)

(2) 森本さんにお電話なさいましたか。
   Morimoto-san ni o-denwa nasaimashita ka.
   (Did you call Mr. Morimoto?)

**[Related Expression]**

*Rareru*\(^1\) can also be used to describe respectfully someone’s action or state, as seen in [1], although the degree of politeness is not as high.

(⇒ *rareru*\(^1\), Note 9)

[1] a. 田中先生はもう帰られましたか。
   Tanaka-sensei wa mō kaeraremashita ka.
   (Did Prof. Tanaka go home already?)

b. この本をもう読まれましたか。
   Kono hon o mō yomaremashita ka.
   (Have you read this book yet?)

o-oshie suru

Examples

(a) そのことは私がお話ししましょう。

(I will tell you about that matter.)

(b) 山村君は先生に本をお借りした。
Yamamura-kun wa sensei ni hon o o-kari shita.
(Mr. Yamamura borrowed a book from his teacher.)

Notes

1. O-Vmasu suru is used when the speaker wants to be polite when talking about something he or his in-group member did or will do. (For more detail, see Characteristics of Japanese Grammar, 6. Politeness and Formality.) For example, when a sales manager is talking to a customer, the manager uses this pattern to describe what his salesmen will do for the customer, as in (1).

   (1) サンプルは明日うちのセールスマンがお届けします。
Sanpuru wa myōnichi uchi no sērusuman ga o-todoke shimasu.
((One of) Our salesmen will bring the sample to you tomorrow.)

2. O-Vmasu suru is used only when the speaker’s (or his in-group member’s) action involves or affects the person the speaker wants to be polite to. Thus, (2) is unacceptable under ordinary circumstances.

   (2) *私がお歩きします。
*Watashi ga o-aruki shimasu.
(I will walk.)

3. There are some verbs whose humble forms are expressed by special verbs. (See Characteristics of Japanese Grammar, 6. Politeness and formality.) The rule in Note 2 does not apply to these verbs. That is, these special verbs are also used as simple polite expressions and can be used even if the speaker’s (or his in-group member’s) action does not involve or affect the person the speaker wants to be polite to.
4. When a verb has the form “N suru”, like shōkaisuru ‘introduce’ and denwasuru ‘call’, its humble form is “go- / o-N suru” or, more politely, “go- / o-N itasu”. (Itasu is the humble form of the verb suru, do’.) Except for a handful of exceptions which require ō- (i.e., denwasuru ‘call’, benkyōsuru ‘study’, ryōrisuru ‘cook’, sentakusuru ‘wash’, sōjisuru ‘clean’, sanposuru ‘take a walk’), go- precedes N. (⇒ o-, REL.)

Examples:

(3) 上村さんをご紹介します / いたします。
Uemura-san o go-shōkai shimasu / itashimasu.

(Let me (lit. I will) introduce Mr. Uemura.)

(4) あしたお電話します / いたします。
Ashita o-denwa shimasu / itashimasu.

(I will call you tomorrow.)

[Related Expression]

O-Vmasu ni naru is also used to express politeness. However, o-Vmasu ni naru and o-Vmasu suru are different in that the former is used when the speaker talks about someone’s action or state with respect, while the latter is used when the speaker talks about his own action or state.

Notes

1. There are two types of passive sentences in Japanese. One can be
called “direct passive” and the other, “indirect passive”. The direct
passive is similar to the English passive. (KS(A), Exs. (a) and (b))
That is, for every passive sentence, there is a corresponding active sen-
tence. For example, the active version of KS(A) is (1).
(1) 花子は一郎をだました。
Hanako wa Ichirō o damashita.
(Hanako deceived Ichiro.)

As seen in KS(A), in direct passive sentences, the direct object in active sentences is presented as the subject; the subject in active sentences is presented as the agent and marked by ni. (⇒ ni<sup>3</sup>) Note that verbs in direct passive sentences are always transitive.

2. When the speaker uses a direct passive sentence, he is making a statement from the viewpoint of the receiver of the action. The agent is frequently omitted when he / it is not important and / or unknown, as in Exs. (a) and (b).

3. The indirect object in active sentences can also be the subject in direct passive sentences. Examples:

   (2) a. Active sentence
   ジョンは先生に質問をした。
   Jon wa sensei ni shitsumon o shita.
   (John asked his teacher a question.)

   b. Direct passive sentence
   先生はジョンに質問をされた。
   Sensei wa Jon ni shitsumon o sareta.
   (The teacher was asked a question by John.)

4. The agent in direct passive sentences can also be marked by other particles, such as ni yotte and kara.

   (3) Ni yotte
   a. この絵はピカソによってかかれた。
   Kono e wa Pikaso ni yotte kakareta.
   (This picture was painted by Picasso.)

   b. 電話はベルによって発明された。
   Denwa wa Beru ni yotte hatsumeisareta.
   (The telephone was invented by Bell.)

Ni yotte, meaning ‘depending on; owing to; by means of’, is usually used in written form or formal speech when X in X ni yotte is a sort of medium through which or whom something is done. When ni yotte is used, X ni yotte is usually under strong focus. Therefore, the following sentences are unacceptable under normal circumstances.
5. The other type of passive, the indirect passive, does not exist in English. The indirect passive is different from the direct passive and the English passive in the following ways:

(A) The verb can be intransitive. (KS(B), Ex. (c))

(B) The direct object can remain as the direct object. (KS(C), Ex. (d))

The indirect passive describes an event (X) involving an action by someone or something (Y) which affects another person (Z). As in direct passive sentences, the subject (Z) has no control over the event. (⇒ Characteristics of Japanese Grammar, 5. Passive) Consider the following pair of sentences. (7a), a non-passive sentence, states simply that Taro drank Jiro’s beer. (7b), an indirect passive sentence, however, expresses the idea that Jiro was affected by Taro’s drinking beer.
It implies that Jiro was annoyed in some way by Taro's action, perhaps because the beer Taro drank belonged to Jiro.

(7) a. 太郎は次郎のビールを飲んだ。
    \[\text{Taro wa Jirō no biru o nonda.}\]
    (Taro drank Jiro's beer.)

b. 次郎は太郎にビールを飲まれた。
    \[\text{Jirō wa Tarō ni biru o nomareta.}\]
    (Jiro was annoyed by Taro's drinking beer.)

6. In the indirect passive construction, \( Z \) is usually presented as the topic, marked by \( \text{wa} \), and \( Y \) as the agent, marked by \( \text{ni} \), as seen in KS(B) and KS(C).

7. Since in many situations \( X \) negatively affects \( Z \), this construction is also referred to as "adversity passive" or "suffering passive". (KS(B), KS(C), Exs. (c) and (d)) However, whether \( X \) affects \( Z \) negatively or positively depends on the situation. \( Z \) is not always a "victim", as seen in (8) where \( Z \) is affected positively.

(8) 高山さんは美人に横に座られてニコニコしている。
    \[\text{Takayama-san wa bijin ni yoko ni suwararete nikonioko shite iru.}\]
    (Lit. Mr. Takayama, having a pretty woman sit beside him, is smiling happily. (=A pretty woman sat beside Mr. Takayama and he is happy.))

8. In indirect passive sentences, the agent must be marked by \( \text{ni} \). If a passive sentence contains an NP \( \text{ni} \), as well as an agent marked by \( \text{ni} \), the agent must precede the NP \( \text{ni} \). Example:

(9) a. 私はトムにメアリーに電話された。
    \[\text{Watashi wa Tomu \text{ni} Meari \text{ni} denwasareta.}\]
    (Tom called Mary (and I was unhappy).)

b. *私はメアリーにトムに電話された。
    \[\text{*Watashi wa Meari \text{ni} Tomu \text{ni} denwasareta.}\]
    (Tom called Mary (and I was unhappy).)

9. Passive verbs are also used as honorific expressions, as in KS(D) and Ex. (e), though the degree of politeness is lower than that of the "\( o-Vmasu \) ni naru" form and special honorific verbs. (⇒ \( o \sim \text{ni} \) naru; Characteristics of Japanese Grammar, 6. Politeness and Formality) Politeness, in this case, is conveyed through the indirectness of the passive construction.
10. Passive verbs are all Gr. 2 verbs. The basic conjugations are as follows:

(10) 話される (nonpast·inf·affirmative)
    hanasareru

話されない (nonpast·inf·negative)
hanasarenai

話されて (te-form)
hanasarete

話された (past·inf·affirmative)
hanasaretta

[Related Expression]

The potential form of Gr. 2 verbs is the same form as the passive form. (⇒ rareru²) Potential, passive or honorific structures are identified through syntax and context. Examples:

[1] 先生は刺身が食べられる。(Potential)
    Sensei wa sashimi ga taberareru.
    (My teacher can eat sashimi.)

[2] 先生は刺身を食べられた。((A) Honorific, (B) Potential or (C) Indirect passive)
    Sensei wa sashimi o taberareta
    ((A) My teacher ate sashimi. (B) My teacher could eat sashimi. (C) Someone ate sashimi and my teacher was unhappy.)

[3] 先生は学生に刺身を食べられた。(Indirect passive)
    Sensei wa gakusei ni sashimi o taberareta.
    (The teacher had (his) sashimi eaten by his students.)

As seen in [1], if the direct object is marked by ga, taberareru can only be interpreted as potential; if there is an agent marked by ni, however, taberareru expresses indirect passive, as seen in [3]. If there is no agent marked by ni and the direct object is marked by o, taberareru is ambiguous; it can be either honorific, potential or indirect passive, as seen in [2].

Notes

1. In potential expressions, if there is an experiencer, that noun phrase is usually marked by wa and the object of the action by either ga or o. (⇒ wa ~ ga) Compare (1a) and (1b).

   (1) a. Non-potential
       私は英語を話します。
       Watashi wa eigo o hanashimasu.
       (I speak English.)

   b. Potential
       私は英語が/を話せます。
       Watashi wa eigo ga / o hanasemasu.
       (I can speak English.)

2. In general, the choice between ga and o seems to depend on the degree of volition expressed in the action the experiencer takes. That is, if his volition is high, o is preferable. Thus, in the following sentences, ga is unnatural.

   (2) a. 私はやめようと思えばいつでも今の仕事を/ *がやめられる。
       Watashi wa yameyō to omoeba itsu demo ima no shigoto
       o / *ga yamerareru.
       (I can quit my current job whenever I want to quit (lit. whenever I think I will quit it).)

   b. 僕はやっとの思いで自分を/ *がおさえられた。
       Boku wa yatto no omoi de jibun o / *ga osaerareta.
       (I could barely control my emotions (lit. hold myself).)

3. Dekiru ‘can do’, however, always requires the object of an action to be marked by ga, as in Ex. (b). Another example follows:
4. The spatial お (i.e., お²) and the detachment お (i.e., お³) do not change into ご in potential expressions.

(4) Space
   a. 私はあの公園を / *が夜一人で歩けない。
   Watashi wa ano kōen o / *ga yoru hitori de arukanai.
   (I can’t walk through that park by myself at night.)
   b. この道を / *がくつをはかずに歩けますか。
   Kono michi o / *ga kutsu o hakazu ni arukemasu ka.
   (Can you walk along this road without shoes on?)

(5) Detachment
   今日はうちを / *が出られません。
   Kyō wa uchi o / *ga derarememasen.
   (I can’t leave home today.)

5. If the experiencer is clear from the context and / or the situation, or if the experiencer is a person in general, he is usually omitted and the object of the action is presented as a topic marked by は, as in KS(B) and Ex. (c).

6. Non-volitional verbs like わかる ‘understand, be understandable’; いる ‘need, be necessary’; ある ‘exist’; あく ‘open (v.i.)’ and かする ‘rot (v.i.)’ do not have potential forms.

7. The potential forms of みる ‘see’ (mirareru) and きく ‘hear’ (kikeru) are similar to the verbs みる ‘be visible’ and きく ‘be audible’, respectively, but their uses are different. (⇔ kikoeru; mieru)

8. The idea of potentiality can also be expressed by Vinf·nonpast ことができる.
   (⇔ koto ga dekiryu)

9. Potential verbs are all Gr. 2 verbs. The basic conjugations are as follows:

(6) 話せる （can talk）
   hanaseru

話せない （cannot talk）
   hanasenai

話せて （can talk and, (te-form))
   hanasete
10. There is another potential form for Group 2 verbs.

[先生 / 先生 だった] らしい (It seems that s.o. is / was a teacher.)
[sensei / sensei datta] rashii

Examples

(a) 杉本さんはもう帰ったらしいです。
Sugimoto-san wa mō kaetta rashii desu.
(Mr. Sugimoto seems to have gone home already.)

(b) あの学校の入学試験は難しいらしい。
Ano gakkō no nyūgakushiken wa muzukashii rashii.
(That school’s entrance exam seems difficult.)

(c) このあたりはとても静からしいです。
Kono atari wa totemo shizuka rashii desu.
(This neighborhood seems very quiet.)

(d) その話は本当らしい。
Sono hanashi wa hontō rashii.
(That story seems true (lit. the truth).)

(e) ここは学校らしい。
Koko wa gakkō rashii.
(This place seems to be a school.)

Notes

1. Rashii is generally used when the speaker makes a conjecture based on some information which he has heard, read or seen. What he has heard is especially important. Unlike sōda², which expresses a simple guess based on what the speaker sees, rashii is used when the conjecture is based on more reliable information. (⇒ sōda²) (For a comprehensive comparison of conjecture expressions, see yōda, Related Expressions.)

2. If there has been relatively little conjecture in the speaker’s mind, rashii is almost the same as the hearsay expression sōda¹. (⇒ sōda¹)

3. Negative conjecture is expressed by a negative predicate and rashii, as in (1).
(1) a. 田口さんはパーティーに行かないらしい。
Taguchi-san wa pāti ni ikannai rashii.
(It seems that Mr. Taguchi won’t go to the party.)

b. メアリーはビルが好きじゃないらしい。
Meari wa Biru ga sukijanai rashii.
(It seems that Mary doesn’t like Bill.)

4. Another use of rashii is as follows:

(2) 大木さんは男らしい。
Ōki-san wa otoko rashii.
(Mr. Oki is manly.)

Here, rashii means likeness. That is, “X wa Y rashii” means that X is like the ideal model of Y. (Of course, (2) can also mean “It seems that Oki is a man.”)

5. Since rashii is an i-type adjective, it can also precede nouns, as in (3).

(3) 私は男らしい人が好きだ。
Watashi wa otoko rashii hito ga sukida.
(I like a manly man.)

The negative version of (2) is (4).

(4) 大木さんは男らしくない。
Ōki-san wa otoko rashikunai.
(Mr. Oki is not manly.)

If Ōki-san wa otoko (da) is negated, the meaning changes.

(5) 大木さんは男じゃないらしい。
Ōki-san wa otoko janai rashii.
(It seems that Oki is not a man.)

Notes

1. The procedure for making relative clauses consists of several steps.
   The following steps show how to relativize *sutēki* ‘steak’ in (1a) in order to obtain the clause modifying *sutēki* in (1b).

   (1) a. ジョンはステーキを食べました。
       *Jon wa sutēki o tabemashita.*
       (John ate a steak.)

   b. そのステーキはおいしかったです。
       *Sono sutēki wa oishikattadesu.*
       (The steak was delicious.)

   Step 1: Delete the common noun phrase in the relative clause. ([ ] indicates the relative clause boundary.)

   (2) [ジョンは Ø を食べました]ステーキはおいしかったです。
       *[Jon wa Ø o tabemashita] sutēki wa oishikattadesu.*

   Step 2: Delete the particle which remains.
(3) [ジョンは食べました]ステーキはおいしかったです。
   [Jon wa tabemashita] sutēki wa oishikattadesu.

Step 3: Change the predicate into an appropriate form. (See Formation.)

(4) [ジョンは食べた]ステーキはおいしかったです。
   [Jon wa tabeta] sutēki wa oishikattadesu.

Step 4: If the topic marker wa appears in the clause, replace it with the appropriate particle. (If wa follows another particle, delete wa.) In this example, Jon is the subject; therefore, the particle which replaces wa is the subject marker ga.

(5) [ジョンが食べた]ステーキはおいしかったです。
   [Jon ga tabeta] sutēki wa oishikattadesu.
   (The steak that John ate was delicious.)

The clause in brackets in (5) is the final form of the relative clause when sutēki is relativized in (1a).

2. As seen in the procedure for relativization in Note 1, the relative clause construction in Japanese has several characteristics:

   (A) Relative clauses precede their corresponding relativized nouns.

   (B) There are no relative pronouns like which, that and who in English.

   (C) Particles which were affixed to relativized nouns are deleted.

   (D) The topic marker wa does not appear in relative clauses.

3. No can also be used to mark the subject in relative clauses, as in (6).

(6) ジョンが食べたステーキ
    Jon ga tabeta sutēki
    (the steak that John ate)

No cannot be used in place of ga, however, if the subject of the sentence is followed by a noun, as in (7a). If no is used in this construction, the meaning of the sentence changes, as seen in (7b).

(7) a. トムがフットボールの切符をあげた女の子
    Tomu ga futtobōru no kippu o ageta onna no ko
    (the girl to whom Tom gave a football ticket)

b. トムのフットボールの切符をあげた女の子
    Tomu no futtobōru no kippu o ageta onna no ko
    (the girl to whom (someone) gave Tom's football ticket)
4. Besides the relative clause construction explained above, Japanese has a construction which looks similar to the one above. As seen in Note 1, in a genuine relative clause construction, the relativized noun (the head noun) is part of the original sentence from which the relative clause was derived. In this construction, however, the “head noun” is not part of the original sentence. For example, in (8), nioi ‘smell’ is not part of the sentence Sakana ga kogeru. ‘Fish is burning.’

(8) 魚がこげるにおい。
sakana ga kogeru nioi
(the smell of burning fish (lit. the smell which fish burns))

The relationship between the “relative clause” and the “head noun”, as seen in (8), is as follows: Suppose that X is the “head noun”. Then, X is something which was brought about by the event expressed in the “relative clause”, but is not something which was explicitly stated. For example, in (8) the “head noun” nioi ‘smell’ is something brought about when fish burns, but is not an explicit part of the original sentence. Here are some more examples of this type of construction:

(9) だれかがろうかを走る音
dareka ga rōka o hashiru oto
(the sound of someone’s running in the hall)

(10) 紙をもしたけむり
kami o moyashita kemuri
(the smoke which came out when someone burned papers (lit. the smoke which someone burned papers))

(11) 山に登った疲れ
yama ni nobotta tsukare
(fatigue which was caused from climbing a mountain (lit. fatigue that (someone) climbed a mountain))

5. The following examples are usually considered to be appositive clause constructions rather than relative clause constructions, because in these examples what is expressed by the preceding clause is the following noun itself.

(12) 日本へ行く計画 / 考え / 予定 / 夢
Nihon e iku keikaku / kangae / yotei / yume
(the plan / idea / schedule / dream that (I am) going to Japan)
6. In relative clauses in Japanese, the restrictive use and the non-restrictive use cannot be distinguished from the structure. It is usually determined from the context and/or the situation. The following examples are ambiguous.

(A) Mr. Brown, to whom I taught Japanese, studies well.
(B) (Among those Browns we know the) Mr. Brown to whom I taught Japanese studies well.

(A) Japanese people, who work hard, are hated.
(B) Japanese people who work hard are hated.

7. The ease of relativization of a noun phrase differs depending on the particle marking the phrase. (16) shows the particle hierarchy. Here, noun phrases marked by the particles in the upper position are easy to relativize and noun phrases marked by the particles in the lower position are hard to relativize.

\[
g a > o^1 > n i^2 > n i^3 > o^2 > e > d e^1 > d e^2 \text{ (means)} > k a r a^1 \text{ (source)} > n o^1 > k a r a^1 \text{ (starting point)} > t o^2 > d e^2 \text{ (cause / reason)} > y o r i^1
\]

Concerning the relativization of noun phrases in simple sentences, noun phrases marked by \(d e^2\) (cause / reason) and \(y o r i^1\) cannot be relativized, but those marked by the rest of the particles in (16) can.
sa さ  suf.

A suffix that makes a noun out of an adjective by attaching it to the stem of an Adj (i) or much less frequently to the stem of an Adj (na).

**Key Sentence**

<table>
<thead>
<tr>
<th>Adj (i) stem</th>
<th>さ</th>
<th>広さ</th>
<th>は ちょうど いい / いいです。</th>
</tr>
</thead>
<tbody>
<tr>
<td>この うち の</td>
<td>Kono uchi no</td>
<td>ひろさ</td>
<td>wa chōdo ii / iidesu.</td>
</tr>
</tbody>
</table>

(The size of this house is just right.)

**Formation**

Adj (i / na) stem さ  sa

高さ  (height)  
*takasa*

静かさ  (quietness)  
*shizukasa*

**Examples**

(a) 富士山の高さはどのぐらいですか。
*Fujisan no takasa wa dono gurai desu ka.
(What is the approximate height of Mt. Fuji?)*

(b) 日本語の難しさがよく分かりました。
*Nihongo no muzukashisa ga yoku wakarimashita.
(I'm now well aware of the difficulty of Japanese.)*

(c) アメリカのよさはパイオニア・スピリットでしょう。
*Amerika no yosa wa paionia supiritto deshō.
(One of America’s good qualities is perhaps its pioneering spirit.)*

**Notes**

1. The suffix -sa is a very productive suffix that makes a noun out of an adjective. Some typical examples are given below:
新しさ  (newness / freshness)  大きさ  (size)
atarashisa  ōkisa

速さ  (speed)  強さ  (strength)
hayasa  tsuyosa

長さ  (length)  よさ  (goodness / merit)
nagasa  yosa

白さ  (whiteness)  黒さ  (blackness)
shirosa  kurosa

2. Adj (na) stem+sa is not commonly used. It is suggested that the learner avoid using it. Some of the most commonly used Adjns (na) stem+sa are the following:

便利さ  (convenience)  正確さ  (accuracy)
benrisa  seikakusa

忠実さ  (loyalty)  完ぺきさ  (perfection)
chūjitsusa  kanpekisa

のどかさ  (calmness)  にぎやかさ  (liveliness)
nodokasa  nigiyakasa

3. When an adjective can be paired with another adjectival antonym as in ōkii ‘big’ vs. chisai ‘small’, the positive counterpart, (i.e., ōkii) tends to acquire a meaning of absolute degree when -sa is attached, as in ōkisa ‘size’. Examples follow:

**[Related Expression]**

-sa describes, in an analytical manner, the degree of the state represented by an adjective, but -mi, another noun-forming suffix, is a more emotive and concrete characterization of some state (based primarily on direct perception). Only a limited number of Adj (i) can be used with -mi. Examples:

赤み (reddishness) | 悲しみ (sorrow)  
*akami*            | *kanashimi*     
暖かみ (warmness)  | 深み (depth)    
*atakami*          | *fukami*        
厚み (thickness)   | 弱み (weakness)  
*atsumi*           | *yowami*        
甘み (sweetness)   | 苦み (bitterness) 
*amami*            | *nigami*        
苦しみ (painfulness)| 強み (strength)  
*kurushimi*        | *tsuyomi*       

Consider the following sentences in which -sa is unacceptable.

[1] あの人はおもしろみ / *おもしろさがないね。

*Ano hito wa omoshiromi / *omoshirosa ga nai ne.*  
(He just lacks something that attracts people.)
[2] 楽しま / *楽しさにしています。
Tanoshimi / *tanoshisa ni shite imasu.
(I'm looking forward to it.)

In both [1] and [2] the -sa version is unacceptable because both sentences express something concrete that can be expressed only by -mi. The fact that nouns with the suffix -mi indicate something concrete seems to be related to a general tendency of nasal sounds.

(⇒ Characteristics of Japanese Grammar, 8. Sound Symbolisms)

-sama 様 suf.

a suffix (originally meaning ‘appearance’) that indicates the speaker's / writer's politeness towards s.o.

Mr.; Miss; Ms.; Mrs.
【REL. -chan; -kun; -san】

Examples

(a) 王様の耳はろばの耳だ。
Ō-sama no mimi wa robā no mimi da.
(The King's ears are donkey's ears.)

(b) 神様を信じますか。
Kami-sama o shinjimasu ka.
(Do you believe in God?)

(c) 花子ちゃん、今夜はお月様もお星様もきれいねえ。
Hanako-chan, kon'yā wa o-tsuki-sama mo o-hoshi-sama mo kirei nē.
(Hanako, aren't the moon and the stars beautiful tonight!)

(d) お母様、どこにいらっしゃるの?
O-kā-sama, doko ni irassharu no?
(Mother, where are you going?)

(e) お客様が見えたよ。
O-kyaku-sama ga mieta yo.
(Our guests have come.)
1. The reason why -sama ‘appearance’ is used to show one’s respect is that
-sama allows one to refer indirectly to one’s superior. For instance,
Yamada-sama is a more indirect way to refer to a person called Yamada
than to call him simply Yamada, because Yamada-sama literary means
‘appearance of Yamada’. Note, however, that a personal name + sama
is not used in conversational Japanese, except in highly polite speech used
to clientele by clerks / attendants of hotels, restaurants, travel agencies,
department stores, etc.

2. -sama attached to a personified object shows more endearment than
respect, as in Ex. (c).

3. -sama can also be attached to some action or state related to the hearer,
as in (1) through (5) below:

   (1) ご馳走様(でした)。
       Go-chisō-sama (deshita).
       (It was such a treat.)

   (2) お世話様になりました。
       O-sewa-sama ni narimashita.
       (Thank you for all that you’ve done for me.)

   (3) お気の毒様(でした)。
       O-ki no doku-sama (deshita).
       (Lit. It was a pitiful matter. (That’s too bad.))

   (4) お疲れ様(でした)。
       O-tsukare-sama (deshita).
       (You must be very tired.)

   (5) おかげ様で元気です。
       O-kage-sama de genkidesu.
       (Lit. Thanks to you I’m fine. (I’m fine, thank you.))

4. In written Japanese, esp. after the addressee’s name in a letter, etc.,
-sama is used as in:

   (6) 山田一郎様
       Yamada Ichirō-sama
       (Mr. Ichiro Yamada)

[Related Expressions]

1. Two related forms, -san and -chan are derived from -sama through
phonetic modifications.  

-san is the informal version of -sama and therefore less honorific and more intimate than -sama.  
Except for Exs. (a) and (b), in which the highest superiors appear, -sama can be replaced by -san.  
-san can also be attached to names of occupations and titles as in:

[1]  Name of occupation + san

魚屋さん  (fishmonger)
sakana-ya-san

お菓子屋さん  (confectioner)
o-kashi-ya-san

酒屋さん  (wine dealer)
saka-ya-san

[2]  Title + san

校長さん  (principal)
kōchō-san

市長さん  (mayor)
shichō-san

課長さん  (section chief)
kachō-san

-chan is used with children's names or in child-like language.  Normally this suffix is attached only to kinship terms or first names as in:

お母ちゃん  (mom)
o-kā-chan

お父ちゃん  (pop)
o-tō-chan

おじいちゃん  (grandpa)
o-ji-chan

おばあちゃん  (grandma)
o-bā-chan

おじちゃん  (uncle)
oji-chan

おばちゃん  (auntie)
obā-chan
[4] First name + chan
花子ちゃん (Hanako)
Hanako-chan
太郎ちゃん (Taro)
Tarō-chan

II. -kun is a similar Sino-Japanese suffix which can be attached to a male equal or male inferior's first name and / or last name. It is sometimes used to refer to a female or a male in an institution such as a school or a company. Etymologically -kun has nothing to do with -sama and its variants.

Notes

1. The idea that someone / something (=the causer) causes or allows some-
one / something (= the causee) to do something is expressed by the causative construction. In the causative construction, the causer is usually marked by *wa in main clauses and by *ga in subordinate clauses. When the main verb is an intransitive verb, the causee is marked by either *o or *ni. The choice between the two particles depends on the following general rule. When *ni is used, the causee has taken an action intentionally. For example, *ni is ungrammatical in (1) because the causee didn’t intend to go to the party in this situation.

(1) 父は私を / *にむりやりパーティーへ行かせた。
   Chichi wa watashi o / *ni muriyari pātī e ikaseta.
   (My father forced (lit. forcefully made) me to go to the party.)

Also, *ni is ungrammatical in (2) because the causee is a non-volitional entity and, therefore, has no intent (cannot take a volitional action).

(2) 私はハンカチを / *にしめらせた。
   Watashi wa hankachi o / *ni shimeraseta.
   (Lit. I made my handkerchief get damp. (=I dampened my handkerchief.))

O, on the other hand, can be used regardless of the causee’s volition, as seen in (3) and (4). Whether a sentence expresses “permissive” causative or “coercive” causative depends on the context and / or the situation.

(3) a. 私はいやがるむすこを / *にむりやり泳がせた。
   Watashi wa iyagaru musuko o / *ni muriyari oyogaseta.
   (Lit. I forced my son, who resisted swimming, to swim.)

b. 私はむすこを / に好きだだけ泳がせた。
   Watashi wa musuko o / ni sukina dake oyogaseta.
   (I let my son swim as much as he wanted.)

(4) a. 秋子は勉強はもうしたくないと思ったが私は彼女を / *に大学に行かせることにした。
   Akiko wa benkyō wa mō shitakunai to itta ga watashi wa kanojo o / *ni daigaku ni ikaseru koto ni shita.
   (Akiko said she didn’t want to study any more, but I’ve decided to send her to college. (lit. make her go to college.))

b. 秋子はもっと勉強したいと言ったので、私は彼女を / に大学に行かせることにした。
   Akiko wa motto benkyōshitai to itta node, watashi wa kanojo o / ni daigaku ni ikaseru koto ni shita.
(Akiko said she wanted to study more, so I've decided to let her go to college.)

2. If the main verb is a transitive verb, the causee can be marked only by ni, as in (5), because o cannot appear more than once in a clause and, in this case, there is already a direct object marked by o in the clause. (⇒ o¹)

(5) 一郎は雪子に /*をビールを飲ませた。

*Ichirō wa Yukiko ni /*ō biru o nomaseta.

(Ichiro made (or let) Yukiko drink beer.)

Thus, when the verb is transitive, ni is acceptable even if the causee is not willing to take the action.

(6) 一郎は雪子にむりやりビールを飲ませた。

*Ichirō wa Yukiko ni muriyari biru o nomaseta.

(Ichiro forced Yukiko to drink beer.)

When the main verb is transitive, it is often difficult to tell from the sentence alone whether or not the causee takes the action willingly. This must be determined by the context and / or the situation in which the sentence is uttered.

3. Whether or not the causee is willing to do something is clear if one of the set of giving and receiving verbs is used. (⇒ ageru²; kureru²; morau²) Examples:

(7) 私は春子をパーティーに行かせてやった。

Watashi wa Haruko o pātī ni ikasete yatta.

(I let Haruko go to the party.)

(8) 父は私に酒を飲ませてくれた。

Chichi wa watashi ni sake o nomasete kureta.

(My father let me drink sake.)

The causee's unwillingness to do something, on the other hand, can be more explicitly expressed by the causative-passive construction explained in Note 7.

4. In causative sentences, the causer must be equal to or higher than the causee in terms of status. Thus, the following is unacceptable:

(9) *私は先生に / をパーティーに来させるつもりだ。

*Watashi wa sensei ni / o pātī ni kosaseru tsumori da.

(I'm going to let (or make) my teacher come to the party.)

5. Causative verbs are all Gr. 2 verbs. The basic conjugations are as follows:
(10) 話させる (nonpast·inf·affirmative)
    hanasaseru
話させない (nonpast·inf·negative)
    hanasasenai
話させて (te-form)
    nanasasete
話させた (past·inf·affirmative)
    hanasaseta

6. There is another set of formation rules for causative verbs. (Causative verbs of this version are all Gr. 1 verbs.)

(11) a. Gr. 1 Verbs: Vneg す
    su
    話す (cause to talk)
    hanasasu

b. Gr. 2 Verbs: Vstem さす
    sasu
    食べさせす (cause to eat)
    tabesasu

c. Irr. Verbs: 来る → 来させす (cause to come)
    kuru  kosasu
    する → させす (cause to do)
    suru  sasu

In general, this set of conjugations seems to express more direct causation. For example, in (12a) tabesasu means 'feed (with a spoon or something)' rather than 'make / let eat', while in (12b) tabesaseru is more general and means 'make / let eat (either by saying something like "Eat your meal" or "You may eat your meal" or actually by feeding with a spoon or something').

(12) a. 私はジムにくだものを食べさせすつもりだ。
    Watashi wa Jimu ni kudamono o tabesasu tsumori da.
    (I intend to feed Jim fruit.)

b. 私はジムにくだものを食べさせるつもりだ。
    Watashi wa Jimu ni kudamono o tabesaseru tsumori da.
    (I intend to make / let Jim eat fruit.)
7. Causative-passive verbs, which are used in causative-passive sentences, are constructed by affixing the passive verb ending *rateru* to causative verb stems. (⇒ *rateru*) Examples:

(13) 話させられる (be made to talk)  
*hanasaserareru*

食べさせられる (be made to eat)  
*tabesaserareru*

Causative-passive sentences express the idea “be made to do something”. Note that they do not express the idea “be allowed to do something”. (14) and (15) show causative sentences and their corresponding causative-passive sentences.

(14) a. 父は私を歩いて帰らせた。  
*Chichi wa watashi o aruite kaeraseta.*  
(My father had me walk home.)

b. 私は父に歩いて帰らせられた。  
*Watashi wa chichi ni aruite kaeraserareta.*  
(Lit. I was made to walk home by my father. (=My father made me walk home.))

(15) a. 和夫は夏子に酒を飲ませた。  
*Kazuo wa Natsuko ni sake o nomaseta.*  
(Kazuo made / let Natsuko drink sake.)

b. 夏子は和夫に酒を飲ませられた。  
*Natsuko wa Kazuo ni sake o nomaserareta.*  
(Natsuko was made to drink sake by Kazuo.)

**sekkaku せっかく**  *adv.*

Some situation which seldom occurs has now occurred and one can either make use of it or, to one’s regret, cannot make use of it.

### Examples

(a) せっかくアメリカまで行ったのにニューヨークに行けなくて残念だった。Sekkaku Amerika made itta noni Nyūyōku ni ikenakute zannendatta. (I went as far as America at great expense, but, to my regret, I couldn’t make it to New York.)

(b) せっかく日本語を三年間も勉強したのだから、是非一度日本へ行ってみたいと思います。Sekkaku nihongo o sannenkan mo benkyōshita no da kara, zehi ichido Nihon e itte mitai to omoimasu. (Because I studied Japanese for (as many as) three years, I would love to go to Japan once.)
(c) せっかくの旅行が病気でだめになりました。

(My long awaited trip had to be canceled because of my illness.)

(d) せっかくですが今日は忙しくて行けません。
Sekkaku desu ga kyō wa isogashikute ikemasen.
(I appreciate your most kind offer, but I’m too busy to go there today.)

(e) せっかくのチャンスだからデートしたらどうですか。
Sekkaku no chansu da kara dētoshitara dō desu ka.
(It’s a good chance, so why don’t you date her?)

(f) せっかくですから遠慮なくいただきます。
Sekkaku desu kara, enryo naku itadakimasu.
(Since you took the trouble to bring it to me, I’ll take it without hesitation.)

Note

Sekkaku tends to co-occur with noni ‘although’ or no da kara ‘because (it is that) ~’, as in KSs(A) and (B), respectively. Sekkaku no+N, however, can be used as a noun phrase, free from any co-occurrence restrictions, as shown in KS(C) and Exs. (c) and (e). Sekkaku desu ga (in Ex. (d)) is used to politely decline s.o.’s kind offer, and sekkaku desu kara (in Ex. (f)) is used to accept s.o.’s offer.

[Related Expression]

Sekkaku is related to wazawaza, an adverb whose basic meaning is ‘intentionally take the trouble to do s.t., although it is not necessary to do so’.

[1] a. せっかく / *わざわざ近くまで来たのだから寄りました。
Sekkaku / *Wazawaza chikaku made kita no da kara yorimashita.
(Because I came all the way to your neighborhood, I dropped by.)

b. わざわざ / *せっかく新しい車を買った。
Wazawaza / *Sekkaku atarashii kuruma o katta.
(He went to the trouble of buying a new car.)

c. わざわざ / *せっかく持って来てくれてありがとう。
Wazawaza / *Sekkaku motte kite kurete arigatō.
(Thanks for your trouble in bringing it to me.)
shi し  conj.

Examples

(a) 仕事もあったし、結婚も出来たし、とてもうれしいです。
Shigoto mo atta shi, kekkon mo dekita shi, totemo ureshiidesu.
(Not only did I find a job, but I was also able to get married, so I'm very happy.)

(b) 今日は天気もいいし、どこかへ行きましょうか。
Kyō wa tenki mo ii shi, doko ka e ikimashō ka.
(It's a nice day, so shall we go out somewhere?)

(c) あの人は美人だし、頭もいい。
Ano hito wa bijin da shi, atama mo ii.
(She's beautiful and what's more she's bright.)

(d) 切符は買ってあるし、是非見に行きましょう。
Kippu wa katte aru shi, zehi mi ni ikimashō.
(I've bought a ticket for you, so let's go see it, by all means.)

Notes

1. As in Ex. (a), shi can be repeated more than once in a clause, just like Vtē ‘〜 and’ can be repeated.

2. There are times when a sentence ends with shi in order to weaken the sentence and obscure the cause / reason:
(1) A: あした映画に行きませんか。
    Ashita eiga ni ikimasen ka.
    (Wouldn’t you like to go see a movie tomorrow?)

B: えっ、あしたですか。あしたは試験があるし、…
    E, ashita desu ka. Ashita wa shiken ga aru shi, . . .
    (Tomorrow? I have an exam tomorrow, and . . .)

3. When the speaker wishes to be very polite, the clause before shi can be in the formal form if the main clause is in the formal form, as in (2).

(2) 今日は天気もいいですし、どこへ行きましょうか。
    Kyō wa tenki mo ii desu shi, doko ka e ikimashō ka.
    (It’s a nice day, so shall we go out somewhere?) (Cf. Ex. (b))

Note

Adjs (i) that do not contain -shi- are, for the most part, descriptive adjectives that are dependent on the speaker's objective judgment. In other words, they are adjectives which indicate something that one can objectively measure on some scale. Typical descriptive adjectives are:

(Mr. Tamura ate only salad.)

(c) 私は日曜日 (に) しか来られません。

Watashi wa nichiyōbi (ni) shika koraremasen.
(I can come only on Sunday.)

(d) この本はこの図書館 (に) しかありません。

Kono hon wa kono toshokan (ni) shika arimasen.
(Only this library has this book.)

(e) そこは車でしか行けない。

Soko wa kuruma de shika ikenai.
(Lit. You can go there only by car. (=The only way you can go there is by car.))
(f) 私は山田さんとしか話をしない。
Watashi wa Yamada-san to shika hanashi o shi.
(I talk only with Mr. Yamada.)

(g) この学校は学生が百人しかいない。
Kono gakkō wa gakusei ga hyakunin shika inai.
(This school has only a hundred students.)

Note

Shika always occurs with negative predicates.

[Related Expressions]

I. Dake expresses a similar idea. (⇒ dake) However, dake and shika differ in the following ways:

(A) X shika emphasizes the negative proposition of “non-X”, while X dake merely describes the situation in neutral fashion.

(B) Shika occurs only with negative predicates; dake, however, can occur with affirmative predicates. Compare the following sentences:

[1] a. ボブだけ来た。
Bobu dake kita.
(Only Bob came.)

b. ボブしか来なかった。
Bobu shika konakatta.
(Nobody but Bob came.)

[2] a. ボブだけ来なかった。
Bob dake konakatta.
(Only Bob didn’t come.)

b. *ボブしか来た / 来なくなかった。
*Bobu shika kita / konakunakatta.
(Everybody but Bob came.)

(C) The verb kakaru ‘it takes (time)’ can be used with shika, but not with dake, as in [3].

[3] a. 私の家から学校までは車で五分しかかかるらない。
Watashi no ie kara gakkō made wa kuruma de gofun shika kakaranai.
(From my house to school it takes only five minutes by car.)
b. *私の家から学校までは車で五分だけかかる。
   *Watashi no ie kara gakkō made wa kuruma de gofun
dake kakaru.
   (From my house to school it takes only five minutes
by car.)

II. Bakari is also used to mean ‘only’ in some situations. (⇒ bakari) Unlike
X shika or X dake, however, X bakari emphasizes the positive proposition
of X, often with the implication that s.o. / s.t. does s.t. to X / with
X / . . . a lot or more than one expects. For example, [4a] emphasizes
the fact that Jim drank beer, whereas [4b] emphasizes the fact that Jim
didn’t drink anything but beer. [4c] is a neutral statement.

[4] a. ジムはビールばかり飲んだ。
   Jimu wa biru bakari nonda.
   (Jim drank only beer (and a lot).)

b. ジムはビールしか飲まなかった。
   Jimu wa biru shika nomanakatta.
   (Jim drank nothing but beer.)

c. ジムはビールだけ飲んだ。
   Jimu wa biru dake nonda.
   (Jim drank only beer.)

Note that X bakari cannot be used if X is a single entity. Thus, [5a]
is grammatical, but [5b] is not.

[5] a. 女の子ばかり来た。
   Onna no ko bakari kita.
   (Only girls came (and it was more than I expected).)

b. *メアリーばかり来た。
   *Meari bakari kita.
   (Only Mary came.)

Note also that bakari cannot be used with negative predicates, as in [6].

[6] 子供達だけ / *ばかり来なかった。
   Kodomotachi dake / *bakari konakatta.
   (Only the children didn’t come.)

(Finish (eating) your meal quickly.)

(d) シチューや作りすぎてしまいました。
*Shichū o tsukuri sugite shimaishita.*
(I made too much stew (to my regret).)

**Notes**

1. *Shimau* is used as an auxiliary verb with *Vte* and expresses the idea of completion in terms of an action. *Vte shimau* often appears with such adverbs as *sukkari* ‘completely’, *zenbu* ‘all’ and *kanzenni* ‘completely’. Examples:

   (1) a. マイクはすっかり日本語を忘れてしまった。
   *Maiku wa sukkari nihongo o wasurete shimatta.*
   (Mike has completely forgotten Japanese.)

   b. 私は持っていた切手を全部友達にあげてしまった。
   *Watashi wa motte ita kitte o zenbu tomodachi ni agete shimatta.*
   (I gave all the stamps I had kept to my friends.)

2. *Vte shimatta* also expresses the idea that someone did something which he shouldn’t have done or something happened which shouldn’t have happened. (KS(B) and Ex. (d)) Thus, it often implies the agent’s regret about what he has done or the speaker’s regret or criticism about someone’s action or about something that has happened. Examples:

   (2) a. ジェリーはベギーのケーキを食べてしまった。
   *Jeri wa Pegi no kēki o tabete shimatta.*
   (Jerry (mistakenly) ate Peggy’s cake.)

   b. 私はちがうバスに乗ってしまった。
   *Watashi wa chigau basu ni notte shimatta.*
   (I got on the wrong bus.)

   c. 雨が降ってしまったのでピクニックに行けなかった。
   *Ame ga futte shimatta node piknikku ni ikenakatta.*
   (It rained, so we couldn’t go on a picnic.)

3. Whether a sentence with *Vte shimatta* is interpreted as simple completion or regret (or criticism) depends on the context and / or the situation. For example, (3) can be interpreted in two ways.
(3) 僕はお酒を飲んでしまった。
Boku wa o-sake o nonde shimatta.
((A) I finished drinking sake. (B) I drank sake (which I shouldn’t have done).)

4. Te shima and de shima are contracted as chau and jau, respectively, in informal speech, as in (4), and can be used by male and by female speakers.

(4) a. 話して しまう → 話し ちゃう (have talked)
hanashite shima hanashi chau

b. 飲んで しまう → 飲 じゃう (have drunk)
nonde shima non jau

Chimau and jimau, another set of contracted forms of te shima, are used only by male speakers.

[Related Expressions]

I. Vpast can also express the completion of an action. However, it is different from Vte shima in that Vpast expresses the completion of an action in the past, while Vte shima expresses completion regardless of the time of completion. Thus, [1a] is grammatical, but [1b] is not.

[1] a. ここにおいておくとジムが食べてしまうよ。
Koko ni oite oku to Jimu ga tabete shima yo.
(If you leave it here, Jim will eat it (up).)

b. *ここにおいておくとジムが食べたよ。
*Koko ni oite oku to Jimu ga tabeta yo.
(If you leave it here, Jim will eat it up.)

II. Vmasu owaru also means ‘finish doing ~’. The difference between Vmasu owaru and Vte shima is that Vmasu owaru indicates the action of finishing something, while Vte shima indicates the completed state of the action. Thus, these two expressions correspond to the English expressions finish doing and have done in that Vmasu owaru can occur with a specific time phrase, but Vte shima cannot.

[2] a. きのうその本を読み終わった / *読んでしまった。
Kinō sono hon o yomiowatta / *yonde shimatta.
(I finished reading / *have read the book yesterday.)

b. けさ九時にやっとレポートを書き終わった / *書いてしまった。
Kesa kuji ni yatto repōto o kakiowatta / *kaite shimatta.
shimau / shiru

(I finally finished writing / *have finally written the report at nine o'clock this morning.)

It is also noted that shimau can be used with noncontrollable verbs like wasureru 'forget', while owaru cannot, as in [3].

[3] a. 僕はナンシーの住所を忘れてしまった。
   Boku wa Nanshi no jūsho o wasurete shimatta.
   (I've forgotten Nancy's address.)

b. *僕はナンシーの住所を忘れ終わった。
   *Boku wa Nanshi no jūsho o wasureowatta.
   (*I finished forgetting Nancy's address.)

(d) 私は上田さんがアメリカへ行ったことを知らなかった。
    Watashi wa Ueda-san ga Amerika e itta koto o shiranakatta.
    (I didn't know that Mr. Ueda had gone to America.)

Notes

1. Shiru, a nonstative verb, takes the Vte iru form when it means the
   stative 'know'.
   \[\Rightarrow \text{iru}^2\]

2. When answering in the negative to the question X o shitte imasu ka ‘Do
   you know X?’, the negative nonstative form shiranai / shirimasen is
   used instead of shitte inai / shitte imasen, as in KS(B) and Ex. (c).

Ano sutēki wa oishisōdatta.
(That steak looked delicious.)

(c) このあたりは静かそうだ。
Kono atari wa shizuka sōda.
(This neighborhood looks quiet.)

Notes

1. (Vmasu / Adj (i / na) stem) sōda expresses the speaker's conjecture based
   on visual information. Thus, this expression can be used only when the
   speaker directly observes something. The speaker's conjecture concerns
   an event which might take place in the future or the present state of
   someone or something. In other words, sōda² cannot be used to express
   the speaker's conjecture concerning a past event or state.

   (⇒ rashii; yōda)

2. The adjective iī ‘good’ and the negative nai ‘not exist / not’ change
to yosa and nasa, respectively, before sōda². Examples:

   (1) このアパートはよさそうだ。
   Kono a파트 wa yosa sōda.
   (This apartment looks good.)

   (2) 問題はなさそうだ。
   Mondai wa nasa sōda.
   (It looks like there is no problem.)

   (3) 村山さんの家はあまり新しくなさそうだ。
   Murayama-san no ie wa amari atarashikunasa sōda.
   (Mr. Murayama's house doesn't look so new.)

3. N or N+Copula cannot precede sōda², as seen in (4a) and (4b), but N+
   Copula neg·nonpast can, as seen in (4c).
(4) a. *加藤さんは学生 Ø そうだ。
    *Kató-san wa gakusei Ø sóda.
    (Mr. Kato looks like a student.)

b. *加藤さんは学生だそうだ。
    *Kató-san wa gakusei da sóda.
    (Mr. Kato looks like a student.)

c. 加藤さんは学生じゃないそうだ。
    Kató-san wa gakusei janasa sóda.
    (Mr. Kato doesn’t look like a student.)

To express the intended meaning in (4a) and (4b) rashii is used. (⇒ rashii) (4b) is grammatical if sóda means hearsay. (⇒ sóda¹)

4. In this construction, the negative forms of verbs usually don’t precede sóda². Instead, Vmasu só ni / mo nai is used. Examples:

(5) クリスは車を売りそうに / も ない。
    Kurisu wa kuruma o uri só ni / mo nai.
    (Chris doesn’t seem to sell his car.)

(6) この問題は学生には出来そうに / も ない。
    Kono mondai wa gakusei ni wa deki só ni / mo nai.
    (It doesn’t seem that the students can solve this problem.)

5. Sóda is also used to express the speaker's conjecture concerning his own non-volitional future actions based on what he feels.

(7) 僕はこのケーキを残しそうだ。
    Boku wa kono kēki o nokoshi sóda.
    (I’m afraid I can’t eat all this cake.)

(8) 私はとても疲れいてたおれそうだ。
    Watashi wa totemo tsukarete ite taore sóda.
    (I’m so tired that I feel weak (lit. like I’m falling down).)

6. Sóda is a na-type adjective; the prenominal form is sóna. Examples:

(9) 高そうな車
    taka sóna kuruma
    (a car which looks expensive (=an expensive-looking car))

(10) 雨が降りそうな空
    ame ga furi sóna sora
    (lit. the sky which looks like it will bring rain)

B: それで、先週新しいラケットを買ったんですね。
*Sore de, senshūatarashii raketto o katta n desu ne.*
(That’s why he bought a new paddle last week.)

[Related Expressions]

I. “S₁. Sore de S₂” can be rephrased using node if sore de means cause or reason. Note, however, that the node construction is a single sentence. (⇒ node) Example:
[1] ちょっと大阪で用事があったのできのういなかったんです。
Chotto Osaka de yōji ga atta node kinō inakatta n desu.
(Because I had an errand to run in Osaka, I wasn't here yesterday.)

The difference is that sore de combines two sentences much more loosely than node.

II. “S₁, Sore de S₂” can be rephrased using da / desu kara, if S₁ indicates
a reason or a cause for S₂.

[2] ちょっと大阪で用事がありました。だからきのういなかったんです。
Chotto Osaka de yōji ga arimashita. Da kara kinō inakatta n desu.
(I had an errand to run in Osaka. So, I wasn't here yesterday.)

The difference between sore de and da kara is similar to the difference
between node and kara. (⇒ kara³; node) Observe the following sent-
tence.

[3] 今日は忙しいです。だから / *それであした来てください。
Kyō wa isogashii desu. Da kara / *Sore de ashita kite kudasai.
(I'm busy today. So, please come tomorrow.)

(d) それではまた来週の金曜日に来ます。
    Sore de wa mata raishū no kin’yōbi ni kimasu.
    (Well then, I’ll come again next Friday.)

Notes

1. Sore de wa is contracted into sore ja or sore jā in informal speech.

2. Sore de wa is often shortened to de wa, which is further contracted to jā or ja.

3. Sore de wa is used in sentence-initial position, and sore ‘that’ refers to that which is stated in the preceding sentence, as in Exs. (a) and (b), or to the preceding context, as in Exs. (c) and (d). In Exs. (c) and (d) the speaker uses sore de wa based on some nonverbal shared knowledge. The shared knowledge for (c) and (d) could be ‘the fact of having worked long enough’ and ‘the fact of having finished today’s discussion and an agreement for meeting every Friday’, respectively.

  Getsuyō, kaiyō, sore kara mokuyō mo totemo isogashiidesu.
  (I am very busy on Monday, Tuesday, and Thursday, too.)

Notes

1. Sore kara can be used to indicate something which the speaker almost
   forgot to mention, as in (1) below:

   (1) ジョンとメリーと，ああそうだ，それからボブが来たよ。
       Jon to Meri to, ā sō da, sore kara Bobu ga kita yo.
       (John and Mary and, oh yeah, Bob came too.)

2. Sore kara ‘and then’ is often used by the hearer to elicit more infor-
   mation from the speaker. Example:
418  sore kara

(2)  A: 今日はどこへ行きましたか。
    Kyō wa doko e ikimashita ka.
    (Where did you go today?)

    B: まず東京タワーに上りました。

        Depāto ni itte, shokudō de hirugohan o tabemashita.
        (I went to a department store and ate my lunch at the cafeteria.)

3. Vte, Vmasu, Adj (i) stem ku (te) and Adj (na) stem de do not have their own tense. The tense is identical with that of the main verb.

[Related Expressions]

I. Vte kara and Vte, sore kara are similar but not identical in meaning. Vte kara expresses chronological sequence; Vte, sore kara expresses chronological sequence and / or enumeration. For example, [1a] expresses purely chronological order and [1b], chronological order and enumeration.

(⇒ kara²)

[1] a. 山中さんは三時間ゴルフをしてから一時間泳いだ。
    Yamanaka-san wa sanjikan gorufu o shite kara ichijikan oyoida.
    (Mr. Yamanaka swam for one hour after having played golf for three hours.)

b. 山中さんは三時間ゴルフをして、それから一時間泳いだ。
    Yamanaka-san wa sanjikan gorufu o shite, sore kara ichijikan oyoida.
    (Mr. Yamanaka played golf for three hours, and, on top of that, he swam for an hour.)
II. “Vte / Vmasu, sore kara”, “Adj (i) stem kute, sore kara” and “Adj (na) stem de, sore kara” are very similar to shi when they express enumeration.

[2] a. 今日はテニスをして、それから映画も見た。
KYŌ wa tenisu o shite, SORE KARA eiga mo mita.
(Today I played tennis, and I saw a movie, too.)

b. 今日はテニスもしたし、映画も見た。
KYŌ wa tenisu mo shita shi, eiga mo mita.
(Today I played tennis, and what's more, saw a movie.)

III. Sō shite / soshite and sore kara are interchangeable when two events do not occur simultaneously. Compare the following:

[3] a. 音楽を聞いて、そうして勉強するのが好きだ。
ONGAKU o kiite, SŌ SHITE benkyōsuru no ga sukida.
(I like to listen to music while studying. / I like to listen to music first and then study.)

   (Three years.)

A: それなら、日本のことはよく知っているでしょうね。
   Sore nara, Nihon no koto wa yoku shitte iru deshō ne.
   (Then, you must know a lot about Japan.)

Notes

1. Sore ‘that’ refers to a previously-spoken sentence. In KS, for example, sore refers to A’s entire sentence. B’s sentence can be rephrased as (1):

   (1) 頭が痛いならすぐ寝なさい。
       Atama ga itai n nara sugu nenasi.
       (If you have a headache, go to sleep right away.)

   Nara in (1) expresses the speaker’s supposition concerning the truth of A’s statement.\[\Rightarrow nara\]

2. Sore nara has a more formal form, sore naraba, and a more informal one, sonnara.

3. For restrictions imposed on the sentence that follows sore nara, see the notes in nara.

[Related Expression]

Although sore nara and sore de wa are very similar, they differ in that the former is dependent on verbal context while the latter is not. Thus, towards the end of one’s visit with his superior or on an occasion when something is offered, sore de wa is used, as in [1a, b].

[1] a. それでは / *それなら失礼します。
       Sore de wa / *Sore nara shitsureishimasu.
       (Lit. Then I must be going now.)
b. それでは/*それなら遅慮なくいただきます。

(This movie is uninteresting. And it's too long.)

(c) この花はきれいです。そして安います。

Kono hana wa kireidesu. Soshite yasuidesu.
(This flower is pretty. And it is inexpensive.)

Notes

1. Soshite and sō shite are normally interchangeable, but if sō shite is used in the original sense of 'by doing so', it cannot be replaced by soshite.

   (1) そうして / *そして直すんですか。

   Sō shite / *Soshite naosu n desu ka.

   (Lit. Do you fix it by doing so? (=Oh, that's how you fix it?))

2. The two sentences in this construction can be combined using the te-form of verbs or adjectives, as in (2). This version is encountered less frequently than the above version and sounds a little redundant, because the te-form alone can mean '～and'.

   (2) 今日は東京に行って、そうして / そして友達に会いました。

   Kyō wa Tōkyō ni itte, sō shite / soshite tomodachi ni aimashita.

   (I went to Tokyo today, and I met my friend there.)

(Mr. Mori is too fat.)

**Notes**

1. *Sugiru*, which as a main verb means 'pass; go beyond some limit', is used as an auxiliary verb with *Vmasu* or Adj (*i / na*) stem and means 'do s.t. excessively' or 'be ~ excessively'.

2. The stem of *ii* 'good' changes to *yo* before *sugiru*, as in (1).

   (1) このアパートはトムにはよくすぎる。
   Kono apāto wa Tomu ni wa yo sugiru.
   (This apartment is too good for Tom.)

   (I like baseball.)

(b) ジョンソンさんはジャズが大好きです。
    Jonson-san wa jazu ga dai-sukidesu.
    (Mr. Johnson loves jazz.)

Notes

1. Sukida is a na-type adjective which requires the “wa ~ ga construction”. That is, the experiencer (i.e., the person who likes someone or something) is marked by wa and the liked object by ga. (⇒ ∼ wa ∼ ga)
   Note that the liked object is marked by ga not by o.

2. In subordinate clauses, the experiencer is also marked by ga, as in (1) and (2).

   (1) 私がステーキが好きなことはみんな知っている。
       Watashi ga sutēki ga skina koto wa minna shitte iru.
       (Everybody knows that I like steak.)

   (2) ジョンが好きなスポーツは野球です。

(c) 日本語が書ける外国人は大変少ない。
Nihongo ga kakeru gaikokujin wa taihen ounai.
(Lit. Foreigners who can write Japanese are very few. (=Very few foreigners can write Japanese.))

Notes

1. *Sukunai cannot be used before a noun, except in a relative clause where sukunai is the predicate of the subject of the relative clause.

   (1) *この大学は少ない女子学生がいます。
   *Kono daigaku wa sukunai joshigakusei ga imasu.

     b. 日本語が分かるアメリカ人は少しばいる。
     Nihongo ga wakaru Amerikajin wa sukoshi wa iru.
     (There are a few Americans who can understand Japanese.)

**[Related Expression]**

*Sukunai* differs from a similar word *wazuka*(da) in both meaning and use. The latter means ‘insignificant number or amount of ~’ and is used before a noun or in a predicate position or as an adverb. Only in [1a] below can *wazukada* be replaced by *sukunai*.

[1]  a. 私が持っているお金はわずかだ。
     Watashi ga motte iru o-kane wa wazukada.
     (The money I possess is very little.)

     b. わずかなお金で暮らしている。
     Wazukana o-kane de kurashite iru.
     (He is living with a paltry sum of money.)

     c. あの人はわずかのことですぐおこる。
     Ano hito wa wazuka no koto de sugu okoru.
     (He gets angry easily over a trifling matter.)

     d. その時僕はわずか(に)六つでした。

(f) いいネクタイをしているね。
   li nekutai o shite iru ne.
   (You’re wearing a nice tie, aren’t you?)

**Notes**

1. *Suru* means ‘to cause some state or action’, and corresponds to English ‘do’ or ‘make’.

2. KS(A) and Ex. (a) are cases in which the subject is doing / playing s.t. KS(B) as well as Ex. (b) are cases where the subject is playing a social or dramatic role. KSs(C) and (D) and Ex. (c) have causative meanings.

3. KS(C) and Ex. (c) require that either Adj (i) stem+ku or Adj (na) stem+ni (i.e., adverbial form of Adj (i / na)) be used before suru. KS(D) and
Ex. (e) use a Noun+ni in front of suru.

4. The Direct Objects of KS(F) and Ex. (f) are items that cover a small part of the human body such as nekutai ‘(neck)tie’, tebukuro ‘gloves’ and udedokei ‘wristwatch’. When used with such direct objects, suru means ‘wear’.

5. The construction in KS(D) (i.e., N+ni suru) also has an idiomatic use, meaning ‘decide on ~’. (⇒ ni suru)

6. Sino-Japanese compounds+suru such as benkyōsuru ‘study’ and unten-suru ‘drive’ can be used as transitive verbs, as in KS(E) and Ex. (d). The Sino-Japanese compound itself can also be used as the direct object of suru. For example, compare KS(E) and Ex. (d) with (1) and (2), respectively.

(1) 私は中国語の勉強をしている。
Watashi wa chūgokugo no benkyō o shite iru.
(Lit. I am doing the study of Chinese. (=I am studying Chinese.))

(2) 僕はよく車の運転をします。
Boku wa yoku kuruma no unten o shimasu.
(Lit. I often do the driving of a car. (=I often drive a car.))

Note in Sentences (1) and (2) that the direct object in KS(E) and Ex. (d) is connected to the Sino-Japanese compound by the particle no, creating a noun phrase which is the direct object of suru.

7. In contemporary Japanese it is very common to use suru with loanwords. The majority of loanwords are from English verbs. Some typical examples follow:

<table>
<thead>
<tr>
<th>English</th>
<th>Japanese</th>
</tr>
</thead>
<tbody>
<tr>
<td>make a hit</td>
<td>ヒットする hitto-suru</td>
</tr>
<tr>
<td>knock on the door</td>
<td>ノックする nokku-suru</td>

<tr>
<td>drive a car</td>
<td>ドライブする doraibu-suru</td>
</tr>
<tr>
<td>kiss</td>
<td>キスする kisu-suru</td>
</tr>
<tr>
<td>type</td>
<td>タイプする taipu-suru</td>
</tr>
<tr>
<td>pass an exam</td>
<td>パスする pasu-suru</td>
</tr>
</tbody>
</table>

It is also common to use suru with sound symbolisms, especially phenomimes and psychomimes.

(⇒ Characteristics of Japanese Grammar, 8. Sound Symbolisms)
<table>

<tr>
<td>bikubiku-suru</td>

<td>はっとする (be taken aback)</td>
</tr>
<tr>
<td>bonyari-suru</td>
<td>hatto-suru</td>
</tr>
<tr>
<td>ぞっとする (shiver)</td>
<td>いらいらする (become irritated)</td>
</tr>
<tr>
<td>zotto-suru</td>
<td>iraira-suru</td>
</tr>
</tbody>
</table>

8. *Suru* basically means some causative change that is under human control, whereas *naru* ‘become’ basically means spontaneous change that is almost beyond human control. Since injury normally occurs due to human carelessness, *suru* is acceptable, but *naru* is unacceptable, as shown in (3) below. In contrast to injury, illness is assumed to occur regardless of human carefulness or carelessness, so it should not take *suru*. But in actuality it does. Illness can take *suru* when it is talked about as if it were something under human control, for example, cases of past illness (as in (4a)), apologies implying that one has caused illness due to carelessness on one’s part (as in (4b)), and statements of one’s medical history (as in (4c)). Otherwise, illness cannot take *suru*, as shown in (4d).

(3) a. 病気 / けがをする。
*Byōki / kega o suru.*
(One becomes ill / sustains injury.)

b. 病気 / *けがになる。
*Byōki / *kega ni naru.*
(One becomes ill.)

(4) a. 若い頃はよく病気をした / ?になった。
*Wakai koro wa yoku byōki o shita / ?ni natta.*
(When I was young, I often became ill.)

b. いつも病気をして / ?になってすみません。
*Itsumo byōki o shite / ?ni natte sumimasen.*
(I’m sorry that I always become ill.)

c. 一年に何回ぐらい病気をしますか / ?になりますか。
*Ichinen ni nankai gurai byōki o shimasu ka / ?ni narimasu ka.*
(How about how many times do you become ill per year?)

d. きのう急に病気になりました / *をしました。
*Kinō kyūni byōki ni narimashita / *o shimashita.*
(I suddenly became ill yesterday.)
9. *Suru* can be used in the construction \( o + \text{Vmasu} + \text{suru} \), a humble, polite form of verb. The subject of this humble verb must be the speaker or his in-group member.

(5) 私がお読み / 書き / 持ちします。

*Watashi ga o yomi / kaki / mochi shimasu.*

(I will read / write / carry it (for you).)

A further degree of humbleness can be expressed by replacing *suru* with its humble version *itasu* / *itashimasu*.  

\( \Rightarrow o \sim \text{suru} \)

**Related Expressions**

I. *Naru* ‘become’ forms an intransitive-transitive pair with *suru*, although they are not phonetically related. \( \Rightarrow \text{Appendix 3} \) Semantically, *naru* seems more passive, while *suru* seems more causative. Compare the following pairs of sentences:

1. a. 山田は停学になった。

*Yamada wa teigaku ni natta.*

(Lit. Yamada became suspension from school. (=Yamada got suspended from school.)

b. 学校は山田を停学にした。

*Gakkō wa Yamada o teigaku ni shita.*

(Lit. The school made Yamada suspended from school. (=The school suspended Yamada.))

2. a. 山田は本を書くことになった。

*Yamada wa hon o kaku koto ni natta.*

(It’s been decided that Yamada will write a book.)

b. 山田は本を書くことにした。

*Yamada wa hon o kaku koto ni shita.*

(Yamada has decided to write a book.)

\( \Rightarrow \text{koto ni naru; koto ni suru} \)

II. *Suru* can be replaced by its informal version *yaru* (Gr. 1 Verb) when it means ‘do / play s.t.’ as in KS(A) or ‘play a dramatic / social role’ as in KS(B). Also, if *suru* takes a Sino-Japanese compound as its direct object (as in *benkyō o suru* ‘Lit. do a study of’), it can be replaced by *yaru.*
**Key Sentence**

**Examples**

(a)  一男は丈夫な体をしています。

*Kazuo wa jōbuna karada o shite imasu.*

(Kazuo has a strong body.)

(b)  この机は丸い形をしている。

*Kono tsukue wa marui katachi o shite iru.*

(This table has a round shape.)

**Notes**

1. The sentence pattern is:

   Topic (subject) + Adj(i / na) + [Noun of Bodily Part / Noun of Attribute] + *shite iru / imasu.*

   A bodily part or an attribute must be inalienably possessed by the subject. In other words, it must be such an essential part of the possessor (=subject) that he / it cannot exist without the part or the attribute.

2. In the main clause the verb *suru* always takes the *te iru* form, but in a relative clause *te iru* may be replaced by *ta* as in:

   (1) 長い足をしている / した洋子
       *Nagai ashi o shite iru / shita Yōko*
       (Yoko, who has long legs)

**[Related Expression]**

Sentences of this construction can be restated using the *wa-ga* construction as follows:
N₁ wa Adj N₂ o shite iru → N₁ wa N₂ ga Adj.

Thus, the KS example can be rephrased as:

[1] 洋子は足が長い / 長いです。
   Yoko wa ashi ga nagai / nagaidesu.
   (Yoko has long legs.)

The only perceptible difference between KS and [1] is that the latter sentence is more analytical than the former. In other words, in KS nagai ashi ‘long legs’ is one unit, but in [1] ashi ‘legs’ is first presented as a single unit and is then further characterized as nagai ‘long’.

Note

When suru⁴ is used to mean ‘lapse of time’, it can only be used in a sub-
ordinate clause, as in KS(B) and Ex. (b). Therefore, the following sentence
in which suru⁴ is used in the main clause is ungrammatical.

(1) *三年しました。
    *Sannen shimashita.
    Cp. 三年たちました。
    Sannen tachimashita.

### Examples

(a) 私は自転車を買いました。すると弟も欲しがりました。
*Watashi wa jitensha o kaimashita. Suru to otōto mo hoshigarimashita.*
(I bought a bike. Then, my younger brother wanted one, too.)

(b) 頭が痛かったのでアスピリンを飲みました。すると痛みがすぐ止まりました。

B: すると、来年は大学受験ですかね。
*Suru to, rainen wa daigakujuken desu ne.*
(Then, he is going to take a college entrance examination next year, isn’t he?)
To of *soru to* is the conjunction *to*. Therefore, in KS(A), Sentence₂ normally expresses an event that is beyond the control of the speaker; that is why Sentence₂ cannot be a command, a request, or a suggestion.

**Related Expressions**

I. *Soru to* is the shortened form of *sō suru to*. These two constructions have identical meanings and can be used interchangeably. They are related to another expression *sore de wa* ‘then’, but unlike *sore de wa*, the second sentence in the (*sō*) *soru to* construction cannot be a command, request, suggestion, or something which can be controlled by the subject of the sentence. (⇒ *sore de wa*) Thus,

   *Kyō wa isogashii desu.*
   (I'm busy today.)

   B: それでは / *(そう)* するとあした行きましょう。
   *Sore de wa / *(Sō)* suru to ashita ikimashō.*
   (Then, let’s go there tomorrow.)

   B: それでは / *(そう)* するとあした来てください。
   *Sore de wa / *(Sō)* suru to ashita kite kudasai.*
   (Then, please come tomorrow.)

   *Anata ga konai to komaru n desu.*

   B: それでは / *(そう)* すると行きます。
   *Sore de wa / *(Sō)* suru to ikimasu.*
   (Lit. Then, I’ll go.)

II. *Sore de wa* ‘then’ can replace the *soru to* in KS(B) but not the *soru to* in KS(A), because *sore de wa* requires that the speakers of Sentence₁ and Sentence₂ be different.

Note

Kanojo ‘she’ can take -tachi, but kare ‘he’ cannot.

[Related Expressions]

In addition to -tachi there are three other pluralizing suffixes: -domo, -gata and -ra. -domo is attached primarily to formal first person pronouns, yielding a humble ‘we’, as in:

[1] 私共は何も存じません。
Watashidomo wa nani mo zonjimasen.
(We don’t know anything about it.)
-domo can also be attached to a very limited number of human nouns such as *otoko ‘man’ and onna ‘woman’, yielding the rather downgrading plurals *otokodomo ‘men’ and *onnadomo ‘women’, respectively. Although kodomo ‘child’ is ko+domo, it is no longer used as a plural. Instead -tachi is attached to it to generate the plural form, as in Formation (iii).

-gata is an honorific plural marker attached to the second person pronoun anata ‘you’ and a very limited number of nouns such as o-kā-san ‘mother’, o-tō-san ‘father’ and sensei ‘teacher’.

[2] a. あなた方はいついらっしゃいますか。
Anatagata wa itsu irasshaimasu ka.
(When are you going there?)

b. 先生方はいらっしゃらないそうです。
Senseigata wa irassharanai sōdesu.
(I was told that the teachers aren't coming.)

The honorific plural form for hito ‘person’ is katagata (as in kono katagata ‘these people’) which is the plural form of kata.

-ra is the least formal plural marker and is normally attached to personal pronouns and names.

Examples

(a) 僕は冷たいビールを / が飲みたい。
Boku wa tsumetai biru o / ga nomitai.
(I want to drink cold beer.)
(b) 今日は何を / が食べたいですか。
   Kyō wa nani o / ga tabetadesu ka.
   (What do you want to eat today?)

(c) 三木さんは車を買っていたがっている。
   Miki-san wa kuruma o kaita gatte iru.
   (Mr. Miki wants to buy a car.)

Notes

1. Tai is an i-type auxiliary adjective which expresses a person's desire to do something. Since Vmasu tai expresses a very personal feeling, it is usually used only for the first person in declarative sentences and for the second person in interrogative sentences. For the third person, Vmasu ta gatte iru ‘lit. is showing signs of wanting to do s.t.’ is usually used, as in KS(C) and Ex. (c). (⇒ garu) Vmasu tai with the third person subject is acceptable, however, in the following situations:

   (1) In the past tense
   
   和男はとても行きたかった。
   Kazuo wa totemo ikita katta.
   (Kazuo wanted to go very badly.)

   (2) In indirect / semi-direct speech
   a. 一郎も行きたいと言っている。
      Ichirō mo ikitai to itte iru.
      (Ichiro says he wants to go, too.)

   b. 利子は日本へ帰りたいそうだ。
      Toshiko wa Nihon e kaeritai sōda.
      (I heard that Toshiko wants to go back to Japan.)

   (3) In explanatory situations

   野村さんはあなたと話したいんですよ。
   Nomura-san wa anata to hanashi tai n desu yo.
   ((The explanation is that) Miss Nomura wants to talk with you.)

   (⇒ no da)

   (4) In conjecture expressions

   a. 村山さんはのり子と踊りたいらっしゃい。
      Murayama-san wa Noriko to odoritai rashii.
      (It seems that Mr. Murayama wants to dance with Noriko.)

   b. 早田さんは早く家族に会いたそうだ。
      Hayata-san wa hayaku kazoku ni aita sōda.
      (It looks like Mr. Hayata wants to see his family soon.)
2. In some situations, if the verb in Vmasu tai is a transitive verb, the direct object can be marked either by ga or by o, as seen in KS(B), Ex. (a) and Ex. (b). In general, the choice between ga and o seems to depend on the degree of desire. That is, when the desire to do something is high, ga is preferred; when it is low, o is used. Compare (4) and (5):

(4) [Situation: The speaker has just run five miles.]

私は水が / ？を飲みたい。
Watashi wa mizu ga / ？o nomitai.
(I want to drink some water.)

(5) [Situation: The speaker has been told by a doctor to drink as much water as possible. That is, he feels he has to drink water.]

私は水を / ？が飲みたいが…
Watashi wa mizu o / ？ga nomitai ga…
(I want to drink water but (my stomach doesn’t accept it anymore)…)

Under the following conditions, ga cannot be used even if the degree of desire is high.

(A) When a long element intervenes between the direct object and the verb:

(6) 私は水を / *が出かける前に飲みたい。
Watashi wa mizu o / *ga dekakeru mae ni nomitai.
(I want to drink water before I leave home.)

(B) When the main verb is in the passive form:

(7) 私は先生にこの絵を / *がほめられたい。
Watashi wa sensei ni kono e o / *ga homerareta.
(Lit. I want to have this picture praised by my teacher.)

(C) When the preceding noun is not the direct object:

(8) a. 私は早くこの電車を / *が降りたい。
Watashi wa hayaku kono densha o / *ga oritai.
(I want to get off this train soon.)

b. 私は公園を / *が歩きたい。
Watashi wa kōen o / *ga arukitai.
(I want to walk through the park.)

(⇒ o²; o³)

3. In the construction Vmasu ta gatte iru, ga can never be used to mark the direct object.
(9) 三木さんは車を / *が買いたがっている。
Miki-san wa kuruma o / *ga kaita gatte iru.
(Mr. Miki wants to buy a car.)

4. Vmasu tai cannot be used to express an invitation. The following sentences are inappropriate in invitation situations.

(10)  a. 私と一緒に行きたいですか。
Watashi to isshoni iki tai desu ka.
(Do you want to go with me?)

     b. あした食事に来たいですか。
Ashita shokuji ni kitai desu ka.
(Would you like to come to dinner tomorrow?)

In these situations negative questions are used, as seen in (11).

(⇒ mashō)

(11) 私と一緒に行きませんか。
Watashi to isshoni ikimasen ka.
(Wouldn’t you like to go with me?)

[Related Expressions]

The idea of ‘want’ in English is expressed by either tai, hoshii¹ or hoshii². Tai is used when the experiencer wants to do something. Hoshii¹ is used when the experiencer wants something. Hoshii² is used when the experiencer wants someone to do something. (⇒ hoshii¹; hoshii²)

**Notes**

1. 〜te / de tamaranai is an idiomatic phrase used to express the fact that some situation is unbearable in the extreme for the speaker or someone with whom he empathizes.

2. The adjectives used before te / de refer to human feelings.

3. There is no affirmative counterpart of this construction, *〜te / de tamaru.

**[Related Expression]**

〜te tamaranai (lit. 〜 and I can’t stand it) can be replaced by te shikata ga nai (lit. 〜 and I don’t know what to do about it). The only difference is that the former is more emotive than the latter. But when shikata ga nai is directly preceded by Vte mo, it cannot be replaced by tamara nai, as shown in [1].

    Furansu ni itta no wa kōsui o kau tame da.
    (Lit. It was for the purpose of buying perfume that I went to France.
     (=I went to France to buy perfume.))

**Notes**

1. *Tame ni* expresses cause or reason when it is preceded by an Adj(*i*) or an
   Adj(*na*), as in Exs. (f) and (g), or when the main clause describes a
   noncontrollable situation and / or when the *tame ni* clause is in the past
   tense, as in Ex. (d). In these cases, it never expresses purpose. Con-
   sider the additional examples in (1).

   (1) a. 仕事のために何もほかの事が出来ない。
       *Shigoto no tame ni nani mo hoka no koto ga dekinai.*
       (Because of the job I can’t do anything else.)

   b. 会社のために朝から晩まで働いている。
       *Kaisha no tame ni asa kara ban made hataraitte iru.*
       (He’s working from morning till night for the sake of his
        company.)

   (1a) gets the *reason / cause* interpretation, because the main clause
describes a noncontrollable situation, whereas (1b) gets the *purpose*
interpretation, because the main clause describes a controllable situation.

2. The *ni* of *tame ni* can be dropped, as in Exs. (b), (c), (d), (e), (f) and (g),
   if a phrase(s) intervenes between the main verb and *tame ni*.

**Related Expressions**

I. When *tame* is used to mean reason or cause, it can be replaced by *kara*
or *node*. Thus, KS(C) and Ex. (d) can be rephrased as [1a] and [1b],
respectively.
1. 今年は雪があまり降らないから / のでスキが出来ない。
   Kotoshi wa yuki ga amari furanai kara / node suki ga dekinai.
   (We cannot ski because it hasn’t snowed very much this year.)

2. 私は父が死んだから / ので大学に行けなかった。
   Watashi wa chichi ga shinda kara / node daigaku ni ikenakatta.
   (I couldn’t go to college because my father died.)

The difference between tame and other markers of reason / cause is that
   tame is more formal than the others and is seldom used in informal
   conversation. (⇔ kara³; node)

II. When tame is used to mean purpose, it can be replaced by either
   Vinf·nonpast noni or Vmasu ni Vmotion. However, tame ni can be replaced
   by noni only when one does something in the process of achieving some
   goal. Thus, [3a] can be paraphrased as [3b] but [4a] cannot be para-
   phrased as [4b].

3. a. 漢字を調べるために辞書を使う。
   Kanji o shiraberu tame ni jisho o tsukau.
   (In order to find out about kanji I use a dictionary.)

4. a. 体を強くするために毎日プールで泳いでいる。
   Karada o tsuyoku suru tame ni mainichi puru de oyoide iru.
   (I’m swimming every day in the pool in order to strengthen
   my body.)

Note also that tame can be replaced by Vmasu ni Vmotion only when
tame is used with a Vmotion. The difference between tame and other
markers of purpose is that tame is the most formal and least colloquial
of the three.

Notes

1. The meaning of $S_1$ tara $S_2$ varies depending on the contents of $S_1$ and
$S_2$ and also on the situation in which this construction is used. How-
ever, $S_1$ always represents an antecedent and $S_2$ a subsequence. For
example, in KS, Mr. Yamada's coming precedes the speaker's returning
home. Likewise, in Ex. (a), the speaker's asking his teacher precedes
his understanding something. If this relation does not hold, this con-
struction cannot be used. For example, (1) cannot be expressed by the
tara construction because the event of $S_1$, the speaker's going to Chicago,
does not precede the event of $S_2$, his going there by car.

   (1) When I go to Chicago, I usually go by car.
   *私はシカゴへ行ったたらたいてい車で行きます。
   *Watashi wa Shikago e ittara taitei kuruma de ikimasu.
   (In this situation, toki is used. (⇒ toki)) For the same reason, tara
   is ungrammatical in the situation in (2).

   (2) If you go to Chicago, go by bus.
   *シカゴへ行ったしたらバスで行きなさい。
   *Shikago e ittara basu de ikinasai.
   (In this case, nara is used. (⇒ nara))

2. In $S_1$ tara $S_2$, it is often the case that $S_1$ represents a condition and $S_2$
an event which occurs under that condition. Therefore, the whole sen-
tence basically means 'when $S_1$ is satisfied, $S_2$ takes place' or ' $S_1$
brings about $S_2$', as in Exs. (c), (d) and (e).
3. As seen in KS, *tara* may mean ‘when’ in one case and ‘if’ in another. *Tara* means ‘when’ if S₁ is a certainty; if not, *tara* means ‘if’. Thus, in (3), *tara* means ‘when’.

(3) 十二時になったら帰ります。
   *Jūniji ni nattara kaerimasu.*
   (When / *If it is twelve o’clock, I’ll go home.)

*Moshi* before S₁ *tara* makes sentences unambiguous; it always means ‘if S₁’. Example:

(4) もし山田さんが来たら私は帰ります。
   *Moshi* Yamada-san ga kitara watashi wa kaerimasu.
   (If / *When Mr. Yamada comes, I’ll go home.)

4. In S₁ *tara* S₂, S₂ can be a command, a request, a suggestion, an invitation or a volitional sentence.

(5) 仕事が早く終わったら僕のうちに  
   *Shigoto ga hayaku owattara boku no uchi ni*
   \[
   \begin{align*}
   a. & \text{ 来なさい。} & \text{kinasai.} \\
   b. & \text{ 来てください。} & \text{kite kudasai.} \\
   c. & \text{ 来たらどうですか。} & \text{kitara dō desu ka.} \\
   d. & \text{ 来ませんか。} & \text{kimasen ka.}
   \end{align*}
   \]
   (If you finish your work early,
   a. come to my place.  
   b. please come to my place.  
   c. why don’t you come to my place?  
   d. wouldn’t you like to come to my place?)

(6) 仕事が早く終わったらおうちにおうかがいします。
   *Shigoto ga hayaku owattara o-uchi ni o-ukagai shimasu.*
   (If I finish my work early, I’ll visit your place.)

5. S₁ *tara* S₂ can also be used in counterfactual situations, as in (7).
(7) a. お金があったらこんなうちにはいない。
   O-kane ga attara konna uchi ni wa inai.
   (If I had money, I wouldn’t be in such a house.)

b. あの時お金があったら日本へ行っていたでしょう。
   Ano toki o-kane ga attara Nihon e itte ita deshō.
   (If I had had money at that time, I would probably have
gone to Japan.)

6. When S₂ in “S₁ tara S₂” represents a past action, the action cannot be
one intentionally taken by the agent after the action or event represented
by S₁. Thus, the (a) sentences in (8) and (9) are acceptable, but the
(b) sentences are not.

(8) a. 学校へ行ったら、うぜん上田さんに会った。
   Gakkō e ittara, gūzen Ueda-san ni atta.
   (When I went to school, I happened to see Mr. Ueda.)

b. *学校へ行ったら、上田さんと話をした。
   *Gakkō e ittara, Ueda-san to hanashi o shita.
   (When I went to school, I talked with Mr. Ueda.)

(9) a. お酒を飲んだら寝てしまった。

   (After I drank sake, I fell asleep.)

b. *お酒を飲んだら寝た。
   *O-sake o nondaara neta.
   (After I drank sake, I went to bed.)

Kyashi no apāto ni ittara / iku to / *ikeba / *itta (no) nara
Andī ga ita.
(When I went to Cathy's apartment, Andy was there.)

II. As stated in Note 4, S₂ in S₁ tara S₂ can be a command, a request, a suggestion, an invitation or a volitional sentence. This is also the case with S₂ in S₁ ba S₂ and S₁ nara S₂ but not with S₂ in S₁ to S₂. Example:

[2] 安かったら / 安ければ / 安い(の)なら / *安いと買いなさい。
Yasukattara / Yasukereba / Yasui (no) nara / *Yasui to kinasai.
(Buy it, if it's cheap.)

III. Although S₂ in S₁ tara S₂, S₁ ba S₂ and S₁ nara S₂ can be a command, a request, a suggestion, an invitation or a volitional sentence, the meanings are not exactly the same. The following examples show the differences clearly.

[3] a. ペンが来たら, 私は帰ります。
Ben ga kitarā, watashi wa kairimasu.
(When / If Ben comes, I'll go home.)

b. ペンがくれば, 私は帰ります。
Ben ga kureba, watashi wa kairimasu.
(If Ben comes, I'll go home. (If not, I'll stay here.))

c. ペンが来る(の)なら, 私は帰ります。
Ben ga kuru (no) nara, watashi wa kairimasu.
(If it is true that Ben is coming, I'll go home.)

As seen above, [3a] is ambiguous; it is not clear that Ben is coming. If Ben's coming is certain, [3a] indicates the time the speaker will leave. If Ben's coming is uncertain, [3a] indicates the condition under which the speaker will leave. In both cases, however, Ben's coming precedes the speaker's leaving. [3b] is similar to the second case of [3a] (i.e., the case in which Ben's coming is uncertain). However, [3b] focuses more on the condition. That is, [3b] implies something like 'the condition under which I go home is Ben's coming here'. In [3b] also, Ben's coming precedes the speaker's leaving. S₁ in [3c] also indicates the condition under which the speaker returns home. In this case, however, Ben's coming does not necessarily precede the speaker's leaving.
because the condition under which the speaker goes home is that Ben's coming is true, not that Ben comes (to a certain place).

IV. As stated in Note 5, S₁ *tara* S₂ can be used in counterfactual situations, and so can S₁ *ba* S₂ and S₁ *nara* S₂. However, S₁ *to* S₂ cannot be used in such situations except for the idiomatic expression S *to ii / yokatta* ‘It would be good / It would have been good if S’. Example:

[4] あの時お金をあったら / あれば / あったなら / *あると日本に行っていただろう。

Ano toki o-kane ga attara / areba / atta nara / *aru to Nihon ni itte ita darō.

(If I had had money at that time, I would have gone to Japan.)

~*tara dō desu ka* ~たらどうですか  

a phrase which expresses a suggestion (Lit. How would you feel if you do s.t.?)

</tr>
<tr>
<td>ら</td>
<td>どうですか。</td>
</tr>
<tr>
<td>ra</td>
<td>dō desu ka.</td>
</tr>
</tbody>
</table>

(Why don’t you read more Japanese books?)

**Formation**

Vinf·past  ら どうですか。

ra dō desu ka.

話した ら どうですか。  (Why don’t you talk ~?)

hanashita ra dō desu ka.
食べたらどうですか。 (Why don't you eat ~?)
tabeta ra dō desu ka.

**Examples**

(a) サラダも食べたらどうですか。
Sarada mo tabetara dō desu ka.
(Why don't you eat salad, too?)

(b) 山村先生に聞いたらどうですか。
Yamamura-sensei ni kiitara dō desu ka.
(Why don't you ask Prof. Yamamura?)

**Notes**

1. Vinf·past ra dō desu ka is an idiomatic phrase derived from the “S₁
tara S₂” construction and expressing a suggestion. (⇒ ~tara)

2. The informal version is Vinf·past ra dō? More polite versions are
Vinf·past ra dō deshō (ka), Vinf·past ra ikaga desu ka and Vinf·past
ra ikaga deshō (ka). (⇒ darō)

**Related Expression**

Hō ga ii also expresses suggestion, but this phrase is close to a command (es-
pecially when it is preceded by Vinf·past), and, therefore, is stronger than
tara dō desu ka.

**~tari ~tari suru**

~たり~たりする

(Mr. Ishikawa doesn’t come regularly and we can’t count on him.)

Notes

1. The “X tari Y tari suru” construction generally expresses an inexhaustive listing of actions or states. “Inexhaustive” means that in a given situation there may be additional, unstated actions or states. (The exhaustive listing of actions or states is expressed by the te-form. (⇔ -te))
   (Cp. to₁; ya)

2. Suru usually follows “X tari Y tari” regardless of the part of speech of X and Y, and expresses the tense, the aspect (e.g., progressive, perfect) and the formality level of the sentence.

3. This construction usually lists two actions or two states, but it can list more than two actions or two states, as in (1).
(1) 本を読んだり、映画を見たり、テープを聞いたりして日本語を勉強している。
Hon o yondari, eiga o mitari, tēpu o kiitari shite nihongo o ben-kyōshite iru.
(I'm studying Japanese by doing things like reading books, seeing movies and listening to tapes.)

Sometimes only one action or state is listed in this construction, as in (2).

(2) 新聞を読んだりして友達が来るのを待っていた。
Shinbun o yondari shite tomodachi ga kuru no o matte ita.
(I was waiting for my friend to come, doing things like reading a newspaper.)

4. If "X tari Y tari suru" is not the final segment of a sentence and the predicate is an adjective, suru may be omitted, as in (3).

(3) 歌ったり踊ったり（して）とても楽しかった。
Utattari odottari (shite) totemo tanoshikatta.
(We did things like singing and dancing, and it was a lot of fun.)

If the predicate is a verb, however, suru cannot be omitted as in (4).

(4) *私達はテニスをしたり泳いだりして / *∅ 遊んだ。
*Watashitachi wa tenisu o shitari oyoidari shite / *∅ asonda.
(Lit. We played doing things like playing tennis and swimming.)

5. As seen in KS(C) and Ex. (f), a slightly different pattern, X tari Y tari da, is also used in some situations. This pattern is used when a speaker describes someone’s or something’s inconstant state.

-tatte たって conj.

Examples

(a) お金があったって車は買いたくない。

O-kane ga attatte kuruma wa kaitakunai.

(Even if I had money, I wouldn’t want to buy a car.)
(b) 本を買ったら、忙しくて読めない。
Hon o kattatte, isogashikute yomenai.
(Even if I buy books, I'm too busy to read them.)

c) きたなくたってかまいません。

e) どんなにいい先生だって時々間違います。
Donna ni ii sensei datte tokidoki machigaimasu.
(No matter how good a teacher may be, he sometimes makes mistakes.)

Notes
1. -tatte is used strictly in informal spoken Japanese, and is used to indicate something counter to fact. However, the counterfactual (or subjunctive) nature of this construction is not very strong. See Ex. (a).
2. -tatte can take donna ni (as in Ex. (e)) meaning 'no matter how'. More examples follow.

(1) a. どんなに考えて分からないよ。
Donna ni kangaetatte wakaranai yo.
(No matter how hard you think, you won't understand it.)

   b. どんなに寒くて大丈夫です。
Donna ni samukutatte daijōbudesu.
(No matter how cold it is, it's all right.)

[Related Expression]
-tatte can be replaced by te mo. The difference is that te mo can be used in spoken and written language and that it is less emotive than -tatte. Thus, if Ex. (a) is replaced by the following sentence, the counterfactuality of having money is nullified, and the entire sentence sounds much less emotive.

[1] お金があっても車は買いたくない。
O-kane ga atte mo kuruma wa kaitakunai.
(Even if I have money, I don't want to buy a car.)
-te て

(Prof. Ito was ill this week and Prof. Murata taught for him.)

Notes

1. The *te*-form functions, in part, to link sentences. That is, if the last element of the predicate of a clause is the *te*-form, it means that that clause is not the end of the sentence and that another predicate or clause follows it. For example, in Ex. (b) the last element of the predicate of the first clause is *sugite*, the *te*-form of *sugiru* ‘do s.t. too much’, and *sugite* is followed by another clause *atama ga itai* ‘lit. (my) head aches’.

2. The meaning of the *te*-form varies according to context, but generally, it corresponds to *and* or *-ing* in participial constructions.

3. When the *te*-form links two predicates, the relationship between the two is often one of the following:

(A₁: the action or state expressed by the first predicate; A₂: the action or state expressed by the second predicate)
(A) $A_1$ and $A_2$ occur sequentially, as in KS(1) and Ex. (a).

(B) $A_1$ and $A_2$ are two states of someone or something, as in KS(2), KS(4), Exs. (c) and (f).

(C) $A_1$ is the reason for or the cause of $A_2$, as in KS(3), Exs.(b), (d), (e) and (g). (This usage of the $te$-form is very common.)

(D) $A_1$ is the means by which someone does $A_2$ or the manner in which someone does $A_2$. Examples:

1. 僕は歩いて帰った。
   *Boku wa aruīte kaetta.*
   (Lit. I walked and went home. (=I went home on foot.))

2. 健二は急いでご飯を食べた。
   *Kenji wa isoide gohan o tabeta.*
   (Lit. Kenji hurried and ate his meal. (=Kenji ate his meal in a hurry.))

(E) $A_1$ is contrasted with $A_2$. Example:

3. 男は外で働いて、女はうちで働く。
   *Otoko wa soto de hataraitte, onna wa uchi de hataraku.*
   (Lit. Men work outside and women work inside.)

(F) $A_2$ is unexpected in terms of $A_1$. Example:

4. トムはいつも遊んでいてテストが出来る。
   *Tomu wa itsumo asonde ite tesuto ga dekiru.*
   (Tom plays around, yet he always does well on tests.)

4. The $te$-form can be repeated more than once in a clause. Just like the particle $to$ makes an exhaustive listing of nouns, the $te$-form can list verbs and adjectives exhaustively. (Cp. $\sim$ tari $\sim$ tari suru; ya) Example:

5. エミーは美しくて明るくて人に親切だ。
   *Emi wa utsukushikute akarukute hito ni shinsetsuda.*
   (Amy is pretty, cheerful and kind to people.)

5. $Te$-form verbs are also used with such expressions as $iru$ ‘be doing $\sim$’, $kara$ ‘after’ and $wa ikenai$ ‘must not do $\sim$’. (⇒ Appendix 4, Connection forms of important expressions, F. V$te+$___)
te mo ても  conj.

Te mo is used when that which is expressed in the main clause is not what is expected from the content of the dependent (te mo) clause.

(h) 井上さんが先輩でも僕ははっきり言うつもりだ。
*Inoue-san ga senpai de mo boku wa hakkiri iu tsumori da.*
(I intend to speak straightforwardly, even if Mr. Inoue is my senior.)
Notes

1. The basic meaning of *te mo* is the same as the English phrase ‘even if ~’.

2. ~*te mo iidesu ka* as in Ex. (e) is an idiomatic expression used to request permission to do s.t. If the answer is in the affirmative, it is “*Hai, iidesu.*” (Yes, you may.) If it is in the negative, it is “*Te, ikemasen.*” (No, you may not.)

3. WH-word ~ *te mo* means ‘no matter WH-’, as in Exs. (c), (d), (f), and (g). Typical usages are listed below:

   だれ に 話して も (no matter who s.o. talks to)
   *dare ni hanashite mo*

   何 を 話して も (no matter what s.o. talks about)
   *nani o hanashite mo*

   どこ で 話して も (no matter where s.o. talks)
   *doko de hanashite mo*

   いつ 話して も (no matter when s.o. talks)
   *itsu hanashite mo*

   どう 話して も (no matter how s.o. talks)
   *dō hanashite mo*

   どんな に 話して も (no matter how much s.o. talks)
   *donna ni hanashite mo*

[Related Expressions]

*Te mo* is comparable but not identical to *keredo* ‘although’ and *noni* ‘in spite of the fact that’. The semantic difference is exactly that of English ‘even if’ vs. ‘although’. (⇒ *keredo; noni*) Thus,

[1] 中山さんは本を買っても / 買うけれど / 買うのに読みません。
   *Nakayama-san wa hon o katte mo / kau keredo / kau noni yomi-masen.*
   (Mr. Nakayama doesn’t read books even if / although he buys them.)
   However, if *te mo* is used with a WH-word, it cannot be replaced by *keredo* or *noni*.

[2] 何を食べても / *食べるけれど / *食べるのにおいしいです。
   *Nani o tabete mo / *taberu keredo / *taberu noni oishiidesu.*
   (No matter what I eat, it tastes good.)

   (Today’s homework assignment is a composition. It is all right if it’s
    short, but please write an interesting one.)

(c) A: テニスをしませんか。
    Tenisu o shimasen ka.
    (Wouldn’t you like to play tennis?)

   B: 下手でもいいですか。
    Hetade mo ii desu ka.
    (Is it all right if I’m poor at it?)

(d) A: 何か冷たいものを飲みたいんです。
    Nanika tsumetai mono o nomitai n desu ga.
    (I want to drink something cold.)

   B: ビールでもいいですか。
    Biru de mo ii desu ka.
    (Will beer do?)

Notes

1. When te mo ii is preceded by a verb, it means permission.

2. ~nakute mo ii, the negative te-form with mo ii, means ‘It is all right
   if ~ not ~’ or ‘do not have to do ~’. (Cp. ~nakereba naranai)

Examples:

(1) 私はその試験を受けなくてもいい。
    Watashi wa sono shiken o ukennakute mo ii.
    (I don’t have to take the exam.)

(2) 新しくなくてもいいです。
    Atarashikunakute mo ii desu.
    (It is all right if it’s not new (or fresh).)

(3) 学生じゃなくてもいいです。
    Gakusei janakute mo ii desu.
    (It is all right if you’re not a student.)
3. Other expressions like yoroshii(desu), the polite form of ii ‘good, all right’, and kamaimasen ‘don’t mind’ can be used in place of ii(desu). The degrees of politeness in these expressions are as follows:

(4)  

\[ ii(desu) > kamaimasen > yoroshii(desu) \]

| less polite | more polite |

Examples:

(5) あした休んでもよろしいですか。

*Ashita yasunde mo yoroshiidesu ka.*

(Would it be all right if I take a day off tomorrow?)

(6) たばこを吸ってもかまいませんか。

*Tabako o sutte mo kamaimasen ka.*

(Do you mind (lit. Don’t you mind) if I smoke?)

Note that *kama*u ‘mind’ must be negated in this expression.

4. *Te mo ii* sometimes appears with WH-words like *nani* ‘what’ and *ikura* ‘how much’. In this case, the expression means ‘It is all right no matter what / who / how much / etc. ~’ or ‘It doesn’t matter what / who / how much ~.’ (See *te mo*, Note 3.) Examples:

(7) それはだれかしもしいです。

*Sore wa *dare ga* shite mo iidesu.*

(It doesn’t matter who does it.)

(8) いくら食べてもいいです。

*Ikura* tabete mo iidesu.

(It is all right no matter how much you eat.)

Examples

(a) 私は英語と日本語を話す。
Watashi wa eigo to nihongo o hanasu.
(I speak English and Japanese.)

(b) ミルズさんは来年ドイツとフランスとスペインへ行くつもりだ。
Miruzu-san wa rinen Doitsu to Furansu to Supein e iku tsumori da.
(Mr. Mills is planning to go to Germany, France and Spain next year.)

(c) ステーキはナイフとフォークで食べる。
Sutēki wa naifu to fōku de taberu.
(We eat steak with a knife and a fork.)

(d) 山本さんとスミスさんがテニスをしている。
Yamamoto-san to Sumisu-san ga tenisu o shite iru.
(Mr. Yamamoto and Mr. Smith are playing tennis.)

(e) 日本語とトルコ語は似ている。
Nihongo to torukogo wa nite iru.
(Japanese and Turkish are alike.)

Notes

1. ト is used to list things exhaustively. The final ト is usually omitted, but the others are not. Thus, “A, B, C and D” is usually expressed as “A ト B ト C ト D.”

2. ト connects noun phrases only. Thus, it cannot be used for and in sentences, as seen in (1) – (3).

(⇒ -te)

(1) *ここのはンバーガーは安いといい。
*Koko no hanbāgā wa yasui to ii.
(Hamburgers here are cheap and good.)

(2) *ウイルソンさんは日本へ行ったと木村さんに会った。
*Uiruson-san wa Nihon e itta to Kimura-san ni atta.
(Mr. Wilson went to Japan and met Mr. Kimura.)
3. "N₁ to N₂ (to N₃...)" is a noun phrase; it can occur anywhere nouns can occur.

4. When N₁ to N₂ is used as the subject of a sentence, the sentence may be ambiguous. In Ex. (d), for example, without adequate context we cannot tell if Mr. Yamamoto and Mr. Smith are playing tennis together. If the predicate contains reciprocal words such as niru 'resemble', onaji-da 'be the same' and kekkonsuru 'marry', however, sentences with "N₁ to N₂" in subject position are not ambiguous, as seen in Ex. (e).

[Related Expressions]

I. When Ex. (d) means 'Mr. Yamamoto and Mr. Smith are playing tennis together', it can be restated using to² 'with', as in [1].

[1] a. 山本さんはスミスさんとテニスをしている。
Yamamoto-san wa Sumisu-san to tenisu o shite iru.
(Mr. Yamamoto is playing tennis with Mr. Smith.)

b. スミスさんは山本さんとテニスをしている。
Sumisu-san wa Yamamoto-san to tenisu o shite iru.
(Mr. Smith is playing tennis with Mr. Yamamoto.)

Note that if the speaker states [1a] or [1b] instead of Ex. (d), he is speaking from Mr. Yamamoto's or Mr. Smith's viewpoint, respectively.

II. Ya is also used to list things, but that listing is inexhaustive. Examples:

[2] a. ミルズさんやハリスさんが来た。
Miruzu-san ya Harisu-san ga kita.
(Mr. Mills, Mr. Harris, and others came.)

b. これはスプーンやフォークで食べる。
Kore wa supūn ya fōku de taberu.
(We eat this with utensils like spoons and forks.)

III. The particle ni can be used to combine two or more objects that usually come as a set.

Maiasa misoshirusu ni / to gohan o taberu.
(I eat miso soup and rice every morning.)
b. あの人はいつも白いシャツに / と赤いチョッキを着ている。

Ano hito wa itsumo shiroi shatsu ni / to akai chokki o kite iru.
(He is always wearing a white shirt and a red vest.)

The difference between  ni  and  to  is that  ni  always implies that one or more than one object has been added to the first object as an indispensable member of the entire set.  To, however, does not necessarily carry that implication.

一緒に パーティー に 行った / 行きました。

Examples

(a) トムはジョンとよくテニスをする。

Tomu wa Jon to yoku tenisu o suru.
(Tom often plays tennis with John.)

(b) 一郎はみどりと結婚した。

Ichirō wa Midori to kekkonshita.
(Ichiro married Midori.)

(c) この車は僕の車と同じです。

(This car is the same as my car.)
(d) 日本のきゅうりはアメリカのきゅうりと少しちがいます。
Nihon no kyūri wa Amerika no kyūri to sukoshi chigaimasu.
(Japanese cucumbers are a little different from American ones.)

**Notes**

1. When Y is the subject of a clause, X to indicates that X and Y have a reciprocal relationship. For example, in Ex. (a), the fact that Tom often plays tennis with John necessarily means that John often plays tennis with Tom; in other words, it means that they have a reciprocal relationship. Thus, to often corresponds to the English 'with', as in 'in the company of'. To also appears with such reciprocal verbs and adjectives as kekkonsuru 'marry', kenkasuru 'quarrel', hanashiau 'discuss with', niru 'resemble', chigau 'differ' and onajida 'be the same'. (See Exs. (b), (c) and (d).)

2. In reciprocal sentences, the subject and X in X to are interchangeable. For example, Ex. (b) can be restated as in (1).

(1) みどりは一郎と結婚した。
Midori wa Ichirō to kekkonshita.
(Midori married Ichiro.)

Ex. (b) is described from Ichiro's point of view, while (1) is described from Midori's point of view.  
($\Rightarrow$ to$^1$, REL. 1)

**[Related Expression]**

Some reciprocal expressions take X ni or X to depending on the meaning, as in [1] and [2].

[1] a. 正男は先生と話した。
Masao wa sensei to hanashita.
(Masao talked with his teacher.)

b. 正男は先生に話した。
Masao wa sensei ni hanashita.
(Masao talked to his teacher.)

[2] a. 明は君子とぶつかった。
Akira wa Kimiko to butsukatta.
(Akira bumped into Kimiko.)

b. 明は君子にぶつかった。
Akira wa Kimiko ni butsukatta.
(Akira bumped into Kimiko.)
The difference is that to implies a “bidirectional” action while ni implies a “unidirectional” one. For example, [2a] implies that both Akira and Kimiko were moving, whereas in [2b] only Akira was moving. Thus, to is unacceptable in [3] because hashira ‘post’ is immobile.

[3] 明は柱に / *とぶつかった。

* Akira wa hashira ni / *to butsukatta.
  (Akira bumped into a post.)

(f) ベンはむっとりと座っている。

Notes

1. To is basically used to mark a quotation; the literal meaning of ~ to iu is ‘say with (the sound) ~’. This use of to, however, has been ex-
tended further to cover indirect quotations, as in Exs. (a) and (b), and even thoughts (i.e., internal voice), as in Ex. (c). Note that in Japanese to is necessary for both direct and indirect quotations, as seen in KS and Ex. (a).

2. To is used to mark the content of such actions as omou ‘think; feel’, kangaeru ‘think (with the intellect)’, kaku ‘write’, kiku ‘hear’ and setsumeisuru ‘explain’.

3. To is also used with phonomimes, as in Ex. (d). Again, the idea is that someone / something makes the sound marked by to when doing something. Note that sound symbolisms in Japanese are not children’s words. Rather, they are an important part of the Japanese vocabulary.

4. When a sound is repeated twice like batabata in Ex. (d), to can be omitted. When a sound is not repeated, however, to does not drop. Examples:

   (1) a. 子供達はバタバタと / Ø 走り回った。
      Kodomotachi wa batabata to / Ø hashirimawatta.
      (Lit. The children ran around with a clattering noise.)

      b. 正男はバタンと / *Ø ドアを閉めた。
      Masao wa batan to / *Ø doa o shimeta.
      (Masao slammed the door (lit. closed the door with a bang).)

5. The use of to with phonomimes is extended to phonomimes and psychomimes, as in Exs. (e) and (f), though these are not representations of actual sounds.

〜to ieba 〜と言えば 　phr.

an expression which presents as  the topic of a following discourse a phrase which has just been uttered

Speaking of 〜【REL. ttara; tte】

Key Sentence

A:

この 本 は 田中さん に 借りた ん です。
Kono hon wa Tanaka-san ni karita n desu.
(I borrowed this book from Mr. Tanaka.)

B:

田中さん と 言えば もう 病気 は 治った の かしら。
Tanaka-san to ieba mō byōki wa naotta no kashira.
(Speaking of Mr. Tanaka, I wonder if he's gotten over his illness yet.)

Examples

(a) A: 次の日曜日は京都へ行くつもりだ。
Tsugi no nichiyōbi wa Kyōto e iku tsumori da.
(I'm going to Kyoto next Sunday.)

B: 京都と言えば、春子が京都大学の入学試験に通ったそうだ。
Kyōto to ieba, Haruko ga Kyōtodaigaku no nyūgakushiken ni tōta sōda.
(Speaking of Kyoto, I heard that Haruko passed Kyoto University's entrance exam.)

(b) A: 小西君はよく休むねえ。
Konishi-kun wa yoku yasumu nē.
(Mr. Konishi is absent frequently, isn't he?)

B: よく休むと言えば、山本君も最近見ませんね。
Yoku yasumu to ieba, Yamamoto-kun mo saikin mimasen ne.
(Talking about (someone's) frequent absences, we don't see Mr. Yamamoto these days either, do we?)

Notes

1. To ieba literally means ‘if you say that 〜’, but it is used as a topic
presentation expression meaning ‘speaking of’.

2. Usually a noun phrase is presented by to ieba, but any sentence element is possible. For example, in Ex. (b), a verb phrase is presented.

3. The informal form of to ieba is tte ieba.

[Related Expressions]

There are several other expressions used to present topics.

I. Ttara is the abbreviation for to kitara or to ittara and is used to present noun phrase topics in informal conversation. It is more emphatic than the topic marker wa and sometimes means something like ‘when it comes to ~’ or ‘in the case of ~’. Example:

[1] よし江ったら私には何も言わないのよ。
   Yoshie ttara watashi ni wa nani mo iwanai no yo.
   (Yoshie didn’t tell me anything, you know.)

II. Tte, the abbreviation for to iu to ‘when you say ~’, or to iu no wa ‘what you say (or call) ~’, is also used to present topics in informal conversation. Like to ieba any sentence element can precede tte, and that element is usually a part of the conversation partner’s previous utterance. Examples:

[2] A：シービーを買いましたよ。
   Shibi o kaimashita yo.
   (I bought a CB.)

   B：シービーって?
   Shibi tte?
   ((What do you mean by what you call) a CB?)

[3] A：来週から英語を教えるんです。
   Raishū kara eigo o oshieru n desu.
   (I’m teaching English from next week.)

   B：英語を教えるって、だれに?
   Eigo o oshierutte, dare ni?
   (Teaching English? To whom?)

Notes

1. To iu is a combination of the quote marker to and iu ‘call, say’.
   (⇒ to³)

2. The head noun in KS(B) is a noun of communication, such as hanashi ‘story’, nyūsu ‘news’, shirase ‘information’, tegami ‘letter’ and uwasa ‘rumor’. The head noun in KS(C) is a noun of human emotion, such as kanashimi ‘sadness’, kanji ‘feeling’, ki ‘feeling’, kimochi ‘feeling’, osore ‘fear’ and yorokobi ‘joy’.

3. To iu is optional if the preceding element is not a noun or a clause which represents a quotation, as in KS(C) and Exs. (c) and (d).

4. When to iu is used at the end of a sentence, it means hearsay (“I heard that ~, They say ~, It is said that ~”). The sentence-final to iu is used only in written Japanese, as in (1).

   B: 音楽を聞くとか，本を読むとかしています。
    *Ongaku o kiku toka, hon o yomu toka shite imasu.*
    (I do things like listening to music or reading books.)

Notes

1. The conjunction *toka* is a combination of the quote marker *to* and *ka*. That is why *toka* is often followed by the verb *iu* ‘say’, as in Ex. (a). When *toka* is followed by *iu*, as in (1), it is not a conjunction; it is a quote marker. The *ka* indicates the speaker’s uncertainty about the quoted report.

   (1) 佐藤さんは忙しくて行けないとか言っていた。
      *Satō-san wa isogashikute ikenai to ka itte ita.*
      (Mr. Sato was saying he can’t go there because he’s busy or something.)

2. *N₁ to ka iu N₂* meaning ‘*N₂* that is called *N₁* or something like that’ is another example of *toka* used in the above sense.

   (2) 野口とかいう人が来た。
      *Noguchi to ka iu hito ga kita.*
      (A person named Noguchi or something like that showed up.)
3. S toka S toka suru is used when a statement refers to something in general rather than to something specific. Thus, this structure is inappropriate in (3). (See Related Expression.)

(3)  A: ニューヨークではどんなことをしましたか。
Nyūyōku de wa donna koto o shimashita ka.
(What sort of things did you do in New York?)

B: *ミュージカルを見るとか美術館に行くとかしました。
*Myūjikaru o miru toka bijutsukan ni iku toka shimashita.
(I did things like watching musicals and visiting art museums.)

[Related Expression]

～tari ～tari suru, like S toka S toka suru, indicates an inexhaustive listing of examples. It differs from S toka S toka suru, however, in that it can be used in both general and specific statements. As noted in Note 3, the toka construction can only be used in general statements. Thus, the grammatical version of (3B) is [1].

[1] ミュージカルを見たり美術館に行ったりしました。
Myūjikaru o mitari bijutsukan ni ittari shimashita.
When ～tari ～tari suru indicates alternative actions or states, it cannot be replaced by toka.

[2] 子供が部屋を出たり / *出るとか 入ったり / *入るとかしている。
Kodomo ga heya o detari / *deru toka haittari / *hairu toka shite iru.
(A child is going in and out of the room.)

(e) これは出発の時にわたします。
Kore wa shuppatsu no toki ni watashimasu.
(I'll give this to you when you leave (lit. at the time of your departure).)

Notes

1. *Toki*, by itself, means ‘time’, but when it is used as a dependent noun with a modifying phrase or clause, it means ‘at the time when’ or ‘when’.

2. The clause preceding *toki* is a type of relative clause; therefore, the basic rules for relative clauses apply to this construction. (*⇒ Relative Clause*) The following two rules are particularly important:

   (A) If the subject of the *toki* clause is different from that of the main clause, it is marked by *ga*. Compare (1) with KS(A):

   (1) メアリーは私が日本にいた時フランスにいた。
   Meari wa watashi ga Nihon ni ita toki Furansu ni ita.
   (Mary was in France while I was in Japan.)

   (B) The predicate form is usually informal except that *da* after Adj *(na)* stem and N changes to *na* and *no*, respectively.

3. The particle *ni* after *toki* is optional. With *ni*, time is emphasized and sometimes comes under focus. Compare the two sentences in (2).

   (2) a. 私は学生の時よく勉強した。
   Watashi wa gakusei no toki yoku benkyōshita.
   (I studied hard when I was a student.)

   b. 私は学生の時によく勉強した。
   Watashi wa gakusei no toki ni yoku benkyōshita.
   (It was when I was a student that I studied hard.)
4. If \( S_2 \) in \( S_1 \ toki \ S_2 \) is in the past tense and \( S_1 \) expresses a state, the tense of \( S_1 \) can be either past or nonpast, as in (3).

(3) a. 私は日本にいる / いた時田中先生に会った。
   \[ Watashi \ wa \ Nihon \ ni \ i ru \ / \ ita \ toki \ Tanaka-sensei \ ni \ atta. \]
   (I met Prof. Tanaka when I was in Japan.)

   b. 肉が高い / 高かった時は魚も高かった。
   \[ Niku \ ga \ takai \ / \ takakatta \ toki \ wa \ sakana \ mo \ takakatta. \]
   (When meat was expensive, fish was expensive, too.)

5. When \( S_1 \) in \( S_1 \ toki \ S_2 \) expresses an action, the meaning of the sentence changes depending on the tenses of \( S_1 \) and \( S_2 \).

(A) When the verb in \( S_1 \) is not a movement verb:

(4) a. 私はご飯を食べる時手を洗う。
   \[ Watashi \ wa \ gohan \ o \ taberu \ toki \ te \ o \ arau. \]
   (I (will) wash my hands (right) before I eat my meal.)

   b. 私はご飯を食べた時手を洗う。
   \[ Watashi \ wa \ gohan \ o \ tabeta \ toki \ te \ o \ arau. \]
   (I (will) wash my hands (right) after I’ve eaten my meal.)

   c. 私はご飯を食べる時手を洗った。
   \[ Watashi \ wa \ gohan \ o \ taberu \ toki \ te \ o \ aratta. \]
   (I washed my hands (right) before I ate my meal.)

   d. 私はご飯を食べた時手を洗った。
   \[ Watashi \ wa \ gohan \ o \ tabeta \ toki \ te \ o \ aratta. \]
   (I washed my hands (right) after I ate my meal.)

(B) When the verb in \( S_1 \) is a movement verb:

(5) a. 私はシカゴへ行く時すしを食べるつもりだ。
   \[ Watashi \ wa \ Shikago \ e \ iku \ toki \ sushi \ o \ taberu \ tsumori \ da. \]
   (I’m going to eat sushi (A) (right) before I leave for Chicago. / (B) on the way to Chicago.)

   b. 私はシカゴへ行った時すしを食べるつもりだ。
   \[ Watashi \ wa \ Shikago \ e \ itta \ toki \ sushi \ o \ taberu \ tsumori \ da. \]
   (I’m going to eat sushi after I’ve arrived in Chicago.)

   c. 私はシカゴへ行く時すしを食べた。
   \[ Watashi \ wa \ Shikago \ e \ iku \ toki \ sushi \ o \ tabeta. \]
((A) I ate sushi (right) before I left for Chicago. (B) I ate sushi on the way to Chicago.)

d. 私はシカゴへ行った時すしを食べた。
Watashi wa Shikago e itta toki sushi o tabeta.
(I ate sushi after I arrived in Chicago.)

(C) When the action in $S_1$ and the action in $S_2$ take place simultaneously or concurrently:

(6) a. 私はシカゴへ行く時車で行く。
Watashi wa Shikago e iku toki kuruma de iku.
(When I go to Chicago, I go by car.)

b. *私はシカゴへ行った時車で行く。
*Watashi wa Shikago e itta toki kuruma de iku.

c. 私はシカゴへ行く時車で行った。
Watashi wa Shikago e iku toki kuruma de itta.
(When I went to Chicago, I went by car.)

d. 私はシカゴへ行った時車で行った。
Watashi wa Shikago e itta toki kuruma de itta.
(When I went to Chicago, I went by car.)

[Related Expressions]

Unlike when-clauses in English, toki-clauses do not indicate condition. In other words, toki-clauses are genuine time clauses. In order to indicate condition as expressed in when-clauses, conjunctions like ~tara and to are used. ($\Leftrightarrow$ ~tara; to$^+$) Thus, if [1] expresses a condition which causes the hearer surprise, toki cannot be used.

[1] You will be surprised when you see it.

In this case, tara or to must be used, as in [2].

[2] それを見たら / 見ると / *見る時 / *見た時* おどろきますよ。
Sore o {mitara / miru to / *miru toki / *mita toki} odorokimasu yo.
(You’ll be surprised when you see it.)

(Lit. Toshio has come to the point of not understanding anything because he didn’t study well in the state where (the class) was the most important. (=Toshio has gotten totally lost because he didn’t study hard when it was most important.))

(h) お休みのところをすみません。
O-yasumi no tokoro o sumimasen.
(Lit. I’m sorry (to disturb) the state in which you are off duty. (=I’m sorry to bother you when you are off duty / on vacation.))

Notes

1. *Tokoro* itself means ‘place’, but it can also mean ‘state’ or ‘time’ when it is used with a modifying verb, adjective or noun.

2. As seen in KS(A) – KS(D), verbs which precede *tokoro* are either past or nonpast and either progressive or non-progressive, and each one of the four verb forms expresses a different aspect of the action.

3. As seen in KS(E), when the preceding verb is nonpast and non-progressive and the following copula is in the past tense, the sentence may mean ‘someone or something almost did something.’ (The literal meaning is ‘someone or something was about to do something.’) When *tokoro datta* means ‘almost did something’, such adverbs as mō sukoshi de ‘just by a little’ and abunaku ‘nearly’ are often used also, as in KS(E) and Ex. (e).

4. *Tokoro* can be followed by either the copula, as in KS(A) – KS(E), Exs. (a) and (e), or such particles as o, ni, e and de, as in KS(F) and KS(G), Exs. (b) – (d) and (f) – (h).

5. When adjectives or nouns with no precede *tokoro*, *tokoro* is usually followed by a particle rather than the copula, as in Exs. (f) and (h). The following sentences are ungrammatical:
tokoro da

(1) a. *私は今忙しいところです。
   *Watashi wa ima isogashii tokoro desu.

   b. *私は今休みのところです。
   *Watashi wa ima yasumi no tokoro desu.

[Related Expressions]

I. When tokoro is used as a dependent noun, its function appears to be similar to that of toki. However, these two expressions are different in that tokoro basically indicates a state, while toki indicates a time. Thus, [1] makes sense by itself, but [2] does not.

   [1] 僕は電話をかけるところだ。
   Boku wa denwa o kakeru tokoro da.
   (Lit. I'm in the state where I'm going to place a call. (=I'm just about to call someone.))

   [2] *僕は電話をかける時だ。
   *Boku wa denwa o kakeru toki da.
   (*I am when I'm going to place a call.)

II. Vte iru / ita tokoro da is similar to Vte iru / ita. The difference is that the former focuses more on the state or the scene while the latter concentrates on the action. Compare the usages of the two expressions in [3] and [4].

   [3] あ、ジョンが走っている / *走っているところだ。
   A, Jon ga hashitte iru / *hashitte iru tokoro da.
   (Look! John is running.)

   [4] この写真は学生がフリスビーをしているところです / *しています。
   Kono shashin wa gakusei ga furisubi o shite iru tokoro desu / *shiteimasu.
   (This picture shows students playing frisbee (lit. is a scene of students playing frisbee).)

III. Vinf-past tokoro da is similar to Vinf-past bakari da. However, their implications are different. That is, the former indicates that someone / something is in the state of having just done something, while the latter implies that someone / something did something and not much time has passed since then. Thus, tokoro da is strange in [5] because isshūkan mae ‘a week ago’ is too far in the past to be used to express “have just done something”.

[5] 私は山本先生には一週間前にあったばかりだ
/Watashi wa Yamamoto-sensei ni wa isshūkan mae ni atta bakari
da / *tokoro da.
(I met Prof. Yamamoto only a week ago.)

(b) これは日本のアパートとしては大きい方です。
   Kore wa Nihon no apāto to shite wa ōkii hō desu.
   (For a Japanese apartment, this is one of the bigger ones.)

[Related Expression]

Ni shite wa is also used to present a standard for comparisons. However, it is different from to shite wa in terms of the speaker’s presupposition. That is, sentences with X ni shite wa presuppose that the person or the thing referred to by the subject is X, whereas those with X to shite wa have no such presupposition. In Ex. (a), for example, Mr. Johnson may or may not be a first-year Japanese student. However, if ni shite wa is used, it is presupposed that he is actually a first-year Japanese student. The two expressions are also different in that ni shite wa can be used when the speaker doesn’t know exactly what he is comparing with the standard he presents, but to shite wa cannot be used in such situations. For example, suppose that someone receives a package and doesn’t know its contents. In this situa-
tion, he can say hon ni shite wa, assuming that the package contains books, but he cannot say hon to shite wa, as in [1].

[1] これは本にしては / *としては軽すぎるね。

*Boku / *Haha / *Tomodachi / Yamada-san / Anata wa taberu tsumori desu ka.
(Do / Does I / my mother / my friend / Mr. Yamada / you intend to eat it?)

3. Tsumori da can be negated in two ways. The verb / adjective in front of tsumori can be negated, as in Ex. (c), or tsumori can be negated as tsumori wa nai (not *tsumori de wa nai), as in Ex. (b). The difference between these two negative versions is that the second version implies stronger negation than the first one, as shown by (3) below:

(3) A: 今晚の音楽会に行くつもりですか。
Konban no ongakukai ni iku tsumori desu ka.
(Do you intend to go to tonight’s concert?)

B: まだよく分かりませんが、多分、行かないつもりです / ??行くつもりはありません。
Mada yoku wakarimasen ga, tabun, ikanai tsumori desu / ??iku tsumori wa arimasen.
(I can’t tell for sure now, but probably I’m not going there.)

[Related Expressions]

I. Tsumori should not be confused with hazu which means ‘expectation’ rather than ‘conviction’. (⇔ hazu)

II. Tsumori da is comparable but not identical to yō to omou. Firstly, yō to omou can replace tsumori da only in KS(A), that is, only when a verb precedes tsumori da. Secondly, yō to omou indicates a spur-of-the-moment decision while tsumori da indicates a more stable conviction / intention. Thus, if you are shown a car by a car salesman, you can say:

[1] a. この車はよさそうなので買おうと思いますがいくらですか。
Kono kuruma wa yosasōna node kaō to omoimasu ga ikura desu ka.
(This car looks nice, so I think I will buy it, but how much is it?)

But it is strange to say:

b. ??この車はよさそうなので買うつもりですがいくらですか。
??Kono kuruma wa yosasōna node kau tsumori desu ga ikura desu ka.
(Lit. ??This car looks nice, so I intend to buy it, but how much is it?)

Or, if you see an interesting ad for a stereo set in the newspaper, you can say [2a] but not [2b].

[2] a. ステレオの広告を見て買おうと思ったら家内に反対された。
Sutereo no kōkoku o mite kaō to omottara kanai ni hantaisareta.
(Lit. Upon looking at an ad for stereos, I thought I would buy one, but my wife objected to it.)

b. ??ステレオの広告を見て買うつもりだったら、家内に反対された。
??Sutereo no kōkoku o mite kau tsumori dattara, kanai ni hantaisareta.
(Lit. ??Upon looking at an ad for stereos, I intended to buy one, but my wife objected to it.)

(a) 漢字っておもしろいですよ。  
*Kanji tte omoshiroidesu yo.*  
(Speaking of kanji, they are interesting, I tell you.)

(b) 日本人ってよく写真を撮りますね。  
*Nihonjin tte yoku shashin o torimasu ne.*

(e) 家が広いっていいですね。
*le ga hiroi tte ii desu ne.
(It's good to have a spacious house, isn't it?)

Notes

1. You should not use Adj (na) stem tte, unless it is an Adj (na) that can be used also as a noun as in: *kenkō ‘healthy / health’, kodoku ‘lonely / loneliness’, shinsetsu ‘kind / kindness’, etc.

   (1) a. 健康ってありがたいですね。
       *Kenkō tte arigatai desu ne.
       (Health is a precious thing, you know.)

   b. *元気ってありがたいですね。
       *Genki tte arigatai desu ne.
       (Health is a precious thing, you know.)

2. You should not confuse -tte¹ with -tte² of hearsay. (⇒ tte²) Consider the following sentences:

   (2) a. 山崎が医者になっって本当ですか。
       *Yamazaki ga isha ni natta tte hontō desu ka.
       (I heard that Yamazaki has become a medical doctor, but is it true?)

   b. 日本の肉が高いって、どのぐらい高いんですか。
       *Nihon no niku ga takai tte dono gurai takai n desu ka.
       (I heard that Japanese meat is expensive, but how expensive is it?)

3. -tte¹ tends to co-occur with the sentence-final particles ne or yo.

[Related Expression]

When -tte is attached to a noun as in KS(A) and Exs. (a) and (b), it is close in meaning to the topic marker wa. When -tte is attached to a sentence as in KS(B) and Exs. (c), (d) and (e), it is close in meaning to ~ (to iu) no wa. -tte, however, is more colloquial and emotive than wa or (to iu) no wa. In fact, if the predicate does not express the speaker's emotive judgment / evaluation -tte cannot be used. Thus,

   [1] a. 山口さんは / *って先生です。
       *Yamaguchi-san wa / *tte sensei desu.
       (Mr. Yamaguchi is a teacher.)
-tte² って 　prt.

(Jane said that she wouldn't dance / They say that Jane won't dance.)

Examples

(a) 今晚は雪が降るって。

Konban wa yuki ga furutte.

(They say it's going to snow tonight.)

(b) 僕も行こうって思いました。

Boku mo ikô ka tte omoimashita.

(I wondered if I should go there, too.)

Notes

1. Quote+tte² is a colloquial version of Quote+to³. (⇒ to³) Any quotation which can precede to³ can precede -tte.

2. When there is a human topic in the -tte construction as in KS, the sentence is ambiguous as to whose quotation it is. The person who is quoting can be either the topic person or ‘they’. But if a reporting verb iu ‘say’ is used after -tte, then the sentence means ‘The person (topic) says that ~’.
(1) ジェーンは踊らないって言っているよ。

Jēn wa odoranai tte itte iru yo.

(Jane is saying that she won’t dance.)

3. When -tte is not followed by a verb, the understood verb is iu ‘say’. Other verbs (i.e., omou ‘feel, think’) cannot be deleted after -tte, as shown in Ex. (b).

[Related Expressions]

I. Itta / iiimashita ‘said’, itte iru / imasu ‘is saying’ or itte ita / imashita ‘was saying’ can be deleted after -tte², as seen in KS and [1] below, but not after to³, as seen in [2].

[1] a. ジェーンは踊らないって言った。

Jēn wa odoranai tte itta.

(Jane said that she wouldn’t dance.)

b. ジェーンは踊らないって。

Jēn wa odoranai tte.

(=KS)

[2] a. ジェーンは踊らないと言って言った。

Jēn wa odoranai to itta.

(Jane said that she wouldn’t dance.)

b. *ジェーンは踊らないと言った。

*Jēn wa odoranai to.

The difference between -tte² and to³ is that the former is more emphatic and emotive owing to its glottal stop.

(⇒ Characteristics of Japanese Grammar, 8. Sound Symbolisms)

II. When the subject of the understood iu is an unspecified person(s), as in the second interpretation of KS, -tte² is similar to the hearsay sōda¹ ‘they say ~’. -tte², however, is more colloquial and informal than sōda¹. (⇒ sōda¹) X ga itte ita kedo ‘X was saying but’ or its variants are used when specifying an informational source in the -tte construction, not the usual X ni yoru to, as shown in [3].

[3] a. ジョンが言っていたけど、ジェーンは踊らないって。

Jon ga itte ita kedo, Jēn wa odoranai tte.

(According to John, Jane is not going to dance.)

b. ジョンによると、ジェーンは踊らないそうだ / *って。

Jon ni yoru to, Jēn wa odoranai sōda / *tte.

(According to John, Jane is not going to dance.)

Examples

(a) 雨が降らないうちにテニスをして来ます。

Ame ga furanai uchi ni tenisu o shite kimasu.
(I'll go and play tennis (and come back) before it rains.)

(b) 忘れないうちに言っておきたいことがある。

Wasurenai uchi ni itte okitai koto ga aru.
(There is something I want to tell you before I forget.)

(c) 考えているうちに分からなくなった。

Kangaete iru uchi ni wakaranaku natta.
(While thinking about it, I got lost.)

(d) 働けるうちに出来るだけ働きたい。

Hatarakeru uchi ni dekiru dake hatarikitai.
(I'd like to work as much as possible while I can work.)

(e) 温かいうちに飲んでください。

Atatakai uchi ni nonde kudasai.
(Please drink it while it is warm.)

(f) 休みのうちによく寝ておきます。

Yasumi no uchi ni yoku nete okimasu.
(I'll sleep a lot during the vacation.)

Notes

1. The uchi ni clause expresses the general time during which a given action or state occurs. Uchi ni is preceded by verbs describing states or progressive actions, or by adjectives, or by nouns expressing duration such as haru ‘spring’, hiruma ‘day time’ and shūkan ‘week’. (For examples, see KSs(A), (C), (D) and Ex. (f), respectively.)

2. The tense before uchi ni is always nonpast, regardless of the tense of the main clause.

3. The verb before uchi ni is frequently negated, as in KS (B), Exs. (a) and (b).
[Related Expressions]

I. When it indicates an interval of time, *aida* refers to the 'time space' between two points, i.e., the beginning and the end. In other words, the time space indicated by *aida* can be measured in clocktime. *Uchi*, however, does not refer to such measurable time space; it simply means 'time space within'. Thus, in a situation where a mother wants to read books while her child is away at school, either *uchī* or *aida* can be used, as in [1a]. However, in a situation where we want to play tennis before it rains, we cannot substitute *aida* for *uchī*, as in [1b], because it is impossible to specify a time boundary.

[1] a. 子供が学校に行っているうちに / 間に本を読みます。
   *Kodomo ga gakkō ni itte iru uchī ni / aida ni hon o yomimasu.*
   (I read books while my child is away at school.)

b. 雨が降らないうちに / *間にテニスをします。
   *Ame ga furanai uchī ni / *aida ni tenisu o shimasu.*
   (I'll go and play tennis before it rains.)

c. 冷たいうちに / *間にビールを飲んでください。
   *Tsumetai uchī ni / *aida ni biru o nonde kudasai.*
   (Please drink the beer while it is cold.)

II. The *uchī ni* construction cannot be used for situations where a noun is an event noun such as *jugyō* 'class', *kaigi* 'conference' and *shiai* 'game'.

[2] a. 授業の間に / 中(に) / *のうちによく質問をした。
   *Jugyō no aida ni / chū (ni) / *no uchī ni yoku shitsumon o shita.*
   (He frequently asked questions during the class.)

b. 試合の間に / 中(に) / *のうちに雨が降って来た。
   *Shiai no aida ni / chū (ni) / *no uchī ni ame ga futte kita.*
   (It started to rain while the game was going on.)

Examples

(a) ジョーンズさんは今日日本語を勉強している。

   Jōnzu-san wa ima nihongo o benkyōshite iru.

   (Mr. Jones is studying Japanese now.)

(b) この町には大学が二つある。

   (I gave Haruko a doll and Akiko a picture book.)

Notes

1. The origin of wa can be traced to the conditional marker ba. (Compare the spellings of wa (は) and ba (ば).) (⇒ ba) However, in con-
temporary Japanese, *wa* is used, in general, to mark information which
the speaker assumes to be part of the hearer's register. In other words,
when *wa* marks X, the speaker usually assumes that the hearer knows
what X refers to. Thus, noun phrases which can be marked by *wa* in
ordinary circumstances are as follows:

(A) Common nouns whose referents have already been introduced
into the discourse linguistically or extra-linguistically. Example:

(1) 昔々，一人のおじいさんが住んでいました。
*Mukashimukashi, hitori no o-ji-san ga sunde imashita.*
(Once upon a time, there lived an old man.)
おじいさんはとてもやさしい人でした。
*O-ji-san wa totemo yasashii hito deshita.*
(The old man was a very gentle man.)

(B) Proper nouns. Examples:

(2) アメリカ ‘America’; スミスさん ‘Mr. Smith’
*Amerika* *Sumisu-san*

(C) Nouns whose referents can be uniquely identified (that is, they
are one of a kind). Examples:

(3) 太陽 ‘sun’; 空 ‘sky’
*taiyō* *sora*

(D) Generic names. Examples:

(4) 人 ‘man’; 車 ‘car’
*hito* *kuruma*

It is noted that *wa* never marks WH-words such as *nani* ‘what’ and
dare ‘who’. Thus, (5) is ungrammatical.

(5) *だれはパーティーに来ましたか。
*Dare wa pāti ni kimashita ka.*
(Who came to the party?)

This is because WH-words do not refer to a known thing and, there-
fore, their referents can never be in the hearer’s register.

2. More specifically, *wa* marks a topic and/or a contrastive element.
When *wa* is used as a topic marker, as in X *wa Y*, X is something the
rest of the sentence (i.e., Y) is about, and the focus of the sentence falls
on Y or part of Y. (Cp. *ga*) The topic X *wa* normally appears at
the beginning of a sentence.
3. *Wa* is also used to mark a contrastive element, as in KS (B), Exs. (c) and (d). However, whether *wa* is being used as a topic marker or as a contrastive marker is not always clear. This is not clear particularly when there is one element X marked by *wa* but there is no other element Y explicitly contrasted with X. Here are some general rules for determining whether a given *wa* is topical or contrastive.

(A) When more than one *wa* appears in a sentence, as in “…*X wa Y wa Z wa*…”, the first *wa* is usually understood to be the topic marker, the second *wa* is more contrastive than the first one, the third one is more contrastive than the second, and so on. Examples:

(6) 大郎はテニスは出来ます。
*Tarō wa tenisu wa dekimasu.*
(Taro can play tennis.)

(7) 僕は今日はテニスはしない。
*Boku wa kyō wa tenisu wa shinai.*
(I won't play tennis today.)

(B) When X *wa* is pronounced with stress, it marks a contrastive element. Examples:

(8) 私は一年です。
*Watāshi wa ichinen desu.*
((I don't know about other people but, at least) I am a freshman.)

(9) サッカーは飲みます。
*Bīru wa nomimasu.*
((I don't drink other drinks but) I drink beer.)

4. When *wa* is used in negative sentences, it marks the negated element. This is a special use of *wa* as a contrastive marker. Compare the following sentences:

(10) a. 私はきのうボストンへ行かなかった。
*Watashi wa kinō Bosuton e ikanakatta.*
(I didn't go to Boston yesterday.)

b. 私はきのうはボストンへ行かなかった。
*Watashi wa kinō wa Bosuton e ikanakatta.*
(I didn't go to Boston yesterday.)
c. 私はきのうボストンへは行かなかった。

_Watashi wa kīno Bosuton e wa ikanaikatta._

(I didn’t go to Bōston yesterday.)

(10a) simply states that the speaker didn’t go to Boston yesterday. (10b) negates yesterday, implying that the speaker went to Boston on other days or that he usually goes to Boston on that day but didn’t yesterday. Likewise, (10c) negates to Boston, implying that the speaker went somewhere but it was not to Boston.

5. There are rules for particle ellipsis when _wa_ marks noun phrases with case markers (i.e., particles such as the subject marker _ga_ (=_ga1_) and the direct object marker _o_ (=_o1_)).

(A) When _wa_ marks X _ga_ or X _o_, _ga_ or _o_ must drop. (Exs. (a) and (c))

(B) When _wa_ marks X _e_ or X _ni8_ (location), _e_ or _ni_ optionally drop. (Ex. (b))

(C) When _wa_ marks X _ni1_ / _ni2_ / _ni3_ / _ni4_ (time, indirect object, agent, contact), X _de_, X _to_, X _kara_, X _made_ or X _yori_, the case marker usually remains and _wa_ follows it, forming a double particle. (Ex. (d)) More examples follow:

(11) ここではたばこを吸わないでください。

_Koko de wa tabako o suwanaide kudasai._

(Please don’t smoke here.)

(12) 田中さんとはよく会います。

_Tanaka-san to wa yoku aimasu._

(I see Mr. Tanaka often.)

6. The topical _wa_ does not appear in subordinate clauses, as in (13).

(13) a. 花子は私が / *はきのう酒を飲んだことを知っている。

_Hanako wa watashi ga / *wa kīno sake o nonda koto o shitte iru._

(Hanako knows that I drank sake yesterday.)

b. 私が / *は読んだ本は「雪国」です。

_Watashi ga / *wa yonda hon wa "Yukiguni" desu._

(The book I read was Snow Country.)

<tr>
<td>Watashi mo ashita no pātī ni iku</td>

Examples

(a) 大木さんはもう帰りましたわ。
    Ōki-san wa mō kaerimashita wa.
    (Mr. Oki has already gone home.)

(b) 久子はまだ学生ですわ。
    Hisako wa mada gakusei desu wa.
    (Hisako is still a student.)

(c) この部屋は小さいわ。
    Kono heya wa chīsai wa.
    (This room is small.)

Notes

1. The sentence particle wa is used only in female speech and expresses the speaker’s weak assertion or volition. In addition, wa sometimes expresses the speaker’s intimacy or friendliness.

2. Wa can follow any declarative sentence, but cannot follow the volitional forms of verbs. Thus, the following sentence is ungrammatical.

   (1) *私が行きましょう / 行こうわ。
       *Watashi ga ikimashō / ikō wa.
       (I will go.)

   Note that wa cannot be used in questions.

   (2) a. *ジャクソンさんは学生ですかわ。
       *Jakuson-san wa gakusei desu ka wa.
       (Is Mr. Jackson a student?)
b. *ジャクソンさんは学生ですわか。
   *Jakuson-san wa gakusei desu wa ka.
   (Is Mr. Jackson a student?)

c. *ジャクソンさんは学生ですわ?
   *Jakuson-san wa gakusei desu wa?
   (Is Mr. Jackson a student?)

3. Other sentence particles such as *ne and *yo can occur with *wa. In this case, *wa must precede these particles.

   (3) 私も行くわね。
       Watashi mo iku wa ne.
       (I'll go there, too. All right?)

   (4) 私も行くわよ。
       Watashi mo iku wa yo.
       (I'll go there, too. (Emphatic))

(d) 今度の試合はワシントン大学だ。

Kondo no shiai wa Washinton Daigaku to da.

(The next game is against the University of Washington.)

**Notes**

1. “A wa B da” is probably the most basic sentence structure in Japanese. The very basic meaning of this construction is “A is B”. However, this pattern can convey more than that meaning. For example, the second sentence in (1) literally means ‘My wife is tea’, but actually means ‘My wife drinks tea’. Here, the copula da is used in place of nomu ‘drink’.

   (1) 私は毎朝コーヒーを飲む。家内は紅茶だ。

   Watashi wa maiasa kōhi o nomu. Kanai wa kōcha da.

   (I drink coffee every morning. Lit. My wife is tea. (= My wife drinks tea.))

   In fact, this structure is used frequently in conversation, as in (2), where the copula desu in B’s sentence means ikimasu ‘am going’.
(2) A: 私はハワイへ行きます。
Watashi wa Hawai e ikimasu.
(I'm going to Hawaii.)

B: 私はフロリダです。
Watashi wa Furōda desu.
(Lit. I am Florida. (=I'm going to Florida.))

In general, the copula can be used in place of a predicate if the meaning can be understood from context. Note the following examples:

(3) このレストランはすしがおいしい。あのレストランはてんぷらだ。
Kono resutoran wa sushi ga oishii. Ano resutoran wa tenpura da.
(Sushi is good at this restaurant. At that restaurant tempura is
good.)

(4) ディックはスケートが上手だ。ポールはスキだ。
Dikku wa sukēto ga jōzuda. Pōru wa ski da.
(Dick is good at (ice) skating. Paul is good at skiing.)

(5) みつ子はお母さんが病気だ。つとむはお父さんだ。
Mitsuko wa o-kā-san ga byōki da. Tsutomu wa o-tō-san da.
(In Mitsuko's family, her mother is ill. In Tsutomu's family, his
father is ill.)

What the copula da means may be understood from the linguistic context, as in (1) – (5), or from the extra-linguistic context, as in (6).

(6) [In an order situation at a restaurant]
僕はうなぎだ。
Boku wa unagi da.
(Lit. I am an eel. (=I'll have eel / I'd like eel.))

2. In “A wa B da”, B may be a noun phrase, as in KS(A) or a noun phrase with a particle, as in KS(B). General rules about particle ellipsis and retention in this construction follow:

(A) Ga, o, e and ni (time (=ni¹), location (=ni⁸)) must drop. (See
(1) – (6).)

(B) Ni (indirect object (=ni²), agent (=ni³), direct contact (=ni⁴)) and
de (location (=de¹), means (=de²)) may drop. Examples:

(7) A: 僕はケンにたのんだ。
Boku wa Ken ni tanonda.
(I asked Ken.)
B: 僕はアンディー(に)だ。
   Boku wa Andi (ni) da.
   (I asked Andy.)

(8) A: 僕はアパートで勉強する。
   Boku wa apāto de benkyōsuru.
   (I study in my apartment.)

B: 僕は図書館(で)だ。
   Boku wa toshokan (de) da.
   (I study at the library.)

(C) De (reason), to, kara and made usually do not drop. Examples:

(9) A: 僕は病気で休んだ。
   Boku wa byōki de yasunda.
   (I was absent because of illness.)

B: 僕はけがで/ ??♀ だ。
   Boku wa kega de / ??♀ da.
   (I was absent because I got injured (lit. because of an injury).)

(10) A: 私は一郎と踊りました。
    Watashi wa Ichirō to odorimashita.
    (I danced with Ichiro.)

B: 私は信男と/ ??♀ です。
    Watashi wa Nobuo to / ??♀ desu.
    (I danced with Nobuo.)

3. When the copula is used for a predicate, it usually appears in the non-
past tense regardless of the tense of the predicate, as in (7) and (9).

4. In “A wa B da”, A wa may drop if it can be understood from context,
as seen in (11).

(11) A: それは何ですか。
    Sore wa nan desu ka.
    (What is that?)

B: (これは)辞書です。
   (Kore wa) Jisho desu.
   (This is a dictionary.)

**Notes**

1. "A wa B ga C" is one of the basic constructions in Japanese. In this construction, C usually expresses something about B and "B ga C" expresses something about A, as illustrated in (1).

![Diagram](image)

2. Sentences utilizing this construction may be categorized into three classes:

(A) A is human, and "B ga C" expresses A's physical and/or mental state, for example, ability or desire, as in KS (1), Exs. (a), (b) and (c).

(B) B is part of A, and C expresses something about B, which, in turn, expresses something about A, as in KS (2), Exs. (d), (e), (f) and (g).

(C) B is a member of A, and C expresses something about B, as in KS (3), Exs. (h) and (i).

3. Listed below are the verbs and adjectives which usually require the "A wa B ga C" construction. (Sentences with these verbs and adjectives belong to Class (A) in Note 2.)
(2) Ability:

分かる (be understandable; understand)
wakaru

出来る (can be done; can do)
dekiru

られる (can) 見える (be visible) 聴こえる (be audible)
rar eru² mieru kiko eru

上手だ (good at)

Formation

Vte はいけない
"wa ikenai"

話してはいけない  (must not talk)
hanashite wa ikenai

食べてはいけない  (must not eat)
tabete wa ikenai

Examples

(a) 教室でものを食べてはいけません。
Kyōshitsu de mono o tabete wa ikemasen.
(You must not eat (food) in the classroom.)

(b) 花子はまだ酒を飲んではいけない。
Hanako wa mada sake o nonde wa ikenai.
(Hanako must / can not drink alcohol yet.)

Notes

1. In Vte wa ikenai, the second person subject is usually omitted, as in KS and Ex. (a).

2. Vte wa ikenai is often used as a negative answer to “Vte mo ii desu ka. (May I～?)”

[Related Expression]

Vte wa naranai also expresses prohibition. Vte wa naranai, however, sounds a little stronger than Vte wa ikenai.
wakaru 分かる  v. (Gr. 1)

- can figure out (spontaneously) various facts—such as content, nature, value, meaning, cause, reason, result—about s.t. whose existence is presupposed
- be comprehensible; understand; can tell; figure out
- 【REL. shiru】

◆ Key Sentence

| Topic (experiencer) | Object of Comprehension |)
|--------------------|--|---|
| 私 (Watashi) (ni) は (wa) | この言葉 (kono kotoba) が (ga) | 分からない / 分かりません。 (wakaranai / wakarimasen).

(Lit. To me this word is not comprehensible. (= I don’t understand this word.)

Examples

(a) 私はこの映画の意味が分からない。
Watashi ni wa kono eiga no imi ga wakaranai.
(I don’t understand the meaning of this movie.)

(b) この問題は難しくて分からない。
Kono mondai wa muzukashikute wakaranai.
(This problem is too difficult to understand.)

(c) あしたまでにこの仕事が出来るかどうか分かりません。
Ashita made ni kono shigoto ga dekiru ka dō ka wakarimasen.
(I can’t tell if I can finish this work by tomorrow.)

(d) A: 田中さんを知っていますか。
Tanaka-san o shitte imasu ka.
(Do you know Mr. Tanaka?)

B: ええ、知っていますが、あの人はどうもよく分かりません。
E, shitte imasu ga, ano hito wa dōmo yoku wakarimasen.
(Yes, I know him, but he is somehow incomprehensible to me.)

Notes

1. The basic pattern for this verb is the ~ wa ~ ga pattern. (⇒ ~ wa ~ ga) The experiencer of wakaru takes ni optionally, as in KS.
2. Because *wakaru* is already a potential verb, it cannot take the potential form *wakareru* ‘can understand’.

3. *Wakaru* normally takes *ga* to indicate the object of comprehension, but must take *o* when ‘non-spontaneous comprehension’ is involved, as in causative sentences ((1a)) or sentences in which the experiencer makes a conscious effort to understand something ((1b)).

(1) a. 親の死を /*が小さい子供に分からせるのは難しい。
   Oya no shi o /*ga chisai kodomo ni wakaraseru no wa muzukashii.
   (It is hard to make a small child comprehend the death of a parent.)

   b. ジャックはリンダの気持ちを /*が分からろうとしない。
   Jakku wa Rinda no kimochi o /*ga wakarō to shinai.
   (Jack does not try to understand Linda’s feeling.)

[Related Expression]

*Wakaru* indicates ‘the process of figuring something out’ and is different from *shiru* which basically means ‘to get some raw information from some outside source’. The primary difference between the two verbs is illustrated in the following sentences:

[1] 友達に聞いて大野の結婚のことを知っていて /*が分かっていた。
   Tomodachi ni kiite Ōno no kekkon no koto o shitte ita /*ga wakatte ita.
   (I knew about Ono’s marriage by hearing it from a friend.)

[2] よく考えれば分かります /*知りますよ。
   Yoku kangaereba wakarimasu /*shirimasu yo.
   (If you think hard, you’ll understand /*know it.)

   Ikura ka wakarimasu ka.
   (Can you tell how much it is?)

   B：はい，調べれば分かります /*知ります。
   Hai, shirabereba wakarimasu /*shirimasu.
   (Yes, I can tell /*know it, if I check into it.)

[4] A：今晚何をするつもりですか。
   Konban nani o suru tsumori desu ka.
   (What do you intend to do tonight?)
B: まだ分かりません / *知りません。
Mada wakarimasen / *shirimasen.
(I don’t know yet.)

(Yesterday I slept only three hours. No wonder I am sleepy.)
(e) えっ？足立さんが入院したんですか。パーティーに来なかったわけだ。
(What? Was Mr. Adachi hospitalized? No wonder he didn’t come to the party.)

(f) A：山田さんは英語のことは何も知っています。
Yamada-san wa eigo no koto wa nan demo shitte imasu.
(Mr. Yamada knows everything about English.)

B：生き字引というわけですか。
Iki jibiki to iu wake desu ka.
(You mean he is a living dictionary?)

(g) 父の言うことが分からないわけではないが、どうしても医者になりたくない。
Chichi no iu koto ga wakaranai wake de wa nai ga, dōshitemo isha ni naritakunai.
(It is not that I don’t understand what my father is saying; I simply don’t want to become a medical doctor.)

Notes

1. *Wake* can be used as a full noun, meaning ‘reason’ as in (1) and (2) below:

(1) 会社をやめたそうですが、そのわけを聞かせてください。
Kaisha o yameta sōdesu ga, sono *wake* o kikasete kudasai.
(I heard that you quit the company. Let me hear the reason for that.)

(2) ここに来たわけは言えません。
Koko ni kita *wake* wa iemasen.
(I can’t tell you the reason why I came here.)

2. *Wake de* is the *te*-form of *wake da*.

(3) お母さんと二人だけですか。そういうわけで結婚出来ないんですか。
O-kā-san to futari dake desu ka. Sō iu *wake de* kekkon dekinai n desu ka.
(It’s only you and your mother? For that reason you can’t get married, eh?)

[Related Expression]

*Hazu da* ‘expect’ is similar but not identical to *wake da*. *Hazu da* can express a speaker’s expectation when there is no preceding context; *wake da* cannot. In other words, *wake da* is highly dependent on verbal context.

(⇒ *hazu da*)
[1]  a. あしたは授業がないはず / *わけですよ。
Ashita wa jugyō ga nai hazu / *wake desu yo.
(I expect that there is no class tomorrow.)

b. あの人は若いはず / *わけですよ。
Ano hito wa wakai hazu / *wake desu yo.
(I expect him to be young.)

(c) あの人は政治家ではなくて政治屋だ。
Ano hito wa seijika de wa nakute seiji-ya da.  
(He is not a statesman but a mere politician.)

Note

The suffix -ya is sometimes used to downgrade a person. This use, however, is very restricted. Examples follow:
(1) はずかしがり屋 (a shy person)
   hazukashigari-ya

   いばり屋 (a haughty person)
   ibari-ya

   気取り屋 (an affected person)
   kidori-ya

Note that these examples are all derived from Vmasu+ya, as in hazukashigari +ya, ibari+ya and kidori+ya.

  (a) 山本さんやスミスさんがテニスをしている。
      Yamamoto-san ya Sumisu-san ga tenisu o shite iru.
      (Mr. Yamamoto, Mr. Smith and others are playing tennis.)

  (b) 僕はビールやワインを飲んだ。
      Boku wa biru ya wain o nonda.
      (I drank beer, wine and things like that.)

  (c) 土田さんは大川さんや鈴木さんに手紙を書いた。
      Tsuchida-san wa Ōkawa-san ya Suzuki-san ni tegami o kaita.
(Mr. Tsuchida wrote a letter to Mr. Okawa and Mr. Suzuki (and others).)

**Notes**

1. *Ya* is used to combine two or more nouns or noun phrases. It cannot be used to combine predicates. Thus, (1) is unacceptable.

   (1) *きのうはデパートに行きましたや映画を見ました。

   *Kinō wa depāto ni ikimashita ya eiga o mimashita.

   (Yesterday I did things like going to a department store and seeing a movie.)

   Instead of (1) we have to use *~ tari ~ tari suru* to express an inexhaustive listing of predicates, as in (2).  

   (⇒ *~ tari ~ tari suru*)

   (2) *きのうはデパートに行ったり映画を見たりしました。

   *Kinō wa depāto ni ittari eiga o mitari shimashita.*

2. *N ya N* can be used as a noun phrase in any position where a single noun can be used. It can be used as the subject, as in KS and Ex. (a), or as the direct object as in Ex. (b), or as the indirect object as in Ex. (c).

3. *N ya N* cannot appear in the position of X in the X *ga Y da* construction, because *ga* in X *ga Y da* is a highly exhaustive listing marker.

   (⇒ *ga*)

   (3) *ジェーンやミッシェルが学生です。

   *Jēn ya Missheru *ga* gakusei desu.

   (*Jane and Michelle and only they (and others) are students.)*

   This idea can be conveyed using the construction in (4):

   (4) *学生はジェーンやミッシェルです。

   *Gakusei wa Jēn ya Missheru desu.*

   (The students are Jane or Michelle (and others).)

**Related Expression**

*Tok* is used to make a rather general, inexhaustive listing of items as examples, whereas *ya* is used to make an inexhaustive listing of items related to a specific time and place. Consider the following examples:

   *Sumisu-san wa tatoeba donna nihonshoku ga sukidesu ka.*

   (Mr. Smith, what kind of Japanese cuisine do you like?
   Give me some examples.)
B: そうですね。てんぷらとか / すき焼きとか / さし身ですね。
Sō desu ne. Tenpura toka / すき焼き toka / さし身 desu ne.
(Well, I’d say tempura, sukiyaki and sashimi (and others).)

b. A: きのう料理屋で何を食べましたか。
Kinō ryōri-ya de nani o tabemashita ka.
(What did you eat at the Japanese restaurant?)

B: てんぷらや / すき焼きや / さし身を食べました。
Tenpura ya / すき焼き ya / さし身 o tabemashita.
(I ate tempura, sukiyaki and sashimi (and others).)

yahari やはり
adv.

Examples

(a) 雪子さんは今でもやはりきれいです。
Yukiko-san wa ima demo yahari kireidesu.
(Yukiko is still pretty.)

(b) お兄さんはテニスが上手ですが、弟さんもやっぱり上手ですよ。
O-ni-san wa tenisu ga jōzudesu ga, otōto-san mo yappari jōzudesu yo.
(The older brother is good at tennis, and the younger brother is also
good at it.)

c) やはり日本のビールはおいしいですね。
   *Yahari Nihon no biru wa oishii desu ne.*
   (As expected, Japanese beer is good.)

d) 僕はやはり結婚することになりました。
   *Boku wa yahari kekkonsuru koto ni shimashita.*
   (I’ve decided to get married, after all.)

**Notes**

1. *Yahari* is a speaker-oriented adverb because its use is based on the
   speaker’s subjective and presuppositional standards. Its overuse in con-
   versation makes a discourse overly subjective, but its proper use in
   conversation makes a discourse sound like real Japanese.

2. *Yahari* can be positioned sentence-initially or sentence-medially, just
   like other adverbs. Thus, in KS *yahari* can be positioned in two ways.

   (1) a. やはりベイリーさんは来なかったね。
       *Yahari Beiri-san wa konakatta ne.*

   b. ベイリーさんはやはり来なかったね。
       *Beiri-san wa yahari konakatta ne.*

   c. ?ベイリーさんは来なかったね、やはり。
       *?Beiri-san wa konakatta ne, yahari.*

   The sentence-initial *yahari* is more emphatic than the sentence-medial
   *yahari*. The sentence-final *yahari* as in (1c) sounds like an after-thought,
   and its usage is slightly marginal.

3. *Yappari* is a more emphatic and emotive version of *yahari*, owing to its
   glottal stop -pp-.

   (⇒ Characteristics of Japanese Grammar, 8. Sound Symbolisms)

**[Related Expressions]**

I. *Sasuga* is an adverb / adj *(na)* whose meaning is similar to *yahari*. *Sa-
   suga*, however, has only one meaning ‘as expected’ and indicates that
   the speaker is very much impressed or surprised by the given situation.

   [1] a. さすが(に)日本人はよく働く。
       *Sasuga(ni) nihonjin wa yoku hataraku.*
       (Truly Japanese people work hard!)

   An example of sentence-medial *yahari*
b. さすが(に)アメリカは広い。
   Sasuga(ni) Amerika wa hiroi.
   (Exactly as I expected, America is huge.)

Sasuga(ni) can replace yahari only when yahari means ‘as expected’, as in KS and Ex. (c).

II. The adverb kekkyoku ‘after all, in short’ can replace yahari only when the latter means ‘after all’, as in Ex. (d). More examples follow:

   [2] a. 色々薬を飲んだがやはり / 結局治らなかった。
       Iroiro kusuri o nonda ga yahari / kekkyoku naoranakatta.
       (I took all kinds of medicine, but I wasn’t cured.)

   b. やはり / 結局行かないことにした。
       Yahari / Kekkyoku ikanai koto ni shita.
       (After all, I decided not to go there.)

In [2] kekkyoku sounds more formal than yahari, because the former is a Sino-Japanese word, while the latter is a Japanese word. Yet both can be used in conversational Japanese.

III. The adverb masaka ‘by no means, on no account, surely not’ is used when a given situation is far from the speaker’s expectation. In that sense, it is an antonym of yahari. Masaka is used with a negative predicate or is used all by itself, meaning ‘Unbelievable!, You don’t say!’.

   [3] a. まさか小川さんが先生になるとは思わなかった。
       Masaka Ogawa-san ga sensei ni naru to wa omowanakatta.
       (I never expected Mr. Ogawa to become a teacher.)

   b. A: トムが入院したそうだ。
       Tomu ga nyūinshita sōda.
       (I heard that Tom was hospitalized.)

   B: まさか！きのうテニスをしていたよ。
       Masaka! Kinō tenisu o shite ita yo.
       (You don’t say! He was playing tennis yesterday.)

    (His house is easy to find.)

(b) 佐藤先生は話しやすいです。
    Satō-sensei wa hanashiyasuidesu.
    (Prof. Sato is easy to talk to.)

(c) このペンは書きやすい。
    Kono pen wa kakiyasui.
    (This pen is easy to write with.)

(d) 上野さんは一緒に仕事がしやすかった。
    Ueno-san wa isshoni shigoto ga shiyasukatta.
    (Mr. Ueno was easy to work with.)

(e) 豆腐は腐りやすい。
    Tōfu wa kusariyasui.
    (Tofu rots easily.)
1. *Vmasu yasui* is an *i*-type compound adjective and conjugates as an Adj (*i*), as seen in the following:

2. The following sentences (1) - (4) are closely related to Exs. (a) - (d).

   (1) あの人のうちを見つける。<br>The person's home.  
   (*Cp. Ex. (a))*  
   Ano hito no uchi o mitsukeru. 
   (One locates his house.)

   (2) 佐藤先生に話す。<br>Sato-sensei to hanasu. 
   (*Cp. Ex. (b))*  
   (One talks to Prof. Sato.)

   (3) このペンで書く。<br>Pen to kaku. 
   (*Cp. Ex. (c))*  
   (One writes with this pen.)

   (4) 上野さんと一緒に仕事をした。<br>Ueno-san to isshoni shigoto o shita. 
   (*Cp. Ex. (d))*  
   (One worked together with Mr. Ueno.)

The noun phrases in (1) through (4) above, such as the direct object ~ *o*, the indirect object ~ *ni*, the instrumental phrase ~ *de*, and the comitative phrase ~ *to* are the sources for the topic (subject) of Exs. (a),
(b), (c) and (d), respectively. It is important to note that all these particles drop in the *yasui*-construction, and that the topic is the new subject of the *yasui*-construction.

3. If the subject of the *yasui*-construction is under focus, it is marked by *ga*, as in (5).

(5) A: どの先生が話しやすいですか。
*Dono sensei ga hanashiyasudesu ka.*
(Which professor is easy to talk to?)

B: 佐藤先生が話しやすいです。
*Satō-sensei ga hanashiyasudesu.*
(Prof. Sato is easy to talk to.)

4. The antonym of *yasui* is *nikui* ‘hard to ~’, and is used in exactly the same way as *yasui.*

(⇐ *nikui*)

---

**yo よ  prt.**

A sentence-final particle that indicates the speaker’s (fairly) strong conviction or assertion about s.t. that is assumed to be known only to him. I tell you; I’m telling you; you know; contrary to what you think.

◆ Key Sentence

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>坂本さん は たばこを吸わない / 吸いません</td>
<td>よ。</td>
</tr>
</tbody>
</table>
*Sakamoto-san wa tabako o suwanai / suimasen*

(Mr. Sakamoto doesn’t smoke, you know.)

**Examples**

(a) A: 日本語はおもしろいですか。
*Nihongo wa omoshiroidesu ka.*
(Is Japanese interesting?)
B: ええ、とてもおもしろいですよ。
    *E, totemo omoshiroidesu yo.
    (Yes, it’s very interesting, I tell you.)

(b) A: あの人はそんな本を買わないでしょう。
    Ano hito wa sonna hon o kawanai deshō.
    (He probably won’t buy that sort of book.)

B: いいえ、買いますよ。
    Îe, kaimasu yo.
    (Yes, he’ll buy it (contrary to what you think).)

Notes

1. In this construction, the sentence preceding yo can be any informal or formal sentence except a question.

   (1) a. *読むかよ。
       *Yomu ka yo.

   b. *読みますかよ。
       *Yomimasu ka yo.

The sentences in (1) are unacceptable because the speaker's strong conviction and his act of questioning contradict each other. If (1a) is interpreted as a rhetorical question meaning 'I bet he isn’t going to read it’, however, the sentence becomes acceptable. But (1b), the formal version of (1a), cannot be a rhetorical question.

2. A sentence preceding yo can be an informal or a formal request. Examples:

   (2) a. 読めよ。
       Yome yo.
       (Read it.)

   b. 読みなさいよ。
       Yominasai yo.
       ((From a superior to his inferior) Read it.)

   c. 読んでくださいよ。
       Yonde kudasai yo.
       (Please read it.)

When yo is used in this way, the sentence becomes more forceful.
3. Another sentence-final particle *ne* may be attached to S *yo*, yielding the meaning ‘I assert S and don’t you agree?’ S *yo ne* is used when the speaker wishes to mitigate the force of his assertion by talking as if the content of S were also known to the hearer. (⇒ *ne*, Note 5) Examples:

(3) a. この本はおもしろいですよね。
   
   *Kono hon wa omoshiroi desu yo ne.*
   
   (This book is interesting, right?)

   b. アメリカまで十時間はかかりますよね。
   
   *Amerika made juujikan wa kakarimasu yo ne.*
   
   (It takes at least 10 hours to get to America, right?)

*S yo ne* can also be used when the speaker is addressing someone who doesn’t know about an asserted fact and there is another person nearby who is aware of it. In such circumstances, the speaker asks the person who shares the asserted fact for his agreement at the end of the sentence.

(4) [The speaker is talking with someone about Mr. Kato, who is standing nearby.]

   加藤さんはロシア語が出来ますよ，ね？
   
   *Katō-san wa roshiago ga dekimasu yo，ne？*
   
   (Mr. Kato can speak Russian...Can’t you, Mr. Kato?)

4. In nonpolite, informal speech (i.e., intimate speech) sex differences are expressed by a combination of *yo* and the female speech markers *wa* and *no*. (⇒ *wa*²; *no*⁴; Characteristics of Japanese Grammar, 7. Sentence-final Particles) The following chart illustrates the use of *yo* in informal male and female speech.

5. *Ne*, the Japanese tag question marker, is another frequently used sentence-final particle. (⇒ *ne*) *Yo* should not be confused with *ne*. In contrast to *yo*, *ne* is used when the speaker and the hearer share some specific information. For example, if the speaker is looking at a delicious-looking piece of cake with his friend, he would say (5b) instead of (5a).
(5) a. *おいしそうですよ。
   *Oishisōdesu yo.
   (Looks delicious, I tell you.)

   b. おいしそうですね。
   Oishisōdesu ne.
   (Looks delicious, doesn't it?)

On the other hand, if he is eating some delicious cake which his friend has not tasted, he would say (6a) rather than (6b).

(6) a. おいしいですよ。
   Oishiidesu yo.
   (It's good, I tell you.)

   b. *おいしいですね。
   *Oishiidesu ne.
   (It's good, isn't it?)

Examples

(a) 木村さんはきのうお酒を飲んだようだ。
Kimura-san wa kinō o-sake o nonda yōda.
(It seems that Mr. Kimura drank sake yesterday.)

(b) この問題は学生にはちょっと難しいようだ。
Kono mondai wa gakusei ni wa chotto muzukashii yōda.
(This problem seems to be a little difficult for the students.)

(c) ここは昔学校だったようだ。
Koko wa mukashi gakkō datta yōda.
(It seems that this place used to be a school.)

(d) この酒は水のようだ。
Kono sake wa mizu no yōda.
(This sake is like water.)

Notes

1. Yōda expresses the likelihood of s.t./s.o., or the likeness of s.t./s.o. to s.t./s.o. In either case, when the speaker uses yōda, his statement is based on firsthand, reliable information (usually visual information).

2. Yōda can be used in counter-factual situations, as in Ex. (d). In this case, the adverb marude ‘just’ can be used for emphasis.

   (1) 木村さんはまるで酒を飲んだようだ。
Kimura-san wa marude sake o nonda yōda.
(Mr. Kimura looks as if he had just drunk sake.)

   (2) あの人はまるで日本人のようです。
Ano hito wa marude nihonjin no yōdesu.
(That person is just like a Japanese person.)

3. Yōda is a na-type adjective and has the prenominal form yōna and the adverbial form yōni. （⇒yōni²）Examples:
(3) 今日田中さんのような人を見ました。
   Kyō Tanaka-san no yōna hito o mimashita.
   (I saw a man who looked like Mr. Tanaka.)

(4) スミスさんは日本人のように日本語を話します。
   Sumisu-san wa nihonjin no yōni nihongo o hanashimasu.
   (Mr. Smith speaks Japanese like a Japanese.)

4. The colloquial version of yōda is mitaida, which is also a na-type adjective. The uses of mitaida are exactly the same as those for yōda. The formation rules are as follows:

(5) {V / Adj (i)} inf みたいだ
   mitaida

(6) {Adj (na) stem / N} {ø / だった} みたいだ
   ø datta mitaida

[Related Expressions]

The conjecture expressions S darō, S rashii, and S sōda² convey ideas similar to S yōda. The differences are as follows:

(A) S darō expresses the speaker’s conjecture, but it is not necessarily based on any information. In other words, S darō can be used when the speaker is merely guessing.

(B) S rashii usually expresses the speaker’s conjecture based on what the speaker has heard or read. That is, the information his conjecture is based on is not firsthand.

(C) S sōda² expresses the speaker’s conjecture about what is going to happen or the current state of someone or something. Although this expression is based on what the speaker sees or feels, it is merely his guess and the degree of certainty in his statement is fairly low. Only Vmasu or Adj (i / na) stem can precede sōda².

(D) S yōda is also an expression which is usually based on what the speaker sees or saw. However, unlike S sōda², this expression involves the speaker’s reasoning process based on firsthand, reliable information and his knowledge. Thus, the degree of certainty in yōda is the highest of the four expressions compared here.

The following examples demonstrate the differences among these four expressions. The sentences in [1] present examples with the adjective takai ‘expensive’ before the conjecture auxiliaries.
[1] a. この本は高いだろう。
Kono hon wa takai darō.
(This book is probably expensive.)

b. この本は高らしい。
Kono hon wa takai rashii.
((From what I heard and / or read,) this book seems expensive.)

c. この本は高そうだ。
Kono hon wa taka sōda.
(This book looks expensive.)

d. この本は高いようだ。
Kono hon wa takai yōda.
((Considering the prices of similar books,) this book seems expensive.)

Here, [1a] is mere conjecture. [1b] expresses the speaker's conjecture based on what he has heard and / or read. (If the sentence involves little conjecture, it is almost like hearsay. (⇔ sōda!)) [1c] is also the speaker's guess, but in this case it is based on what he sees. [1d] expresses the speaker's judgment about the price of the book. Note that in [1d] the speaker knows the book's price; therefore, this is not a guess. [2] provides examples with the noun sensei 'teacher' preceding the conjecture words. The differences in meaning among the sentences here are the same as those explained in [1], except that [2c] is ungrammatical.

[2] a. あの人は先生だろう。
Ano hito wa sensei darō.
(I guess he is a teacher.)

b. あの人は先生らしい。
Ano hito wa sensei rashii.
((From what I heard,) he seems to be a teacher.)

c. *あの人は先生そうだ。
*Ano hito wa sensei sōda.

d. あの人は先生のようだ。
Ano hito wa sensei no yōda.
((Judging from how he looks,) he seems to be a teacher. / He looks as if he were a teacher.)

In [3], the verb furu 'fall' precedes the conjecture auxiliaries.
[3]  a. 今日は雨が降るだろう。
    Kyō wa ame ga furu darō.
    (I guess it will rain today.)

b. 今日は雨が降るらしい。
    Kyō wa ame ga furu rashii.
    ((From what I heard,) it seems that it will rain today.)

c. 今にも雨が降りそうだ。
    Imanimo ame ga furi sōda.
    (It looks like it's going to rain at any moment.)

d. この辺はよく雨が降るようだ。
    Kono hen wa yoku ame ga furu yōda.
    ((Judging from the abundance of trees and moss,) it appears that it rains a lot around here.)

Here, [3a] is the speaker's guess. [3b] is the speaker's conjecture based on what he heard or it is almost like hearsay. [3c] is also the speaker's guess, but, in this case, he is probably looking at the sky. Like [3c], [3d] is based on what the speaker sees, but in this case the information is reliable, and involves the speaker's reasoning process.

The diagram in [4] summarizes the characteristics of the four conjecture expressions and sōda¹ (hearsay).

![Diagram of conjecture expressions]

---

The diagram shows the flow of information from input data (such as weather patterns, observations, etc.) to the final report. It illustrates how different forms of evidence (e.g., rashii, yōda, darō) are used to form conjectures, which are then reported. The diagram is a helpful visual aid for understanding the logical framework of making conjectures based on various types of evidence.

(Lit. Just like cats are cute, so are dogs. (=Dogs are cute, just like cats.))

Notes

1. Yōni\textsuperscript{1} expresses purpose but yōni\textsuperscript{2} doesn’t; it expresses similarity, especially in appearance. (⇒ yōni\textsuperscript{1})

2. Yōni\textsuperscript{2} can express a counterfactual situation as in KS(B). The adverb marude ‘just’ is often used to emphasize counterfactuality. Examples follow:

   (1) a. まるで生き返ったように元気になった。
   Marude ikikaetta yōni genkini natta.
   (Lit. He recovered as if he had risen from the dead.)

   b. あの子はまるで大人のように話す。

話す 言う (tell s.o. to talk) hanasu yōni  "yōni iu"

食べる 言う (tell s.o. to eat) taberu yōni  "yōni iu"

Examples

(a) 坂本さんは雪江に図書館の前で待っているように言った。
Sakamoto-san wa Yukie ni toshokan no mae de matte iru yōni itta.
(Mr. Sakamoto told Yukie to be waiting in front of the library.)

(b) すみませんが、小林さんにあした朝九時にここへ来るように言ってくださいませんか。
Sumimasen ga, Kobayashi-san ni ashita asa kuji ni koko e kuru yōni itte kudasaimasen ka.
(I’m sorry, but could you please tell Mr. Kobayashi to come here at 9 o’clock tomorrow morning?)

(c) 私は聞こえるようにはっきり言ったんですが...
Watashi wa kikoeru yōni hakkiri itta n desu ga...
(I said it in such a way that it was clearly audible, but...)

Notes

1. Yōni iu can be used either as an indirect imperative as in KS and Exs. (a) and (b), or to mean ‘say in such a way that ~,’ i.e., the use of yōni.
(⇒ yōni') In the former case, the verb must be a controllable verb—an verb that represents something controllable by human volition, such as suru ‘do’, matsu ‘wait’, kuru ‘come’, yomu ‘read’ and kau ‘buy’. In the latter case the verb must be a noncontrollable verb, such as wakaru ‘understand’, kikoeru ‘be audible’ (Ex. (c)), or a potential form of verbs.

2. When yōni iu is used as an indirect imperative, the verb iu can be replaced by other verbs such as tanomu ‘ask’, meijiru ‘order’ and motomeru ‘request’.

(1) 田中さんは山本さんにすぐ来るように言った / 頼んだ / 命じた。
Tanaka-san wa Yamamoto-san ni sugu kuru yōni itta / tanonda / meijita.
(Mr. Tanaka told / asked / ordered Mr. Yamamoto to come (to his place) immediately.)

The direct imperative versions of (1) are something like (2). Notice that there is more than one direct imperative form if the directive verb is iu.

(2) a. 田中さんは山本さんに「すぐ来てください(来なさい / 来い)。」と言った。
Tanaka-san wa Yamamoto-san ni "Sugu kite kudasai (kinasai / koi)." to itta.
(Mr. Tanaka said to Mr. Yamamoto, "Please come (Come) here right away.")

b. 田中さんは山本さんに「すぐ来い。」と命じた。
Tanaka-san wa Yamamoto-san ni "Sugu koi." to meijita.
(Mr. Tanaka ordered Mr. Yamamoto, "Come here right away!")

c. 田中さんは山本さんに「すぐ来てください。」と頼んだ。
Tanaka-san wa Yamamoto-san ni "Sugu kite kudasai." to tanonda.
(Mr. Tanaka asked Mr. Yamamoto, "Please come here right away.")

Formation

Vinf・nonpast ようになる

yōni naru

[話す  / 話さない] ようになる (s.o. reaches the point where he talks /
hanasu / hanasanai) yōni naru doesn't talk)

[食べる / 食べない] ようになる (s.o. reaches the point where he eats /
taberu / tabenai) yōni naru doesn't eat)

Examples

(a) 難しい日本語が読めるようになりました。

Muzukashii nihongo ga yomemur yōni narimashita.

(I am finally able to read difficult Japanese.)
(b) パットは私と話さないようになった。
Patto wa watashi to hanasanai yōnī natta.
(Pat doesn’t talk with me any more.)

(c) もうすぐおもしろさが分かるようになりますよ。
Mō sugu omoshirosa ga wakaru yōnī narimasu yo.
(You’ll soon come to understand the fun of it, I tell you.)

(d) この道は今通れないようになっている。
Kono michi wa ima tōrenai yōnī natte iru.
(Lit. This street has reached the point where people cannot pass. (=At present we cannot use this street.))

Notes
1. Although ~yōnī naru usually indicates a gradual change, when it is pre-
ceded by an affirmative verb the change may not take place gradually.
Thus, an adverb such as kyūnī ‘suddenly’ can co-occur with an affir-
mative verb and ~yōnī naru, as seen in (1).

(1) うちの子は最近急に勉強するようになったんですよ。
Uchi no ko wa saikin kyūnī benkyōsuru yōnī natta n desu yo.
(Lit. Recently our child has suddenly reached the point where he
studies. (=Recently our child suddenly started to study.))

When ~yōnī naru is preceded by a negative verb (as in KS(B)), how-
ever, the change must take place gradually. If the change is not
gradual, ~naku naru is used in place of ~nai yōnī naru.
(See Related Expression II.)

2. Yōnī natte iru emphasizes a current state that has come about after a
long process, as in Ex. (d).

3. There are two ways to negate this construction, but the meanings are
completely different. The verb before yōnī can be negated, as in (2a),
or the verb naru can be negated, as in (2b).

(2) a. 漢字が覚えられないようになった。
Kanji ga oboerarenai yōnī natta.
(I’ve reached the point where I can’t memorize kanji.)

b. 漢字が覚えられるようにならなかった。
Kanji ga oboerareru yōnī naranakatta.
(I haven’t reached the point where I can memorize kanji.)
(2a) means that the speaker can’t memorize kanji any more, and (2b) means that he is not yet able to memorize kanji.

4. Yōni by itself can be used as an adverbial phrase, along with main verbs other than naru. 

(⇒ yōni¹; yōni²)

[Related Expressions]

I. Koto ni naru ‘it has been decided that ~’ and ~yōni naru are related expressions in that both of them indicate some change, but they differ in that the former implies a passive decision, while the latter suggests a change brought about by a long process. Compare the following sentences:

[1] a. 私は大阪に転勤することに / *よんでりました。
Watashi wa Ōsaka ni tenkinsuru koto ni / *yōni narimashita.
(It has been decided that I will transfer to Osaka.)

b. 私は英語が話せるように / *ことになりました。
Watashi wa eigo ga hanaseru yōni / *koto ni narimashita.
(I’ve reached the point where I can speak English.)

II. When the verb before ~yōni naru is negated, as in KS(B), this construction can be compared to the ~naku naru construction.

[2] a. 林さんは酒を飲まないようになった。
Hayashi-san wa sake o nomanai yōni natta. (=KS(B))
(Mr. Hayashi doesn’t drink sake any more.)

b. 林さんは酒を飲まなくなった。
Hayashi-san wa sake o nomanaku natta.
(Mr. Hayashi doesn’t drink sake any more.)

The nai yōni natta version in [2a] implies a more gradual change than the naku natta version in [2b]. Thus, adverbs such as kyūni ‘suddenly’ or totsuzen ‘suddenly’ can co-occur with [2b] but not with [2a].
〜yōni suru 〜ようにする  

S.o. causes some circumstantial or behavioral change to take place.

【REL. 〜yōni naru】

Key Sentence

| 私は毎日運動するようにする /します。 |
| Watashi wa mainichi undōsuru yōni suru / shimasu. |

(I’ll make sure that I do exercises everyday.)

Formation

Vinf・nonpast ようにする yōni suru

話す /話さない ようにする (s.o. makes sure that he / s.o. else talks /
{hanasu / hanasanai} yōni suru doesn’t talk)

食べる /食べない ようにする (s.o. makes sure that he / s.o. else eats /
{taberu / tabenai} yōni suru doesn’t eat)

Examples

(a) 出来るだけ日本語で話すようにしています。
Dekiru dake nihongo de hanasu yōni shite imasu.
(I’m making sure I speak in Japanese as much as possible.)

(b) 山川には会わないようにした。
Yamakawa ni wa awanai yōni shita.
(I’ve made sure that I won’t see Yamakawa.)

(c) 分からないことは先生に聞くようにしている。
Wakaranai koto wa sensei ni kiku yōni shite iru.
(I make a point of asking my teacher about things I don’t understand.)

(d) 毎朝八時にお来るようにしてください。
Maiasa hachiji ni kuru yōni shite kudasai.
(Please make sure that you come at eight every morning.)

(e) うしろからもよく見えるようにしました。
Ushiro kara mo yoku mieru yōni shimashita.
(I’ve seen to it that people can see from the rear seats, too.)

(f) 成績がよくなるようにした。
Seiseki ga yoku naru yōni shita.
(I’ve made sure that my grades will improve.)

Notes

1. ~yōni shite iru expresses s.o.’s habitual act of making sure that he or s.o. else will do (or will not do) s.t., as shown in Exs. (a) and (c).
2. The subjects in the yōni clause and in the main clause may or may not be identical. In (1a), the subjects are different, but in (1b), they are identical.

   (1) a. ジョンはメアリーが行けるようにした。
Jon wa Meari ga ikeru yōni shita.
   (John has seen to it that Mary can go there.)

   b. ジョンは行けるようにした。
Jon wa ikeru yōni shita.
   (John has seen to it that he (=John) can go there.)

3. There are two ways to negate this construction, but the meaning changes according to the pattern. The verb before yōni can be negated as in (2a), or the verb suru can be negated as in (2b).

   (2) a. 小川は山本が勉強出来ないようにした。
Ogawa wa Yamamoto ga benkyō deki nai yōni shita.
   (Ogawa made sure that Yamamoto couldn’t study.)

   b. 小川は山本が勉強出来るように（は）しかなかった。
Ogawa wa Yamamoto ga benkyō dekiru yōni (wa) shinakatta.
   (Ogawa didn’t make sure that Yamamoto could study.)

   In (2a) Ogawa is directly involved in preventing Yamamoto from studying, but in (2b) Ogawa just didn’t bother to assist Yamamoto’s studying.

4. When an Adj (i / na) or N is used before yōni suru, the verb naru is used as follows:

   (i) Adj (i) stem くなるようにする
   ku naru yōni suru
   [高くなる / 高くなくなる]のようにする (make sure s.t. becomes / won’t become expensive)
(ii) {Adj (na) stem / N} になるようにする

ni naru yōni suru

静かに / では なく / じゃなく] なるようにする
shizuka {ni / de wa naku / janaku} naru yōni suru
(make sure s.t. is / won’t be quiet)

先生に / では なく / じゃなく] なるようにする
sensei {ni / de wa naku / janaku} naru yōni suru
(make sure s.o. is / won’t be a teacher)

[Related Expression]

～yōni naru ‘reach the point where’ is the intransitive counterpart of yōni suru. The former only indirectly implies human efforts behind some change that will occur or has occurred, but the latter straightforwardly indicates human efforts. For example, in [1a] the speaker can get up early in the morning almost effortlessly, but in [1b] he has to make sure that he can get up early in the morning.

[1] a. 朝早く起きられるようになりました。
Asa hayaku okirareru yōni narimashita.
(I am finally able to get up early in the morning.)

b. 朝早く起きられるようにしています。
Asa hayaku okirareru yōni shite imasu.
(I am making sure that I can get up early in the morning.)

Nihongo o benkyōshitakattara, Amerika no gakkō de benkyōsuru yori Nihon e ikinasai.
(If you want to study Japanese, go to Japan rather than studying at a school in America.)
1. Either a noun phrase or a sentence precedes yori. When verbs precede yori, they are usually nonpast. However, there are a few cases where past tense verbs are used, as in (1).

(1) その試験は思ったよりやさしかった。  
*Sono shiken wa omotta yori yasashikatta.*  
(The exam was easier than I thought.)

2. In KS(A), KS(B) and KS(C), *mo* is optional after *yori* and does not change the meaning of the sentence.

(Please come before three o'clock.)
(c) これより先はバスがありません。
Kore yori saki wa basu ga arimasen.
(There's no bus service from here (lit. beyond this point).)

**Note**

The use of *yorĩ* as a marker indicating a set point in terms of location can be extended to more abstract locations, as in (1).

(1) 八十点より上は合格です。
*Hachijutten yorĩ ue wa gōkaku desu.*
(Lit. Eighty point up is a pass. (=The passing mark is eighty.))

**[Related Expression]**

*Kara* can be used in place of *yorĩ*² when *kara* indicates a set point in space, as in [1].

[1] この線から / より内側に入ってはいけません。
*Kono sen kara / yorĩ uchigawa ni haitte wa ikemasen.*
(You must not get inside this line.)

When *yorĩ* indicates a point in time, however, *kara* can replace it only if it indicates a starting time. Thus, *kara* in [2a] is grammatical, but *kara* in [2b] is not.

[2] a. 三時より / から後に来てください。

(Please come after three o'clock.)

b. 三時より / *から前に来てください。
*Sanji yorĩ / *kara mae ni kite kudasai.*
(Please come before three o'clock.)

It is also noted that *yorĩ*² implies a comparison of two things, while *kara* has no such implication.

### Formation

**KS(A):**

- **Vinf·vol** と 思う  
  to omou
- 話そう と 思う (I think I will talk.)  
  hanasō to omou
- 食べよう と 思う (I think I will eat.)

  mai to omou
- 話すまい と 思う (I think I will not talk.)  
  hanasumai to omou
- 食べるまい と 思う (I think I will not eat.)  
  taberumai to omou
Examples

(a) 夏休みに日本アルプスに登ろうと思います。
   Natsuyasumi ni Nihon Arupusu ni noborō to omoimasu.
   (I think I will climb the Japan Alps during summer vacation.)

(b) 森さんはワープロ（＝ワードプロセッサー）を買おうと思っています。
   Mori-san wa wāpuro (=wādo purosessā) o kaō to omotte imasu.
   (Mr. Mori is thinking of buying a word processor.)

(c) 僕はあの人はもう話すまいと思う。
   Boku wa ano hito wa mō hanasumai to omou.
   (I think I won't talk to that person any more.)

Notes

1. When the subject is not the first person, as in Ex. (b), the nonpast form of omou cannot be used. Thus, the following sentence is unacceptable.
   (1) *森さんはワープロを買おうと思う / 思います。
      *Mori-san wa wāpuro o kaō to omou / omoimasu.

   The reason why (1) is unacceptable is that omou represents an internal feeling of the speaker alone. Therefore, when the subject is the third person, omou has to be replaced by the stative omotte iru which means ‘he (=the third person subject) has indicated that he feels ~, in such a way that the speaker can see and / or hear what he feels’. Observe the following sentence.

   (2) 私 / *父 / *山下さんはその映画を見ようと思います。
      Watashi / *Chichi / *Yamashita-san wa sono eiga o miyō to omoimasu.

   (I / My father / Mr. Yamashita think(s) I / he will see that movie.)

   It is also to be noted that ~yō to omou cannot be used as a question.

   (3) ??あの本を読もうと思いますか。
       ??Ano hon o yomō to omoimasu ka.

   (Do you think you will read that book?)

2. The negative version of ~yō to omou is Vinf·nonpast ~mai to omou, as seen in KS(B) and Ex. (c).

3. The verb that precedes yō must be a verb that represents something controllable by human volition. Thus, the following sentences are all ungrammatical, because the verbs are noncontrollable.
(4) a. *車を買えようと思う。
*Kuruma o kaeyō to omou.
(I think I can buy a car.)

Cp. 車を買えると思う。
*Kuruma o kaeru to omou.
(I think I can buy a car.)

b. *お金をもらったら喜ぼうと思う。
*O-kane o morattara yorokobō to omou.
(I think I’ll be happy if I get money.)

Cp. お金をもらったら喜ぶだろうと思う。
O-kane o morattara yorokobu darō to omou.
(I think I will probably rejoice if I receive money.)

c. *雨に降られようと思う。
*Ame ni furareyō to omou.
(I think I will be caught in the rain.)

Cp. 雨に降られると思う。
*Ame ni furareru to omou.
(I think I will be caught in the rain.)

A passive verb can be used with 〜yō to omou, however, if the speaker perceives the passive situation as somehow controllable, as in (5).

(5) たまには先生にほめられようと思う。
*Tama ni wa sensei ni homerareyō to omou.
(Lit. I think I will do my best to be praised by my teacher once in a while.)

(I’m buying three books per month.)

(b) ゴルフが少しずつ上手になって来た。
Gorufu ga suki shitsu zutsu jōzunī natte kita.
(I have become a better golfer bit by bit.)

(c) 私は子供達に本を二冊ずつやった。
Watashi wa kodomotachi ni hon o nisatsu zutsu yatta.
(I gave two books to each of the children.)

(d) どのクラスにも女子学生が六人ずついた。
Dono kurasu ni mo joshigakusei ga rokin zutsu ita.
(There were six girl students in each class.)

Notes

1. The particle zutsu is used only after a quantifier (= an expression of quantity).

2. A sentence without zutsu can express virtually the same fact. Compare KS and Ex. (a) with (1a) and (1b), respectively.

   (1) a. 私は漢字を毎日五つ覚える。
   Watashi wa kanji o mainichi itsutsu oboeru.
   (I memorize five kanji every day.)
b. 毎月三冊本を買ってています。
   Maitsuki **sansatsu hon o katte imasu**.
   (I'm buying three books every month.)

A sentence with **zutsu** focuses on equal distribution of quantity, but a sentence without **zutsu** doesn't.

Appendix 2  Semantic Classification of Verbs and Adjectives

A. Stative verbs:
A stative verb usually does not appear with the auxiliary verb *iru*.

<table>
<thead>
<tr>
<th>ある (of an inanimate thing) exist</th>
<th>いる (of an animate thing) exist</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>aru</em></td>
<td><em>iru</em></td>
</tr>
<tr>
<td>できる (can do)</td>
<td>いる (need)</td>
</tr>
<tr>
<td><em>deki</em> <em>iru</em></td>
<td></td>
</tr>
</tbody>
</table>

(All the potential verbs are stative. (e.g., 飲める (can drink))

B. Continual verbs:
A continual verb with the auxiliary verb *iru* expresses the progressive aspect.

<table>
<thead>
<tr>
<th>食べる (eat);</th>
<th>飲む (drink);</th>
<th>歩く (walk);</th>
<th>走る (run);</th>
<th>踊る (dance);</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>taberu</em></td>
<td><em>nomu</em></td>
<td><em>aruku</em></td>
<td><em>hashiru</em></td>
<td><em>odoru</em></td>
</tr>
<tr>
<td>歌う (sing);</td>
<td>泳ぐ (swim);</td>
<td>待つ (wait);</td>
<td>話す (talk);</td>
<td>聞く (hear);</td>
</tr>
<tr>
<td><em>uta</em></td>
<td><em>yogu</em></td>
<td><em>matsu</em></td>
<td><em>hanasu</em></td>
<td><em>kiku</em></td>
</tr>
<tr>
<td>読む (read);</td>
<td>書く (write);</td>
<td>見る (see);</td>
<td>泣く (cry);</td>
<td>教える (teach);</td>
</tr>
<tr>
<td><em>yomu</em></td>
<td><em>kaku</em></td>
<td><em>miru</em></td>
<td><em>naku</em></td>
<td><em>oshieru</em></td>
</tr>
<tr>

</tr>
<tr>
<td><em>benkyō</em> <em>sureru</em></td>
<td><em>tobu</em></td>
<td><em>kangaeru</em></td>
<td><em>au</em></td>
<td><em>sumu</em></td>
</tr>
</tbody>
</table>

C. Stative-continual verbs:
A stative-continual verb can be either a stative verb or a continual verb.

<table>
<thead>
<tr>
<th>見える (be visible);</th>
<th>聞こえる (be audible);</th>
<th>分かる (understand);</th>
<th>違う (differ);</th>
<th>似合う (become; be suitable)</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>mieru</em></td>
<td><em>kikoeru</em></td>
<td><em>wakaru</em></td>
<td><em>chigau</em></td>
<td></td>
</tr>
</tbody>
</table>

D. Punctual verbs:
A punctual verb with the auxiliary verb *iru* expresses a repeated action or a state after an action was taken or something took place.

<table>
<thead>
<tr>
<th>知る (get to know);</th>
<th>死ぬ (die);</th>
<th>忘れる (forget);</th>
<th>貸す (lend);</th>
<th>借りる (borrow);</th>
<th>跳ぶ (jump);</th>
<th>打つ (hit);</th>
<th>出る (get out);</th>
<th>入る (enter);</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>shiru</em></td>
<td><em>shinu</em></td>
<td><em>wasureru</em></td>
<td><em>kasu</em></td>
<td><em>kariru</em></td>
<td><em>tobu</em></td>
<td><em>utsu</em></td>
<td><em>deru</em></td>
<td><em>hairu</em></td>
</tr>
</tbody>
</table>
E. Continual-punctual verbs:

A continual-punctual verb can be either a continual verb or a punctual verb.

着る (wear); 取る (take); 変わる (change (v.i.)); 注文する (order)
kiru toru kawaru chūmonsuru

F. Non-volitional verbs:

A non-volitional verb usually does not take the volitional form, the imperative form and the potential form. Non-volitional verbs are classified into emotive verbs and non-emotive verbs.

F-1. Non-volitional-emotive verbs:

Most of the non-volitional-emotive verbs can take an NP-o. (⇒o4)

よろこぶ (be pleased); 悲しむ (be sad); 愤る (be angry); きらう
yorokobu kanashimu okoru kirau
(hate); 好む (like); 困る (get into trouble); 苦しむ (suffer)
konomu komaru kurushimu
(Komaru and kurushimu do not take an NP-o. They take either an NP-de or an NP-ni.)

F-2. Non-volitional-non-emotive verbs:

できる (can do); いる (need); 知る (get to know); 見える (be visible);
dekiru iru shiru mieru
聞く (be audible); 分かる (understand); 違う (differ); 似合う
kikoeru wakaru chigau niau
(become, be suitable); 疲れる (get tired)  
\textit{tsukareru}

**G. Reciprocal verbs:**
A reciprocal verb takes the particle \textit{to} for the direct object.

<table>
<thead>
<tr>
<th>Reciprocal verb</th>

</tr>
</thead>
<tbody>
<tr>
<td>結婚する (marry); けんかする (fight); 会う (meet); 合う (match); ぶつかる (bump into); 相談する (consult)</td>
<td>\textit{kekkonsuru} \textit{kenkasuru} \textit{au} \textit{au} \textit{butsukaru} \textit{sōdansuru}</td>
</tr>
</tbody>
</table>

**H. Movement verbs:**
A movement verb can take \textit{Vmasu ni} to express a purpose.

<table>
<thead>
<tr>
<th>Movement verb</th>

### Notes

1. The "—u → —asu" pattern is not included in this list because this pattern applies to all intransitive Gr. 1 verbs, changing them into the causative form (i.e., the transitive form).

2. *Suru* 'do' vs. *naru* 'become' and *korosu* 'kill' vs. *shinu* 'die' make pairs of transitive and intransitive verbs, though the two in each pair have no phonological element in common.

2. The so-series can be used to direct attention to a referent removed from both the speaker and the hearer if information about the referent has been given to the hearer, as in:

(2)  A: きのう車で湖に行って来たよ。
  Kinō kuruma de mizuumi ni itte kita yo.
  (Yesterday I went to a lake by car.)

  B: その湖には魚がいたかい?
  Sono mizuumi ni wa sakana ga ita kai?
  (Were there fish in the lake?)

3. The speaker feels most empathetic with an item referred to by the ko-series, because the item is closest to him. On the other hand, the speaker feels least empathetic with an item referred to by the a-series, because the item is removed from him and his hearer.

Notes

1. The native Japanese numeral system is used from 1 to 10 only. For numbers greater than 10 the Sino-Japanese numeral system is used. The parenthesized -tsu is a counter for things.
2. 1,000 is usually read as sen, not as is-sen.
3. Telephone numbers are given in Sino-Japanese numerals. For example,

389-2681 is read as “san-hachi-kyū-no, ni-roku-hachi-ichi”. However, 4 and 7 are often read as yon and nana, respectively.

4. The year according to the Western calendar is given in Sino-Japanese numerals followed by nen, the counter for year. Thus, 1984 is read as “sen-kyūhyaku-hachijū-yo(n)nen”.

1. Depending on the initial sound of a counter, the pronunciation of the number and / or the counter changes. Counters are classified according to the phonetic modifications they undergo. Type A counters are straightforward cases of Sino-Japanese Number + Counter, with no phonetic modifications. The following is a chart of phonetic modifications for Type B through Type F. If there is no entry for a given number it indicates that there is no phonetic modification for that particular number. As for the remaining irregular types, you have to memorize them piecemeal.

# Appendix 7 Compound Words

A compound is a word that consists of two or more independent words with a meaning which cannot be predicted from the combination of the constituent elements. For example, *hana o miru* means ‘to see flowers’, but the compound version *hana-mi* means specifically ‘the viewing of cherry blossoms’.

The following is a list of basic nominal, verbal and adjectival compounds and their formation.

**Notes**

In compound words, the initial voiceless consonant (i.e., plosives such as \(k-, t-\); fricatives such as \(s-, h-, f-\); affricates such as \(ts-, ch-\)) of the second element of the compound tends to become voiced as shown below:

**E.g.**
- hito 'man' + koroshi 'kill' → hitogoroshi 'manslaughter'
- ami 'net' + to 'door' → amido 'screen door'
- ne 'sleep' + sake 'rice wine' → nezake 'nightcap'
- naga 'long' + hanashi 'talk' → nagabanashi 'long talk'
- ki 'tree' + fune 'boat' → kibune 'wooden vessel'
- kokoro 'heart' + tsuyoi 'strong' → kokorozuyoi 'feel secure'
- hana 'nose' + chi 'blood' → hanaji 'nosebleed'

Voicing, however, does not normally take place if one of the following conditions is met.

1. The second element is a borrowed word whose 'foreignness' is still strongly felt.
   **E.g.**
   - kyōiku 'education' + terebi 'television'  
     → kyōiku \[\text{terebi} \quad \text{*derebi}\] 'educational television'
   - kateiyō 'home use' + konpyūtā 'computer'  
     → kateiyō \[\text{konpyūtā} \quad \text{*gonpyūtā}\] 'home computer'

   But if a borrowed word is free from 'foreignness', then voicing tends to take place.
   **E.g.**
   - ame 'rain' + kappa 'Portuguese capa' → amagappa 'raincoat'
   - iroha 'Japanese alphabet' + karuta 'Portuguese carta' → irohagaruta 'Japanese alphabet cards'

2. The consonant of the second syllable of the second element is voiced.
   **E.g.**
   - hi 'sun' + kage 'shade'  
     → \[\text{hikage} \quad \text{*higage}\]
   - ushiro 'back' + sugata 'appearance'  
     → \[\text{ushirosugata} \quad \text{*ushirosugata}\] 'appearance from the back'
Appendix 8 Improving Reading Skill by Identifying an 'Extended Sentential Unit'

In Japanese, the most important principle of word order is that the modifier precedes what is being modified. (⇒ Characteristics of Japanese Grammar, 1. Word Order) The typical modifier modified word order in Japanese can be summarized as follows:

<table>
<thead>
<tr>
<th>MODIFIER + MODIFIED</th>
<th>MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjective + Noun</td>
<td></td>
</tr>
<tr>
<td>おもしろい omoshiroi (interesting)</td>
<td>人 hito (person)</td>
</tr>
<tr>

</tr>
<tr>
<td>とても totemo (very)</td>
<td>大きい ōkii (big)</td>
</tr>
<tr>
<td>Adverb + Verb</td>
<td></td>
</tr>
<tr>
<td>速く hayaku (quickly)</td>
<td>歩く aruku (walk)</td>
</tr>
<tr>
<td>Noun + Particle</td>
<td></td>
</tr>
<tr>
<td>子供 kodomo (child)</td>
<td>が ga (subject)</td>
</tr>
<tr>
<td>先生 sensei (teacher)</td>
<td>に ni (to)</td>
</tr>
<tr>
<td>Sentence + Conjunction</td>
<td></td>
</tr>
<tr>
<td>本を買う hon o kau ((I) buy books)</td>
<td>から kara (because)</td>
</tr>
<tr>
<td>雨が降った ame ga futta (it rained)</td>
<td>けれども keredomo (although)</td>
</tr>
</tbody>
</table>
Let's call the cohesive unit of modifier + modified an Extended Sentential Unit (=ESU). If all ESUs started at the beginning of the sentence, students would have no trouble identifying them. But in reality an ESU often comes somewhere between the beginning and the end of a sentence. Moreover, in written Japanese an ESU is quite frequently embedded within another ESU. The ability to identify each ESU in a complex sentence is a must for reading comprehension.

The following examples will serve to illustrate this point.

1. a. 私は辞書をまだ使っている。
   Watashi wa jishō o mada tsukatte iru.
   (I'm still using the dictionary.)

   b. 私は小さい辞書をまだ使っている。
   Watashi wa chīsana jishō o mada tsukatte iru.
   (I'm still using the small dictionary.)

   c. 私は父が買ってきた小さい辞書をまだ使っている。
   Watashi wa chichi ga katte kureta chīsana jishō o mada tsukatte iru.
   (I'm still using the small dictionary which my father bought for me.)

   d. 私は中学に入った時に父が買ってきた小さい辞書をまだ使っている。
   Watashi wa chūgaku ni haitta toki ni chichi ga katte kureta chīsana jishō o mada tsukatte iru.
   (I'm still using the dictionary which my father bought for me when I entered junior high school.)
If we choose jisho ‘dictionary’ as the modified word, where does its modifier start in each sentence of example (1)? In other words, exactly what part of each sentence is the ESU? Since (1a) obviously doesn’t have any modifier, there is no ESU. How about in (1b)? The modifier is a simple adjective chisana ‘small’. In (1c) the modifier is the entire relative clause which starts with chichi ga ‘father (subject)’. Notice that the sentence-initial noun phrase watashi wa ‘I (subject / topic)’ is not a part of the ESU in question, because watashi wa is the subject of the main verb tsukatte iru ‘am using’. Sentence (1d) is the most complex sentence of the four. Where does the ESU for jisho start in (1d)? It starts from chūgaku ‘junior high school’, because the clause chūgaku ni haitta toki ni ‘when (I) entered junior high school’ modifies the verb katte kureta ‘(he) bought for me’.

A quick and accurate identification of an ESU is a prerequisite for reading comprehension. The following is a list of guidelines which will help students to identify ESUs in written Japanese.

**Guideline I**
A modified element (= m.e.) is typically a noun, a head noun of a relative clause, a nominalizer no or koto, a coordinate or a subordinate conjunction (such as ga ‘but’, kara ‘because’, keredomo ‘although’), a modal (such as hazu da ‘it is expected that ~’, no da ‘it is that ~’, yōda ‘it appears that ~’, sóda ‘I hear that ~’), an adjective, a verb or a particle, as shown in the MODIFIER + MODIFIED chart.

**Guideline II**
If an element preceding an m.e. modifies some element that comes after the m.e., that element is outside the ESU.

Thus, if kyō ‘today’ in (2) is judged to modify itta ‘said’, an element that comes after the m.e. to ‘quote marker’, kyō is outside the ESU. But, if the same adverb is judged to modify nai ‘there isn’t’, then the adverb is a part of the ESU.

(2) ジョンは今日授業がないと言った。
Jon wa kyō jugyō ga nai to itta.
(Today John said that there wasn’t any class. / John said that there isn’t class today.)

**Guideline III**
A sentence-initial topic phrase Noun Phrase + wa(...) is very often considered outside an ESU, especially when the topic phrase is the main subject of the sentence. The same is true of a Noun Phrase + mo(...).
Some more examples follow:

(3) a. 私はも子供が病気だったから行けなかった。
    Watashi wa / mo kodomo ga byōki datta kara ikenakatta.
    (I couldn’t go there (either), because my child was ill.)

b. 私はも鈴木さんが行かなければ行かない。
    Watashi wa / mo Suzuki-san ga ikanakereba ikanai.
    (I won’t go there (either) if Mr. Suzuki won’t go there.)

c. 山本はも雷子が結婚したことを知らない。
    Yamamoto wa / mo Yukiko ga kekkonshita koto o shiranai.
    (Yamamoto doesn’t know (either) that Yukiko got married.)

d. きのうはここにあった本が今日はない。
    Kinō wa koko ni atta hon ga kyō wa nai.
    (The book which was here yesterday is not here today.)

In (3a) through (3c), wa and mo phrases are outside the ESU of the boxed m.e.’s, but in (3d) wa is inside the ESU of the m.e. hon ‘book’, because wa is used in this sentence as a contrast marker, not as a topic marker.

Guideline IV

When two sentences are combined by the conjunction ga(,) ‘but’, the first sentence is very often outside the ESU of the m.e. contained in the second sentence.

For example, in (4) the first sentence is outside the ESU of the respective m.e.’s.

(4) a. 宿題がたくさんあったが、疲れていたのですぐに寝てしまった。
    Shukudai ga takusan atta ga, tsukarete ita node sugu nete shi-matta.
    (I had a lot of homework to do but I went to sleep right away because I was tired.)

b. 「将軍」を読むつもりだったが、テレビで見たから読むのをやめた。
    "Shōgun" o yomu tsumori datta ga, terebi de mita kara yomu no o yameta.
    (I intended to read Shogun, but I quit because I had seen it on TV.)

When two sentences are combined by the te-form of a verb / adjective, the first sentence is either inside or outside the ESU depending on the context, as illustrated by (5).

(5) a. 洋子は頭が痛くて仕方がないと言った。
    Yōko wa atama ga itakute shikata ga nai to itta.
    (Yoko said that she had a terrible headache.)
b. 洋子は京都に行って、前から買おうと思っていた着物を買った。
   Yōko wa Kyōto ni itte, mae kara kaō to omotte ita kimono o katta.
   (Yoko went to Kyoto, and bought the kimono which she had been thinking of buying for some time.)

In (5a) the ESU includes the first sentence, whereas in (5b) it doesn’t.

Guideline V
When an m.e. is a modal, its ESU normally extends to the beginning of the sentence, including wa / mo phrase.

(6) a. リサは来年日本へ行くらしい。
   Risa wa rainen Nihon e iku rashii.
   (It seems that Lisa is going to Japan next year.)

b. ボブには日本語は難しすぎるようだ。
   Bobu ni wa nihongo wa muzukashisugiru yōda.
   (It appears that Japanese is too difficult for Bob.)

c. あんな所には行きたくないんだ。
   Anna tokoro ni wa ikitakunai nda.
   (Lit. It is that I don’t want to go to such a place.)

d. ナンシーは大学をやめるそうだ。
   Nanshi wa daigaku o yameru sōda.
   (I heard that Nancy is going to quit college.)

Guideline VI
When an m.e. is the quote marker to, Guideline III is overridden, because a quote is supposed to follow the original source as closely as possible; if wa is in the original sentence, that wa has to be quoted. Examples follow:

(7) a. 人間は考えるあしたとパスカルが言った。
   Ningen wa kangaeru ashi da to Pasukaru ga itta.
   (Pascal said that a human is a thinking reed.)

b. 本にペットは老人にいいと書いてあった。
   Hon ni petto wa rōjin ni ii to kaite atta.
   (It was written in a book that pets are good for elderly people.)

Guideline VII
Some m.e.’s allow their ESU to extend beyond the sentence boundary. This is especially true with sentence-initial conjunctions such as shikashi ‘but’, shitagatte ‘therefore’, sunawachi ‘namely’, tadashi ‘but’, tokoro ga ‘but’ and da kara ‘so’ and the modal no da ‘it is that ~’.
Appendixes 617

(8) a. 幸子は大学を出た。申し仕事をなかった。
Sachiko wa daigaku o deta. [Shikashi] shigoto wa nakatta.
(Sachiko graduated from college. But she didn't get a job.)

b. 急に胸が苦しくなったんです。だから病院に行きました。
Kyūni mune ga kurushiku natta n desu. [Da kara] byōin ni ikimashita.
(Suddenly I had a pain in my chest, so I went to the hospital.)

c. あしたは朝五時に起きます。五時半の汽車に乗るんです。
Ashita wa asa goji ni okimasu. Gojihan no kisha ni noru
[ndesu].
(I'll get up at five o'clock tomorrow morning. It's because I'm going
to catch the 5:30 train.)

So far, seven basic guidelines which can be used to identify ESU have been
presented. The student should read Japanese carefully, searching for ESUs,
especially for the following four ESUs that create enormous difficulties.

(i) Sentence + Conjunction
(ii) Relative Clause + Noun
(iii) Sentence + Nominalizer (no / koto)
(iv) Sentence + Modal

For your practice, a short, simple passage containing 10 boxed m.e.'s is pro-
vided below. Underline the ESUs for each m.e. The answers are given
below the passage.

(Last week I went to Kyoto with Hanako in a car I borrowed from my friend.
I was a little nervous because it was the first time that I had driven on the
highway. But after having driven about an hour I became used to the speed, and every now and then I almost fell asleep. Before we reached Kyoto, I stopped at service areas about five times and drank coffee. Because I drove while talking a lot with Hanako sitting next to me, I didn’t feel that Kyoto was that far. If the trip is this pleasant, I would like to make it again.)

Answers: The words given below indicate the first words of the ESUs.
